# PREFACE.

**F** E W works of literature are held in greater effimation, than thofe which treat in a methodical and elementary way of the principles of fcience. But the human mind in every enlightened age is progreffive; and the beft elementary treatifes after a certain time are reduced in their value by the operation of fubfequent difcoveries. Hence it has always been defired by candid enquirers, that preceding works of this kind fhould from time to time be fuperfeded, and that other productions including the larger views that have fince offered themfelves, fhould be fubftituted in their place.

It would be ftrange if fomething of this kind were not defirable in politics, after the great change that has been produced in men's minds upon this fubject, and the light that has been 1 thrown vi

# P R E F A C E.

thrown upon it by the recent difcuffions of America and France. A fenfe of the value of fuch a work, if properly executed, was the motive which gave birth to thefe volumes. Of their execution the reader must judge.

Authors who have formed the defign of fuperfeding the works of their predeceffors, will be found, if they were in any degree equal to the defign, not merely to have collected the fcattered information that had been produced upon the fubject, but to have increafed the fcience with the fruit of their own meditations. In the following work principles will occafionally be found, which it will not be juft to reject without examination, merely becaufe they are new. It was impoffible perfeveringly to reflect upon fo prolific a fcience, and a fcience which may be faid to be yet in its infancy, without being led into ways of thinking that were in fome degree uncommon.

# Another

# P'REFACE. vii

Another argument in favour of the utility of fuch a work was frequently in the author's mind, and therefore ought to be mentioned. He conceived politics to be the proper vehicle of a liberal morality. That description of ethics deserves to be held in flight estimation, which seeks only to regulate our conduct in articles of particular and perfonal concern, inftead of exciting our attention to the general good of the fpecies. It appeared fufficiently practicable to make of fuch a treatife, exclusively of its direct political use, and advantageous vehicle of moral improvement. He was accordingly defirous of producing a work, from the perufal of which no man should rife without being strengthened in habits of fincerity, fortitude and justice.

Having flated the confiderations in which the work originated, it is proper to mention a few circumflances of the outline of its hiftory. The fentiments it contains are by no means the fuggeflions of a fudden effervefcence of fancy. Political enu viii

quiry had long held a foremost place in the writer's attention. It is now twelve years fince he became fatisfied, that monarchy was a species of government unavoidably corrupt. He owed this conviction to the political writings of Swift and to a perusal of the Latin historians. Nearly at the fame time he derived great additional inftruction from reading the most confiderable French writers. upon the nature of man in the following order, Système de la Nature, Rouffeau, and Helvetius. Long before he thought of the prefent work, he had familiarifed to his mind the arguments it contains on justice, gratitude, rights of man, promises, oaths and the omnipotence of truth. Political complexity is one of the errors that take ftrongeft hold on the underftanding; and it was only by ideas fuggested by the French revolution, that he was reconciled to the defirableness of a government of the fimpleft conftruction. To the fame event he owes the determination of mind which gave existence to this work.

Such

# PREFACE.

Such was the preparation which encouraged him to undertake the prefent treatife. The direct execution may be difmiffed in a few words. It was projected in the month of May 1791: the compolition was begun in the following September, and has therefore occupied a fpace of fixteen months. This period was devoted to the purpofe with unremitted ardour. It were to be wilhed it had been longer; but it feemed as if no contemptible part of the utility of the work depended upon its early appearance.

The printing of the following treatife, as well as the composition, was influenced by the fame principle, a defire to reconcile a certain degree of difpatch with the neceffary deliberation. The printing was for that reason commenced, long before the composition was finished. Some difadvantages have arisen from this circumstance. The ideas of the author became more perspicuous and digested, as his enquiries advanced. The longer he confidered the subject, the more accu-

b

rately

ix

PREFACE.

x

rately he feemed to understand it. This circumstance has led him into a few contradictions. The principal of these confists in an occasional inaccuracy of language, particularly in the first book, refpecting the word government. He did not enter upon the work, without being aware that government by its very nature counteracts the improvement of individual mind; but he underftood the full meaning of this proposition more completely as he proceeded, and faw more diffinctly into the nature of the remedy. This, and a few other defects, under a different mode of preparation would have been avoided. The candid reader will make a fuitable allowance. The author judges upon a review, that these defects are fuch as not materially to injure the object of the work, and that more has been gained than loft by the conduct he has purfued.

The period in which the work makes its appearance is fingular. The people of England have affiduoufly been excited to declare their loy-

P R E F A C E.

alty, and to mark every man as obnoxious who is not ready to fign the Shibboleth of the conftitu-Money is raifed by voluntary fubscription tion. to defray the expence of profecuting men who shall dare to promulgate heretical opinions, and thus to opprefs them at once with the enmity of government and of individuals. This was an accident wholly unforefeen when the work was undertaken; and it will fcarcely be fuppofed that fuch an accident could produce any alteration in the . writer's defigns. Every man, if we may believe the voice of rumour, is to be profecuted who fhall appeal to the people by the publication of any unconflitutional paper or pamphlet; and it is added, that men are to be profecuted for any unguarded words that may be dropped in the warmth of conversation and debate. It is now to be tried whether, in addition to these alarming encroachments upon our liberty, a book is to fall under the arm of the civil power, which, befide the advantage of having for one of its express objects the diffuading from all tumult and violence,

is

xi

# PREFACE.

is by its very nature an appeal to men of fludy and reflexion. It is to be tried whether a project is formed for fuppreffing the activity of mind, and putting an end to the difquifitions of fcience. Refpecting the event in a perfonal view the author has formed his refolution. Whatever conduct his countrymen may purfue, they will not be able to fhake his tranquillity. The duty he is moft bound to difcharge is the affifting the progrefs of truth; and if he fuffer in any refpect for fuch a proceeding, there is certainly no viciffitude that can befal him, that can ever bring along with it a more fatisfactory confolation.

But, exclusively of this precarious and unimportant confideration, it is the fortune of the prefent work to appear before a public that is panic flruck, and impressed with the most dreadful apprehensions of fuch doctrines as are here delivered. All the prejudices of the human mind are in arms against it. This circumstance may appear to be of greater importance than the other. But

But it is the property of truth to be fearlefs, and to prove victorious over every adverfary. It requires no great degree of fortitude, to look with indifference upon the falfe fire of the moment, and to forefee the calm period of reafon which will fucceed.

#### OF THE

# FIRST BOOK.

# QF THE IMPORTANCE OF POLITICAL INSTITUTIONS.

## CHAP. L

#### INTRODUCTION.

THE subject proposed.—System of indifference—of passive obedience—of liberty.—System of liberty extended. Page 1

# CHAP. II.

#### HISTORY OF POLITICAL SOCIETY.

Frequency of war—among the ancients—among the moderns—the French—the English.—Causes of war.—Penal laws.—Despotism.—Deduction.—Enumeration of arguments. 5

b

# CHAP. III.

# THE MORAL CHARACTERS OF MEN ORIGINATE IN THEIR PERCEPTIONS.

No innate principles.—Objections to this affertion—from the early actions of infants—from the defire of felf-prefervation—from felflove—from pity—from the vices of children—tyranny—fullennefs. —Conclusion. Page 12

# CHAP. IV.

THREE PRINCIPAL CAUSES OF MORAL IMPROVE. MENT CONSIDERED.

# I. LITERATURE.

Benefits of literature.—Examples.—Essential properties of literature. —Its defects.

# U. EDUCATION.

Benefits of education.-Causes of its imbecility.

III. POLITICAL JUSTICE. Benefits of political institution.—Universality of its influence—proved by the mistakes of society.—Origin of evil. 19

#### CHAP. V.

INFLUENCE OF POLITICAL INSTITUTIONS EXEMPLIFIED.

Robbery and fraud, two great vices in fociety—originate, 1. in extreme poverty—2. in the oftentation of the rich—3. in their tyranny

tyranny—rendered permanent—1. by legislation—2. by the administration of law—3. by the inequality of conditions. Page 33

#### CHAP. VI.

# HUMAN INVENTIONS CAPABLE OF PERPETUAL IM-PROVEMENT.

Perfectibility of man—inftanced, first, in language. — Its beginnings. — Abstraction.—Complexity of language.—Second instance: alphabetical writing.—Hieroglyphics at first universal.—Progressive deviations.—Application. 43

#### CHAP. VII.

# OF THE OBJECTION TO THESE PRINCIPLES FROM THE INFLUENCE OF CLIMATE.

#### PART I.

#### OF MORAL AND PHYSICAL CAUSES.

The queftion flated.—Provinces of fenfation and reflection.—Moral caufes frequently miftaken for phyfical.—Superiority of the former evident from the varieties of buman character.—Operation of phyfical caufes rare.—Fertility of reflection.—Phyfical caufes in the first instance superior, asterwards moral.—Objection from the effect of breed in animals.—Conclusion. 51

b 2

PART

#### PART II.

## OF NATIONAL CHARACTERS.

Character of the priesthood.—All nations capable of liberty.—The affertion illustrated.—Experience favours these reasonings.—Means of introducing liberty. Page 60

# CHAP. VIII.

OF THE OBJECTION TO THESE PRINCIPLES FROM THE INFLUENCE OF LUXURY.

The objection flated.—Source of this objection.—Refuted from mutability—from mortality—from the nature of truth.—The probability of perfeverance confidered. 71

# BOOK II.

# PRINCIPLES OF SOCIETY.

# CHAP. I.

#### INTRODUCTION.

Nature of the enquiry.—Mode of pursuing it.—Distinction between fociety and government 77

#### CHAP. II.

#### OF JUSTICE.

Connection of politics and morals.—Extent and meaning of justice.— Subject of justice: mankind.—Its distribution measured by the capacity of its subject—by bis usefulness.—Family affection considered.—Gratitude confidered.—Objections: from ignorance from utility.—An exception stated.—Degrees of justice.—Application.—Idca of political justice. Page 80

APPENDIX, No. I.

#### OF SUICIDE.

Motives of fuicide: 1. escape from pain — 2. benevolence. — Martyrdom considered. 92

APPENDIX, No. II.

OF DUELLING.

Motives of duelling: 1. revenge — 2. reputation for courage.— Fallacy of this motive.—Objection answered.—Illustration. 94

CHAP. III.

# OF DUTY.

A difficulty stated.—Of absolute and practical virtue.—Impropriety of this diffinction.—Universality of what is called practical virtue 8 —instanced

----instanced in robbery---in religious fanaticism.--The quality of an action distinct from the disposition with which it is performed.---Farther difficulty.---Meaning of the term, duty.--Application.---Inferences. Page 97

# CHAP. IV.

# OF THE EQUALITY OF MANKIND.

Physical equality.—Objection.—Answers.—Moral equality.—How limited.—Province of political justice. 104

#### CHAP. V.

# RIGHTS OF MAN.

The question stated.—Foundation of society.—Opposite rights impossible.—Conclusion from these premises.—Discretion confidered.— Rights of kings.—Immoral consequences of the doctrine of rights.— Rights of communities.—Objections: 1. the right of mutual aid. —Explanation.—Origin of the term, right.—2. rights of private judgment and of the press.—Explanation.—Reasons of this limitation upon the functions of the community: 1. the inutility of attempting restraint—2. its pernicious tendency.—Conclusion.

#### CHAP. VI.

# OF THE EXERCISE OF PRIVATE JUDGMENT.

Foundation of virtue.—Human actions regulated: 1. by the nature of things—2. by positive institution.—Tendency of the latter: 1. 5 to

109

to excite virtue.—Its equivocal character in this respect.—2. to inform the judgment.—Its inaptitude for that purpose.—Province of conscience confidered.—Tendency of an interference with that province.—Recapitulation.—Arguments in favour of positive institution: 1. the necessity of repelling private injustice.—Objections: the uncertainty of evidence—the diversity of motives the unsuitableness of the means of correction—either to impress new sentiments—or to strengthen old ones.—Punishment for the sake of example considered.—Urgency of the case.—2. rebellion —3. war.—Objections.—Reply. Page 120

# BOOK III.

## PRINCIPLES OF GOVERNMENT.

# CHAP. I.

# SYSTEMS OF POLITICAL WRITEKS.

The question stated.—First hypothes: government founded in superior strength.—Second hypothes: government jure divino.— Third hypothes: the social contract.—The first hypothese examined.—The second.—Criterion of divine right: 1. patriarchal descent—2. justice. 139

#### CHAP. II.

OF THE SOCIAL CONTRACT.

Queries proposed.—Who are the contracting parties?—What is the form of engagement?—Over how long a period does the contract extend?—To how great a variety of propositions?—Can it extend to laws hereaster to be made?—Address of adhesion considered. —Power of a majority. Page 143

# CHAP. III.

#### OF PROMISES.

The validity of promifes examined.—Shown to be inconfiftent with justice—to be foreign to the general good.—Of the expectation excited.—The fulfilling expectation does not imply the validity of a promife.—Conclusion.

#### CHAP. IV.

# OF POLITICAL AUTHORITY.

Common deliberation the true foundation of government—proved from the equal claims of mankind—from the nature of our faculties from the object of government—from the effects of common deliberation.—Delegation vindicated.—Difference between the doEtrine here maintained and that of a focial contract apparent—from the merely prospective nature of the former—from the nullity of promiscs—from the fallibility of deliberation.—Conclusion. 157 C H A P.

# CHAP. V.

# OF LEGISLATION.

Society can declare and interpret, but cannot enact.—Its authority only executive. Page 166

# CHAP. VI.

#### OF OBEDIENCE.

Obedience not the correlative of authority.—No man bound to yield obedience to another.—Case of submission confidered.—Foundation of obedience.—Usefulness of social communication.—Case of confidence confidered.—Its limitations.—Mischief of unlimited confidence.—Subjection explained.

# APPENDIX.

Moral principles frequently elucidated by incidental reflection-by incidental paffages in various authors.-Example. 176

CHAP. VII.

OF FORMS OF GOVERNMENT.

Argument in favour of a variety of forms—compared with the argument in favour of a variety of religious creeds.—That there is one best form of government proved—from the unity of truth from the nature of man.—Objection from human weakness and prejudice.—Danger in establishing an impersect code.—Manners c

of nations produced by their forms of government.—Gradual improvement necessary.—Simplicity chiefly to be defired.—Publication of truth the grand instrument—by individuals, not by government—the truth entire, and not by parcels.—Sort of progress to be defired. Page 179

# BOOK IV.

MISCELLANEOUS PRINCIPLES.

1 · · · ·

# CHAP. I.

# OF RESISTANCE.

Every individual the judge of his own refisiance.—Objection.— Answered from the nature of government—from the modes of refistance.—1. Force rarely to be employed—either where there is small prospect of success—or where the prospect is great.—History of Charles the first estimated.—2. Reasoning the legitimate mode. 191

#### CHAP.

## OF REVOLUTIONS.

SECTION I.

DUTIES OF A CITIZEN.

Obligation to Support the confliction of our country confidered must arife either from the reason of the case, or from a personal and local confideration—The first examined.—The second.

Page 198

SECTION II,

MODE OF EFFECTING REVOLUTIONS.

Persuasion the proper instrument—not violence—nor resentment.— Lateness of event desirable. 202

SECTION III.

OF POLITICAL ASSOCIATIONS.

Meaning of the term.—Alfociations objected to—1. from the fort of perfons with whom a just revolution should originate—2. from the danger of tumult.—Objects of alfociation.—In what cases admissible.—Argued for from the necessity to give weight to opinion —from their tendency to ascertain opinion.—Unnecessity for these purposes.—General inutility.—Concessions.—Importance of social communication.—Propriety of teaching resistance confidered. 205

C 2

#### SECTION

# GONTENDS

## SECTION IV.

OF THE SPECIES OF REFORM TO BE DESIRED.

Ought it to be partial or entire?—Truth may not be partially taught.—Partial reformation confidered.—Objection.—Anfwer. —Partial reform indiferfible.—Nature of a just revolution bow distant? Page 213

С Н А Р. ТШ.

# OF TYRANNICIDE.

Diversity of opinions on this subject.—Argument in its vindication. The destruction of a tyrant not a case of exception.—Consequences of tyrannicide.—Assafination described.—Importance of funcerity. 226

# CHAP. IV.

# OF THE CULTIVATION OF TRUTH.

#### SECTION I.,

OF ABSTRACT OR GENERAL TRUTH. Its importance as conducing—to our intellectual improvement—to our moral improvement.—Virtue the beft fource of bappinefs.—Proved by comparifon—by its manner of adapting itself to all fituations by its undecaying excellence—cannot be effectually propagated but by a caltivated mind.—Importance of general truth to our political improvement. 231

#### SECTION II.

## OF SINCERITY.

Nature of this virtue.—Its effecis—upon our own actions—upon our neighbours.—Its tendency to produce fortitude.—Effects of infuncerity.—Character which funcerity would acquire to him who practifed it.—Objections.—The fear of giving unnecessary pain.— Answer.—The defire of preserving my life.—This objection proves too much.—Answer.—Secrecy confidered.—The secrets of others. —State secrets.—Secrets of philanthropy. Page 238

#### APPENDIX, No. I.

# OF THE CONNEXION BETWEEN UNDERSTANDING AND VIRTUE.

Can eminent virtue exift unconnected with talents? — Nature of -virtue. — It is the offspring of understanding . — It generates underflanding. — Illustration from other pursuits — love — ambition applied.

Can eminent talents exift unconnected with virtue?—Argument in the affirmative from analogy—in the negative from the univerfality of moral fpeculation—from the nature of vice as founded in miftake.—The argument balanced.—Importance of a fenfe of justice.—Its connexion with talents.—Illiberality with which men of talents are usually treated. 253

## APPENDIX,

APPENDIX, No. II.

OF THE MODE OF EXCLUDING VISITORS.

Its impropriety argued—from the fituation in which it places, 1. the wifitor—2. the fervant.—Objections :—Pretended neceffity of this practice, 1. to preferve us from intrusion—2. to free us from disagreeable acquaintance.—Characters of the honest and dishonest man in this respect compared. Page 265

# APPENDIX, No. III.

## SUBJECT OF SINCERITY RESUMED.

A cafe proposed.—Arguments in favour of concealment.—Previous question: Is truth in general to be partially communicated?— Customary effects of sincerity—of infincerity—upon him who practifes it—1. the suspension of improvement—2. misanthropy— 3. difingenuity—upon the spectators.—Sincerity delineated.—Its general importance.—Application.—Duty respecting the choice of a residence. 272

#### CHAP. V.

# OF FREE WILL AND NECESSITY.

Importance of the question.—Definition of neceffity.—Why supposed to exist in the operations of the material universe.—The case of the operations of mind is parallel.—Indications of necessity—in bistory —in our judgments of character—in our schemes of policy—in our ideas

ideas of moral discipline.—Objection from the fallibility of our expectations in human conduct.—Answer.—Origin and universality of the sentiment of free will.—The sentiment of necessity also universal.—The truth of this sentiment argued from the nature of volition.—Hypothesis of see will examined.—Self-determination. —Indifference.—The will not a distinct faculty.—Free will difadvantageous to its possifier.—of no service to morality. Page 283.

# CHAP. VI.

# INFERENCES FROM THE DOCTRINE OF NECESSITY.

Idea it fuggefts to us of the universe.—Influence on our moral ideas —attion—virtue—exertion—persuasion—exhortation—ardour complacence and aversion—punishment—repentance—praise and blame — intellectual tranquillity. — Language of necessity recommended. 305;~

# CHAP. VH.

# OF THE MECHANISM OF THE HUMAN MIND.

Nature of mechanism.—Its classes, material and intellectual:— Material system, or of vibrations.—The intellectual system most probable—from the confideration that thought would otherwise be a superfluity—from the established principles of reasoning from effects to causes.—Objections refuted.—Thoughts which produce animal motion may be—1. Involuntary.—All animal motions were first involuntary.—2. Unattended with conscious form

mind cannot have more than one thought at any one time.—Objection to this affertion from the cafe of complex ideas—from various mental operations—as comparifon—apprehension—rapidity of the fuccession of ideas.—Application.—Duration measured by conscious fields.—3. A distinct thought to each motion may be unnecession — apparent from the complexity of sensible impressions. —The mind always thinks.—Conclusion.—The theory applied to the phenomenon of walking—to the circulation of the blood.—Of motion in general.—Of dreams. Page 318

# CHAP. VIII.

# OF THE PRINCIPLE OF VIRTUE.

Hypothefes of benevolence and felf love—fuperiority of the former,— Action'is either voluntary or involuntary.—Nature of the firft of thefe claffes.—Argument that refults from it.—Voluntary action bas a real existence.—Confequence of that existence.—Experimental view of the subject.—Suppositions suggested by the advocates of felf love—that we calculate upon all occasions the advantage to accrue to us.—Falfeness of this supposition.—Supposition of a contrary fort.—We do not calculate what would be the uneafiness to refult from our refraining to act—either in relieving distress—or in adding to the stock of general good.—Uneafines an accidental member of the process.—The suppositions inconsistently blended.— Scheme of felf love recommended from the propensity of mind to abbreviate

Digitized by GOOGLE

abbreviate its process—from the simplicity that obtains in the natures of things.—Hypothesis of self love incompatible with virtue.—Conclusion.—Importance of the question.—Application. Page 341

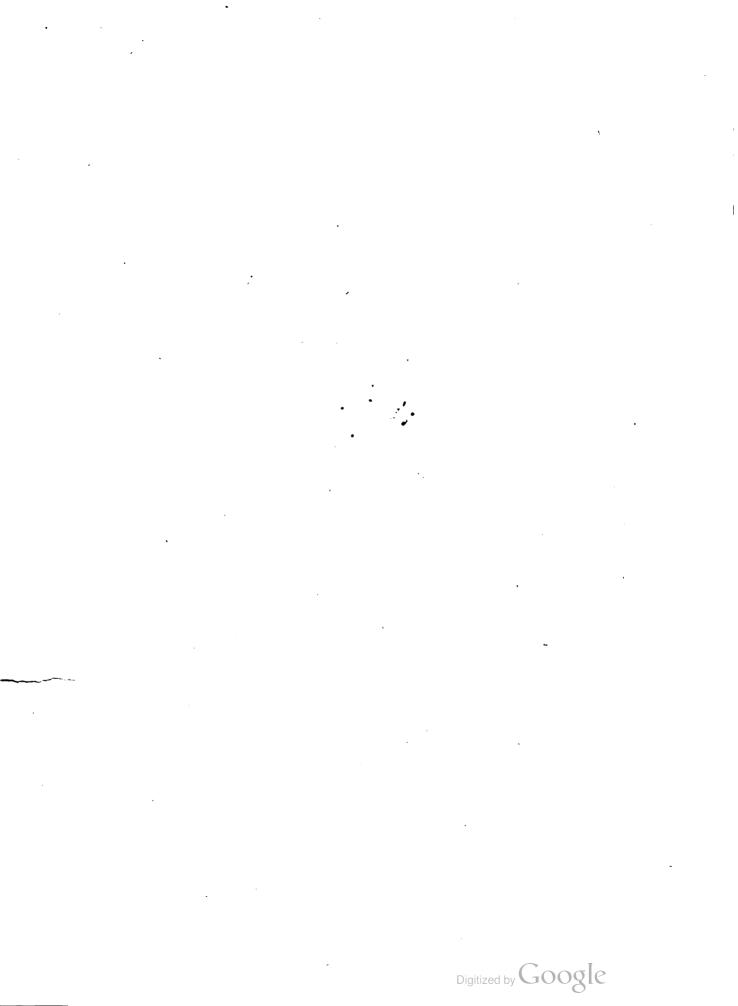

# CHAP. IX.

#### OF THE TENDENCY OF VIRTUE.

It is the read to happine/s-to the effeem and affection of others.-Objection from misconstruction and calumny.—Answer.—Virtue compared with other modes of procuring efteem.-Vice and not virtue is the fubject of obloquy-instanced in the base alloy with which our virtues are mixed—in arrogance and offentation-in the vices in which perfons of moral excellence allow themselves. - The virtuous man only has friends. - Virtue the road to prosperity and success in the world-applied to commercial transactions-to cases that depend upon patronage.-Apparent exceptions where the dependent is employed as the instrument of vice.-Virtue compared with other modes of becoming prosperous. -Source of the difrepute of virtue in this respect.-Concession.-Cafe where convenient vice bids fair for concealment - Chance of detection.-Indolence-apprehensiveness-and depravity the offspring of vice. 362

ONCERNING

#### POLITICAL JUSTICE.

BOOK

OF THE IMPORTANCE OF POLITICAL INSTITUTIONS.

#### C HAP. I.

### INTRODUCTION.

PASSIVE OBEDIENCE-OF LIBERTY.-SYSTEM OF LIBERTY EXTENDED.

THE question which first prefents itself in an enquiry con-BOOK I. cerning political inflitution, relates to the importance of The fubject the topic which is made the fubject of enquiry. All men will proposed. grant that the happiness of the human species is the most defirable object for human fcience to promote; and that intellectual and moral happiness or pleasure is extremely to be preferred

B

to

CHAP. I.

# INTRODUCTION.

BOOK I. to those which are precarious and transitory. The methods which may be proposed for the attainment of this object, are various. If it could be proved that a found political inftitution was of all others the most powerful engine for promoting individual good, or on the other hand that an erroneous and corrupt government was the most formidable adversary to the improvement of the fpecies, it would follow that politics was the first and most important subject of human investigation.

The opinions of mankind in this respect have been divided. Syftem of indifference : By one fet of men it is affirmed, that the different degrees of excellence afcribed to different forms of government are rather imaginary than real; that in the great objects of fuperintendance no government will eminently fail; and that it is neither the duty nor the wifdom of an honeft and industrious individual to bufy himfelf with concerns fo foreign to the fphere of his induftry. A fecond clafs, in adopting the fame principles, have of paffive obedience : given to them a different turn. Believing that all governments are nearly equal in their merit, they have regarded anarchy as the only political mifchief that deferved to excite alarm, and have been the zealous and undiftinguishing adversaries of all innovation. Neither of these classes has of course been inclined to afcribe to the fcience and practice of politics a pre-eminence over every other.

of liberty.

But the advocates of what is termed political liberty have al-2 ways

2

СНАР. І.

# INTRODUCTION.

They have placed this liberty principally ways been numerous. in two articles; the fecurity of our perfons, and the fecurity of our property. They have perceived that these objects could not be effected but by the impartial administration of general laws, and the invefting in the people at large a certain power fufficient to give permanence to this administration. They have pleaded, fome for a lefs and fome for a greater degree of equality among the members of the community; and they have confidered this equality as infringed or endangered by enormous taxation, and the prerogatives and privileges of monarchs and aristocratical bodies.

But, while they have been thus extensive in the object of their. demand, they feem to have agreed with the two former claffes in regarding politics as an object of fubordinate importance, and only in a remote degree connected with moral improvement. They have been prompted in their exertions rather by a quick fenfe of justice and difdain of oppression, than by a confciousnes of the intimate connection of the different parts of the focial fystem, whether as it relates to the intercourse of individuals, or to the maxims and inftitutes of flates and nations \*.

It may however be reafonable to confider whether the fcience Syftem of liof politics be not of fomewhat greater value than any of these ed.

berty extend-

\* These remarks will apply to the English writers upon politics in general, from Sydney and Locke to the author of the Rights of Man. The more comprehensive view has been perspicuously treated by Rousseau and Helvetius.

BOOK I. CHAP. L

4

reasoners have been inclined to suspect. It may fairly be queltioned, whether government be not still more confiderable in its incidental effects, than in those intended to be produced. Vice, for example, depends for its existence upon the existence of temptation. May not a good government ftrongly tend to extirpate, and a bad one to increase the mass of temptation? Again, vice depends for its existence upon the existence of error. May not a good government by taking away all reftraints upon the enquiring mind haften, and a bad one by its patronage of error procrastinates the discovery and establishment of truth? Let us confider the fubject in this point of view. If it can be proved. that the fcience of politics is thus unlimited in its importance, the advocates of liberty will have gained an additional recommendation, and its admirers will be incited with the greater eagerness to the investigation of its principles.

HISTORY OF POLITICAL SOCIETY.

FREQUENCY OF WAR-AMONG THE ANCIENTS-AMONG THE MODERNS-THE FRENCH-THE ENGLISH.-CAUSES OF WAR.-PENAL LAWS.-DESPOTISM.-DEDUCTION. ENUMERATION OF ARGUMENTS.

**THILE** we enquire whether government is capable of BOOK I. improvement, we shall do well to confider its present effects. It is an old observation, that the history of mankind war: is little else than the history of crimes. War has hitherto been confidered as the infeparable ally of political inflitution. earlieft records of time are the annals of conquerors and heroes, a Bacchus, a Sefostris, a Semiramis and a Cyrus. Thefe princes led millions of men under their ftandard, and ravaged innumerable provinces. A small number only of their forces ever returned to their native homes, the reft having perifhed of difeafes, hardships and milery. The evils they inflicted, and the mortality introduced in the countries against which their expeditions were directed, were certainly not lefs fevere than those which their countrymen fuffered. No fooner does hiftory become more precife, than we are prefented with the four great monarchies, that is, with four fuccefsful projects, by means of bloodshed,

CHAP. II. Frequency of .

The among the ancients :

BOOK I. Bloodshed, violence and murder, of enflaving mankind. The CHAP. II. sexpeditions of Cambyfes against Egypt, of Darius against the Scythians, and of Xerxes against the Greeks, seem almost to fet credibility at defiance by the fatal confequences with which they were attended. The conquests of Alexander cost innumerable lives, and the immortality of Cafar is computed to have been purchased by the death of one million two hundred thousand Indeed the Romans, by the long duration of their wars, men. and their inflexible adherence to their purpose, are to be ranked among the foremost destroyers of the human species. Their wars in Italy endured for more than four hundred years, and their contest for supremacy with the Carthaginians two hundred. The Mithridatic war began with a maffacre of one hundred and fifty thousand Romans, and in three fingle actions of the war five hundred thousand men were lost by the eastern monarch. Sylla, his ferocious conqueror, next turned his arms against his country, and the ftruggle between him and Marius was attended with proferiptions, butcheries and murders that knew no reftraint from mercy and humanity. The Romans, at length, fuffered the penalty of their iniquitous deeds; and the world was vexed for three hundred years by the irruptions of Goths, Vandals, Oftrogoths, Huns, and innumerable hordes of barbarians.

# POLITICAL SOCIETY.

Gengiskan and Tamerlane, or the extensive murders of the BOOK I. Spaniards in the new world. Let us examine the civilized and favoured quarter of Europe, or even those countries of Europe which are thought most enlightened.

France was wasted by fucceffive battles during a whole cen- the French: tury, for the question of the Salic law, and the claim of the Plantagenets. Scarcely was this contest terminated, before the religious wars broke out, some idea of which we may form from the siege of Rochelle, where of sisteen thousand perfons shut up eleven thousand perished of hunger and misery; and from the massacre of Saint Bartholomew, in which the numbers assistanted were forty thousand. This quarrel was appealed by Henry the fourth, and succeeded by the thirty years war in Germany for superiority with the house of Austria, and afterwards by the military transactions of Louis the fourteenth.

In England the war of Creffy and Agincourt only gave place the English. to the civil war of York and Lancaster, and again after an interval to the war of Charles the first and his parliament. No fooner was the constitution settled by the revolution, than we were engaged in a wide field of continental warfare by king William, the duke of Marlborough, Maria Therefa and the king of Pruffia.

And what are in most cases the pretexts upon which war is Caules of war. under-

BOOK I. CHAP. II.

undertaken? What rational man could poffibly have given himfelf the leaft diffurbance for the fake of choofing whether Henry the fixth or Edward the fourth fhould have the ftyle of king of England? What Englifhman could reafonably have drawn his fword for the purpofe of rendering his country an inferior dependency of France, as it muft neceffarily have been if the ambition of the Plantagenets had fucceeded? What can be more deplorable than to fee us first engage eight years in war rather than fuffer the haughty Maria Therefa to live with a diminished fovereignty or in a private station; and then eight years more to fupport the free-booter who had taken advantage of her helples condition?

The ufual caufes of war are excellently defcribed by Swift. " Sometimes the quarrel between two princes is to decide which of them shall disposses a third of his dominions, where neither of them pretends to any right. Sometimes one prince quarrels with another, for fear the other should quarrel with him. Sometimes a war is entered upon becaufe the enemy is too ftrong; and fometimes becaufe he is too weak. Sometimes our neighbours want the things which we have, or have the things which we want; and we both fight, till they take ours, or give It is a very juftifiable caufe of war to invade a country us theirs. after the people have been wafted by famine, deftroyed by peftilence, or embroiled by factions among themfelves. It is justifiable to enter into a war against our nearest ally, when one of his towns lies convenient for us, or a territory of land, that would

# POLITICAL SOCIETY.

would render our dominions round and compact. If a prince fends forces into a nation where the people are poor and ignorant, he may lawfully put the half of them to death, and make flaves of the reft, in order to civilize and reduce them from their barbarous way of living. It is a very kingly, honourable and frequent practice, when one prince defires the affiftance of another to fecure him against an invasion, that the affiftant, when he has driven out the invader, should feize on the dominions himself, and kill, imprison or banish the prince he came to relieve \*."

If we turn from the foreign transactions of flates with each Penal laws. other, to the principles of their domeflic policy, we shall not find much greater reason to be fatisfied. A numerous class of mankind are held down in a flate of abject penury, and are continually prompted by disappointment and diffress to commit violence upon their more fortunate neighbours. The only mode which is employed to repress this violence, and to maintain the order and peace of fociety, is punishment. Whips, axes and gibbets, dungeons, chains and racks are the most approved and established methods of persuading men to obedience, and impress pression of reason. Hundreds of victims are annually facrificed at the spring of positive law and political infitution.

# HISTORY OF

BOOK I. CHAP. II. Defpotifm. Add to this the fpecies of government which prevails over nine tenths of the globe, which is defpotifin: a government, as Mr. Locke juftly obferves, altogether " vile and miferable," and " more to be deprecated than anarchy itfelf \*."

Deduction.

This account of the hiftory and ftate of man is not a declamation, but an appeal to facts. He that confiders it cannot poffibly regard political difquifition as a trifle, and government as a neutral and unimportant concern. I by no means call upon the reader implicitly to admit that thefe evils are capable of remedy, and that wars, executions and defpotifm can be extirpated out of the world. But I call upon him to confider whether they may be remedied. I would have him feel that civil policy is a topic upon which the feverest investigation may laudably be employed.

If government be a fubject, which, like mathematics, natural

\* Locke on Government, Book I. Ch. i. §. 1; and Book II. Ch. vii. §. 91. The words in the last place are : "Wherever any two men are, who have no standing rule and common judge to appeal to on earth for the determination of controversics of right betwixt them, there they are still in *the flate of nature*, and under all the inconveniences of it, with only this woeful difference to the subject, &c."

Most of the above arguments may be found much more at large in Burke's Vindication of Natural Society; a treatife, in which the evils of the existing political institutions are displayed with incomparable force of reasoning and hustre of eloquence, while the intention of the author was to shew that these evils were to be confidered as trivial.

### POLITICAL SOCIETY.

philosophy and morals, admits of argument and demonstration, then may we reafonably hope that men shall fome time or other agree refpecting it. If it comprehend every thing that is most important and interesting to man, it is probable that, when the theory is greatly advanced, the practice will not be wholly neglected. Men may one day feel that they are partakers of a common nature, and that true freedom and perfect equity, like food and air, are pregnant with benefit to every conflictution. If there be the faintest hope that this shall be the final refult, then certainly no fubject can infpire to a found mind fuch generous enthusiasm, such enlightened ardour and such invincible perseverance.

The probability of this improvement will be fufficiently efta- Enumeration blished, if we confider, FIRST, that the moral characters of men are the refult of their perceptions: and, SECONDLY, that of all the modes of operating upon mind government is the most confiderable. In addition to these arguments it will be found. THIRDLY, that the good and ill effects of political inftitution are not lefs confpicuous in detail than in principle; and, FOURTHLY, that perfectibility is one of the most unequivocal characteristics of the human species, so that the political, as well as the intellectual flate of man, may be prefumed to be in a courle of progreffive improvement.

# THE MORAL CHARACTERS OF MEN ORIGINATE IN THEIR PERCEPTIONS.

NO INNATE PRINCIPLES.—OBJECTIONS TO THIS ASSERTION —FROM THE EARLY ACTIONS OF INFANTS—FROM THE DESIRE OF SELF-PRESERVATION—FROM SELF-LOVE— FROM PITY—FROM THE VICES OF CHILDREN—TYRANNY —SULLENNESS.—CONCLUSION.

W E bring into the world with us no innate principles: confequently we are neither virtuous nor vicious as we first come into existence. No truth can be more evident than this, to any man who will yield the subject an impartial confideration. Every principle is a proposition. Every proposition confists in the connection of at least two diffinct ideas, which are affirmed to agree or difagree with each other. If therefore the principles be innate, the ideas must be so too. But nothing can be more incontrovertible, than that we do not bring pre-established ideas into the world with us.

Let the innate principle be, that virtue is a rule to which we are obliged to conform. Here are three great and leading ideas, not to mention fubordinate ones, which it is neceffary to form, before we can fo much as understand the proposition.

The

BOOK I.

No innate

principles.

#### ORIGINATE IN THEIR PERCEPTIONS.

What is virtue? Previoufly to our forming an idea corresponding to this general term, it seems necessary that we should have observed the several features by which virtue is diftinguished, and the several subordinate articles of right conduct, that taken together, constitute that mass of practical judgments to which we give the denomination of virtue. Virtue may perhaps be defined, that species of operations of an intelligent being, which conduces to the benefit of intelligent beings in general, and is produced by a defire of that benefit. But taking for granted the universal admission of this definition, and this is no very defensible assumption, how widely have people of different ages and countries disagreed in the application of this general conception to particulars? a disagreement by no means compatible with the supposition that the fentiment is itself innate.

The next innate idea included in the above proposition, is that of a rule or standard, a generical measure with which individuals are to be compared, and their conformity or disagreement with which is to determine their value.

Laftly, there is the idea of obligation, its nature and fource, the obliger and the fanction, the penalty and the reward.

Who is there in the prefent state of scientifical improvement, that will believe that this vast chain of perceptions and notions is fomething 13

# THE MORAL CHARACTERS OF MEN

BOOK I. CHAP. III. fomething that we bring into the world with us, a myftical magazine, flut up in the human embryo, whole treasures are to be gradually unfolded as circumstances shall require? Who does not perceive that they are regularly generated in the mind by a feries of impressions, and digested and arranged by affociation and reflexion?

Objections to this affertion; from the early actions of infants:

Experience has by many been fuppofed adverse to these reafonings: but it will upon examination be found to be perfectly in harmony with them. The child at the moment of his birth is totally unprovided with ideas, except fuch as his mode of existence in the womb may have supplied. His first impressions are those of pleasure and pain. But he has no foresight of the tendency of any action to obtain either the one or the other, previously to experience.

A certain irritation of the palm of the hand will produce that contraction of the fingers, which accompanies the action of grafping. This contraction will at first be unaccompanied with defign, the object will be grafped without any intention to retain it, and let go again without thought or observation. After a certain number of repetitions, the nature of the action will be perceived; it will be performed with a confciousness of its tendency; and even the hand stretched out upon the approach of any object that is desired. Prefent to the child, thus far instructed, a lighted candle. The fight of it will produce a pleasurable state of the organs of perception.

Digitized by Google

#### ORIGINATE IN THEIR PERCEPTIONS.

perception. He will ftretch out his hand to the flame, and will BOOK I. CHAP. III. have no apprehension of the pain of burning till he has felt the fenfation.

At the age of maturity, the eyelids inftantaneoully close, when any fubstance, from which danger is apprehended, is advanced towards them; and this action is fo fpontaneous, as to be with great difficulty prevented by a grown perfon, though he found explicitly defire it. In infants there is no fuch propenfity; and an object may be approached to their organs, however near and however fuddenly, without producing this effect. Frowns will be totally indifferent to a child, who has never found them affo ciated with the effects of anger. Fear itself is a species of forefight; and in no cafe exifts till introduced by experience.

It has been faid, that the defire of felf-prefervation is innate. I from the defire of felfdemand what is meant by this defire ? Must we not understand prefervation: by it, a preference of existence to non-existence? Do we prefer any thing but because it is apprehended to be good? It follows, that we cannot prefer existence, previously to our experience of the motives for preference it posses. Indeed the ideas of life and death are exceedingly complicated, and very tardy in their formation. A child defires pleafure and loathes pain, long before he can have any imagination refpecting the cealing to exist.

Again, it has been faid, that felf-love is innate. But there fromfelf-loves cannot be an error more easy of detection. By the love of

felf

If

### THE MORAL CHARACTERS OF MEN

BOOK I. CHAP. III. felf we understand the approbation of pleasure, and diflike of pain: but this is only the faculty of perception under another name. Who ever denied that man was a percipient being? Who ever dreamed that there was a particular inftinct necessary to render him percipient?

from pity :

Pity has fometimes been fuppofed an inftance of innate principle; particularly as it feems to arife more inftantaneoufly in young perfons, and perfons of little refinement, than in others. But it was reafonable to expect, that threats and anger, circumftances that have been affociated with our own fufferings, fhould excite painful feelings in us in the cafe of others, independently of any laboured analyfis. The cries of diftrefs, the appearance of agony or corporal infliction, irrefiftibly revive the memory of the pains accompanied by those fymptoms in ourfelves. Longer experience and observation enable us to separate the calamities of others and our own fafety, the existence of pain in one subject and of pleasure or benefit in others, or in the fame at a future period, more accurately than we could be expected to do previoufly to that experience.

from the vices of children : Such then is univerfally the fubject of human inftitution and education. We bring neither virtue nor vice with us at our entrance into the world. But the feeds of error are ordinarily fown fo early as to pass with superficial observers for innate.

Digitized by Google

Our

# ORIGINATE IN THEIR PERCEPTIONS.

Our conftitution prompts us to utter a cry at the unexpected BOOK I. CHAP. III. Infants early perceive the affiftance they fensation of pain. obtain from the volition of others; and they have at first no means of inviting that affiftance but by an inarticulate cry. In this neutral and innocent circumstance, combined with the folly and imbecility of parents and nurfes, we are prefented with the first occasion of vice. Affistance is necessary, conducive to the existence, the health and the mental fanity of the infant. Empire in the infant over those who protect him is unnecessary. If we do not withhold our affistance precifely at the moment when it ceafes to be requifite, if our compliance or our refufal be not in every cafe irrevocable, if we grant any thing to impatience, importunity or obstinacy, from that moment we become parties in the intellectual murder of our offspring.

In this cafe we inftil into them the vices of a tyrant; but we fullennels. are in equal danger of teaching them the vices of a flave. It is not till very late that mankind acquire the ideas of justice, retribution and morality, and thefe notions are far from exifting in the minds of infants. Of consequence, when we strike, or when we rebuke them, we risk at least the exciting in them a fense of injury, and a feeling of refentment. Above all, fentiments of this fort cannot fail to be awakened, if our action be accompanied with fymptoms of anger, cruelty, harfhnefs or caprice. The fame imbecility, that led us to infpire them with a fpirit of tyranny by yielding to their importunities, afterwards dictates to

D

tyranny:

us

# THE MORAL CHARACTERS OF MEN, &c.

us an inconfiftent and capricious conduct, at one time denying them as abfurdly, as at another we gratified them unreafonably. Who, that has obferved the confequences of this treatment, how generally these mistakes are committed, how inseparable they are in some degree from the wisest and the best, will be surprised at the early indications of depravity in children \* ?

Conclusion.

From these reasonings it fufficiently appears, that the moral qualities of men are the produce of the impressions made upon them, and that there is no instance of an original propensity to evil. Our virtues and vices may be traced to the incidents which make the history of our lives; and if these incidents could be divessed the history of our lives; and if these incidents could be divessed of every improper tendency, vice would be extirpated from the world. The task may be difficult, may be of flow progress, and of hope undefined and uncertain. But hope will never defert it; and the man who is anxious for the benefit of his species, will willingly devote a portion of his activity to an enquiry into the mode of effecting this extirpation in whole or in part, an enquiry which promises much, if it do not in reality promise every thing.

• The arguments of this chapter are for the most part an abstract, the direct ones from Locke on the Human Understanding, those which relate to experience from Hartley's Observations on Man, and those respecting education from the Emile of J. J. Rousseau.

# THREE PRINCIPAL CAUSES OF MORAL IMPROVE-MENT CONSIDERED.

#### 1. LITERATURE.

II. EDUCATION.

BENEFITS OF EDUCATION.-CAUSES OF ITS IMBECILITY.

III. POLITICAL JUSTICE.

BENEFITS OF POLITICAL INSTITUTION.—UNIVERSALITY OF ITS INFLUENCE—PROVED BY THE MISTAKES OF SOCIETY. —ORIGIN OF EVIL.

THERE are three principal caufes by which the human mind is advanced towards a ftate of perfection; literature, or the diffusion of knowledge through the medium of difcussion, whether written or oral; education, or a scheme for the early impression of right principles upon the hitherto unprejudiced mind; and political justice, or the adoption of any principle of morality and truth into the practice of a community. Let us take a momentary review of each of these.

D 2

I. LITERA-

BOOK I.

# THREE PRINCIPAL CAUSES OF

# I. LITERATURE.

BOOK I. CHAP. IV. Benefits of

literature.

Few engines can be more powerful, and at the fame time more falutary in their tendency, than literature. Without enquiring for the prefent into the caufe of this phenomenon, it is fufficiently evident in fact, that the human mind is ftrongly infected with prejudice and miftake. The various opinions prevailing in different countries and among different classes of men upon the fame fubject, are almost innumerable; and yet of all these opinions only one can be true. Now the effectual way for extirpating these prejudices and mistakes seems to be literature.

Examples.

Literature has reconciled the whole thinking world refpecting the great principles of the fyftem of the univerfe, and extirpated upon this fubject the dreams of romance and the dogmas of fuperfition. Literature has unfolded the nature of the human mind, and Locke and others have eftablifhed certain maxims refpecting man, as Newton has done refpecting matter, that are generally admitted for unqueftionable. Difcuffion has afcertained with tolerable perfpicuity the preference of liberty over flavery; and the Mainwarings, the Sibthorpes, and the Filmers, the race of fpeculative reafoners in favour of defpotifm, are almost extinct. Local prejudice had introduced innumerable privileges and prohibitions upon the fubject of trade; fpeculation has nearly afcertained that perfect freedom is most favourable

### MORAL IMPROVEMENT CONSIDERED.

able to her profperity. If in many inftances the collation of BOOK I. CHAP. IV. evidence have failed to produce universal conviction, it must however be confidered, that it has not failed to produce irrefragable argument, and that falthood would have been much fhorter in duration, if it had not been protected and inforced by the authority of political government.

Indeed, if there be such a thing as truth, it must infallibly Effential probe ftruck out by the collision of mind with mind. The reftless terature. activity of intellect will for a time be fertile in paradox and error; but thefe will be only diurnals, while the truths that occafionally fpring up, like sturdy plants, will defy the rigour of feason and climate. In proportion as one reasoner compares his deductions with those of another, the weak places of his argument will be detected, the principles he too haftily adopted will be overthrown, and the judgments, in which his mind was exposed to no finister influence, will be confirmed. All that is requifite in these discuffions is unlimited speculation, and a fufficient variety of fystems and opinions. While we only difpute about the beft way of doing a thing in itfelf wrong, we shall indeed make but a trifling progress; but, when we are once perfuaded that nothing is too facred to be brought to the touchstone of examination, science will advance with rapid strides. Men, who turn their attention to the boundless field of enquiry, and still more who recollect the innumerable errors and caprices of mind, are apt to imagine that the labour is without benefit and

perties of li-

21

# THREE PRINCIPAL CAUSES OF

BOOK I. CHAP. IV.

and endless. But this cannot be the case, if truth at last have any real existence. Errors will, during the whole period of their reign, combat each other; prejudices that have passed unfuspected for ages, will have their era of detection; but, if in any science we discover one solitary truth, it cannot be overthrown.

Its defects;

Such are the arguments that may be adduced in favour of literature. But, even should we admit them in their full force, and at the fame time fuppofe that truth is the omnipotent artificer by which mind can infallibly be regulated, it would yet by no means fufficiently follow that literature is alone adequate to all the purposes of human improvement. Literature, and particularly that literature by which prejudice is fuperfeded, and the mind is ftrung to a firmer tone, exifts only as the portion of a few. The multitude, at least in the prefent state of human fociety, cannot partake of its illuminations. For that purpofe it would be neceffary, that the general fystem of policy should become favourable, that every individual should have leifure for reafoning and reflection, and that there should be no species of public inftitution, which, having falshood for its basis, should counteract their progress. This state of society, if it did not precede the general diffemination of truth, would at leaft be the immediate refult of it.

But in representing this state of fociety as the ultimate refult,

WE

#### MORAL IMPROVEMENT CONSIDERED.

we should incur an obvious fallacy. The discovery of truth is a purfuit of fuch vaft extent, that it is fcarcely poffible to prefcribe bounds to it. Those great lines, which seem at present to mark the limits of human understanding, will, like the mists that rife from a lake, retire farther and farther the more clofely we approach them. A certain quantity of truth will be fufficient for the fubverfion of tyranny and usurpation; and this fubverfion, by a reflected force, will affift our underftandings in the difcovery of truth. In the mean time, it is not eafy to define the exact portion of discovery that must necessarily precede political melioration. The period of partiality and injuffice. will be fhortened, in proportion as political rectitude occupies a principal share in our disquisition. When the most confiderable part of a nation, either for numbers or influence, becomes convinced of the flagrant absurdity of its institutions, the whole will foon be prepared tranquilly and by a fort of common confent to fuperfede them.

fested with weeds; and it is a common and a reasonable opinion, that the task is much easier to plant right and virtuous dispositions in an unprejudiced understanding, than to root up the errors that have already become as it were a part of ourselves. If an erroneous and vicious education be, as it has been shewn to be, the source of all our depravity, an education, deprived of these errors, seems to present itself as the most natural exchange, and must necessarily render its subject virtuous and pure.

I will imagine the pupil never to have been made the victim of tyranny or the flave of caprice. He has never been permitted to triumph in the fuccess of importunity, and cannot therefore well have become reftless, inconstant, fantastical or He has been inured to ideas of equality and indeunjuft. pendence, and therefore is not paffionate, haughty and overbearing. The perpetual witness of a temperate conduct and reasonable sentiments, he is not blinded with prejudice, is not liable to make a false estimate of things, and of consequence has no immoderate defires after wealth, and fplendour, and the gratifications of luxury. Virtue has always been prefented to him under the most attractive form, as the furest medium of fuccess in every honourable purfuit, the never-failing confolation of difappointment, and infinitely fuperior in value to every other acquisition.

It

#### OF MORAL IMPROVEMENT CONSIDERED.

It cannot be doubted that fuch an education is calculated to produce very confiderable effects. In the world indeed the pupil will become the spectator of scenes very different from what his preconceived ideas of virtue might have taught him to expect. Let us however admit it to be poffible fo to temper the mind, as to render it proof against the influence of example and the allurements of luxury. Still it may be reasonable to doubt of the fufficiency of education. How many inftances may we expect to find, in which a plan has been carried into execution, fo enlightened, unremitted and ardent, as to produce thefe extraordinary effects? Where must the preceptor himself have been educated, who shall thus elevate his pupil above all the errors of mankind? If the world teach an implicit deference to birth and riches and accidental diffinctions, he will fcarcely be exempt from this deference. If the world be full of intrigue and rivalihip and felfifinels, he will not be wholly difinterested. If falfhood be with mankind at large reduced to a fystem, recommended by the prudent, commanded by the magistrate, inforced by the moralist \*, and practised under a thousand forms, the

• The following paffage is extracted from Lord Kaimes, late one of the judges of the kingdom of Scotland.

"Cuftom-house oaths now a-days go for nothing. Not that the world grows more wicked, but because nobody lays any fires upon them. The duty on French wine is the fame in Scotland and in England. But as we cannot afford to pay this high duty, the permission underhand to pay Spanish duty for

well founded opinions of public and individual interest, which perhaps need only to be clearly explained, in order to their being generally received.

Univerfality of its influence :

BOOK I. CHAP. IV.

> Now in whatever light it be confidered, we cannot avoid perceiving, first, that political institution is peculiarly strong in that very point in which the efficacy of education was deficient, the extent of its operation. That it in fome way influences our conduct will hardly be difputed. It is fufficiently obvious that a defpotic government is calculated to render men pliant, and a free one refolute and independent. All the effects that any principle adopted into the practice of a community may produce, it produces upon a comprehensive scale. It creates a fimilar bias in the whole, or a confiderable part of the fociety. The motive it exhibits, the ftimulus it begets, are operative, because they are fitted to produce effect upon mind. They will therefore inevitably influence all to whom they are equally addreffed. Virtue, where virtue is the refult, will ceafe to be a tafk of perpetual watchfulnefs and contention. It will neither be, nor appear to be, a facrifice of our perfonal advantage to difinterested confiderations. It will render those the confederates, fupport and fecurity of our rectitude, who were before its most formidable enemies.

proved by the miltakes of fociety. Again, an additional argument in favour of the efficacy of political influence, arifes from the extensive influence which

3

certain

### MORAL IMPROVEMENT CONSIDERED.

certain falle principles, engendered by an imperfect fystem of fociety, have been found to exert. Superflition, an immoderate fear of shame, a false calculation of interest, are errors that have been always attended with the most extensive consequences. How incredible at the prefent day do the effects of fuperstition exhibited in the middle ages, the horrors of excommunication and interdict, and the humiliation of the greatest monarchs at the feet of the pope, appear? What can be more contrary to European modes than that dread of difgrace, which induces the Bramin widows of Indostan to destroy themselves upon the funeral pile of their hufbands? What more horribly immoral than the mistaken idea which leads multitudes in commercial countries to regard fraud, falshood and circumvention as the truest policy? But, however powerful these errors may be, the empire of truth, if once established, would be incomparably greater. The man, who is enflaved by fhame, fuperstition or deceit, will be perpetually exposed to an internal war of opinions, disapproving by an involuntary censure the conduct he has been most perfuaded to adopt. No mind can be fo far alienated from truth, as not in the midft of its degeneracy to have incefant returns of a better principle. No fystem of fociety can be fo thoroughly pervaded with mistake, as not frequently to fuggest to us fentiments of virtue, liberty and justice. But truth is in all its branches harmonious and confistent.

The

# THREE PRINCIPAL CAUSES OF

The recollection of this circumstance induces me to add as a -concluding obfervation, that it may reafonably be doubted whether error could ever be formidable or long-lived, if government did not lend it support. The nature of mind is adapted to the perception of ideas, their correspondence and difference. In the right difcernment of these is its true element and most congenial pursuit. Error would indeed for a time have been the refult of our partial perceptions; but, as our perceptions are continually changing, and continually becoming more definite and correct, our errors would have been momentary, and our judgments have hourly approached nearer to the truth. The doctrine of transubstantiation, the belief that men were really eating flesh when they feemed to be eating bread, and drinking thuman blood when they feemed to be drinking wine, could snever have maintained its empire fo long, if it had not been reinforced by civil authority. Men would not have fo long perfuaded themfelves that an old man elected by the intrigues of a conclave of cardinals, from the moment of that election -became immaculate and infallible, if the perfuasion had not been maintained by revenues, endowments and palaces. A fystem of government, that should lend no fanction to ideas of fanaticifm and hypocrify, would prefently accustom its fubjects to think justly upon topics of moral worth and importance. Α flate, that fhould abftain from imposing contradictory and impracticable oaths, and thus perpetually ftimulating its members

to concealment and perjury, would foon become diffinguished for plain dealing and veracity. A country, in which places of dignity and confidence should cease to be at the disposal of faction, favour and interest, would not long be the residence of fervility and deceit.

These remarks fuggest to us the true answer to an obvious Origin of objection, that might otherwise present itself, to the conclusion to which these principles appear to lead. It might be faid, that an erroneous government can never afford an adequate folution for the existence of moral evil, fince government was itself the production of human intelligence, and therefore, if ill, must have been indebted for its ill qualities to fome wrong which had previous existence.

The proposition afferted in this objection is undoubtedly true. All vice is nothing more than error and miftake reduced into practice, and adopted as the principle of our conduct. But error Vicious conduct is perpetually hastening to its own detection. is foon difcovered to involve injurious confequences. Injuffice therefore by its own nature is little fitted for a durable exist-But government "lays its hand upon the fpring there is ence. in fociety, and puts a ftop to its motion \*." # INFLUENCE OF POLITICAL INSTITUTIONS EXEMPLIFIED.

ROBBERY AND FRAUD, TWO GREAT VICES IN SOCIETY-ORIGINATE, I. IN EXTREME POVERTY-2. IN THE OS-TENTATION OF THE RICH-3. IN THEIR TYRANNY-RENDERED PERMANENT-I. BY LEGISLATION-2. BY THE ADMINISTRATION OF LAW-3. BY THE INEQUA-LITY OF CONDITION.

HE efficacy of political inftitutions will be rendered full more evident, if we enquire into the history of the most confiderable vices at prefent exifting in fociety; and if it can be shewn that they derive their inveteracy from political institution.

Two of the greatest abuses relative to the interior policy of Robbery and nations, which at this time prevail in the world, will be allowed to confift in the irregular transfer of property, either first by violence, or fecondly by fraud. If among the inhabitants of any country there existed no defire in one individual to possifies himfelf of the fubstance of another, or no defire fo vehement and reftless, as to prompt him to acquire it by means inconfistent with order and juffice; undoubtedly in that country guilt could

F

fraud, two great vices in lociety :

hardly

### INFLUENCE OF POLITICAL

hardly be known but by report. If every man could with perfect facility obtain the neceffaries of life, and, obtaining them, feel no uneafy craving after its fuperfluities, temptation would lofe its power. Private intereft would vifibly accord with public good; and civil fociety become all that poetry has feigned of the golden age. Let us enquire into the principles to which thefe evils owe their existence, and the treatment by which they may be alleviated or remedied.

originate, r. in extreme poverty.

First then it is to be observed, that, in the most refined states of Europe, the inequality of property has arifen to an alarming Vaft numbers of their inhabitants are deprived of height. almost every accommodation that can render life tolerable or Their utmost industry scarcely fuffices for their fupfecure. The women and children lean with an infupportable port. weight upon the efforts of the man, fo that a large family has in the lower order of life become a proverbial expression for an uncommon degree of poverty and wretchednefs. If ficknefs or fome of those cafualties which are perpetually incident to an active and laborious life, be fuperadded to these burthens, the distress is yet greater.

It feems to be agreed that in England there is lefs wretchednefs and diftrefs than in most of the kingdoms of the continent. In England the poors' rates amount to the fum of two millions fterling per annum. It has been calculated that one perfon in feven

DOOK I.

CHAP. V.

# INSTITUTIONS EXEMPLIFIED.

-feven of the inhabitants of this country derives at fome period of his life affiftance from this fund. If to this we add the perfons, who, from pride, a spirit of independence, or the want of a legal fettlement, though in equal diffrefs, receive no fuch affiftance, the proportion will be confiderably increafed.

I lay no ftrefs upon the accuracy of this calculation; the general fact is fufficient to give us an idea of the greatness of the abuse. The confequences that refult are placed beyond the reach of contradiction. A perpetual ftruggle with the evils of poverty, if frequently ineffectual, must necessarily render many of the fufferers desperate. A painful feeling of their oppressed fituation will itfelf deprive them of the power of furmounting The fuperiority of the rich, being thus unmercifully exerit. cifed, must inevitably expose them to reprifals; and the poor man will be induced to regard the flate of fociety as a flate of war, an unjust combination, not for protecting every man in his rights and fecuring to him the means of existence, but for engroffing all its advantages to a few favoured individuals, and referving for the portion of the reft want, dependence and mifery.

A fecond fource of those destructive passions by which the 2. in the ofpeace of fociety is interrupted, is to be found in the luxury, the the rich: pageantry and magnificence with which enormous wealth is ufually accompanied. Human beings are capable of encoun-

tentation of

### INFLUENCE OF POLITICAL

tering with chearfulness confiderable hardships, when those hardfhips are impartially fhared with the reft of the fociety, and they are not infulted with the fpectacle of indolence and eafe in others, no way deferving of greater advantages than themfelves. But it is a bitter aggravation of their own calamity, to have the privileges of others forced on their obfervation, and, while they are perpetually and vainly endeavouring to fecure for themfelves and their families the poorest conveniences, to find others revelling in the fruits of their labours. This aggravation is affiduoufly administered to them under most of the political eftablishments at prefent in existence. There is a numerous clafs. of individuals, who, though rich, have neither brilliant talents nor fublime virtues; and, however highly they may prize their education, their affability, their fuperior polish and the elegance of their manners, have a fecret confcioufnels that they poffels nothing by which they can fo fecurely affert their pre-eminence and keep their inferiors at a diftance, as the fplendour of their equipage, the magnificence of their retinue and the fumptuousness of their entertainments. The poor man is ftruck with this exhibition; he feels his own miferies; he knows how unwearied are his efforts to obtain a flender pittance of this prodigal waste; and he mistakes opulence for felicity. He cannot perfuade himfelf that an embroidered garment may frequently cover an aching heart.

Such are the causes, that, in different degrees under the different

#### INSTITUTIONS EXEMPLIFIED.

ferent governments of the world, prompt mankind openly or fecretly to encroach upon the property of each other. Let us confider how far they admit either of remedy or aggravation from political inftitution. Whatever tends to decrease the injuries attendant upon poverty, decreafes at the fame time the inordinate defire and the enormous accumulation of wealth. Wealth is not purfued for its own fake, and feldom for the fenfual gratifications it can purchase, but for the same reasons that ordinarily prompt men to the acquisition of learning, eloquence and skill, for the love of diffinction and fear of contempt. How few would prize the possession of riches, if they were condemned to enjoy their equipage, their palaces and their entertainments in folitude, with no eye to wonder at their magnificence, and no fordid observer ready to convert that wonder into an adulation of the owner? If admiration were not generally deemed the exclusive property of the rich, and contempt the conftant lacquey of poverty, the love of gain would ceafe to be an universal paffion. Let us confider in what refpects political inflitution is rendered fubservient to this paffion.

First then, legislation is in almost every country grossly the 1. by legisfavourer of the rich against the poor. Such is the character of the game laws, by which the industrious rustic is forbidden to destroy the animal that preys upon the hopes of his future fubfiftence, or to fupply himfelf with the food that unfought thrufts itself in his path. Such was the spirit of the late revenue laws of

39 BOOK I.

CHAP.

#### INFLUENCE OF POLITICAL

of France, which in feveral of their provisions fell exclusively upon the humble and industrious, and exempted from their operation those who were best able to support it. Thus in England the land tax at this moment produces half a million lefs than it did a century ago, while the taxes on confumption have experienced an addition of thirteen millions per annum during the fame period. This is an attempt, whether effectual or no, to throw the burthen from the rich upon the poor, and as fuch is an exhibition of the fpirit of legislation. Upon the fame principle robbery and other offences, which the wealthier part of the community have no temptation to commit, are treated as capital crimes, and attended with the most rigorous, often the most inhuman punishments. The rich are encouraged to affociate for the execution of the most partial and oppressive positive laws. Monopolies and patents are lavifhly difpenfed to fuch as are able to purchase them. While the most vigilant policy is employed to prevent combinations of the poor to fix the price of labour, and they are deprived of the benefit of that prudence and judgment which would felect the fcene of their industry.

2. by the administration of law: Secondly, the administration of law is not less iniquitous than the spirit in which it is framed. Under the late government of France the office of judge was a matter of purchase, partly by an open price advanced to the crown, and partly by a fecret douceur paid to the minister. He, who knew best how to manage his market in the retail trade of justice, could afford to purchase the good

BOOK I.

CHAP. V.

### INSTITUTIONS EXEMPLIFIED.

good will of its functions at the highest price. To the client juffice was avowedly made an object of perfonal folicitation, and a powerful friend, a handfome woman, or a proper prefent, were. articles of much greater value than a good cause. In England the criminal law is administered with tolerable impartiality fo far as regards the trial itfelf; but the number of capital offences, and of confequence the frequency of pardons, open even here a wide door to favour and abufe. In caufes relating to property the practice of law is arrived at fuch a pitch as to render all justice ineffectual. The length of our chancery fuits, the multiplied appeals from court to court, the enormous fees of counfel, attornies, fecretaries, clerks, the drawing of briefs, bills, replications and rejoinders, and what has fometimes been called the glorious uncertainty of the law, render it often more advisable to refign a property than to contest it, and particularly exclude the impoverified claimant from the fainteft hope of redrefs. Nothing certainly is more practicable than to fecure to all questions of controverfy a cheap and fpeedy decifion, which, combined with the independence of the judges and a few obvious improvements in the construction of juries, would infure the equitable application of general rules to all characters and stations.

Thirdly, the inequality of conditions ufually maintained by 3. by the inpolitical inftitution, is calculated greatly to enhance the imagined conditions. excellence of wealth. In the ancient monarchies of the east, and in Turkey at the prefent day, an eminent station could G fcarcely

equality of

### INFLUENCE OF POLILTICAL, &cc.

fcarcely fail to excite implicit deference. The timid inhabitant trembled before his fuperior; and would have thought it little lefs than blasphemy, to touch the veil drawn by the proud fatrap over his inglorious origin. The fame principles were extensively prevalent under the feudal fystem. The vaffal, who was regarded as a fort of live flock upon the effate, and knew of noappeal from the arbitrary fiat of his lord, would fcarcely venture to fuspect that he was of the fame species. This however conftituted an unnatural and violent fituation. There is a propenfity in man to look farther than the outfide; and to come with a writ of enquiry into the title of the upftart and the fuccessful, In England at the prefent day there are few poor men who do not confole themfelves, by the freedom of their animadverfions upon their fuperiors. The new-fangled gentleman is by no means fecure against having his tranquillity diffurbed by their furly and This propenfity might eafily be encouraged. pointed farcafms. and made conducive to the most falutary purposes. Every man might, as was the cafe in certain countries upon record, be infpired with the confcioufness of citizenship, and be made to feel himfelf an active and efficient member of the great whole. The poor man would then perceive, that, if eclipfed, he could not be trampled upon; and he would no longer be flung with the furies of envy, refentment and despair.

BOOK I. Perfectibility

man

#### HUMAN INVENTIONS CAPABLE

BOOK I. CHAP. VI.

man nature is capable. It is to be remembered, that this being did not as now derive affiftance from the communications of his fellows, nor had his feeble and crude conceptions affifted by the experience of fucceffive centuries; but that in the flate we are figuring all men were equally ignorant. The field of improvement was before them, but for every ftep in advance they were to be indebted to their untutored efforts. Nor is it of any confequence whether fuch was actually the progress of mind, or whether, as others teach, the progrefs was abridged, and man was immediately advanced half way to the end of his career by the interpolition of the author of his nature. In any cafe it is an allowable and no unimproving fpeculation, to confider mind as it is in itfelf, and to enquire what would have been its hiftory, if, immediately upon its production, it had been left to be acted upon by those ordinary laws of the universe with whose operation we are acquainted.

inftanced, 1. in language. One of the acquifitions most evidently requifite as a preliminary to our present improvements is that of language. But it is impossible to conceive of an acquisition, that must have been in its origin more different from what at present it is found, or that less promised that copiousness and refinement it has fince exhibited.

Its beginning. Its beginning was probably from those involuntary cries, which infants for example are found to utter in the earliest stages

### OF PERPETUAL IMPROVEMENT.

stages of their existence, and which, previously to the idea of BOOK I. exciting pity or procuring affiftance, foontaneoully arife from the operation of pain upon our animal frame. These cries, when actually uttered, become a fubject of perception to him by whom they are uttered; and, being observed to be constantly affociated with certain preliminary impressions and to excite the idea of those impressions in the hearer, may afterwards be repeated from reflection and the defire of relief. Eager defire to communicate any information to another, will also prompt us to utter fome fimple found for the purpose of exciting attention: this found will probably frequently recur to organs unpractifed to variety, and will at length stand as it were by convention for the information intended to be conveyed. But the diftance is extreme from these fimple modes of communication, which we posses in common with fome of the inferior animals, to all the analysis and abstraction which languages require.

Abstraction indeed, though as it is commonly understood it Abstraction. be one of the fublimest operations of mind, is in some fort coeval with and infeparable from the existence of mind. The next ftep to fimple perception is that of comparison, or the coupling together of two ideas and the perception of their refemblances and differences. Without comparison there can be no preference, and without preference no action: though it must be acknowledged, that this comparison is an operation that may be performed by the mind without adverting to its nature, and that neither

45

### HUMAN INVENTIONS CAPABLE

BOOK I. CHAP. VI.

neither the brute nor the favage has any confcioufnels of the feveral fteps of the intellectual progrefs. Comparifon immediately leads to imperfect abstraction. The fensation of to-day is classed, if fimilar, with the fensation of yesterday, and an inference is made respecting the conduct to be adopted. Without this degree of abstraction the faint dawnings of language already described could never have existed. Abstraction, which was necessary to the first existence of language, is again affisted in its operations by language. That generalisation, which is implied in the very notion of thought, being thus embodied and rendered palpable, makes the mind acquainted with its own powers and creates a restless defire after farther progress.

Complexity of language.

But, though it be by no means impofible, to trace the caufes that concurred to the production of language, and to prove them adequate to their effect, it does not the lefs appear that this is an acquifition of flow growth and ineftimable value. The very fteps, were we to purfue them, would appear like an endlefs labyrinth. The diftance is immeafurable between the three or four vague and inarticulate founds uttered by animals, and the copioufnefs of lexicography or the regularity of grammar. The general and fpecial names by which things are at firft complicated and afterwards divided, the names by which properties are feparated from their fubftances and powers from both, the comprehensive diffribution of parts of fpeech, verbs, adjectives and particles, the inflexions of words by which the change of

#### OF PERPETUAL IMPROVEMENT:

of their terminations changes their meaning through a variety of fhadings, their concords and their governments, all of them prefent us with fuch a boundless catalogue of science, that he, who on the one hand did not know that the boundless task had been actually performed, or who on the other was not intimately acquainted with the progressive nature of mind, would pronounce the accomplishment of them impossible.

A fecond invention, well calculated to impress us with a fense of the progreffive nature of man, is that of alphabetical writing. Hieroglyphical or picture writing appears at fome time to have Hieroglybeen universal, and the difficulty of conceiving the gradation from this to alphabetical is fo great, as to have induced Hartley, one of the most acute of all philosophical writers, to have recourfe to miraculous interpolition as the only adequate folution. In reality no problem can be imagined more operate, than that of decomposing the founds of words into four and twenty simple elements or letters, and again finding these elements in all other words. When we have examined the fubject a little more closeby, and perceived the steps by which this labour was accomplished, perhaps the immensity of the labour will rather gain upon us, as he that shall have counted a million of units, will have a vafter idea upon the fubject, than he that only confiders them in the gross.

In China hieroglyphical writing has never been fuperfeded by Progressive deviations. alpha-

Second inftance : alphabetical writing. phics at firft univerfal.

BOOK I. CHAP. VI.

47

5

#### HUMAN INVENTIONS CAPABLE

alphabetical, and this from the very nature of their language, which is confiderably monofyllabic, the fame found being made to fignify a great variety of objects, by means of certain fhadings of tone too delicate for any alphabet to be able to reprefent. They have however two kinds of writing, one for the learned, and another for the vulgar. The learned adhere clofely to their hieroglyphical writing, reprefenting every word by its correfponding picture; but the vulgar are frequent in their deviations from it.

Hieroglyphical writing and speech may indeed be considered in the first instance as two languages, running parallel to each other, but with no necessary connection. The picture and the word each of them represent the idea, one as immediately as the other. But, though independent, they will become accidentally affociated; the picture at first imperfectly, and afterwards more constantly fuggesting the idea of its correspondent found. It is in this manner that the mercantile claffes of China began to corrupt, as it is ftyled, their hieroglyphical writing. They had a word fuppofe of two fyllables to write. The character appropriate to that word they were not acquainted with, or it failed to fuggest itself to their memory. Each of the fyllables however was a diffinct word in the language, and the characters belonging to them perfectly familiar. The expedient that fuggefted itfelf was to write these two characters with a mark fignifying their union, though in reality the characters had hitherto been appropriated to ideas

BOOK I.

CHAP. VI.

J

 $\mathbf{f}$ 

### OF PERPETUAL IMPROVEMENT.

of a different fort, wholly unconnected with that now intended to be conveyed. Thus a fort of rebus or chararde was produced. In other cafes the word, though monofyllabic, was capable of being divided into two founds, and the fame procefs was employed. This is a first step towards alphabetical analysis. Some word, fuch as the interjection O! or the particle  $\mathcal{A}$  is already a found perfectly simple, and thus surniss a first store to the edifice. But, though these ideas may perhaps present us with a faint view of the manner in which an alphabet was produced, yet the actual production of a complete alphabet is perhaps of all human difcoveries, that which required the most perfevering reflection, the luckiest concurrence of circumstances, and the most patient and gradual progress.

Let us however suppose man to have gained the two first Application. elements of knowledge, speaking and writing; let us trace him through all his subsequent improvements, through whatever conflitutes the inequality between Newton and the ploughman, and indeed much more than this, since the most ignorant ploughman in civilised fociety is infinitely different from what he would have been, when stripped of all the benefits he has derived from literature and the arts. Let us survey the earth covered with the labours of man, houses, inclosures, harvests, manufactures, instruments, machines, together with all the wonders of painting, poetry, eloquence and philosophy.

BOOK I. CHAP.VI.

49

H

#### HUMAN INVENTIONS CAPABLE, &c.

Such was man in his original state, and such is man as we at prefent behold him. Is it peffible for us to contemplate what he has already done, without being imprefied with a ftrong prefentiment of the improvements he has yet to accomplish? There is no fcience that is not capable of additions; there is no art that may not be carried to a still higher perfection. If this be true of all other fciences, why not of morals? If this be true of all other arts, why not of focial inftitution? The very conception of this as possible, is in the highest degree encouraging. If we can still farther demonstrate it to be a part of the natural and regular progress of mind, our confidence and our hopes will then be complete. This is the temper with which we ought to. engage in the fludy of political truth. Let us look back, that we may profit by the experience of mankind; but let us not look back, as if the wifdom of our anceftors was fuch as to. leave no room for future improvement.

# OF THE OBJECTION TO THESE PRINCIPLES FROM THE INFLUENCE OF CLIMATE.

#### PART I.

#### OF MORAL AND PHYSICAL CAUSES.

THE QUESTION STATED. — PROVINCES OF SENSATION AND REFLECTION. — MORAL CAUSES FREQUENTLY MISTAKEN FOR PHYSICAL. — SUPERIORITY OF THE FORMER EVIDENT FROM THE VARIETIES OF HUMAN CHARACTER. — OPE-RATION OF PHYSICAL CAUSES RARE. — FERTILITY OF REFLECTION. — PHYSICAL CAUSES IN THE FIRST IN-STANCE SUPERIOR, AFTERWARDS MORAL. — OBJECTION FROM THE EFFECT OF BREED IN ANIMALS. — CONCLU-SION.

THERE are certain propositions which may be confidered indifferently, either as corollaries flowing from the principles already established, or as a fource of new arguments against the validity of those principles. In the first view they are entitled to a clear and perspicuous statement, and in the second to a mature examination. For example:

H 2

The

BOOK I. CHAP.VII.

### OF MORAL AND

BOOK I. CHAP. VII. The queftion fuated. The caules which appear to operate upon the human mind may be divided into two claffes; perceptions, which are rendered directly a fubject of reafoning, and regarded by the intellect as inducements to action; and perceptions, which act indirectly upon the mind, by rendering the animal frame gay, vigorous and elastic, or on the contrary fluggish, morbid and inactive. According to the fystem already established, the former of these are to be regarded as the whole, the latter being fo comparatively inefficient and fubordinate as to stand in the estimate as almost nothing. To many reasoners however they have by no means appeared of so trivial importance, and it may not be useles to examine for a moment the ideas they have formed, and the reasons which have induced them to as aferibe fo much to the meanest branch of the human constitution.

Imprefions upon our fenses may act either as physical or moral causes. Indisposition of the body operates upon the mind principally in the first of these ways, seeming without any formal deliberation of the understanding to incline us to diffatisfaction and indolence. Corporal punishment affects us principally in the latter mode, fince, though it directly introduces a painful state of the mind, it influences our conduct, only as it is reflected upon by the understanding, and converted into a motive of action.

Provinces of sensation and reflection, It may be a curious fpeculation to examine how far these 6 claffes

CHAP.VII.

### OF MORAL AND

man of valour into a coward." How eafily would this external difadvantage have been furmounted, if his mind had been more full of the benefits to arife from his valour, if the rainy day had been put in the balance with his wife and children, the moft illuftrious rewards to be beftowed upon himfelf, and freedom and felicity to be fecured to his country? "Indigeftion," we are told, "perhaps a fit of the tooth-ach, renders a man incapable of ftrong thinking and fpirited exertion." How long would thefe be able to hold out againft a fudden and unexpected piece of intelligence of the moft delightful nature ?

When operations of an injurious nature are inflicted on the body, and are encountered by the mind with unalterable firmnefs, what is the degree of pain which in fuch inftances is fuffered? Was the language of Anaxarchus merely a philofophical rant, "Beat on, tyrant! Thou mayeft deftroy the fhell of Anaxarchus, but thou canft not touch Anaxarchus himfelf?" How much pain was really endured by Mutius Scævola and archbifhop Cranmer, when each fteadily held his hand to be devoured by the flames? How much is endured by the favage Indians, who fing in the midft of tortures, and farcaftically provoke their tormentors to more ingenious barbarity?

The truth that feems to refult from these confiderations is, that indisposition only becomes formidable in proportion as it is seconded by the consent of the mind; that our communication

BOOK I

CHAP.VII

#### PHYSICAL CAUSES.

cation with the material universe is at the mercy of our choice; BOOK I. CHAP. VII. and that the inability of the understanding for intellectual exertion is principally an affair of moral confideration, exifting only in the degree in which it is deliberately preferred.

"The hero of to-day," we are told, " fhall by an indigeftion or Superiority of a rainy atmosphere be converted into a coward to-morrow." evident from Waving the confideration of how far this fact where it exifts is in of human reality of a moral and intellectual nature, let us examine to what degree a principle of this fort is the true index of human We have already established it as a fundamental, that actions. there are no innate ideas. Of consequence, if men were principally governed by external circumstances such as that of atmosphere, their characters and actions would be much alike. The fame weather, that made you a coward, would make me fo too, and an army would be defeated by a fog. Perhaps indeed this cataftrophe would be prevented by the impartiality of the moifture, in proportion as the enemy advanced, which he neceffarily must do, into the fame atmosphere.

Every thing that checks the uniformity of this effect, and permanently diffinguishes the character of one man from that of another, is to be traced to the affociation of ideas. But affociation is of the nature of reasoning. The principal, the most numerous and lafting of our affociations, are intellectual, not accidental, built upon the refemblances and differences of things, not

the former the varietics character.

55

#### OF MORAL AND

BOOK I. not upon the contingency of their occurring in any given time or place. It is thus that one man appears courageous and another cowardly, one man vigorous and another dull, under the fame or nearly the fame external circumftances.

Operation of phyfical caufes rare.

In reality the atmosphere, instead of confiderably affecting the mass of mankind, affects in an eminent degree only a small part of that mass. The majority are either above or below it; are either too gross to feel strongly these minute variations, or too busy to be at leisure to attend to them. It is only a few, whose treatment has been tender enough to imbue them with extreme delicacy, and whose faculties are not roused by strong and unintermitted incitements, who can be thus blindly directed. If it should be faid " that the weather indeed is too great a triffe to produce these confequences, but that there are pains and interruptions which fearcely any man can withstand;" it may be answered, that these occur too feldom to be mistaken for the efficient principles of human character, that the fystem which determines our proceedings rifes from a different fource, and ordinarily returns when the pain or interruption has subsided.

There can be no queftion more interesting than that which we are now confidering. Upon our decision in this case it depends, whether those perfons act wisely who prescribe to themselves a certain discipline and are anxious to enrich their minds with science, or whether on the contrary it be better to trust

#### PHYSICAL CAUSES.

trust every thing to the mercy of events. Is it possible that BOOK I. we should not perceive from the very nature of the thing the advantages which the wife man posses over the foolish one, and that the points in which they refemble will be as nothing compared to those in which they differ? In those particulars in which our conduct is directed merely by external impreffions we refemble the inferior animals; we differ from them in the greater facility with which we arrange our fenfations, and compare, prefer and judge.

Out of a fingle fenfation a great variety of reflections may Fertility of be generated. Let the thing perceived be a material fubftance of certain regular dimensions. I perceive that it has an upper and a lower furface, I can therefore conceive of it as divided. I can conceive of the parts into which it is formed as moving towards and from each other, and hence I acquire the ideas of diffance and fpace. I can conceive of them as ftriking against each other, and hence I derive the notion of impenetrability, gravity and momentum, the flownefs, rapidity and direction of motion. Let the fenfation be a pain in the head. I am led to reflect upon its causes, its feat, the aructure of the parts in which it refides, the inconvenience it impofes, the confequences with which it may be attended, the remedies that may be applied and their effects, whether external or internal, material or intellectual.

It is true that the infant and inexperienced mind cannot thus Physical analyse and conjure up differtations of philosophy out of its most first instance

### OF MORAL AND

trivial fenfations. Such a capacity infers a long feries of preceding impreffions. Mind is in its infancy nearly what thefe philosophers describe, the creature of contingencies. But the farther it advances, the more it individualifes. Each man has habits and prejudices that are properly his own. He lives in a little. universe of his own creating, or he communicates with the omniprefent and eternal volume of truth. With these he compares the fucceffive perceptions of his mind, and upon these depend the conclusions he draws and the conduct he observes. Hence it inevitably follows, that physical causes, though of some confequence in the hiftory of man, fink into nothing, when compared with the great and inexpreffible operations of reflection. They are the prejudices we conceive or the judgments we form, our apprehensions of truth and falshood, that constitute the true basis. of distinction between man and man. The difference between favage and favage indeed, in the first generation of the human fpecies and in perfect folitude, can only be afcribed to the different impressions made upon their sense. But this difference. would be almost imperceptible. The ideas of wildom and folly would never have entered the human mind, if men, like beafts, derived neither good nor evil from the reflections and discoveries of their companions and anceftors.

Objection from the effect of breed in animals. Hence we are furnished with an answer to the analogical argument from the confiderable effects that physical causes appear to produce upon brutes. "Breed for example appears to be of unquestionable importance to the character and qualifications of 6 horses.

fuperior, afterwards

moral.

# PHYSICAL CAUSES.

horfes and dogs; why fhould we not fuppofe this or certain other brute and occult caufes to be equally efficacious in the cafe of men? How comes it that the races of animals perhaps never degenerate, if carefully cultivated; at the fame time that we have no fecurity against the wifest philosopher's begetting a dunce?"

I answer, that the existence of physical causes cannot be controverted. In the case of man their efficacy is swallowed up in the superior importance of reflection and science. In animals on the contrary they are left almost alone. If a race of negroes were taken, and maintained each man from his infancy, except so far as was necessary for the propagation of the species, in folitude; or even if they were excluded from an acquaintance with the improvements and imaginations of their ancessors, though permitted the fociety of each other, the operation of breed might perhaps be rendered as confpicuous among them, as in the different classes of horses and dogs. But the ideas they would otherwise receive from their parents and civilised or half-civilised neighbours would be innumerable : and, if the precautions above mentioned were unobserved, all parallel between the two cases would cease:

Such is the character of man confidered as an individual. He Conclusion.

is operated upon by exterior caufes immediately, producing certain effects upon him independently of the exercise of reason; and he is operated upon by exterior causes mediately, their impressions furnishing him with materials for reflection, and af-

fuming

## OF NATIONAL

EDOOK I. CHAP.VII. fuming the form of motives to act or to refrain from acting. But the latter of these, at least fo far as relates to man in a civilised state, may stand for the whole. He that would change the character of the individual, would miserably misapply his efforts, if he principally fought to effect this purpose by the operations of heat and cold, dryness and moissure upon the animal frame. The true instruments of moral influence, are defire and . aversion, punishment and reward, the exhibition of general truth, and the development of those punishments and rewards, which wission and error by the very nature of the thing conftantly bring along with them.

#### PART II.

#### OF NATIONAL CHARACTERS.

CHARACTER OF THE PRIESTHOOD.—ALL NATIONS CAPABLE OF LIBERTY.—THE ASSERTION ILLUSTRATED.—EXPERI-ENCE FAVOURS THESE REASONINGS.—MEANS OF INTRO-DUCING LIBERTY.

A S is the character of the individual, fo may we expect to find it with nations and great bodies of men. The operations of law and political inftitution will be important and interesting, the operations of climate trifling and unworthy of notice. Thus there are particular professions, fuch as that of the priesthood, which must always operate to the production of a particular character.

Priefts

#### CHARACTERS.

Priefts are upon all occasions accustomed to have their opinions listened to with implicit deference; they will therefore be imperious, dogmatical and impatient of opposition. the pricil-Their fuccefs with mankind depends upon the opinion of their fuperior innocence; they will therefore be particularly anxious about appearances, their deportment will be grave and their manners formal. The frank and ingenuous fallies of mind they will be obliged to fupprefs; the errors and irregularities into which they may be drawn they will be studious to conceal. They are obliged at set intervals to affume the exterior. of an ardent devotion; but it is impoffible that this should at all times be free from occasional coldness and distraction. Their importance is connected with their real or fupposed mental fuperiority over the rest of mankind ; they must therefore be patrons of prejudice and implicit faith. Their prosperity depends upon the reception of particular opinions in the world; they must therefore be enemies to freedom of enquiry; they must have a bias upon their minds impressed by fomething different from the force of evidence. Particular moral caufes may in fome inftances limit, perhaps fuperfede the influence of general ones, and render fome men fuperior to the character of their profession; but, exclusively of such exceptions, priefts of all religions, of all climates and of all ages will have a ftriking fimilarity of manners and difpofition. In the fame manner we may reft affured that free men in whatever country will be firm, vigorous and spirited in proportion to their freedom, and that vaffals and flaves will be ignorant, fervile and unprincipled.

### OF NATIONAL

BOOK I. CHAP.VII. All nations capable of Eberty. The truth of this axiom has indeed been pretty univerfally admitted; but it has been affirmed to be " impoffible to eftablish a free government in certain warm and effeminate climates." To enable us to judge of the reasonableness of this affirmation, let us consider what process would be necessary in order to introduce a free government into any country.

The anfwer to this queftion is to be found in the anfwer to that other, whether freedom have any real and folid advantages over flavery? If it have, then our mode of proceeding refpecting it ought to be exactly parallel to that we fhould employ in recommending any other benefit. If I would perfuade a man to accept a great eftate, fuppofing that poffeffion to be a real advantage; if I would induce him to felect for his companion a beautiful and accomplifhed woman, or for his friend a wife, a brave and difinterefted man; if I would perfuade him to prefer eafe to pain, and gratification to torture, what more is neceffary, than that I fhould inform his underftanding, and make him fee thefe things in their true and genuine colours? Should I find it neceffary to enquire firft of what climate he was a native, and whether that were favourable to the poffeffion of a great eftate, a fine woman, or a generous friend ?

The advantages of liberty over flavery are not lefs real, though unfortunately they are lefs palpable, than in the cafes just enumerated. Every man has a confused fense of these advantages, but he has been taught to believe that men would tear each other to pieces, if they had not priests to direct their consciences,

to.

# OF NATIONAL

to entertain? that they were deflitute of reafon, and that the fuperintendence under which they were placed was neceffary for their prefervation. They have therefore fubmitted to whips and ftraw and bread and water, and perhaps imagined this tyranny to be a bleffing. But a fufpicion is at length by fome means propagated among them, that all they have hitherto endured has been an impofition. The fufpicion fpreads, they reflect, they reafon, the idea is communicated from one to another through the chinks of their cells, and at certain times when the vigilance of their keepers has not precluded them from the pleafures of mutual fociety. It becomes the clear perception, the fettled perfuafion of the majority of the perfons confined.

What will be the confequence of this opinion? Will the influence of climate prevent them from embracing the obvious means of their happinefs? Is there any human underflanding that will not perceive a truth like this, when forcibly and repeatedly prefented? Is there a mind that will conceive no indignation at fo horrible a tyranny? In reality the chains fall off of themfelves, when the magic of opinion is diffolved. When a great majority of any fociety are perfuaded to fecure any benefit to themfelves, there is no need of tumult or violence to effect it. The effort would be to refift reafon, not to obey it. The prifoners are collected in their common hall, and the keepers inform them that it is time to return to their cells. They have no longer the power to obey. They look at the impotence of their

BOOK I. CHAP.VII.

nians

### OF NATIONAL

BOOK I. CHAP.VII nians are as much noted for probity, as the Jews for extortion.— What refemblance is there between the ancient and the modern Greeks, between the old Romans and the prefent inhabitants of Italy, between the Gauls and the French? Diodorus Siculus defcribes the Gauls as particularly given to taciturnity, and Ariftotle affirms that they are the only warlike nation who are negligent of women.

If on the contrary climate were principally concerned in forming the characters of nations, we might expect to find heat and cold producing an extraordinary effect upon men, as they do upon plants and inferior animals. But the reverse of this appears to be the fact. Is it supposed that the neighbourhood of the fun renders men gay, fantastic and ingenious? While the French, the Greeks and the Perfians have been remarkable for their gaiety, the Spaniards, the Turks and the Chinefe are not lefs diftinguished by the feriousness of their deportment. It was the opinion of the ancients that the northern nations were incapable of civilifation and improvement; but the moderns have found that the English are not inferior in literary eminence to any nation in the world. Is it afferted, that the northern nations are more hardy and courageous, and that conquest has ufually travelled from that to the oppofite quarter? It would have been truer to fay that conqueft is usually made by poverty upon plenty. The Turks, who from the deferts of Tartary invaded the fertile provinces of the Roman empire, met the Saracens

### CHARACTERS.

cens half way, who were advancing with fimilar views from the no lefs dreary deferts of Arabia. In their extreme perhaps heat and cold may determine the characters of nations, of the negroes for example on one fide and the Laplanders on the other. Not but that in this very inftance much may be afcribed to the wretchednefs of a fterile climate on the one hand, and to the indolence confequent upon a fpontaneous fertility on the other. As to what is more than this, the remedy has not yet been difcovered. Phyfical caufes have already appeared to be powerful, till moral ones can be brought into operation.

Has it been alledged that carnivorous nations are endowed with the greatest courage? The Swedes, whose nutriment is meagre and sparing, have ranked with the most distinguished modern nations in the operations of war.

It is ufually faid, that northern nations are most addicted to wine, and fouthern to women. Admitting this observation in its full force, it would only prove that climate may operate upon the groffer particles of our frame, not that it influences those finer organs upon which the operations of intellect depend. But the truth of the first of these remarks may well be doubted. The Greeks appear to have been sufficiently addicted to the pleasures of the bottle. Among the Persians no character was more coveted than that of a hard drinker. It is easy to obtain any thing

BOOK I. CHAP.VII. of the negrocs, even their wives and children, in exchange for liquor.

As to women the circumflance may be accounted for from moral caufes. The heat of the climate obliges both fexes to go half naked. The animal arrives fooner at maturity in hot countries. And both these circumflances produce vigilance and jea-·loufy, caufes which inevitably tend to inflame the paffions \*.

Means of introducing liberty. The refult of these reasonings is of the utmost importance to him who speculates upon principles of government. It is of little confequence what discoveries may be made in moral and political fcience, if, when we have afcertained most accurately what are the intellectual requisites that lead to wisdom and virtue, a blind and capricious principle is to intrude itself, and taint all our conclusions. Accordingly there have been writers on the subject of government, who, admitting, and even occasionally declaiming with enthusias upon the advantages of liberty and the equal claims of mankind to every social benefit, have yet concluded that the corruptions of despotism and the usurpations of aristocracy were congenial to certain ages and divisions of the world, and under proper limitations entitled to our approbation.

But

## ĊHARACTERS.

But this hypothesis will be found incapable of holding out BOOK I. against a moment's ferious reflection. Can there be any state of mankind that renders them incapable of the exercise of reason? Can there be a period in which it is neceffary to hold the human fpecies in a condition of pupillage? If there be, it feems but reafonable that their fuperintendents and guardians, as in the cafe of infants of another fort, fhould provide for the means of their fublistence without calling upon them for the exertions of manual industry. Wherever men are competent to look the first duties of humanity in the face, and to provide for their defence against the invafions of hunger and the inclemencies of the fky, there they will out of all doubt be found equally capable of every other exertion that may be neceffary to their fecurity and welfare. Prefent to them a conflict which shall put them into a simple and intelligible method of directing their own affairs, adjudging their contefts among themfelves, and cherifhing in their bofoms a manly fenfe of dignity, equality and independence, and you need not doubt that prosperity and virtue will be the refult.

The real enemies of liberty in any country are not the people, but those higher orders who profit by a contrary fystem. Infuse just views of fociety into a certain number of the liberally educated and reflecting members; give to the people guides and instructors; and the business is done. This however is not to be accomplished but in a gradual manner, as will more fully

## OF THE OBJECTION TO THESE PRINCIPLES FROM THE INFLUENCE OF LUXURY.

THE OBJECTION STATED. --- SOURCE OF THIS OBJECTION.--**REFUTED FROM MUTABILITY—FROM MORTALITY—FROM** SYMPATHY-FROM THE NATURE OF TRUTH.-THE PRO-BABILITY OF PERSEVERANCE CONSIDERED.

THERE is another proposition relative to the subject, BOOK I. which is lefs to be confidered as an affertion diffinct in itfelf, than as a particular branch of that which has just been tion stated. discussed; I mean the proposition which affirms, " that nations like individuals are fubject to the phenomena of youth and old age, and that, when a people by luxury and depravation of manners have funk into decrepitude, it is not in the power of legislation to reftore them to vigour and innocence."

This idea has partly been founded upon the romantic notions Source of this of pastoral life and the golden age. Innocence is not virtue. Virtue demands the active employment of an ardent mind in the promotion of the general good. No man can be eminently virtuous, who is not accuftomed to an extensive range of reflection. He must see all the benefits to arise from a disinterested proceed-

The objec-

objection.

### OF THE INFLUENCE

proceeding, and must understand the proper method of producing those benefits. Ignorance, the slothful habits and limited views of uncultivated life have not in them more of true virtue, though they may be more harmles, than luxury, vanity and extravagance. Individuals of exquisite feeling, whose disgust has been excited by the hardened selfishness or the unblushing corruption which have prevailed in their own times, have recurred in imagination to the forests of Norway or the bleak and uncomfortable Highlands of Scotland in fearch of a purer race of mankind. This imagination has been the offspring of disappointment, not the dictate of reason and philosophy.

It may be true, that ignorance is nearer than prejudice to the reception of wifdom, and that the abfence of virtue is a condition more hopeful than the prefence of its oppofite. In this cafe it would have been jufter to compare a nation funk in luxury, to an individual with confirmed habits of wrong, than to an individual whom a debilitated conftitution was bringing fast to the grave. But neither would that comparison have been fair and equitate.

Refuted from mutability :

72

BOOK I.

CHAP. VIII.

The condition of nations is more fluctuating, and will be found lefs obflinate in its refiftance to a confiftent endeavour for their improvement, than that of individuals. In nations fome of their members will be lefs confirmed in error than others. A certain number will be only in a very fmall degree indifpofed

t0,

### LUXURY. OF

to liften to the voice of truth. This number will perpetually increafe. Every new convert will be the means of converting others. In proportion as the body of disciples is augmented, the modes of attack upon the prejudices of others will be varied, and fuited to the variety of men's tempers and prepofferfions.

Add to this that generations of men are perpetually going off from mortathe stage, while other generations fucceed. The next generation will not have fo many prejudices to fubdue. Suppose a despotic nation by some revolution in its affairs to become posfeffed of a free conftitution. The children of the prefent race will be bred in more firm and independent habits of thinking; the fuppleness, the timidity and the vicious dexterity of their fathers will give place to an erect mien, and a clear and decifive The partial and imperfect change of character which judgment. was introduced at first, will in the fucceeding age become more unalloyed and complete.

Laftly, the power of focial inftitutions changing the character from fympaof nations is very different from and infinitely greater than any power which can ordinarily be brought to bear upon a folitary individual. Large bodies of men, when once they have been enlightened and perfuaded, act with more vigour than folitary individuals. They animate the mutual exertions of each other, and the united forces of example and shame urge them to per-The cafe is not of that cuftomary fort where the feverance. power

## OF THE INFLUENCE

BOOK I. CHAP. VIII. but is as if he fhould be placed in an entirely new fituation. His habits are broken through, and his motives of action changed. Inftead of being perpetually recalled to vicious practices by the recurrence of his former connections, the whole fociety receives an impulfe from the fame caufe that acts upon any individual. New ideas are fuggefted, and the furprife of novelty confpires with the approbation of truth to prevent men from falling back into imbecility and languor.

from the nature of truth.

The queftion may in reality be reduced to an enquiry, whether the human understanding can be made the recipient of truth, whether it be possible for an effort fo strenuous to exist as to make men aware of their true interefts. For let this be granted, and the confequence is inevitable. It has already fufficiently appeared, that whatever is politically right or politically wrong, must be in all cafes of no trivial confequence to the welfare of mankind. Monarchy for example will by all men be acknowledged to be attended with many difadvantages. It acts upon infufficient and partial information, it generates intrigue, corruption, adulation and fervility. If it could be proved, that it produced no advantages in equal proportion, and that its abolition would not lead to mifchief, anarchy and diforder, is there a nation upon the face of the earth to whom these propositions were rendered palpable, that would endure to fubmit to it? Is there a nation upon the face of the earth, that would fubmit

7

10

# OF LUXURY.

to the impositions of its administration, the wars it occasions, and the lavish revenues by which it is maintained, if they knew it to be merely an excrescence and a disease in the order of fociety ?

But it has been farther alledged, that, even should a luxurious The probanation be prompted by intolerable grievances and notorious feverance usurpation to affert the just principles of human fociety, they would be unable to perpetuate them, and would foon be led back by their evil habits to their former vices and corruption: that is, they would be capable of the heroic energy that fhould expel the usurper, but not of the moderate resolution that should They would roufe themfelves fo far from prevent his return. their lethargy as to affume a new character and enter into different views; but, after having for fome time acted upon their convictions, they would fuddenly become incapable of underftanding the truth of their principles and feeling their influence.

Men always act upon their apprehensions of preferablenes. There are few errors of which they are guilty, which may not be refolved into a narrow and inadequate view of the alternative presented for their choice. Present pleasure may appear more certain and eligible than diftant good. But they never choofe evil as apprehended to be evil. Wherever a clear and unanfwerable notion of any fubject is prefented to their view, a correspondent action or course of actions inevitably follows. Having thus gained L 2 one

# NATURE OF THE ENQUIRY-MODE OF PURSUING IT .- DIS-TINCTION BETWEEN SOCIETY AND GOVERNMENT.

R. Locke begins his celebrated Treatife of Government BOOK II. with a refutation of the patriarchal fcheme of fir Robert Filmer; and, having thus cleared his ground, proceeds to obferve, enquiry. that " he, that will not give just occasion to think that all government in the world is the product only of force and violence, and that men live together by no other rules but that of beafts, muft

fuing it.

must of necessity find out another rife of government, and another original of political power \*." Accordingly he proceeds through the greater part of his treatife to reason abstractedly upon the probable hiftory of the early ages of mankind, and concludes that no legitimate government could be built upon any other foundation than that of an original contract.

It is to be fuspected that this great man, friend as he was to the liberty and the interefts of mankind, intrepid and fagacious in his fearch after truth, has been guilty of an overlight in the first step of the investigation.

Mode of pur-There are two modes, according to which we may enquire into the origin of fociety and government. We may either examine them historically, that is, confider in what manner they have or ought to have begun, as Mr. Locke has done; or we may examine them philosophically, that is, confider the moral principles upon which they depend. The first of these subjects is not without its use; but the second is of a higher order and more effential importance. The first is a question of form; the fecond of fubstance. It would be of trivial confequence practically confidered, from what fource any form of fociety flowed. and by what mode its principles were fanctioned, could we be always fecure of their conformity to the dictates of truth and justice.

It

## OF SOCIETY.

It is farther neceffary before we enter upon the fubject carefully to diftinguish between fociety and government. Men affociated at first for the fake of mutual affistance. They did not forefee that any restraint would be neceffary, to regulate the conduct of individual members of the fociety, towards each other, or towards the whole. The neceffity of restraint grew out of the errors and perverseness of a few. An acute writer has expressed this idea with peculiar felicity. "Society and government," fays he, " are different in themselves, and have different origins. Society is produced by our wants, and government by our wickedness. Society is in every state a bleffing; government even in its best state but a neceffary evil \*."

## OF JUSTICE.

CONNECTION OF POLITICS AND MORALS.—EXTENT AND MEANING OF JUSTICE.—SUBJECT OF JUSTICE: MAN-KIND.—ITS DISTRIBUTION MEASURED BY THE CAPACITY OF ITS SUBJECT—BY HIS USEFULNESS.—FAMILY AFFEC-TION CONSIDERED.—GRATITUDE CONSIDERED.—OBJEC-TIONS: FROM IGNORANCE—FROM UTILITY.—AN EX-CEPTION STATED.—DEGREES OF JUSTICE.—APPLICA-TION.—IDEA OF POLITICAL JUSTICE.

BOOK II. CHAP. II. Connection of polities and morals. **F** ROM what has been faid it appears, that the fubject of the prefent enquiry is ftrictly fpeaking a department of the fcience of morals. Morality is the fource from which its fundamental axioms must be drawn, and they will be made fomewhat clearer in the prefent inftance, if we affume the term justice as a general appellation for all moral duty.

Extent and meaning of juffice. That this appellation is fufficiently expressive of the subject will appear, if we confider for a moment mercy, gratitude, temperance, or any of those duties which in looser speaking are contradistinguished from justice. Why should I pardon this criminal, 2 remunerate

remunerate this favour, abstain from this indulgence? If it partake of the nature of morality, it must be either right or wrong, just or unjust. It must tend to the benefit of the individual, either without intrenching upon, or with actual advantage to the mass of individuals. Either way it benefits the whole, because individuals are parts of the whole. Therefore to do it is just, and to forbear it is unjust. If justice have any meaning, it is just that I should contribute every thing in my power to the benefit of the whole.

Confiderable light will probably be thrown upon our invefti- Subject of gation, if, quitting for the prefent the political view, we examine kind. justice merely as it exifts among individuals. Justice is a rule of conduct originating in the connection of one percipient being with another. A comprehensive maxim which has been laid down upon the fubject is, " that we fhould love our neighbour as ourfelves." But this maxim, though poffeffing confiderable merit as a popular principle, is not modelled with the ftrictness of philosophical accuracy.

In a loofe and general view I and my neighbour are both of Its diffribuus men; and of confequence entitled to equal attention. But in fured by the reality it is probable that one of us is a being of more worth its fubject : and importance than the other. A man is of more worth than a beaft; becaufe, being poffeffed of higher faculties, he is capable of a more refined and genuine happiness. In the fame manner

BOOK II. CHAP. II.

81

iuflice: man-

tion meacapacity of

the

BOOK II. the illustrious archbishop of Cambray was of more worth than-CHAP. H. his chambermaid, and there are few of us that would hefitate to pronounce, if his palace were in flames, and the life of only one of them could be preferved, which of the two ought to be preferred.

by his ulefulnels.

But there is another ground of preference, befide the private confideration of one of them being farther removed from the flate of a mere animal. We are not connected with one or two percipient beings, but with a fociety, a nation, and in fome fenfe with the whole family of mankind. Of confequence that life ought to be preferred which will be most conducive to the general good. In faving the life of Fenelon, fuppole at the moment when he was conceiving the project of his immortal Telemachus, I should be promoting the benefit of thousands, who have been cured by the perufal of it of fome error, vice and confequent unhappines. Nay, my benefit would extend farther than this, for every individual thus cured has become a better member of fociety, and has contributed in his turn to the happines, the information and improvement of others.

Supposing I had been myself the chambermaid, I ought to have chosen to die, rather than that Fenelon should have died. The life of Fenelon was really preferable to that of the chambermaid. But understanding is the faculty that perceives the truth of this and similar propositions; and justice is the principle that I regulates

regulates my conduct accordingly. It would have been just in the chambermaid to have preferred the archbishop to herself. To have done otherwise would have been a breach of justice.

Supposing the chambermaid had been my wife, my mother or my benefactor. This would not alter the truth of the proposition. The life of Fenelon would still be more valuable than that of the chambermaid; and justice, pure, unadulterated justice, would still have preferred that which was most valuable. Justice would have taught me to fave the life of Fenelon at the expence of the other. What magic is there in the pronoun "my," to overturn the decisions of everlassing truth? My wife or my mother may be a fool or a prostitute, malicious, lying or disconst. If they be, of what confequence is it that they are mine?

"But my mother endured for me the pains of child bearing, and nourifhed me in the helpleffnefs of infancy." When the first fubjected herfelf to the neceffity of these cares, the was probably influenced by no particular motives of benevolence to her future offspring. Every voluntary benefit however entitles the bestower to fome kindnefs and retribution. But why fo? Becaufe a voluntary benefit is an evidence of benevolent intention, that is, of virtue. It is the disposition of the mind, not the external action, that entitles to respect. But the merit of this disposition is equal, whether the benefit was conferred upon me or upon another. I and another man cannot both be right in preferring M 2 our

# BOOK II. CHAP. II.

83

Family affection coulidered.

> Gratitude confidered.

BOOK II. CHAP. II.

our own individual benefactor, for no man can be at the fame time both better and worfe than his neighbour. My benefactor ought to be efteemed, not because he bestowed a benefit upon me, but because he bestowed it upon a human being. His defert will be in exact proportion to the degree, in which that human being was worthy of the diffinction conferred. Thus every view of the fubject brings us back to the confideration of my neighbour's moral worth and his importance to the general weal, as the only flandard to determine the treatment to which he is entitled. Gratitude therefore, a principle which has fo often been the theme of the moralist and the poet, is no part either of justice. By gratitude I understand a fentiment, which would or virtue. lead me to prefer one man to another, from fome other confideration than that of his fuperior usefulness or worth: that is, which would make fomething true to me (for example this preferableness), which cannot be true to another man, and is not true in itfelf \*.

Objections:

from ignorance : It may be objected, " that my relation, my companion, or my benefactor will of courfe in many inftances obtain an uncommon portion of my regard: for, not being univerfally capable of difcriminating the comparative worth of different men, I shall inevitably judge most favourably of him, of whose virtues I have received the most unquestionable proofs; and thus shall be com-

\* This argument respecting gratitude is stated with great clearness in an Essay on the Nature of True Virtue, by the Rev. Jonathan Edwards. 12mo. Dilly.

6

pelled to prefer the man of moral worth whom I know, to BOOK II. another who may posses, unknown to me, an effential fupetiority."

This compulsion however is founded only in the prefeat imperfection of human nature. It may ferve as an apology for my error, but can never turn error into truth. It will always remain contrary to the ftrict and inflexible decisions of justice. The difficulty of conceiving this is owing merely to our confounding the disposition from which an action is chosen, with the action itself. The disposition, that would prefer virtue to vice and a greater degree of virtue to a less, is undoubtedly a fubject of approbation; the erroneous exercise of this disposition by which a wrong object is felected, if unavoidable, is to be deplored, but can by no colouring and under no denomination be converted into right \*.

It may in the fecond place be objected, "that a mutual from utility. commerce of benefits tends to increase the mass of benevolent action, and that to increase the mass of benevolent action is to contribute to the general good." Indeed ! Is the general good promoted by falshood, by treating a man of one egree of worth, as if he had ten times that worth? or as if he were in any degree different from what he really is? Would not the most beneficial confequences refult from a different plan; from my

\* See this fubject more copioufly treated in the following chapter.

conftantly

BOOK II. CHAP. II. conftantly and carefully enquiring into the deferts of all those with whom I am connected, and from their being fure, after a certain allowance for the fallibility of human judgment, of being treated by me exactly as they deferved? Who can tell what would be the effects of fuch a plan of conduct univerfally adopted ?

An exception flated.

There feems to be more truth in the argument, derived chiefly from the unequal diffribution of property, in favour of my providing in ordinary cafes for my wife and children, my brothers and relations, before I provide for ftrangers. As long as providing for individuals belongs to individuals, it feems as if there muft be a certain diffribution of the clafs needing fuperintendence and fupply among the clafs affording it, that each man may have his claim and refource. But this argument, if admitted at all, is to be admitted with great caution. It belongs only to ordinary cafes; and cafes of a higher order or a more urgent neceffity will perpetually occur, in competition with which thefe will be altogether impotent. We muft be feverely forupulous in meafuring out the quantity of fupply; and, with refpect to money in particular, muft remember how little is yet underftood of the true mode of employing it for the public benefit.

Degrees of jultice.

Having confidered the perfons with whom juffice is converfant, let us next enquire into the degree in which we are obliged to confult the good of others. And here I fay, that it is juft that

that I should do all the good in my power. Does any perfor in diftrefs apply to me for relief? It is my duty to grant it, and I commit a breach of duty in refufing. If this principle be not of universal application, it is because, in conferring a benefit upon an individual, I may in fome inftances inflict an injury of fuperior magnitude upon myfelf or fociety. Now the fame justice, that binds me to any individual of my fellow men, binds me to the whole. If, while I confer a benefit upon one man, it appear, in striking an equitable balance, that I am injuring the whole, my action ceafes to be right and becomes abfolutely But how much am I bound to do for the general weal, wrong. that is, for the benefit of the individuals of whom the whole is composed? Every thing in my power. What to the neglect of the means of my own existence? No; for I am myself a part of the whole. Befide, it will rarely happen but that the project of doing for others every thing in my power, will demand for its execution the prefervation of my own existence; or in: other words, it will rarely happen but that I can do more good. in twenty years than in one. If the extraordinary cafe fhould occur in which I can promote the general good by my death, more than by my life, justice requires that I should be content: In all other cafes, it is just that I should be careful to to die. maintain my body and my mind in the utmost vigour, and inthe best condition for fervice \*.

I will suppose for example that it is right for one man to poffefs a greater portion of property than another, either as the fruit of his industry, or the inheritance of his ancestors. Juffice obliges him to regard this property as a truft, and calls upon him maturely to confider in what manner it may beft be employed for the increase of liberty, knowledge and virtue. He has no right to difpofe of a fhilling of it at the will of his caprice. So far from being entitled to well earned applause for having employed fome feanty pittance in the fervice of philanthropy, he is in the eye of juffice a delinquent if he withhold any portion from that fervice. Nothing can be more incontrovertible. Could that portion have been better or more worthily employed? That it could is implied in the very terms of the proposition. Then it was just it should have been so employed.—In the fame manner as my property, I hold my perfon as a truft in behalf of mankind. I am bound to employ my talents, my understanding, my ftrength and my time for the production of the greatest quantity of general good. Such are the declarations of juffice, fo great is the extent of my duty.

But justice is reciprocal. If it be just that I should confer a benefit, it is just that another man should receive it, and, if I withhold from him that to which he is entitled, he may justly complain. My neighbour is in want of ten pounds that I can spare. There is no law of political institution that has been made to reach this case, and to transfer this property from me to him. But

But in the eye of fimple justice, unless it can be shewn that the money can be more beneficently employed, his claim is as complete, as if he had my bond in his possession, or had supplied me with goods to the amount \*.

To this it has fometimes been anfwered, "that there is more than one perfon, that ftands in need of the money I have to fpare, and of confequence I must be at liberty to bestow it as I pleafe." I anfwer, if only one perfon offer himfelf to my knowledge or fearch, to me there is but one. Those others that I cannot find belong to other rich men to affist (rich men, I fay, for every man is rich, who has more money than his just occasions demand), and not to me. If more than one perfon offer, I am obliged to balance their fitness, and conduct myself accordingly. It is fearcely possible to happen that two men shall be of exactly equal fitness, or that I shall be equally certain of the fitness of the one as of the other.

It is therefore impossible for me to confer upon any man a favour, I can only do him a right. Whatever deviates from the law of justice, even I will suppose in the too much done in favour of some individual or some part of the general whole, is so much subtracted from the general stock, is so much of absolute injustice.

\* A spirited outline of these principles is sketched in Swist's Sermon on Mutual Subjection.

N

The

89

BOOK II. CHAP. II. Application.

The inference most clearly afforded by the preceding reasonings, is the competence of justice as a principle of deduction in all cases of moral enquiry. The reasonings themselves are rather of the nature of illustration and example, and any error that may be imputed to them in particulars, will not invalidate the general conclusion, the propriety of applying moral justice as a criterion in the investigation of political truth.

Idea of political justice.

Society is nothing more than an aggregation of individuals. Its claims and its duties muft be the aggregate of their claims and duties, the one no more precarious and arbitrary than the other. What has the fociety a right to require from me? The queftion is already anfwered: every thing that it is my duty to do. Any thing more? Certainly not. Can they change eternal truth, or fubvert the nature of men and their actions? Can they make it my duty to commit intemperance, to maltreat or affaffinate my neighbour?—Again. What is it that the fociety is bound to do for its members? Every thing that can contribute to their welfare. But the nature of their welfare is defined by the nature of mind. That will moft contribute to it, which enlarges the underftanding, fupplies incitements to virtue, fills us with a generous confcioufnels of our independence, and carefully removes whatever can impede our exertions.

Should it be affirmed, " that it is not in the power of any political fyftem to fecure to us these advantages," the conclusion I am

am drawing will ftill be incontrovertible. It is bound to contribute every thing it is able to these purposes, and no man was ever yet found hardy enough to affirm that it could do nothing. Suppose its influence in the utmost degree limited, there must be one method approaching nearer than any other to the defired object, and that method ought to be universally adopted. There is one thing that political inflitutions can affuredly do, they can avoid positively counteracting the true interests of their subjects. But all capricious rules and arbitrary diffinctions do positively counteract them. There is fearcely any modification of fociety but has in it fome degree of moral tendency. So far as it produces neither mischief nor benefit, it is good for nothing. So far as it tends to the improvement of the community, it ought to be universally adopted.

## OF SUICIDE.

# APPENDIX, No. I. p. 87.

### OF SUICIDE..

# MOTIVES OF SUICIDE: I. ESCAPE FROM PAIN.-2. BENEVO-LENCE.--MARTYRDOM CONSIDERED.

BOOK II. CHAP. II. APPENDIX. Motives of fuicide. 1. Efcape from pain. THIS reafoning will explain to us the long difputed cafe of fuicide. "Have I a right under any circumftances to deftroy myfelf in order to escape from pain or difgrace?" Probably not. It is perhaps impossible to imagine a fituation, that shall exclude the possibility of future life, vigour and usefulness. The motive affigned for escape is eminently trivial, to avoid pain, which is a small inconvenience; or difgrace, which is an imaginary evil. The example of fortitude in enduring them, if there were no other confideration, would probably afford a better motive for continuing to live.

2. Benevolence. " Is there then no cafe in which fuicide is a virtue ?" What fhall we think of the reafoning of Lycurgus, who, when he determined upon a voluntary death, remarked, " that all the faculties a rational being poffeffed were capable of a moral ufe, and that, after having fpent his life in the fervice of his country, a man ought, if poffible, to render his death a fource of additional benefit ?" This was the motive of the fuicide of Codrus, Leonidas and Decius. If the fame motive prevailed in the much admired fuicide

## OF SUICIDE.

BOOK II. fuicide of Cato, if he were infligated by reasons purely benevo-CHAP.II. lent, it is impoffible not to applaud his intention, even if he were mistaken in the application.

The difficulty is to decide in any inftance whether the recourfe to a voluntary death can overbalance the usefulness I may exert in twenty or thirty years of additional life. But furely it would be precipitate to decide that there is no fuch inftance. There is a proverb which affirms, " that the blood of the martyrs is the feed of the church." It is commonly supposed that Junius Brutus did right in putting his fons to death in the first year of the Roman republic, and that this action contributed more than any other cause, to generate that energy and virtue for which his country was afterwards fo eminently diftinguished. The death of Cato produced an effect fomewhat fimilar to this. It was dwelt on with admiration by all the lovers of virtue under the fublequent tyrants of Rome. It feemed to be the lamp from which they caught the facred flame. Who can tell how much it has contributed to revive that flame in after ages, when it feemed to have been fo long extinct?

confidered.

Let it be observed that all martyrs  $[\mu\alpha\rho^{\beta}\nu\rho\varepsilon_{\beta}]$  are fuicides by the Murtyrdom very fignification of the term. They die for a teftimony [µaplupio ]; that is, they have a motive for dying. But motives respect only our own voluntary acts, not the violence put upon us by another.

## OF DUELLING.

## APPENDIX, No. II.

### OF DUELLING.

MOTIVES OF DUELLING: I. REVENGE.—2. REPUTATION FOR COURAGE.—FALLACY OF THIS MOTIVE.—OBJECTION AN-SWERED.—ILLUSTRATION.

BOOK II. CHAP. II. APPENDIX. Motives of duciling. T may be proper in this place to beftow a moment's confideration upon the trite, but very important cafe of duelling. A very fhort reflection will fuffice to fet it in its true light.

1. Revenge. This deteftable practice was originally invented by barbarians for the gratification of revenge. It was probably at that time thought a very happy project for reconciling the odioufnefs of malignity with the gallantry of courage.

2. Reputation for courage. But in this light it is now generally given up. Men of the best understanding who lend it their fanction, are unwillingly induced to do fo, and engage in fingle combat merely that their reputation may fustain no flander.

Fallacy of this motive.

Which of these two actions is the trues test of courage: the engaging in a practice which our judgment disapproves, because we cannot submit to the consequences of following that judgment; or the doing what we believe to be right, and chearfully encoun-

### DUELLING. OF

encountering all the confequences that may be annexed to the practice of virtue? With what patience can a man of virtue think of cutting off the life of a fellow mortal, or of putting an abrupt close to all the generous projects he may himself conceive for the benefit of others, merely because he has not firmness enough to awe impertinence and falfhood into filence ?

"But the refusing a duel is an ambiguous action. Cowards Objection. may pretend principle to fhelter themfelves from a danger they dare not meet."

This is partly true and partly falfe. There are few actions Answered. indeed that are not ambiguous, or that with the fame general outline may not proceed from different motives. But the manner of doing them will sufficiently shew the principle from which they fpring.

He, that would break through an univerfally received cuftom Illustration. because he believes it to be wrong, must no doubt arm himself with fortitude. The point in which we chiefly fail, is in not accurately understanding our own intentions, and taking care beforehand to free ourfelves from any alloy of weaknefs and error. He, who comes forward with no other idea in his mind but that of rectitude, and who expresses, with the simplicity and firmnels which full conviction never fails to infpire, the views with which he is impressed, is in no danger of being mistaken for a coward.

BOOK II. CHAP. II. PPENDIE.

95

## OF DUELLING.

BOOK II. CHAP. II.

coward. If he hefitate, it is because he has not an idea perfectly clear of the sentiment he intends to convey. If he be in any degree embarrassed, it is because he has not a seeling sufficiently generous and intrepid of the guilt of the action in which he is pressed to engage.

If there be any meaning in courage, its first ingredient must be the daring to fpeak the truth at all times, to all perfons, and in every possible fituation. What is it but the want of courage that should prevent me from faying, "Sir, I ought to refuse your challenge. What I ought to do, that I dare do. Have I injured you? I will readily and without compulsion repair my injustice to the uttermost mite. Have you misconstrued me? State to me the particulars, and doubt not that what is true I will make appear to be true. Thus far I will go. But, though I should be branded for a coward by all mankind, I will not repair to a fcene of deliberate murder. I will not do an act that I know to be flagitious. I will exercise my judgment upon every proposition that comes before me; the dictates of that judgment I will fpeak; and upon them I will form my conduct." He that holds this language with a countenance in unifon with his words, will never be fufpected of acting from the impulse of fear.

#### C H III. Ρ. Α

#### OF DUTY.

A DIFFICULTY STATED.-OF ABSOLUTE AND PRACTICAL VIRTUE.---IMPROPRIETY OF THIS DISTINCTION.---UNI-VERSALITY OF WHAT IS CALLED PRACTICAL VIRTUE-INSTANCED IN ROBBERY-IN RELIGIOUS FANATICISM.-THE QUALITY OF AN ACTION DISTINCT FROM THE DIS-POSITION WITH WHICH IT IS PERFORMED-FARTHER DIFFICULTY .- MEANING OF THE TERM, DUTY .- APPLI-CATION .--- INFERENCES.

HERE is a difficulty of confiderable magnitude as to the BOOK II. fubject of the preceding chapter, founded upon the difference which may exift between abstract justice and my appre- stated. hensions of justice. When I do an act, wrong in itself, but which as to all the materials of judging extant to my underftanding appears to be right, is my conduct virtuous or vicious?

A difficult

Certain moralists have introduced a distinction upon this head Of abfolute and practical between abfolute and practical virtue. " There is one fpecies of virtue. virtue," they fay, " which rifes out of the nature of things and is immutable, and another which rifes out of the views extant to my understanding. Thus for example suppose, I ought to worfhip

worship Jefus Christ; but, having been bred in the religion of Mahomet, I ought to adhere to that religion, as long as its evidences shall appear to me conclusive. I am impannelled upon a jury to try a man arraigned for murder, and who is really innocent. Abstractedly confidered, I ought to acquit him. But I am unacquainted with his innocence, and evidence is adduced fuch as to form the strongest presumption of his guilt. Demonstration in such cases is not to be attained; I am obliged in every concern of human life to act upon presumption; I ought therefore to convict him."

Impropriety of this diftinction. It may be doubted however whether any good purpofe is likely to be anfwered by employing the terms of abstract fcience in this versatile and uncertain manner. Morality is, if any thing can be, fixed and immutable; and there must furely be fome strange deception that should induce us to give to an action eternally and unchangeably wrong, the epithets of rectitude, duty and virtue.

Univerfality of what is called practical virtue : Nor have thefe moralifts been thoroughly aware to what extent this admiffion would carry them. The human mind is incredibly fubtle in inventing an apology for that to which its inclination leads. Nothing is fo rare as pure and unmingled hypocrify. There is no action of our lives which we were not ready at the time of adopting it to juftify, unlefs fo far as we were prevented by mere indolence and unconcern. There is fcarcely

BOOK II.

CHAP. III.

fcarcely any justification which we endeavour to pass upon others, BOOK II. CHAP. III. which we do not with tolerable fuccess pass upon ourfelves. The diffinction therefore which is here fet up would go near to prove that every action of every human being is entitled to the appellation of virtuous.

There is perhaps no man that cannot recollect the time when inflanced in he fecretly called in question the arbitrary division of property established in human fociety, and felt inclined to appropriate to his use any thing the possession of which appeared to him de-It is probably in fome fuch way that men are ufually firable. influenced in the perpetration of robbery. They perfuade themfelves of the comparative inutility of the property to its prefent poffeffor, and the ineftimable advantage that would attend it in They believe that the transfer ought to be made. their hands. It is of no confequence that they are not confiftent in these views, that the imprefions of education fpeedily recur to their minds, and that in a feafon of adverfity they readily confess the wickedness of their proceeding. It is not less true that they did what at the moment they thought to be right.

fanaticifm.

But there is another confideration that feems still more decifive in religious of the subject before us. The worst actions, the most contrary to abstract justice and utility, have frequently been done from the most confeientious motives. Clement, Ravaillac, Damiens and Gerard had their minds deeply penetrated with anxiety for the

O 2

99

robbery :

eternal

eternal welfare of mankind. For thefe objects they facrificed their eafe, and chearfully exposed themfelves to tortures and death. It was benevolence probably that contributed to light the fires of Smithfield, and point the daggers of Saint Bartholomew. The inventors of the Gunpowder Treason were in general men remarkable for the fanctity of their lives and the feverity of their manners. It is probable indeed, that fome ambitious views, and fome fentiments of hatred and abhorrence mixed with the benevolence and integrity of these perfons. It is probable that no wrong action was ever committed from views entirely pure. But the deception they put upon themfelves might nevertheles be complete. At all events their opinions upon the fubject could not alter the real nature of the action.

The quality of an action diffinct from the difpofition with which it is performed. The true folution of the question lies in observing, that the disposition with which an action is adopted is one thing, and the action itself another. A right action may be done from a wrong disposition; in that case we approve the action, but condemn the actor. A wrong action may be done from a right disposition; in that case we condemn the action, but approve the actor. If the disposition by which a man is governed have a systematical tendency to the benefit of his species, he cannot fail to obtain our efteem, however mistaken he may be in his conduct.

Farther difficulty. But what shall we fay to the duty of a man under these circumstances? Calvin, we will suppose, was clearly and confcientiously

BOOK II.

CHAP. III.

Ought he to BOOK II. tioufly perfuaded that he ought to burn Servetus. have burned him or not? " If he burned him, he did an action deteftable in its own nature; if he refrained, he acted in oppofition to the best judgment of his own understanding as to a point of moral obligation." It is abfurd however to fay, that it was in any fense his duty to burn him. The most that can be admitted is, that his disposition was virtuous, and that in the circumstances in which he was placed an action greatly to be deplored flowed from that disposition by invincible necessity.

Shall we fay then that it was the duty of Calvin, who did not understand the principles of toleration, to act upon a truth of which he was ignorant? Suppose that a person is to be tried at York next week for murder, and that my evidence would ac-Shall we fay that it was my duty to go to York, quit him. though I knew nothing of the matter? Upon the fame principles we might affirm that it is my duty to go from London to York in half an hour, as the trial will come on within that time; the impoffibility not being more real in one cafe than in Upon the fame principles we might affirm, that it the other. is my duty to be impeccable, omniscient and almighty.

Duty is a term the use of which seems to be to describe the mode Meaning of in which any being may beft be employed for the general good. duty. It is limited in its extent by the extent of the capacity of that being. Now capacity varies in its idea in proportion as we

CHAP. III.

IOI

vary

Digitized by Google

vary our view of the fubject to which it belongs. What I am capable of, if you confider me merely as a man, is one thing; what I am capable of as a man of a deformed figure, of weak understanding, of fuperstitious prejudices, or as the case may happen, is another. So much cannot be expected of me under these difadvantages, as if they were absent. But, if this be the true definition of duty, it is absurd to fuppose in any case that an action injurious to the general welfare can be classed in the rank of duties.

Application. To apply these observations to the cases that have been stated. Ignorance, so far as it goes, completely annihilates capacity. As I was uninformed of the trial at York, I could not be influenced by any confideration respecting it. But it is absurd to fay that it was my duty to neglect a motive with which I was unacquainted. If you alledge, " that Calvin was ignorant of the principles of toleration, and had no proper opportunity to learn them," it follows that in burning Servetus he did not violate his duty, but it does not follow that it was his duty to burn him. Upon the supposition here stated duty is filent. Calvin was unacquainted with the principles of justice, and therefore could not practife them. The duty of no man can exceed his capacity; but then neither can in any case an act of injustice be of the nature of duty.

Inferences.

There are certain inferences that flow from this view of the fubject, which it may be proper to mention. Nothing is more 4 common

102

BOOK II.

CHAP. III.

common than for individuals and focieties of men to alledge that they have acted to the beft of their judgment, that they have done their duty, and therefore that their conduct, even fhould it prove to be miftaken, is neverthelefs virtuous. This appears to be an error. An action, though done with the beft intention in the world, may have nothing in it of the nature of virtue. In reality the most effential part of virtue confists in the inceffantly feeking to inform ourfelves more accurately upon the fubject of utility and right. Whoever is greatly mifinformed refpecting them, is indebted for his error to a defect in his philanthropy, and zeal, the context of the test of test of the test of the test of test of the test of test of test of the test of tes

Secondly, fince abfolute virtue may be out of the power of a human being, it becomes us in the mean time to lay the greateft ftrefs upon a virtuous difpofition, which is not attended with the fame ambiguity. A virtuous difpofition is of the utmoft confequence, fince it will in the majority of inftances be productive of virtuous actions; fince it tends, in exact proportion to the quantity of virtue, to increafe our difcernment and improve our underftanding; and fince, if it were univerfally propagated, it would immediately lead to the great end of virtuous actions, the pureft and moft exquifite happiness of intelligent beings. But a virtuous disposition is principally generated by the uncontrolled exercise of private judgment, and the rigid conformity of every man to the dictates of his confcience.

## CHAP. IV.

# OF THE EQUALITY OF MANKIND.

PHYSICAL EQUALITY. — OBJECTION. — ANSWERS. — MORAL EQUALITY. — HOW LIMITED. — PROVINCE OF POLITICAL JUSTICE.

BOOK II. CHAP. IV. Phyfical equality. Their phyfical equality may be confidered either as it relates to the ftrength of the body or the faculties of the mind.

Objection. This part of the fubject has been exposed to cavil and objection. It has been faid, " that the reverse of this equality is the refult of our experience. Among the individuals of our fpecies we actually find that there are not two alike. One man is ftrong and another weak. One man is wife and another foolish. All that exists in the world of the inequality of conditions is to be traced to this as their fource. The ftrong man posses power to fubdue, and the weak stands in need of an ally to protect. The confequence is inevitable: the equality of conditions is a chimerical assumption, neither possible to be reduced into practice, nor defirable if it could be for reduced."

3

Upon

### 104

## OF MANKIND.

Upon this flatement two obfervations are to be made. Firft, this inequality was in its origin infinitely lefs than it is at prefent. In the uncultivated flate of man difeafes, effeminacy and luxury were little known, and of confequence the flrength of every one much more nearly approached to the flrength of his neighbour. In the uncultivated flate of man the underflandings of all were limited, their wants, their ideas and their views nearly upon a level. It was to be expected that in their firft departure from this flate great irregularities would introduce themfelves; and it is the object of fubfequent wifdom and improvement to mitigate thefe irregularities.

Secondly, notwithfanding the incroachments that have been made upon the equality of mankind, a great and fubfantial equality remains. There is no fuch difparity among the human race as to enable one man to hold feveral other men in fubjection, except fo far as they are willing to be fubject. All government is founded in opinion. Men at prefent live under any particular form, becaufe they conceive it their intercft to do fo. One part indeed of a community or empire may be held in fubjection by force; but this cannot be the perfonal force of their defpot; it muft be the force of another part of the community, who are of opinion that it is their intereft to fupport his authority. Deftroy this opinion, and the fabric which is built upon it falls to the ground. It follows therefore that all men are effentially independent.—So much for the phyfical equality.

BOOK II. CHAP. IV.

105

Ρ

# OF THE EQUALITY

BOOK II. CHAP. IV. Moral equality.

106

The moral equality is still lefs open to reasonable exception. By moral equality I underftand the propriety of applying one unalterable rule of justice to every cafe that may arife. This cannot be queffioned but upon arguments that would fubvert the very nature of virtue. " Equality," it has been affirmed, " will always be an unintelligible fiction, fo long as the capacities of men shall be unequal, and their pretended claims have neither guarantee nor fanction by which they can be inforced \*." But furely juffice is fufficiently intelligible in its own nature, abftracted from the confideration whether it be or be not reduced into practice. Juffice has relation to beings endowed with perception, and capable of pleafure and pain. Now it immediately refults from the nature of fuch beings, independently of any arbitrary conflitution, that pleafure is agreeable and pain odious, pleafure to be defired and pain to be obviated. It is therefore just and reafonable that fuch beings fhould contribute, fo far as it lies in their power, to the pleafure and benefit of each other. Among pleafures fome are more exquifite, more unalloyed and lefs precarious than others. It is just that these should be preferred.

From these fimple principles we may deduce the moral equality of mankind. We are partakers of a common nature,

7

and

JOOGLE

<sup>\* &</sup>quot; On a dit—que nous avions tous les mêmes droits. J'ignore ce que c'est que les mêmes droits, où il y a inégalité de talens ou de force, & nulle garantie, nulle sanction." Raynal, Revolution d'Amerique, p. 34.

### O F MANKIND.

and the fame caufes that contribute to the benefit of one contribute to the benefit of another. Our fenses and facultics are of the fame denomination. Our pleafures and pains will therefore be the fame. We are all of us endowed with reafon, able to compare, to judge and to infer. The improvement therefore which is to be defired for the one is to be defired for the other. We fhall be provident for ourfelves and ufeful to each other, in proportion as we rife above the atmosphere of prejudice. The fame independence, the fame freedom from any fuch reftraint, as fhould prevent us from giving the reins to our own understanding, or from uttering upon all occasions whatever we think to be true, will conduce to the improvement of all. There are certain opportunities and a certain fituation most advantageous to every human being, and it is just that these should be communicated to all, as nearly at leaft as the general economy will permit.

There is indeed one species of moral inequality parallel to the Howlimited. phyfical inequality that has been already defcribed. The treatment to which men are entitled is to be measured by their merits and their virtues. That country would not be the feat of wildom and reafon, where the benefactor of his fpecies was confidered in the fame point of view as their enemy. But in reality this diffinction, fo far from being adverfe to equality in any tenable fenfe, is friendly to it, and is accordingly known by the appellation of equity, a term derived from the fame origin. Though in fome fenfe an exception, it tends to the fame

#### RIGHTS OF MAN.

THE QUESTION STATED.—FOUNDATION OF SOCIETY.—OP-POSITE RIGHTS IMPOSSIBLE.—CONCLUSION FROM THESE PREMISES. — DISCRETION CONSIDERED. — RIGHTS OF KINGS.—IMMORAL CONSEQUENCES OF THE DOCTRINE OF RIGHTS.—RIGHTS OF COMMUNITIES.—OBJECTIONS: I. THE RIGHT OF MUTUAL AID.—EXPLANATION.—ORI-GIN OF THE TERM, RIGHT.—2. RIGHTS OF PRIVATE JUDG-MENT AND OF THE PRESS.—EXPLANATION.—REASONS OF THIS LIMITATION UPON THE FUNCTIONS OF JHE COMMUNITY: I. THE INUTILITY OF ATTEMPTING RE-STRAINT.—2. ITS PERNICIOUS TENDENCY.—CONCLU-SION.

THERE is no fubject that has been difcuffed with more eagerness and pertinacity than the rights of man. Has he any rights, or has he none? Much may plausibly be alledged on both fides of this question; and in the conclusion those reasoners appear to express themselves with the greatest accuracy who embrace the negative. There is nothing that has been of greater differvice to the cause of truth, than the hasty and unguarded manner in which its advocates have fometimes defended it: and

BOOK II. CHAP. V. The quefition flated.

ìt

### RIGHTS OF MAN.

it will be admitted to be peculiarly unfortunate, if the advocates on one fide of this quefion fhould be found to have the greateft quantity of truth, while their adverfaries have expressed themfelves in a manner more confonant to reason and the nature of things. Where the queftion has been fo extremely dark ened by an ambiguous use of terms, it may at any rate be defirable to try, whether, by a patient and fevere investigation of the first principles of political fociety, it may be placed in a light confiderably different from the views of both parties.

Foundation of fociety. Political fociety, as has already been obferved, is founded in the principles of morality and juffice. It is impofible for intellectual beings to be brought into coalition and intercourfe, with out a certain mode of conduct, adapted to their nature and connection, immediately becoming a duty incumbent on the parties concerned. Men would never have affectated, if they had not imagined that in confequence of that affociation they would inutually conduce to the advantage and happinefs of each other. This is the real purpofe, the genuine bafis of their intercourfe; and, as far as this purpofe is anfwered, fo far does fociety enfwer the end of its inflitution.

Oppofite rights impolfible. There is only one poftulate more, that is neceffary to bring us to a conclusive mode of reasoning upon this subject. Whatever is meant by the term right, for it will prefently appear that the fense of the term itself has never been clearly understood, there

BOOK II.

CHAP, V.

#### RIGHTS OF MAN.

there can neither be opposite rights, nor rights and duties headle The rights of one min cannot clafh with or be to each other. destructive of the rights of another; for this, instead of rendering the fubject an important branch of truth and morality, as the advocates of the rights of man certainly understand it to be, would be to reduce it to a heap of unintelligible jargon and inconfiftency. If one man have a right to be free, another man cannot have a right to make him a flave; if one man have a right to inflict chaftifement upon me, I cannot have a right to withdraw myself from chastifement; if my neighbour have a right to a fum of money in my possession, I cannot have a right to retain it in my pocket.-It cannot be lefs incontrovertible, that I have no right to omit what my duty prefcribes.

From hence it inevitably follows that men have no rights. By right, as the word is employed in this fubject, has always been underftood difcretion, that is, a full and complete power of either doing a thing or omitting it, without the perfon's becoming liable to animadversion or censure from another, that is, in other words, without his incurring any degree of turpitude or guilt. Now in this fenfe I affirm that man has no rights, no diferetionary power whatever.

It is commonly faid, " that a man has a right to the difpofal Diferention of his fortune, a right to the employment of his time, a right to the uncontrolled choice of his profession or pursuits." But this

confidered.

JII

Conclution from thefe premifes.

can

## RIGHTS OF MAN.

can never be confiftently affirmed till it can be fhewn that he has no duties, prefcribing and limiting his mode of proceeding in all thefe refpects. My neighbour has just as much right to put an end to my existence with dagger or poison, as to deny me that pecuniary affistance without which I must starve, or as to deny me that affistance without which my intellectual attainments or my moral exertions will be materially injured. He has just as much right to amuse himself with burning my house or torturing my children upon the rack, as to shut himself up in a cell careles about his fellow men, and to hide "his talent in a napkin."

If men have any rights, any diference powers, they must be in things of total indifference, as whether I fit on the right or on the left fide of my fire, or dine on beef to day or tomorrow. Even these rights are much fewer than we are apt to imagine, fince before they can be completely established, it must be proved that my choice on one fide or the other can in no possible way contribute to the benefit or injury of myself or of any other person in the world. Those must indeed be rights well worth the contending for, the very effence of which confis in their absolute nugatorines and inutility.

In reality nothing can appear more wonderful to a careful enquirer, than that two ideas fo incompatible as man and rights should ever have been affociated together. Certain it is, that one of

Digitized by Google

BOOK II.

CHAP. V.

#### RIGHTS OF MAN.

of them must be utterly exclusive and annihilatory of the other. Before we ascribe rights to man, we must conceive of him as a being endowed with intellect, and capable of differing the differences and tendencies of things. But a being endowed with intellect, and capable of difcerning the differences and tendencies of things, inftantly becomes a moral being, and has duties incumbent on him to discharge: and duties and rights, as has already been shewn, are absolutely exclusive of each other.

It has been affirmed by the zealous advocates of liberty, " that Rights of princes and magistrates have no rights;" and no position can be more incontrovertible. There is no fituation of their lives that has not its correspondent duties. There is no power intrusted to them that they are not bound to exercise exclusively for the public good. It is ftrange that perfons adopting this principle did not go a ftep farther, and perceive that the fame reftrictions were applicable to fubjects and citizens.

Nor is the fallacy of this language more confpicuous than its Immoral immoral tendency. To this inaccurate and unjust use of the of the docterm right we owe it, that the mifer, who accumulates to no end rights. that which diffused would have conduced to the welfare of thoufands, that the luxurious man, who wallows in indulgence and fees numerous families around him pining in beggary, never fail to tell us of their rights, and to filence animadversion and quiet the cenfure of their own mind by reminding us, " that they

confequences trine of

came

## RIGHTS OF MAN.

came fairly into possession of their wealth, that they owe nor debts, and that of confequence no man has authority to enquire <sup>i</sup>nto their private manner of disposing of that which is their own." A great majority of mankind are confcious that they stand in need of this fort of defence, and are therefore very ready to combine against the infolent intruder, who ventures to enquire into " things that do not concern him." They forget, that the wise man and the honest man, the friend of his country and his kind, is concerned for every thing by which they may be affected, and carries about with him a diploma, constituting him inquisitor general of the moral conduct of his neighbours, with a duty annexed to recal them to virtue, by every lesson that truth can enable him to read, and every punishment that plain speaking is competent to inflict.

11

Rights of communitics. It is fcarcely neceffary to add, that, if individuals have no. rights, neither has fociety, which poffeffes nothing but what individuals have brought into a common flock. The abfurdity of the common opinion, as applied to this fubject, is ftill more glaring, if poffible, than in the view in which we have already confidered it. According to the ufual fentiment every club affembling for any civil purpole, every congregation of religionifts affembling for the worfhip of God, has a right to eftablish any provisions or ceremonies, no matter how ridiculous or detestable, provided they do not interfere with the freedom of others. Reafon lies proftrate under their feet. They have a right to trample upon

BOOK II.

#### RIGHTS OF MAN.

BOOK II. upon and infult her as they pleafe. It is in the fame spirit we have been told that every nation has a right to choose its form of government. A most acute, original and inestimable author was probably mifled by the vulgar phraseology on this fubject, when he afferted, that, " at a time when neither the people of France nor the national affembly were troubling themfelves about the affairs of England or the English parliament, Mr. Burke's conduct was unpardonable in commencing an unprovoked attack upon them \*."

There are various objections that fuggest themselves to the Objections. theory which fubverts the rights of men; and if the theory be true, they will probably appear in the refult to be fo far from really hoftile to it, as to be found more fairly deducible from and confistent with its principles, than with any of those with which they have inadvertently been connected.

In the first place it has fometimes been alledged, and feems to 1. The rights of mutual aid. refult from the reafonings already adduced under the head of juftice, that " men have a right to the affiftance and co-operation of their fellows in every honeft purfuit." But, when we affert Explanation. this proposition, we mean fomething by the word right exceedingly different from what is commonly underftood by the term. We do not understand fomething difcretionary, which, if not voluntarily fulfilled, cannot be confidered as a matter of claim,

CHAP.V.

#### RIGHTS OF MAN.

116 BOOK II.

CHAP. V.

On the contrary every thing adduced upon that occasion was calculated to shew that it was a matter of strict claim; and perhaps fomething would be gained with refpect to perfpicuity, if we rather chofe to diffinguish it by that appellation, than by a name fo much abused, and fo ambiguous in its application, as the term right.

Origin of the terin, right.

The true origin of this latter term is relative to the prefent ftate of political government, in which many of those actions which moral duty most strictly enjoins us are in no degree brought within the fphere of legiflative fanction. Men uninfluenced by comprehensive principles of justice, commit every species of intemperance, are felfish, hard-hearted, licentious and cruel, and maintain their right to all these caprices, because the laws of their country are filent with regard to them. Philosophers and political enquirers have too frequently adopted the fame principles with a certain degree of accommodation; though in fact. men have no more right to these erroneous propensities in their most qualified fense, than they had to them originally in all their It is true, that, under the forms of fociety now extravagance. existing in the world, intemperance and the caprices of personal intercourfe too frequently escape without animadversion. But in a more perfect form, though they may not fall under the cognifance of law, the offender will probably be fo unequivocally reminded by the fincerity of his neighbours of the error he has' 6 com-

## RIGHTS OF MAN.

committed, as to be in no danger of running away with the BOOK II. CHAP. V. opinion that he had a right to commit it.

A fecond and more important objection to the doctrine I am 2. Rights of maintaining is derived from the rights as they are called of private judgment, and the liberty of the prefs. But it may eafily be fhewn, that thefe, no more than the articles already mentioned, are rights of difcretion. If they were, they would prove, that a man was strictly justifiable in publishing what he believed to be pernicious or false, and that it was a matter of perfect moral indifference whether he conformed to the religious rites of Confucius, of Mahomet, or of Chrift. The political freedom of Explanation. confcience and of the prefs, fo far from being as it is commonly fuppofed an extension, is a new cafe of the limitation of rights and difcretion. Confcience and the prefs ought to be unreftrained, not becaufe men have a right to deviate from the exact line that duty prefcribes, but becaufe fociety, the aggregate of individuals, has no right to affume the prerogative of an infallible judge, and to undertake authoritatively to prefcribe to its members in matters of pure fpeculation.

One obvious reason against this assumption on the part of the Reasons of fociety is the impoffibility by any compulsatory method of bringing men to uniformity of opinion. The judgment we form upon the commutopics of general truth, is or is imagined to be founded upon evidence : and, however it may be foothed by gentle applications

private judgment and of the prefs.

this limitation upon the functions of nity. 1. The inutility of attempting reftraint.

118

to the betraying its impartiality, it is apt to repel with no little pertinacity whatever comes under the form of compulsion. Perfecution cannot perfuade the understanding, even when it subdues our resolution. It may make us hypocrites; but cannot make us converts. The government therefore, which is anxious above all things to imbue its subjects with integrity and virtue, will be the farthest in the world from discouraging them in the explicit avowal of their fentiments.

2. Its pernicious tendency.

But there is another reason of a higher order. Man is not, as has been already shewn, a perfect being, but perfectible. No government, that has yet exifted, or is likely prefently to exift upon the face of the earth, is faultles. No government ought therefore pertinaciously to refus the change of its own institutions; and still less ought it to set up a standard upon the various topics of human speculation, to restrain the excursions of an inventive mind. It is only by giving a free fcope to these excurfions, that fcience, philosophy and morals have arrived at their present degree of perfection, or are capable of going on to that still greater perfection, in comparison of which all that has been already done will perhaps appear childifh. But a proceeding, abfolutely neceffary for the purpose of exciting the mind to these falutary excursions, and still more necessary in order to give them their proper operation, confifts in the unrestrained communication of men's thoughts and discoveries to each other. If every man have to begin again at the point from which his neigh-

# 'RIGHTS OF MAN.

neighbour fet out, the labour will be endlefs, and the progrefs in an unvarying circle. There is nothing that more eminently contributes to intellectual energy, than for every man to be habituated to follow without alarm the train of his speculations, and to utter without fear the conclusions that have fuggested them- Conclusion. felves to him.—But does all this imply that men have a right to act any thing but virtue, and to utter any thing but truth ? Certainly not. It implies indeed that there are points with which fociety has no right to interfere, not that difcretion and caprice are more free, or duty less strict upon these points, than upon any others with which human action is conversant.

BOOK II. CHAP. VI. Foundation of virtue.

TO a rational being there can be but one rule of conduct, justice, and one mode of ascertaining that rule, the exercise of his understanding. If in any instance I be made the mechanical instrument of absolute violence, in that instance I fall under

PRIVATE JUDGMENT. OF

under no description of moral conduct either good or bad. But, if, not being operated upon by abfolute compulsion, I be wholly prompted by fomething that is frequently called by that name, and act from the hope of reward or the fear of punishment, my conduct is politively wrong.

Here however a diffinction is to be made. Justice, as it was defined in a preceding chapter, is coincident with utility. I am myfelf a part of the great whole, and my happiness is a part of that complex view of things by which justice is regulated. The hope of reward therefore and the fear of punifhment, confined within certain strict limits, are motives that ought to have influence with my mind.

There are two defcriptions of tendency that may belong to Human acany action, the tendency which it poffesses by the necessary and gulated, univerfal laws of existence, and the tendency which refults from ture of the politive interference of fome intelligent being. The nature of happiness and misery, pleasure and pain, is independent of all politive inflitution: that is, it is immutably true that whatever tends to procure a balance of the former is to be defired, and whatever tends to procure a balance of the latter is to be rejected. In like manner the promulgation of virtue, truth and political justice must always be right. There is perhaps no action of a rational being that has not fome tendency to promote these objects, and confequently that has not a moral character founded in the abstract nature of things.

tions are re-1. by the nathings :

R

The

I 2 I

BOOK II. CHAP.VI. CHAP. VI. 2. By pofitive inflitution. Tendency of the latter.

BOOK II.

The tendency of politive inftitution is of two forts, to furnish me with an additional motive to the practice of virtue or right, and to inform my understanding as to what actions are right and what actions are wrong. Much cannot be faid in commendation of either of these tendencies.

1. To excite virtue. Its equivocal character in this refpect.

First, positive institution may furnish me with an additional motive to the practice of virtue. I have an opportunity of contributing very effentially to the advantage of twenty individuals; they will be benefited, and no other perfons will fuftain a material injury. I ought to embrace this opportunity. Here let us suppose politive institution to interfere, and to annex some great perfonal reward to myfelf to the performance of my duty. This immediately changes the nature of the action. Before I preferred it for its intrinfic excellence. Now, fo far as the positive institution operates, I prefer it, because some person has arbitrarily annexed to it a great weight of felf-intereft. But virtue, confidered as the quality of an intelligent being, depends upon the difposition with which the action is accompanied. Under a politive inftitution then this very action, which is intrinfically virtuous, may, fo far as relates to the agent, become The vicious man would before have neglected the advicious. vantage of these twenty individuals, because he would not bring a certain inconvenience or trouble upon himfelf. The fame man with the fame difposition will now promote their advantage, becaufe his own welfare is concerned in it. Twenty, other things equal,

#### JUDGMENT. **O**F PRIVATE

equal, is twenty times better than one. He that is not governed BOOK II. by the moral arithmetic of the cafe, or who acts from a difpofition directly at war with that arithmetic, is unjust. In other words, morality requires that we should be attentive only to the tendency which belongs to any action by the neceffary and univerfal laws of existence. This is what is meant by the principle, " that we fhould do good, regardless of the confequences;" and by that other, "that we may not do evil, from the prospect of good to refult from it." The cafe would have been rendered ftill more glaring, if, instead of the welfare of twenty, we had fupposed the welfare of millions to have been concerned. In reality, whether the difparity be great or finall, the inference ought to be the fame.

Secondly, politive inftitution may inform my understanding 2. To inform as to what actions are right and what actions are wrong. Here ment. it is proper for us to reflect upon the terms understanding and for that purinformation. Understanding, particularly as it is concerned with moral fubjects, is the percipient of truth. This is its proper fphere. Information, fo far as it is genuine, is a portion detached from the great body of truth. You inform me, " that Euclid afferts the three angles of a plane triangle to be equal to two right angles." Still I am unacquainted with the truth of this propofition. " But Euclid has demonstrated it. His demonstration has exifted for two thousand years, and during that term has proved fatisfactory to every man by whom it has been underflood."

CHAP. VI.

Digitized by Google

I am

BOOK II. CHAP. VI. I am nevertheles uninformed. The knowledge of truth lies in the perceived agreement or difagreement of the terms of a proposition. So long as I am unacquainted with the middle term by means of which they may be compared, fo long as they are incommensurate to my understanding, you may have furnished me with a principle from which I may reason truly to farther confequences, but as to the principle itself I may flrictly be faid to know nothing about it.

Every proposition has an intrinsic evidence of its own. Every confequence has premises from which it flows; and upon them, and not upon any thing elfe, its validity depends. If you could work a miracle to prove, "that the three angles of a triangle were equal to two right angles," I should still know, that the proposition was either true or false previously to the exhibition of that miracle; and that there was no neceffary connection between any one of its terms and the miracle exhibited. The miracle would take off my attention from the true question to a question altogether different, that of authority. By the authority adduced I might be prevailed on to yield an irregular affent to the proposition; but I could not properly be faid to perceive its truth.

But this is not all. If it were, it might perhaps be regarded as a refinement foreign to the concerns of human life. Politive institutions do not content themselves with requiring my affent to

#### PRIVATE JUDGMENT. OF

to certain propositions, in confideration of the respectable testi- BOOK II. mony by which they are inforced. This would amount to no more, than advice flowing from a respectable quarter, which after all I might reject, if it did not accord with the mature judgment of my own underftanding. But in the very nature of these institutions there is included a fanction, a motive either of punishment or reward to induce me to obedience.

It is commonly faid, " that politive inftitutions ought to leave Province of me perfectly free in matters of confcience, but may properly in- confidered. terfere with my conduct in civil concerns." But this diffinction feems to have been very lightly taken up. What fort of moralift must he be, who makes no conficence of what passes in his intercourfe with other men? Such a diffinction proceeds upon the fuppolition, " that it is of great confequence whether I bow to the east or the west; whether I call the object of my worship Jehovah or Alla; whether I pay a prieft in a furplice or a black coat. These are points in which an honest man ought to be rigid and inflexible. But as to those other, whether he shall be a tyrant, a flave or a free citizen; whether he fhall bind himfelf with multiplied oaths impoffible to be performed, or be a rigid observer of truth; whether he shall swear allegiance to a king de jure or a king de facto, to the best or the worst of all possible governments; respecting these points he may fafely commit his conficience to the keeping of the civil magistrate." In reality there are perhaps no concerns of a rational being, over which

confeience

4

morality

CHAP. VI.

BOOK II. CHAP. VI. morality does not extend its province, and respecting which he is not bound to a confcientious proceeding.

Tendency of an interference with that province.

I am fatisfied at prefent, that a certain conduct, fuppofe it be a rigid attention to the confidence of private conversation, is incumbent upon me. You tell me, " there are certain cafes of fuch peculiar emergency as to fuperfede this rule." Perhaps I think there are not. If I admit your proposition, a wide field of enquiry is opened, refpecting what cafes do or do not deferve to be confidered as exceptions. It is little likely that we should agree refpecting all these cases. How then does the law treat me, for my conficientious difcharge of what I conceive to be my duty? Becaufe I will not turn informer (which, it may be, I think an infamous character) against my most valued friend, the law accufes me of misprision of treason, felony or murder, and perhaps hangs me. I believe a certain individual to be a confirmed villain, and a most dangerous member of fociety, and feel it to be my duty to warn others, perhaps the public, against the effect of his vices. Becaufe I publish what I know to be true, the law convicts me of libel, fcandalum magnatum, and crimes of I know not what complicated denomination.

If the evil ftopped here, it would be well. If I only fuffered a certain calamity, fuppofe death, I could endure it. Death has hitherto been the common lot of men, and I expect at fome time or other to fubmit to it. Human fociety must fooner or later be

## OF PRIVATE JUDGMENT.

be deprived of its individual members, whether they be valuable, or whether they be inconfiderable. But the punifhment acts not only retrofpectively upon me, but profpectively upon my contemporaries and countrymen. My neighbour entertains the fame opinion refpecting the conduct he ought to hold as I did. But the executioner of public juffice interpofes with a powerful argument, to convince him that he has miftaken the path of abstract rectitude.

What fort of converts will be produced by this unfeeling logic? " I have deeply reflected," fuppofe, " upon the nature of virtue, and am convinced that a certain proceeding is incumbent But the hangman, fupported by an act of parliament. on me. affures me I am mistaken." If I yield my opinion to his dictum. my action becomes modified, and my character too. An influence like this is inconfistent with all generous magnanimity of fpirit, all ardent impartiality in the difcovery of truth, and all inflexible perfeverance in its affertion. Countries, exposed to the perpetual interference of decrees inftead of arguments, exhibit within their boundaries the mere phantoms of men. We can never judge from an observation of their inhabitants what men would be, if they knew of no appeal from the tribunal of confcience, and if, whatever they thought, they dared to fpeak, and dared to act.

At present there will perhaps occur to the majority of readers but

BOOK II. CHAP. VI.

127

Digitized by Google

BOOK II. but few inflances of laws, which may be fuppofed to interfere CHAP. VI. with the confcientious difcharge of duty. A confiderable number will occur in the courfe of the prefent enquiry. More would readily offer themfelves to a patient refearch. Men are fo fuccefsfully reduced to a common flandard by the operation of pofitive law, that in most countries they are capable of little more than like parrots repeating each other. This uniformity is capable of being produced in two ways, by energy of mind and indefatigableness of enquiry, enabling a confiderable number to penetrate with equal fuccefs into the receffes of truth; and by pufillanimity of temper and a frigid indifference to right and wrong, produced by the penalties which are fufpended over fuch as shall difinterestedly enquire, and communicate and act upon the refult of their enquiries. It is eafy to perceive which of these is the cause of the uniformity that prevails in the present instance.

Recapitulation. If there be any truth more unqueftionable than the reft, it is, that every man is bound to the exertion of his faculties in the difcovery of right, and to the carrying into effect all the right with which he is acquainted. It may be granted that an infallible ftandard, if it could be difcovered, would be confiderably beneficial. But this infallible ftandard itfelf would be of little ufe in human affairs, unlefs it had the property of reafoning as well as deciding, of enlightening the mind as well as conftraining the body. If a man be in fome cafes obliged to prefer his own judg-

#### PRIVATE JUDGMENT. OF

judgment, he is in all cafes obliged to confult that judgment, before he can determine whether the matter in queftion be of the fort provided for or no. So that from this reafoning it ultimately appears, that no man is obliged to conform to any rule of conduct, farther than the rule is confistent with justice.

Such are the genuine principles of human fociety. Such Arguments would be the unconftrained concord of its members, in a flate positive inwhere every individual within the fociety, and every neighbour without, was capable of liftening with fobriety to the dictates of reafon. We shall not fail to be impressed with confiderable regret, if, when we defcend to the prefent mixed characters of mankind, we find ourfelves obliged in any degree to depart from fo fimple and grand a principle. The universal exercise of private judgment is a doctrine fo unfpeakably beautiful, that the true politician will certainly refolve to interfere with it as fparingly and in as few inftances as poffible. Let us confider what are the emergencies that may be thought to demand an exception. They can only be briefly flated in this place, each of them requiring to be minutely examined in the fubfequent ftages of the enquiry.

In the first place then it feems necessary for fome powerful 1. The necesarbitrator to interfere, where the proceedings of the individual ling private threaten the most injurious confequences to his neighbours, and where the inftant nature of the cafe will not accord with the

120

in favour of flitution :

S

BOOK II. CHAP. VI. uncertain progrefs of argument and conviction addreffed to the mind of the offender. A man, fuppofe, has committed murder, or, to make the cafe more aggravated, feveral murders; and, having thus far over-ftepped all those boundaries of innocence and guilt which reftrain the generality of men, it is to be prefumed from analogy that he may be led to the commission of other murders. At first it may appear to be no great infringement upon the exercise of private judgment, to put it under fome degree of reftraint, when it leads to the commission of atrocious crimes. There are however certain difficulties in the cafe which are worthy to be confidered.

**Objections**: First, as foon as we admit the propriety of a rule fuch as that above stated, our next concern will be with the evidence, which shall lead to the acquittal or conviction of the perfon accufed. Now it is well known, that no principles of evidence have yet the uncertainty of evibeen laid down that are infallible. Human affairs univerfally dence : proceed upon prefumption and probability. An eye-witnels must identify the perfon of the offender, and in this he may be miftaken. We must necessarily be contented with prefumptive proofs of his intention; and often are or imagine ourfelves to be obliged to admit prefumptive evidence of the fact itfelf. The confequence is inevitable. And furely it is no trivial evil, to fubject an innocent man eventually, to the public award and the effa-- blifhed punifhment annexed to the most atrocious crimes.

Secondly,

#### PRIVATE JUDGMENT. OF

Secondly, the fame external action will admit of every poffible shade of virtue or vice. One man shall commit murder, to remove a troublefome observer of his depraved dispositions, who will otherwife counteract and expose him to the world. A fecond, because he cannot bear the ingenuous fincerity with which he is told of his vices. A third, from his intolerable envy of fuperior merit. A fourth, because he knows his adversary meditates an act pregnant with extensive mischief, and he perceives no other mode by which its perpetration can be prevented. A fifth, in the actual defence of his father's life or his daughter's Each of these men, except perhaps the last, may act chaftity. either from momentary impulse, or from any of the infinite shades and degrees of deliberation. Would you award one individual punishment to all these varieties of action? Can you pretend in each inftance to afcertain the exact quantity of wrong, equivalent to each? Strictly fpeaking no two men were ever guilty of the fame crime; but here comes in politive law with its Procrustes's bed, and levels all characters, and tramples upon all distinctions.

Thirdly, punifhment is not the appropriate mode of correct- the unfuiting the errors of mankind. It will probably be admitted, that the means of the only true end of punishment is correction. That question will be difcuffed in another part of the prefent enquiry. " I have done fomething, which though wrong in itfelf, I believe to be right; or I have done fomething which I usually admit to be

S 2

BOOK II. CHAP. VI. the diverfity of motives :

ablenefs of correction :

wrong;

wrong; but my conviction upon the fubject is not fo clear and forcible, as to prevent my yielding to a powerful temptation." There can be no doubt, that the proper way of conveying to my underftanding a truth of which I am ignorant, or of impreffing upon me a firmer perfuation of a truth with which I am acquainted, is by an appeal to my reafon. Even an angry expoftulation with me upon my conduct will but excite fimilar paffions in me, and cloud inftead of illuminate my underftanding. There is certainly a way of expreffing truth, with fuch benevolence as to command attention, and fuch evidence as to inforce conviction in all cafes whatever.

either to imprefs new fentiments: Punifhment inevitably excites in the fufferer, and ought to excite, a fenfe of injuftice. Let its purpofe be to convince me of the truth of a proposition, which I at prefent believe to be falfe. It is not abstractedly confidered of the nature of an argument, and therefore it cannot begin with producing conviction. Punishment is a specious name, but is in reality nothing more than force put upon one being by another who happens to be ftronger. Now strength apparently does not conflitute juffice, nor ought " might," according to a trite proverb, to " overcome right." The case of punishment, which we are now confidering, is the case of you and I differing in opinion, and your telling me that you must be right, fince you have a more brawny arm, or have applied your mind more to the acquiring skill in your weapons than I have.

But

BOOK II.

CHAP. VI.

#### OF PRIVATE JUDGMENT.

But let us fuppole, " that I am convinced of my error, but BOOK II. CHAP. VI. that my conviction is fuperficial and fluctuating, and the object ortoiliength-you propole is to render it durable and profound." Ought it to en old ones. be thus durable and profound? There are no doubt arguments and reafons calculated to render it fo. Is it in reality problema\_ tical, and do you wifh by the weight of your blows to make up for the deficiency of your logic? This can never be de-An appeal to force must appear to both parties, in profended. portion to the foundness of their understanding, to be a confeffion of imbecility. He that has recourfe to it, would have no occasion for this expedient, if he were fufficiently acquainted with the powers of that truth it is his office to communicate. If there be any man, who, in fuffering punifhment, is not confcious of injuffice, he must have had his mind previously debafed by flavery, and his fenfe of moral right and wrong blunted by a feries of oppression.

The cafe is not altered for the better, if I fuffer punifhment, Punifhment not for my own correction, but for an example to others. Upon of example this fuppolition a new difficulty is introduced, respecting the propriety of one man's being fubjected to pain, for the fake of improving the character and eradicating the vices of another. The fuffering is here also involuntary. Now, though will cannot alter the nature of juffice, it must be admitted that the voluntary fufferer has at leaft one advantage over the involuntary, in the confcious liberality of his purpofe. He that fuffers, not for his

for the fake : conlidered. .

own.

Digitized by Google

133

own correction, but for the advantage of others, ftands, fo far as relates to that fuffering, in the fituation of an innocent perfon. If the fuffering had relation to him perfonally as a vicious or imperfect character, it must have relation to him in respect either to the past or the future. It cannot have relation to him as to the past, for that is concluded and beyond the reach of alteration or remedy. By the supposition it has not relation to him but to others as to the future.

It ought to be obferved in this place, that by innocence I do not underftand virtue. Innocence is a fort of neutral character, and ftands in the mid way between good and harm. Undoubtedly it were better, that a perfon ufelefs to focicty fhould be deftroyed than a man of eminent worth, and a perfon likely to prove injurious than either. I fay likely to prove injurious; for the fault already committed, being irrevocable, ought not to enter into the account, and we have nothing to do but with the probability of its repetition. It is in this fenfe that the fufferer ftands upon a level with many of those perfons, who are usually denominated innocent.

It must also be allowed, that there are cases in which it is proper that innocent men should fuffer for the public good. But this is a question of a very delicate nature, and the severe moralist will be very reluctant to condemn that man to die for the benessit of others, who is desirous to live.

BOOK II.

As

# OF PRIVATE JUDGMENT.

As to every other circumstance in the cafe of him who is BOOK II. punished for an example to others, it remains precifely the fame as when we fuppofed him to be punished for his own reformation. It is ftill an argument of the most exceptionable nature employed to correct the opinions of mankind. It is ftill a menace of violence made use of to perfuade them of the truth or falshood of -a proposition. It has little chance of making them wife, and can fcarcely fail of making them timid, diffembling and corrupt.

Notwithstanding all these objections, it would be difficult to Urgency of find a country, respecting which we could fay, that the inhabitants might with fafety be difmiffed from the operation of punishment. So mixed is human character, fo wild are its excursions, fo calamitous and deteftable are the errors into which it occafionally falls, that fomething more than argument feems neceffary for their suppression. Human beings are such tyros in the art of reasoning, that the wifest of us often prove impotent in our attempts, where an inftant effect was most powerfully wanted. While I ftand still to reason with the thief, the affassion or the oppression, they hasten to new scenes of devastation, and with unfparing violence confound all the principles of human fociety. I fhould obtain little fuccels by the abolition of punifhment, unlefs I could at the fame time abolifh those causes that generate temptation and make punishment neceffary. Meanwhile the arguments already adduced may be fufficient to fhew that punifiment .

the cafe.

3. War.

136

Objections.

The remaining cafes in which it may feem requifite to have recourfe to the general will of the fociety, and to fuperfede the private judgment of individuals, are, when we are called upon to counteract the hoftilities of an internal enemy, or to repel the attacks of a foreign invader. Here as in the former inflance the evils that arife from an ufurpation upon private judgment are many and various. It is wrong that I fhould contribute in any mode to a proceeding, a war for example, that I believe to be unjuft. Ought I to draw my fword, when the adverfary appears to me to be employed in repelling a wanton aggreffion? The cafe feems not to be at all different, if I contribute my property, the produce it may be of my perfonal labour; though cuftom has reconciled us to the one rather than the other.

The confequences are a degradation of character and a relaxation of principle, in the perfon who is thus made the inftrument of a transfaction, which his judgment difapproves. In this cafe, as has been already stated generally, the human mind is compressed and unnerved, till it affords us fearcely the femblance of what it might otherwise have been. And, in addition to the general confiderations in fimilar cafes, it may be observed, that the frequent and obstinate wars which at present defolate the human

## OF PRIVATE JUDGMENT.

human race would be nearly extirpated, if they were fupported CHAP. VI. only by the voluntary contributions of those by whom their prin-

The objection, which has hitherto been permitted practically Reply. to superfede these reasonings, is the difficulty of conducting an affair, in the fuccefs of which millions may be interested, upon fo precarious a fupport as that of private judgment. The men, with whom we are usually concerned in human fociety, are of fo mixed a character, and a felf-love of the narrowest kind is fo deeply rooted in many of them, that it feems nearly unavoidable upon the scheme of voluntary contribution, that the most generous would pay a very ample proportion, while the mean and avaricious, though they contributed nothing, would come in for their full share of the benefit. He that would reconcile a perfect freedom in this respect with the interest of the whole, ought to propole at the same time the means of extirpating felfishness and vice. How far fuch a propofal is feafible will come hereafter to be confidered.

good,

### SYSTEMS OF

BOOK III. CHAP. I. good, and to control the acts of the individual by an act to be performed in the name of the whole. It is therefore an interefting enquiry to afcertain in what manner fuch acts are to be originated, or in other words to afcertain the foundation of political government.

First hypothesis: government founded in fuperior ftrength. There are three hypothefes that have been principally maintained upon this fubject. First, the fystem of force, according to which it is affirmed, " that, inasmuch as it is necessary that the great mass of mankind should be held under the subjection of compulsory restraint, there can be no other criterion of that reftraint, than the power of the individuals who lay claim to its exercise, the foundation of which power exists in the unequal degrees, in which corporal strength and intellectual fagacity are distributed among mankind."

Second hypothefis: government jure divino. There is a fecond clafs of reafoners, who deduce the origin of all government from divine right, and affirm, " that, as men derived their existence from an infinite creator at first, so are they still subject to his providential care, and of consequence owe allegiance to their civil governors, as to a power which he has thought fit to set over them."

Third hypothefis: the focial contract. The third fyftem is that which has been most usually maintained by the friends of equality and justice; the fystem according to which the individuals of any fociety are supposed to have entered

Digitized by GOOGLE

entered into a contract with their governors or with each other. and which founds the rights of government in the confent of the governed.

The two first of these hypotheses may easily be dismissed. That of force appears to proceed upon the total negation of abftract and immutable justice, affirming every government to be right, that is possefiled of power sufficient to inforce its decrees. It puts a violent termination upon all political fcience; and feems intended to perfuade men, to fit down quietly under their prefent difadvantages, whatever they may be, and not exert themfelves to difcover a remedy for the evils they fuffer. The fecond The fecond. hypothesis is of an equivocal nature. It either coincides with the first, and affirms all existing power to be alike of divine derivation; or it must remain totally useless till a criterion can be found, to diffinguish those governments which are approved by God, from those which cannot lay claim to that fanction. The Criterion of criterion of patriarchal descent will be of no avail, till the true I. Patriarchal claimant and rightful heir can be difcovered. If we make utility 2. Juffice. and justice the test of God's approbation, this hypothesis will be liable to little objection; but then on the other hand little will be gained by it, fince those who have not introduced divine right into the argument, will yet readily grant, that a government which can be shewn to be agreeable to utility and justice, is a rightful government.

The first hy-

CHAP. I.

pothefis examined.

divine right. descent.

The

## SYSTEMS OF POLITICAL WRITERS.

BOOK III. CHAP. I.

The third hypothesis demands a more careful examination. If any error have infinuated itself into the support of truth, it becomes of particular confequence to detect it. Nothing can be of more importance, than to separate prejudice and mistake on the one hand, from reason and demonstration on the other. Whereever they have been confounded, the cause of truth must neceffarily be a sufferer. That cause, so far from being injured by the dissolution of the unnatural alliance, may be expected to derive from that dissolution an eminent degree of prosperity and lustre.

to the lateft posterity. But, if the contract must be renewed in each fucceffive generation, what periods must be fixed on for that purpose? And if I be obliged to submit to the established government till my turn comes to assert to it, upon what principle is that obligation founded? Surely not upon the contract into which my father entered before I was born?

What is the form of engagement ?

Secondly, what is the nature of the confent, in confequence of which I am to be reckoned the fubject of any particular government? It is ufually faid, " that acquiescence is fufficient; and that this acquiescence is to be inferred from my living quietly under the protection of the laws." But if this be true, an end is as effectually put to all political fcience, all difcrimination of better and worfe, as by any fystem invented by the most flavish fycophant that ever existed. Upon this hypothesis every government that is quietly fubmitted to is a lawful government, whether it be the usurpation of Cromwel or the tyranny of Caligula. Acquiescence is frequently nothing more than a choice on the part of the individual of what he deems the least evil. In many cafes it is not fo much as this, fince the peafant and the artifan, who form the bulk of a nation, however diffatisfied with the government of their country, feldom have it in their power to transport themselves to another. It is also to be observed upon the fystem of acquiescence, that it is in little agreement with the established opinions and practices of mankind. Thus what has been called the law of nations, lays least stress upon the allegiance

5

of

THE SOCIAL CONTRACT. OF

of a foreigner fettling among us, though his acquiefcence is cer- BOOK III. tainly most complete; while natives removing into an uninhabited region are claimed by the mother country, and removing into a neighbouring territory are punished by municipal law, if they take arms against the country in which they were born. Now furely acquiescence can fcarcely be construed into confent, while the individuals concerned are wholly unapprifed of the authority intended to be refted upon it. \*

Mr. Locke, the great champion of the doctrine of an original contract, has been aware of this difficulty, and therefore observes, that "a tacit confent indeed obliges a man to obey the laws of any government, as long as he has any pofferfions, or enjoyment of any part of the dominions of that government; but nothing can make a man a member of the commonwealth, but his actually entering into it by positive engagement, and express promife and compact. +" A fingular diffinction; implying upon the face of it, that an acquiescence, such as has just been defcribed, is fufficient to render a man amenable to the penal regulations of fociety; but that his own confent is neceffary to entitle him to its privileges.

A third objection to the focial contract will fuggeft itfelf, as Over how foon as we attempt to afcertain the extent of the obligation, even does the con-

long a period tract extend?

CHAP. II.

OF THE SOCIAL CONTRACT.

fuppofing it to have been entered into in the most folemn manner by every member of the community. Allowing that I am called upon, at the period of my coming of age for example, to declare my affent or diffent to any fystem of opinions or any code of practical inftitutes; for how long a period does this declaration bind me? Am I precluded from better information for the whole courfe of my life? And, if not for my whole life, why for a year, a week or even an hour? If my deliberate judgment or my real fentiment be of no avail in the cafe, inwhat fenfe can it be affirmed that all lawful government is: founded in my confent?.

To how great a variety of propositions?

But the queftion of time is not the only difficulty. If you: demand my affent to any proposition, it is neceffary that the proposition should be stated simply and clearly. So numerous are the varieties of human understanding, in all cafes where its independence and integrity are fufficiently preferved, that there is little chance of any two men coming to a precise agreement about ten fucceffive propositions that are in their own nature open to debate. What then can be more abfurd than to prefent to me the laws of England in fifty volumes folio, and call upon me to give an honess and uninfluenced vote upon their whole contents at once ?

Can it extend to laws hereafter to be made ? But the focial contract, confidered as the foundation of civil government, requires more of me than this. I am not only obliged

BOOK III.

СНАР. П.

#### THE SOCIAL CONTRACT. OF

obliged to confent to all the laws that are actually upon record, but to all the laws that shall hereafter be made. It was under this view of the fubject, that Rouffeau, in tracing the confequences of the focial contract, was led to affert, that " the great body of the people, in whom the fovereign authority refides, can neither delegate nor refign it. The effence of that authority," he adds, "is the general will; and will cannot be reprefented. It must either be the fame or another; there is no The deputies of the people cannot be its reprefenalternative. tatives; they are merely its attorneys. The laws, that the community does not ratify in perfon, are no laws, are nullities.\*"

The difficulty here flated has been endeavoured to be provided Addreffes of against by fome late advocates for liberty, in the way of addreffes fidered. of adhesion; addresses, originating in the various districts and departments of a nation, and without which no regulation of conflitutional importance is to be deemed valid. But this is a very inadequate and fuperficial remedy. The addreffers of courfe have feldom any other remedy than that above defcribed, of in-

\* " La souveraineté ne peut être representée, par la même raison qu'elle ne peut être alienée ; elle confiste effentiellement dans la volonté générale, et la volonté ne se reprefente point : elle est la même, ou elle est autre ; il n'y a point de milieu. Les deputés du peuple ne font donc point fes reprefentans, ils ne font que fes commisfaires; ils ne peuvent rien conclure definitivement. Toute loi que le pcuple en personne n'a pas ratifiée, est mulle ; ce n'est point une loi." Du Contract Social. Liv. III. Chap. xv. U 2 diferiminate

adhefion con-

147

BOOK III. HAP. II.

### OF THE SOCIAL CONTRACT.

diferiminate admiffion or rejection. There is an infinite difference between the first deliberation, and the fubsequent exercise of a negative. The former is a real power, the latter is feldom more than the shadow of a power. Not to add, that address are a most precarious and equivocal mode of collecting the sense of a nation. They are usually voted in a tumultuous and summary manner; they are carried along by the tide of party; and the signatures annexed to them are obtained by indirect and accidental methods; while multitudes of bystanders, unless upon fome extraordinary occasion, remain ignorant of or indifferent in to the transaction.

Power of a majority.

Laftly, if government be founded in the confent of the people<sub>y</sub>, it can have no power over any individual by whom that confent is refufed. If a tacit confent be not fufficient; ftill lefs can I be deemed to have confented to a meafure upon which I put an exprefs negative. This immediately follows from the obfervations of Rouffeau. If the people, or the individuals of whom the people is conflituted, cannot delegate their authority to a reprefentative; neither can any individual delegate his authority to a majority, in an affembly of which he is himfelf a member.. The rules by which my actions fhall be directed are matters of a confideration entirely perfonal; and no man can transfer to another the keeping of his confcience and the judging of his duties. But this brings us back to the point from which we fet out\_

BOOK ITT.

CHAP. II.

out. No confent of ours can diveft us of our moral capacity. This is a fpecies of property which we can neither barter nor refign; and of confequence it is impossible for any government to derive its authority from an original contract.

## CHAP. III.

### OF PROMISES.

-THE VALIDITY OF PROMISES EXAMINED.—SHEWN TO BE IN-CONSISTENT WITH JUSTICE.—TO BE FOREIGN TO THE GENERAL GOOD.—OF THE EXPECTATION EXCITED.—THE FULFILLING EXPECTATION DOES NOT IMPLY THE VALL-DITY OF A PROMISE.—CONCLUSION.

BOOK III. The validity of promifes examined. THE whole principle of an original contract proceeds upon the obligation under which we are placed to obferve our promifes. The reafoning upon which it is founded is, " that we have promifed obedience to government, and therefore are bound to obey." It may confequently be proper to enquire into the nature of this obligation to obferve our promifes.

Shewn to be inconfiftent with juffice : We have already eftablished justice as the fum of moral and political duty. Is justice then in its own nature precarious or immutable? Surely immutable. As long as men are men, the conduct I am bound to observe respecting them must remain the fame. A good man must always be the proper object of my fupport and cooperation; vice of my censure; and the vicious man of instruction and reform.

What

#### PROMISES. OF

What is it then to which the obligation of a promife applies? BOOK III. What I have promifed is either right, or wrong, or indifferent. There are few articles of human conduct that fall under the latter class; and the greater shall be our improvements in moral science the fewer still will they appear. Omitting these, let us then confider only the two preceding claffes. "I have promifed to do fomething just and right." This certainly I ought to perform. Why? Not becaufe I promifed, but becaufe juffice prefcribes it. " I have promifed to beftow a fum of money upon fome good and refpectable purpofe. In the interval between the promife and my fulfilling it, a greater and nobler purpose offers itself, and calls with an imperious voice for my cooperation." Which ought I to prefer? That which best deferves my preference. A promife can make no alteration in the cafe. I ought to be guided by the intrinsic merit of the objects, and not by any external and foreign confideration. No engagements of mine can change. their intrinsic claims.

All this must be exceedingly plain to the reader who has followed me in my early reafonings upon the nature of juffice. If every fhilling of our property, every hour of our time and every faculty of our mind, have already received their deftination from the principles of immutable justice, promises have no department left upon which for them to decide. Justice it appears therefore ought to be done, whether we have promised it or not. If we discover any thing to be unjust, we ought to abstain from it, with whatever.

151

BOOK III. ever folemnity we have engaged for its perpetration. We were CHAP. III. erroneous and vicious when the promife was made; but this affords no fufficient reafon for its performance.

to be foreign to general good.

But it will be faid, " if promises be not made, or when made be not fulfilled, how can the affairs of the world be carried on ?" By rational and intelligent beings acting as if they were rational and intelligent. A promise would perhaps be fufficiently innocent, if it were underflood merely as declaratory of intention, and not as precluding farther information. Even in this reftrained fense however it is far from being generally necessary. Why fhould it be fupposed that the affairs of the world would not go on fufficiently well, though my neighbour could no farther depend upon my affiftance than it appeared rational to grant it? This would be a fufficient dependence if I were honeft, nor would he if he were honest defire any thing more. If I were difhonest, if I could not be bound by the reason and justice of the cafe, it would afford him a flender additional dependence to call in the aid of a principle founded in prejudice and mistake: not to fay, that, let it afford ever fo great advantage in any particular cafe, the evil of the immoral precedent would outweigh the individual advantage.

It may be farther objected, " that this principle might be fufficiently fuited to a better and more perfect flate of fociety, but that at prefent there are diffioneft members of the community, who

#### PROMISES. N F

who will not perform their duty, if they be not bound to it by BOOK III. some groffer motive, than the mere moral confideration." Be This is a queftion altogether different from that we have it fo. been examining. We are not now enquiring whether the community ought to animadvert upon the errors of its members. This animadversion the upright man is not backward to encounter, and willingly rifks the penalty, which the fociety (for the fociety is more competent to afcertain the just amount of the penalty than the preceding caprice of the parties) has awarded in cafes apparently fimilar, if he conceive that his duty requires from him that rifk.

But to return to the cafe of promifes. I shall be told, that, Of the expec " in choosing between two purposes about which to employ my ted. money, my time or my talents, my promife may make an effential difference, and therefore having once been given ought to be fulfilled. The party to whom it was made has had expectations excited in him, which I ought not to difappoint; the party to whom I am under no engagement has no fuch difappointment to encounter." What is this tenderness to which I am bound, this expectation I must not dare to disappoint? An expectation that I should do wrong, that I should prefer a less good to a greater, that I should commit absolute evil; for such must be the refult when the balance has been struck. "But his expectation has altered the nature of his fituation, has engaged him in

X

under-

CHAP. III.

154

BOOK III. CHAP. III. undertakings from which he would otherwife have abstained." Be it fo. He and all other men will be taught to depend more upon their own exertions, and less upon the affistance of others, which caprice may refuse, or justice oblige me to withhold. He and all others will be taught to acquire fuch merit, and to engage in fuch pursuits, as shall oblige every honest man to come to their fuccour, if they should stand in need of affistance. The resolute execution of justice, without listening to that false pity, which, to do imaginary kindness to one, would lead us to injure the whole, would in a thousand ways increase the independence, the energies and the virtue of mankind.

The fulfilling expectation does not imply the validity of a promife.

Let us however fuppofe, "that my conduct ought to be influenced by this previous expectation of the individual." Let us fuppofe, "that, in felecting an individual for a certain office, my choice ought not to be governed merely by the abftract fitnefs of the candidates, but that I ought to take into the account the extreme value of the appointment from certain circumftances to one of the candidates, and its comparative inutility to the other." Let us farther fuppofe, "that the expectation excited in one of them has led him into fludies and purfuits to qualify himfelf for the office, which will be ufelefs if he do not fucceed to it; and that this is one of the confiderations which ought to govern my determination."—All this does not come up to what we have been taught refpecting the obligation of a promife.

2

For,

For, first, it may be observed, that it seems to be of little conlequence in this flatement, whether the expectation were excited by a direct promife or in fome other manner, whether it were excited by a declaration of mine or of a third perfon, or laftly, whether it arole fingly out of the reason of the case and the pure deductions and reflections of the expecter's mind. Upon every one of these suppositions his conduct, and the injury he may fustain from a disappointment, will remain the fame. Here then all that has been commonly underftood by the obligation of a promife is excluded. The motive to be attended to, flows from no folemn engagement of mine, but from an incidental confequence of my declaration, and which might just as eafily have been the confequence of many other circumstances. The confideration by which it becomes me to be influenced is, not a regard for veracity, or a particular defire to preferve my integrity, both of which are in reality wholly unconcerned in the transaction, but an attention to the injury to be fuftained by the lofing candidate, whatever might be the original occasion of the conduct out of which the injury has proceeded.

Let us take an example of a ftill fimpler nature. "I live in Weftminfter; and I engage to meet the captain of a fhip from Blackwal at the Royal Exchange. My engagement is of the nature of information to him, that I fhall be at the Exchange at a certain hour. He accordingly lays afide his other bufinefs, and comes thither to meet me." This is a reafon why I fhould X 2

BOOK III. CHAP. III.

not fail him unlefs for fome very material caufe. But it would feem as if the reafon why I should not fail him would be equally cogent, if I knew from any other fource that he would be there, and that a quantity of convenience equal to the quantity upon the former supposition would accrue from my meeting him. It may be faid, "that it is effential to various circumstances of human intercourfe, that we should be able to depend on each other for a steady adherence to engagements of this fort." The statement however would be fomewhat more accurate if we faid, "that it was effential to various circumstances of human intercourfe, that we should be known to bestow a steady attention upon the quantities of convenience or inconvenience, of good or evil, that might arise to others from our conduct."

Conclusion.

It is undoubtedly upon this hypothefis a part of our duty to make as few promifes or declarations exciting appropriate expectations as poffible. He who lightly gives to another the idea that he will govern himfelf in his future conduct, not by the views that fhall be prefent to his mind when the conduct fhall come to be determined on, but by the view he fhall be able to take of it at fome preceding period, is vicious in fo doing. But the obligation he is under refpecting his future conduct is, to act juftly, and not, because he has committed one error, for that reason to become guilty of a fecond.

### CHAP. IV.

### OF POLITICAL AUTHORITY.

COMMON DELIBERATION THE TRUE FOUNDATION OF GO-VERNMENT-PROVED FROM THE EQUAL CLAIMS OF MANKIND-FROM THE NATURE OF OUR FACULTIES-FROM THE OBJECT OF GOVERNMENT-FROM THE EF-FECTS OF COMMON DELIBERATION .- DELEGATION VIN-DICATED. ---- DIFFERENCE BETWEEN THE DOCTRINE HERE MAINTAINED AND THAT OF A SOCIAL CONTRACT AP-PARENT-FROM THE MERELY PROSPECTIVE NATURE OF THE FORMER-FROM THE NULLITY OF PROMISES--FROM THE FALLIBILITY OF DELIBERATION. -- CONCLUSION.

AVING rejected the hypothefes that have most generally BOOK III. been adduced to account for the origin of government confistently with the principles of moral justice, let us enquire whether we may not arrive at the fame object, by a fimple investigation of the obvious reason of the case, without having recourse to any refinement of fystem or fiction of process.

Government then being introduced for the reasons already Common deaffigned, the first and most important principle that can be ima- true foundagined relative to its form and structure, feems to be this; that, as vernment:

liberation the. tion of go-

### government

# OF POLITICAL AUTHORITY.

BOOK III. government is a transaction in the name and for the benefit of the whole, every member of the community ought to have fome fhare in its administration. The arguments in support of this proposition are various.

proved from the equal claims of mankind :

1. It has already appeared that there is no criterion perfpicuoufly defignating any one man or fet of men to prefide over the reft.

from the nature of our faculties : 2. All men are partakers of the common faculty reafon, and may be fuppofed to have fome communication with the common preceptor truth. It would be wrong in an affair of fuch momentous concern, that any chance for additional wifdom fhould be rejected; nor can we tell in many cafes till after the experiment how eminent any individual may one day be found in the bufinefs of guiding and deliberating for his fellows.

from the object of government : 3. Government is a contrivance inftituted for the fecurity of individuals; and it feems both reafonable that each man should have a share in providing for his own fecurity, and probable that partiality and cabal should by this means be most effectually excluded.

from the effects of common deliberation.

4. Laftly, to give each man a voice in the public concerns comes nearest to that admirable idea of which we should never lose fight, the uncontrolled exercise of private judgment. Each man would thus be inspired with a conscious field of his own importance,

# OF POLITICAL AUTHORITY.

ance, and the flavish feelings that shrink up the foul in the pre-BOOK III. CHAP. IV. fence of an imagined fuperior would be unknown.

Admitting then the propriety of each man having a share in directing the affairs of the whole in the first instance, it feems neceffary that he should concur, in electing a house of representatives, if he be the member of a large state; or, even in a small one, that he should affist in the appointment of officers and administrators; which implies, first, a delegation of authority to these officers, and, secondly, a tacit consent, or rather an admission of the neceffity, that the questions to be debated should abide the decision of a majority.

But to this fystem of delegation the same objections may be Delegation urged, that were cited from Rouffeau in the chapter of the Social Contract. It may be alleged that, "if it be the bufinefs of every man to exercife his own judgment, he can in no inftance furrender this function into the hands of another."

To this objection it may be answered, first, that the parallel is by no means complete between an individual's exercife of his judgment in a cafe that is truly his own, and his exercife of his judgment in an article where the neceffity and province of government are already admitted. Wherever there is a government, there must be a will superfeding that of individuals. It is abfurd

vindicated.

to

#### POLITICAL AUTHORITY. **O**F

BOOK III. to expect that every member of a fociety fhould agree with every other member in the various measures it may be found neceffary The fame neceffity, that requires the introduction of to adopt. force to suppress injustice on the part of a few, requires that the fentiments of the majority should direct that force, and that the minority should either secede, or patiently wait for the period when the truth on the fubject contested shall be generally underftood.

> Secondly, delegation is not, as at first fight it might appear to be, the act of one man committing to another a function, which frictly speaking it became him to exercise for himself. Delegation, in every inftance in which it can be reconciled with juffice, is an act which has for its object the general good. The individuals to whom the delegation is made, are either more likely from talents or leifure to perform the function in the most eligible manner, or at least there is fome public interest requiring that it fhould be performed by one or a few perfons, rather than by every individual for himfelf. This is the cafe, whether in that first and fimplest of all delegations the prerogative of a majority. or in the election of a houfe of reprefentatives, or in the appointment of public officers. Now all contest as to the perfon who shall exercise a certain function, and the propriety of refigning it, is frivolous, the moment it is decided how and by whom it can most advantageously be exercised. It is of no consequence that

160

CHAP. IV.

#### POLITICAL AUTHORITY. OF

that I am the parent of a child, when it has once been afcertain-CHAP. IV. ed that the child will receive greater benefit by living under the fuperintendence of a ftranger.

Laftly, it is a miltake to imagine that the propriety of reftraining me when my conduct is injurious, rifes out of any delegation The justice of employing force when every other of mine. means was infufficient, is even prior to the existence of society. Force ought never to be reforted to but in cafes of absolute neceffity; and, when fuch cafes occur, it is the duty of every man to defend himfelf from violation. There is therefore no delegation neceffary on the part of the offender; but the community in the cenfure it exercises over him stands in the place of the injured party.

It may perhaps by fome perfons be imagined, that the doctrine Difference here delivered of the juffice of proceeding in common concerns by a common deliberation, is nearly coincident with that other doctrine which teaches that all lawful government derives its tract appaauthority from a focial contract. Let us confider what is the true difference between them.

In the first place, the doctrine of common deliberation is of a from the prospective, and not a retrospective nature. Is the question refpecting fome future measure to be adopted in behalf of the former: community? Here the obligation to deliberate in common pre-

fents

## OF POLITICAL AUTHORITY.

fents itfelf, as eminently to be preferred to every other mode of deciding upon the interefts of the whole. Is the queftion whether I shall yield obedience to any measure already promulgated ? Here I have nothing to do with the confideration of how the measure originated; unless perhaps in a country where common deliberation has in fome fort been admitted as a standing principle, and where the object may be to result an innovation upon this principle. In the case of ship money under king Charles the first, it was perhaps fair to result the tax, even supposing it to be abstractedly a good one, upon account of the authority imposing it; though that reason might be insufficient, in a country unused to representative taxation.

Exclusively of this confideration, no measure is to be refifted on account of the irregularity of its derivation. If it be just, it is entitled both to my chearful submission and my zealous support. So far as it is deficient in justice, I am bound to refist. My fituation in this respect is in no degree different from what it was previously to all organised government. Justice was at that time entitled to my affent, and injustice to my disapprobation. They can never cease to have the same claims upon me, till they shall cease to be distinguissed by the same unalterable properties. The measure of my resistance will however vary with circumstances, and therefore will demand from us a separate examination.

## Secondly,

162

BOOK III.

CHAP. IV.

#### POLITICAL AUTHORITY. OF

Secondly, the diffinction between the doctrine here advanced BOOK III. and that of a focial contract will be better underftood, if we recollect what has been faid upon the nature and validity of pro-If promife be in all cafes a fallacious mode of binding a miles. man to a specific mode of action, then must the argument be in all cafes impertinent, that I confented to fuch a decifion, and am therefore bound to regulate myfelf accordingly. It is impoffible to imagine a principle of more injurious tendency, than that which shall teach me to difarm my future wildom by my past folly, and to confult for my direction the errors in which my ignorance has involved me, rather than the code of eternal truth. So far as confent has any validity, abstract justice becomes a matter of pure indifference : fo far as justice deferves to be made the guide of my life, it is in vain to endeavour to fhare its authority with compacts and promifes.

We have found the parallel to be in one respect incomplete from the between the exercise of these two functions, private judgment deliberation. and common deliberation. In another refpect the analogy is exceedingly ftriking, and confiderable perfpicuity will be given to our ideas of the latter by an illustration borrowed from the In the one cafe as in the other there is an obvious former. principle of juffice in favour of the general exercife. No individual can arrive at any degree of moral or intellectual improvement, unless in the use of an independent judgment. No ftate

#### v. CHAP.

#### LEGISLATION. OF

# SOCIETY CAN DECLARE AND INTERPRET, BUT CANNOT ENACT .--- ITS AUTHORITY ONLY EXECUTIVE.

AVING thus far investigated the nature of political func-BOOK III. CHAP. V. tions, it feems necessary that fome explanation should be given in this place upon the fubject of legiflation. Who is it that has the authority to make laws? What are the characteriftics by which that man or body of men is to be known, in whom the faculty is vefted of legiflating for the reft?

Society can declare and interpret, but cannot enact.

To these questions the answer is exceedingly simple: Legislation, as it has been usually underftood, is not an affair of human competence. Reafon is the only legislator, and her decrees are irrevocable and uniform. The functions of fociety extend, not to the making, but the interpreting of law; it cannot decree, it can only declare that, which the nature of things has already decreed, and the propriety of which irrefiftibly flows from the circumstances of the cafe. Montesquieu fays, that " in a free flate

#### LEGISLATION. OF

state every man will be his own legislator \*." This is not true, fetting apart the functions of the community, unless in the limited fense already explained. It is the office of confcience to determine, " not like an Afiatic cadi, according to the ebbs and flows of his own paffions, but like a British judge, who makes no new law, but faithfully declares that law which he finds already written +."

The fame diffinction is to be made upon the fubject of autho- Its authority rity. All political power is strictly speaking executive. It has tive. appeared to be neceffary, with respect to men as we at present find them, that force fhould fometimes be employed in reprefing injustice; and for the fame reasons it appears that this force should as far as possible be vested in the community. To the public support of justice therefore the authority of the community extends. But no fooner does it wander in the smallest degree from the great line of juffice, than its authority is at an end, it ftands upon a level with the obscurest individual, and every man is bound to refift its decifions.

### OF OBEDIENCE.

OBEDIENCE NOT THE CORRELATIVE OF AUTHORITY.—NO MAN BOUND TO YIELD OBEDIENCE TO ANOTHER.—CASE OF SUBMISSION CONSIDERED.—FOUNDATION OF OBEDI-ENCE.—USEFULNESS OF SOCIAL COMMUNICATION.—CASE OF CONFIDENCE CONSIDERED.—ITS LIMITATIONS.— MIS-CHIEF OF UNLIMITED CONFIDENCE.—SUBJECTION EX-PLAINED.

BOOK III. CHAP. VI. HAP. VI. H

Obedience not the correlative of authority. The true folution will probably be found in the obfervation that obedience is by no means the proper correlative. The object of government, as has been already demonstrated, is the exertion of force. Now force can never be regarded as an appeal to the understanding; and therefore obedience, which is an act

#### OBEDIENCE. OF

BOOK III. act of the understanding or will, can have no legitimate connection with it. I am bound to fubmit to justice and truth, becaufe they approve themfelves to my judgment. I am bound to co-operate with government, as far as it appears to me to coincide with these principles. But I submit to government when I think it erroneous, merely becaufe I have no remedy.

No truth can be more fimple, at the fame time that no truth No man has been more darkened by the gloffes of interefted individuals, yield obedithan that one man can in no cafe be bound to yield obedience another. to any other man or fet of men upon earth.

There is one rule to which we are univerfally bound to conform ourfelves, justice, the treating every man precifely as his usefulness and worth demand, the acting under every circumfance in the manner that shall procure the greatest quantity of general good. When we have done thus, what province is there left to the disposal of obedience?

I am fummoned to appear before the magistrate to answer Cafe of fubfor a libel, an imaginary crime, an act which perhaps I am convinced ought in no cafe to fall under the animadversion of law. I comply with this fummons. My compliance proceeds, perhaps from a conviction that the arguments I shall exhibit in the court form the best refistance I can give to his injustice, or perhaps

 $\mathbf{Z}$ 

bound to ence to

miffion confidered.

CHAP. VI.

from

### OF OBEDIENCE.

BOOK III. from perceiving that my non-compliance would frivoloufly and without real use interrupt the public tranquillity.

A quaker refules to pay tithes. He therefore fuffers a tithe proctor to diffrain upon his goods. In this action morally fpeaking he does wrong. The diffinction he makes is the argument of a mind that delights in trifles. That which will be taken from me by force, it is no breach of morality to deliver with my own hand. The money which the robber extorts from me, I do not think it neceffary to oblige him to take from my perfon. If I walk quietly to the gallows, this does not imply my confent to be hanged.

In all these cases there is a clear diffinction between my compliance with justice and my compliance with injustice. I conform to the principles of justice, because I perceive them to be intrinsically and unalterably right. I yield to injustice, though I perceive that to which I yield to be abstractedly wrong, and only choose the least among inevitable evils.

Foundation of obedience. The cafe of volition, as it is commonly termed, feems parallel to that of intellect. You prefent a certain proposition to my mind, to which you require my affent. If you accompany the proposition with evidence calculated to shew the agreement between the terms of which it confists, you may obtain my affent.

Ţ

If

#### OBEDIENCE. O F

If you accompany the proposition with authority, telling me that you have examined it and find it to be true, that thoufands of wife and difinterefted men have admitted it, that angels or Gods have affirmed it, I may affent to your authority; but, with refpect to the proposition itself, my understanding of its reafonablenefs, my perception of that in the proposition which ftricily speaking conflitutes its truth or its falshood, remain just I believe fomething elfe, but I do not believe the as they did. propolition.

Just fo in morals. I may be perfuaded of the propriety of yielding compliance to a requisition the justice of which I cannot difcern, as I may be perfuaded to yield compliance to a requifition which I know to be unjust. But neither of these requisitions is strictly speaking a proper subject of obedience. Obedience feems rather to imply the unforced choice of the mind and affent of the judgment. But the compliance I yield to government, independently of my approbation of its meafures, is of the fame fpecies as my compliance with a wild beaft, that forces me to run north, when my judgment and inclination prompted me to go fouth.

But, though morality in its pureft conftruction altogether Ulefulnels of excludes the idea of one man's yielding obedience to another, munication. yet the greatest benefits will refult from mutual communication. There is fcarcely any man, whofe communications will not

172

fometimes enlighten my judgment and rectify my conduct. But the perfons to whom it becomes me to pay particular attention in this refpect, are not fuch as may exercise any particular magistracy, but fuch, whatever may be their station, as are wifer or better informed in any respect than myself.

Cafe of confidence confidered.

There are two ways in which a man wifer than myfelf may be of use to me; by the communication of those arguments by which he is convinced of the truth of the judgments he has formed; and by the communication of the judgments themfelves independent of argument. This laft is of use only in refpect to the narrowness of our own understandings, and the time that might be requisite for the acquisition of a science of which we are at prefent ignorant. On this account I am not to be blamed, if I employ a builder to construct me a house, or a mechanic to fink me a well; nor fhould I be liable to blame, if I worked in perfon under their direction. In this cafe, not having opportunity or ability to acquire the fcience myfelf, I trust to the science of another. I choose from the deliberation of my own judgment the end to be purfued; I am convinced that the end is good and commendable; and, having done this, I commit the felection of means to a perfon whofe qualifications are fuperior to my own. The confidence reposed in this infance is precifely of the nature of delegation in general. No term furely can be more unapt than that of obedience, to express our duty towards the overfeer we have appointed in our affairs.

, Similar

#### OBEDIENCE. OF

Similar to the confidence I repose in a skilful mechanic is the BOOK III. attention which ought to be paid to the commander of an army. It is my duty in the first place to be fatisfied of the goodness of the caufe, of the propriety of the war, and of the truth of as many general propositions concerning the conduct of it, as can possibly be brought within the fphere of my understanding. It may well be doubted whether fecrecy be in any degree neceffary to the conduct of war. It may be doubted whether treachery and furprife are to be claffed among the legitimate means of defeating our adversary. But after every deduction has been made for confiderations of this fort, there will still remain cafes, where fomething must be confided, as to the plan of a campaign or the arrangement of a battle, to the skill, so far as that skill really exists, of the commander. When he has explained both to the utmost of his ability, there may remain parts, the propriety of which I cannot fully comprehend, but which I have fufficient reason to confide to his judgment.

This doctrine however of limited obedience, or, as it may Its limitamore properly be termed, of confidence and delegation, ought to be called into action as feldom as poffible. Every man should discharge to the utmost practicable extent the duties which arise from his fituation. If he gain as to the ability with which they may be difcharged, when he delegates them to another, he lofes with respect to the fidelity; every one being conscious of the fincerity of his own intention, and no one having equal proof of

CHAP. VI.

## OF OBEDIENCE.

BOOK III. CHAP. VI.

of that of another. A virtuous man will not fail to perceive the obligation under which he is placed to exert his own underftanding, and to judge for himfelf as widely as his circumftances will permit.

• Mitchief of unlimited considence.

The abufe of the doctrine of confidence has been the fource of more calamities to mankind than all the other errors of the human underflanding. Depravity would have gained little ground in the world, if every man had been in the exercife of his independent judgment. The inftrument by which extensive mifchiefs have in all ages been perpetrated has been, the principle of many men being reduced to mere machines in the hands of a few. Man, while he confults his own understanding, is the ornament of the univerfe. Man, when he furrenders his reafon, and becomes the partifan of implicit faith and paffive obedience, is the most mischievous of all animals. Ceasing to examine every proposition that comes before him for the direction of his conduct, he is no longer the capable fubject of moral inftruction. He is, in the inftant of fubmiffion, the blind inflrument of every nefarious purpose of his principal; and, when left to himself, is open to the feduction of injuffice, cruelty and profligacy.

Subjection explained. These reasonings lead to a proper explanation of the word fubject. If by the fubject of any government we mean a person whose duty it is to obey, the true inference from the preceding principles is, that no government has any fubjects. If on the contrary

# OF OBEDIENCE.

contrary we mean a perfon, whom the government is bound to protect, or may juftly reftrain, the word is fufficiently admiffible. This remark enables us to folve the long-difputed queffion, what it is that conflitutes a man the fubject of any government. Every man is in this fenfe a fubject, whom the government is competent to protect on the one hand, or who on the other, by the violence of his proceedings, renders force requifite to prevent him from diffurbing that community, for the prefervation of whofe peace. the government is inflituted.

### APPENDIX.

MORAL PRINCIPLES FREQUENTLY ELUCIDATED BY INCI-DENTAL REFLECTION-BY INCIDENTAL PASSAGES IN VARIOUS AUTHORS.--EXAMPLE.

CHAP. VI. APPENDIX. Moral principles frequently elucidated by incidental reflection :

BOOK III.

I will generally be found that, even where the truth upon any fubject has been most industriously obscured, its occafional irradiations have not been wholly excluded. The mind has no fooner obtained evidence of any new truth, especially in the fcience of morals, but it recollects numerous intimations of that truth which have occasionally fuggested themselves, and is associated that a discovery which was perpetually upon the eve of being made, should have been kept at a distance fo long.

by incidental paffages in various authors. This is eminently the cafe in the fubject of which we are treating. Those numerous passages in poets, divines \* and philosophers, which have placed our unalterable duty in the strongest contrast with the precarious authority of a superior, and have taught us to disclaim all subordination to the latter, have always been received by the ingenuous mind with a tumult of applause. There is indeed no species of composition, in which the feeds of

• "Be not afraid of them that kill the body, and after that have no more that they can do." Luke, Ch. XII. Ver. 4.

a morality

### OF OBEDIENCE.

a morality too perfect for our prefent improvements in fcience, may more reasonably be expected to discover themselves, than in works of imagination. When the mind fhakes off the fetters of prefcription and prejudice, when it boldly takes a flight into the world unknown, and employs itfelf in fearch of those grand and interefting principles which shall tend to impart to every reader the glow of enthusias it is at such moments that the enquiring and philosophical reader may expect to be prefented with the materials and rude fketches of intellectual improvement\*.

Among the many paffages from writers of every denomina- Example. tion that will readily fuggest themselves under this head to a well informed mind, we may naturally recollect the fpirited reafoning of young Norval in the tragedy of Douglas, when he

• This was the opinion of the celebrated Mr. Turgot. "He thought that the moral fentiments of mankind might be confiderably firengthened, and the perception of them rendered more delicate and precife, either by frequent exercife, or the perpetually fubjecting them to the anatomy of a pure and enlightened understanding. For this reafon he confidered romances as holding a place among treatifes of morality, and even as the only books in which he was aware of having feen moral principles treated in an impartial manner." " M. Turgot penfoit qu'on peut parvenir à fortifier dans les hommes leurs fentimens moraux, à les rendre plus délicats et plus jusies, soit par l'exercice de ces sentimens, soit en apprenant à les soumettre à l'analyse d'une raison saine et éclairée. C'est par ce motif qu'il regardoit les romans comme des livres de morale, et même, dijoit-il, comme les seuls où il eut vu de la morale."

BOOK III. CHAP. VI. Appendix.

a. is called upon by lord Randolph to flate the particulars of a
conteft in which he is engaged, that lord Randolph may be
able to decide between the disputants.

"Nay, my good lord, though I revere you much, My caufe I plead not, nor demand your judgment. To the liege lord of my dear native land I owe a fubject's homage; but even him And his high arbitration I reject. Within my bofom reigns another lord— Honour; fole judge and umpire of itfelf."

ACT IV.

Nothing can be more accurate than a confiderable part of the philofophy of this paffage. The term "honour" indeed has been too much abufed, and prefents to the mind too fantaftical an image, to be fairly defcriptive of that principle by which the actions of every intellectual being ought to be regulated. The principle to which it behoves us to attend, is the internal decifion of our own underftanding; and nothing can be more evident than that the fame reafoning, which led Norval to reject the authority of his fovereign in the quarrels and difputes in which he was engaged, ought to have led him to reject it as the regulator of any of his actions, and of confequence to abjure that homage which he fets out with referving. Virtue cannot poffibly be meafured by the judgment and good pleafure of any man with whom we are concerned.

### OF FORMS OF GOVERNMENT.

flownefs and complication of Dutch formality to the phlegmatic Hollander; and the fplendour of the grand monarque to the. vivacity of Frenchmen. Among the ancients what could be better afforted than a pure democracy to the intellectual acutenefs and impetuous energy of the Athenians; while the hardy and unpolifhed Spartan flourifhed much more under the rugged and inflexible difcipline of Lycurgus? The great art of the legislator is to penetrate into the true character of the nation with whom he is concerned, and to difcover the exact ftructure of government which is calculated to render that nation flourishing and happy." Accordingly an Englishman who should reason upon these postulata might fay, "It is not necessary L fhould affert the English constitution to be the happiest and fublimest conception of the human mind; I do not enquire intothe abstract excellence of that government under which France made herfelf illustrious for centuries. I contemplate with enthusiafm the venerable republics of Greece and Rome. But I am an enemy to the removing ancient land-marks, and diffurbing with our crude devices the wildom of ages. I regard with horror the Quixote plan, that would reduce the irregular greatnefs of nations to the frigid and impracticable standard of metaphyfical accuracy\*."

This

\* These arguments bear fome resemblance to those of Mr. Burke. It was not necessary that they should do so precisely, or that we should take advantage of the argumentum ad bominem built upon his fervent admiration of the English

BOOK III.

CHAP. VII.

Digitized by Google

This question has been anticipated in various parts of the BOOK III. CHAP. VII. prefent work; but the argument is fo popular and plaufible to a fuperficial view, as justly to entitle it to a separate examination.

The idea bears fome refemblance to one which was formerly compared infifted upon by certain latitudinarians in religion. "It is gument in faimpious," faid they, " to endeavour to reduce all men to uni- riety of reliformity of opinion upon this fubject. Men's minds are as various as their faces. God has made them fo; and it is to be prefumed that he is well pleafed to be addreffed in different . languages, by different names, and with the confenting ardour of difagreeing fects." Thus did these reasoners confound the majefty of truth with the deformity of falfhood; and suppose that that being who was all truth, took delight in the errors, the abfurdities, and the vices, for all falfhood in fome way or other engenders vice, of his creatures. At the fame time they were employed in unnerving that activity of mind, which is the fingle fource of human improvement. If truth and falshood be in reality upon a level, I shall be very weakly employed in a ftrenuous endeavour either to discover truth for myself, or to impress it upon others.

with the arvour of a vagious creeds. .

Truth is in reality fingle and uniform. There must in the That there is one belt

English constitution. Not to fay that we shall feel ourselves more at our ease in examining the question generally, than in a personal attack upon this illustrious and virtuous hero of former times the and the state

Ţ

nature

from the unity of truth ; nature of things be one beft form of government, which all intellects, fufficiently roufed from the flumber of favage ignorance, will be irrefiftibly incited to approve. If an equal participation of the benefits of nature be good in itfelf, it muft be good for you and me and all mankind. Defpotifin may be of ufe to keep human beings in ignorance, but can never conduce to render them wife or virtuous or happy. If the general tendency of defpotifin be injurious, every portion and fragment of it muft be a noxious ingredient. Truth cannot be fo variable, as to change its nature by croffing an arm of the fea, a petty brook or an ideal line, and become falfhood. On the contrary it is at all times and in all places the fame.

from the nature of man. The fubject of legiflation is every where the fame, man. The points in which human beings refemble are infinitely more confiderable than those in which they differ. We have the fame fenses, the fame inlets of pleasure and pain, the fame faculty to reason, to judge and to infer. The fame causes that make me happy will make you happy. We may differ in our opinions upon this subject at first, but this difference is only in prejudice, and is by no means invincible. An event may often conduce most to the benefit of a human being, which his erroneous judgment perhaps regarded with least complacency. A wife superintendent of affairs would purse with strength of the treat advantage of those ever whom he presided, careless of the temporary disapprobation he incurred, and which would last no longer

BOOK III.

CHAP. VII.

form of government

proved At

longer than the partial and mifguided apprehension from which it flowed.

Is there a country in which a prudent director of education would propose some other object for his labours than to make his pupil temperate and just and wife? Is there a climate that requires its inhabitants to be hard drinkers or horfe-jockies or gamesters or bullies, rather than men? Can there be a corner of the world, where the lover of justice and truth would find himfelf out of his element and useles? If no; then liberty must be every where better than flavery, and the government of rectitude and impartiality better than the government of caprice.

But to this it may be objected that " men may not be every Objection where capable of liberty. A gift however valuable in itfelf, if weakness and it be intended to be beneficial, must be adapted to the capacity of the receiver. In human affairs every thing must be gradual; and it is contrary to every idea that experience furnishes of the nature of mind to expect to advance men to a flate of perfection at once. It was in a fpirit fomewhat fimilar to this, that Solon, the Athenian lawgiver, apologifed for the imperfection of his code, faying, " that he had not fought to promulgate fuch laws as were good in themfelves, but fuch as his countrymen were able to bear."

The experiment of Solon feems to be of a dangerous nature. Danger in A code, fuch as his, bid fair for permanence, and does not an imperfect code.

eftablifhing

appear

from human prejudice.

BOOK III. CHAP. VII.

appear to have contained in it a principle of improvement. He did not meditate that gradual progrefs which was above deferibed, nor contemplate in the Athenians of his own time, the root from which were to fpring the poffible Athenians of fome future period, who might realife all that he was able to conceive of good fenfe, fortitude and virtue. His inflitutions were rather calculated to hold them down in perpetuity to one certain degree of excellence and no more.

Manners of nations produced by their forms of government.

This fuggestion furnishes us with the real clue to that striking coincidence between the manners of a nation and the form of its government, which was mentioned in the beginning of the chapter, and which has furnished fo capital an argument to the advocates for the local propriety of different forms of government. It was in reality fomewhat illogical in these reasoners to employ this as an argument upon the fubject, without previoully afcertaining which of the two things was to be regarded as a caufe and which as an effect, whether the government arofe out of the manners of the nation, or the manners of the nation out of the government. The last of these statements appears upon the whole to be nearest to the fact. The government may be indebted for its existence to accident or force. Revolutions, as they have most frequently taken place in the world, are epochas, in which the temper and wifhes of a nation are least confulted\*. When it is otherwife, still the real effect of the government

CHAP. VII.

#### OBEDIENCE. OF

which is inftituted, is to perpetuate propenfities and fentiments, BOOK III. which without its operation would fpeedily have given place to other propensities. Upon every supposition, the existing correfpondence between national character and national government will be found in a just confideration to arife out of the latter.

The principle of gradual improvement advanced in the last Gradual imcited objection must be admitted for true; but then it is neces- necessary. fary, while we adopt it, that we should not fuffer ourselves to act in direct opposition to it; and that we should choose the best and most powerful means for forwarding that improvement.

Man is in a flate of perpetual progress. He must grow either better or worse, either correct his habits or confirm them. The government proposed must either increase our passions and prejudices by fanning the flame, or by gradually difcouraging tend to extirpate them. In reality, it is fufficiently difficult to imagine a government that fhall have the latter tendency. By its very nature political inftitution has a tendency to fufpend the elafticity, and put an end to the advancement of mind. Every fcheme for embodying imperfection must be injurious. That which is to-day a confiderable melioration, will at fome future period, if preferved unaltered, appear a defect and difeafe in the body politic. It were earneftly to be defired that each man was wife enough to govern himfelf without the intervention of any compulfory reftraint; and, fince government even in its best state is

. **B** b

provement

Simplicity chiefly to be desired.

185

an

BOOK III. CHAP. VII. an evil, the object principally to be aimed at is, that we fhould have as little of it as the general peace of human fociety will permit.

Publication of truth the grand infrument : by individuals, not by government :

But the grand inflrument for forwarding the improvement of mind is the publication of truth. Not the publication on the part of government; for it is infinitely difficult to discover infallibly what the truth is, especially upon controverted points, and government is as liable as individuals to be miftaken in this respect. In reality it is more liable; for the depolitaries of government have a very obvious temptation to defire, by means of ignorance and implicit faith, to perpetuate the exifting flate of things. The only fubftantial method for the propagation of truth is discuffion, fo that the errors of one man may be detected by the acutenels and fevere difquifition of his neighbours. All we have to demand from the officers of government, at leaft in their public character, is neutrality. The intervention of authority in a field proper to reafoning and demonstration is always injurious. If on the right fide, it can only difcredit truth, and call off the attention of men to a foreign confideration. If on the wrong, though it may not be able to suppress the fpirit of enquiry, it will have a tendency to convert the calm pursuit of knowledge into paffion and tumult.

the truth entire, and not by parcels. "But in what manner shall the principles of truth be communicated fo as best to lead to the practice? By shewing to man-

4

kind

kind truth in all its evidence, or concealing one half of it ? Shall they be initiated by a partial difcovery, and thus led on by regular degrees to conclusions that would at first have wholly alienated their minds ?"

This queftion will come to be more fully difcuffed in a following chapter. In the mean time let us only confider for the prefent the quantity of effect that may be expected from these two opposite plans.

An inhabitant of Turkey or Morocco may perhaps be of opinion, that the vefting power in the arbitrary will or caprice of an individual has in it more advantages than difadvantages. If I be defirous to change his opinion, fhould I undertake to recommend to him in animated language fome modification of this caprice? I fhould attack it in its principle. If I do otherwife, I fhall betray the ftrength of my caufe. The principle opposite to his own, will not possible half the irressible force which I could have given to it. His objections will affume vigour. The principle I am maintaining being half truth and half falshood, he will in every step of the contest possibles an advantage in the offensive, of which, if he be fufficiently acute, I can never deprive him.

Now the principle I fhould have to explain of equal law and equal justice to the inhabitant of Morocco, would be as new to B b 2 him,

BOOK III. CHAP VII.

BOOK III. CHAP. VII. him, as any principle of the boldeft political defcription that I could propagate in this country. Whatever apparent difference may exift between the two cafes, may fairly be fufpected to owe its exiftence to the imagination of the observer. The rule therefore which fuggests itself in this case is fitted for univerfal application.

Sort of progrefs to be defired.

As to the improvements which are to be introduced into the political fystem, their quantity and their period must be determined by the degree of knowledge exifting in any country, and the flate of preparation of the public mind for the changes that are to be defired. Political renovation may strictly be confidered as one of the stages in intellectual improvement. Literature and difquifition cannot of themselves be rendered fufficiently general; it will be only the cruder and groffer parts that can be expected to defcend in their genuine form to the multitude; while those abstract and bold speculations, in which the value of literature principally confifts, must necessarily continue the portion of the favoured few. It is here that focial inftitution offers itself in aid of the abstruser powers of argumentative communi-As foon as any important truth has become established cation. to a fufficient extent in the minds of the enterprifing and the wife, it may tranquilly and with eafe be rendered a part of the general fystem; fince the uninstructed and the poor are never the ftrenuous fupporters of those complicated fystems by which oppression is maintained; and fince they have an obvious intereft

tereft in the practical introduction of fimplicity and truth. One BOOK III. valuable principle being thus realifed, prepares the way for the realifing of more. It ferves as a refting-place to the human mind in its great bufinefs of exploring the regions of truth, and gives it new alacrity and encouragement for farther exertions.

CONCERNING

# POLITICAL JUSTICE.

### BOOK IV.

MISCELLANEOUS PRINCIPLES.

#### CHAP. I.

#### OF RESISTANCE.

EVERY INDIVIDUAL THE JUDGE OF HIS OWN RESISTANCE. OBJECTION.—ANSWERED FROM THE NATURE OF GO-VERNMENT—FROM THE MODES OF RESISTANCE.—I. FORCE RARELY T.O BE EMPLOYED—EITHER WHERE THERE IS SMALL PROSPECT OF SUCCESS—OR WHERE THE PROSPECT IS GREAT.—HISTORY OF CHARLES THE FIRST ESTI-MATED.—2. REASONING THE LEGITIMATE MODE.

T has appeared in the course of our reasonings upon political authority, that every man is bound to resist every unjust proceeding on the part of the community. But who is the judge ( · ,

judge of this injuffice? The queftion anfwers itfelf: the private judgment of the individual. Were it not fo, the appeal would be nugatory, for we have no infallible judge to whom to refer our controverfies. He is obliged to confult his own private judgment in this cafe, for the faine reafon that obliges him to confult it in every other article of his conduct.

Objection.

"But is not this polition neceffarily fubverfive of all government? Can there be a power to rule, where no man is bound to obey; or at leaft where every man is to confult his own underftanding firft, and then to yield his concurrence no farther than he fhall conceive the regulation to be juft? The very idea of government is that of an authority fuperfeding private judgment; how then can the exercise of private judgment be left entire? What degree of order is to be expected in a community, where every man is taught to indulge his own speculations, and even to refift the decision of the whole, whenever that decision is opposed to the dictates of his own fancy?"

Anfwered from the nature of government : The true anfwer to thefe queftions lies in the obfervation with which we began our difquifition on government, that this boafted inftitution is nothing more than a fcheme for enforcing by brute violence the fenfe of one man or fet of men upon another, neceffary to be employed in certain cafes of peculiar emergency. Supposing the queftion then to lie merely between the force of the community on one part, and the force with which

judge of his own re-

fiftance.

#### RESISTANCE. **O**F

which any individual member fhould think it incumbent upon him to refift their decifions on the other, it is fufficiently evident that a certain kind of authority and fupremacy would be the re-But this is not the true state of the question. fult.

It is farther evident, that, though the duty of every man to exercife his private judgment be unalterable, yet fo far as relates to practice, wherever government fublis, the exercise of private judgment is fubstantially intrenched upon. The force put by the community upon those who exercise rapine and injustice, and the influence of that force as a moral motive upon its members in general, are each of them exhibitions of an argument, not founded in general reafon, but in the precarious interference of a fallible individual. Nor is this all. Without anticipating the question of the different kinds of resistance and the election that it may be our duty to make of one kind rather than another, it is certain in fact, that my conduct will be materially altered by the forefight that, if I act in a certain manner, I shall have the combined force of a number of individuals to oppose me. That government therefore is the beft, which in no one inftance interferes with the exercise of private judgment without absolute neceffity.

The modes according to which an individual may oppose any from the modes of ie. measure which his judgment disapproves are of two forts, action fiftance. and fpeech. Shall he upon every occasion have recourse to the 1. Force rare-Сc former ? ployed,

BOOK IV. CHAP. I.

ly to be em-

BOOK IV. CHAP. I.

former? This it is abfurd fo much as to fuppofe. The object of every virtuous man is the general good. But how can he be faid to promote the general good, who is ready to wafte his active force upon every trivial occasion, and facrifice his life without the chance of any public benefit?

either where there is fmall profpect of fuccefs,

"But he referves himfelf," I will fuppofe, "for fome great occafion; and then, carelefs as to fuccefs, which is a large object only to little minds, generoufly embarks in a caufe where he has no hope but to perifh. He becomes the martyr of truth. He believes that fuch an example will tend to imprefs the minds of his fellow men, and to roufe them from their lethargy."

The queftion of martyrdom is of a difficult nature. I had rather convince men by my arguments, than feduce them by my example. It is fearcely possible for me to tell what opportunities for usefulness may offer themselves in the future years of my existence. Nor is it improbable in a general confideration that long and perfevering fervices may be more advantageous than brilliant and transitory ones. The case being thus circumstanced, a truly wise man cannot fail to hesitate as to the idea of offering up his life a voluntary oblation.

Whenever martyrdom becomes an indifpenfible duty, when nothing can preferve him fhort of the clearest dereliction of principle and the most palpable desertion of truth, he will then meet it

it with perfect ferenity. He did not avoid it before from any BOOK IV. weakness of personal feeling. When it must be encountered, he knows that it is indebted for that luftre which has been fo generally acknowledged among mankind, to the intrepidity of the He knows that nothing is fo effential to true virtue, fufferer. as an utter difregard to individual advantage.

The objections that offer themfelves to an exertion of actual force, where there are no hopes of fuccess, are numerous. Such an exertion cannot be made without injury to the lives of more than a fingle individual. A certain number both of enemies and friends must be expected to be the victims of fo wild an undertaking. It is regarded by contemporaries, and recorded by hiftory as an intemperate ebullition of the paffions; and ferves rather as a beacon to deter others, than as a motive to animate them. It is not the frenzy of enthufiasm, but the calm, sagacious and deliberate effort of reason, to which truth must be indebted for its progrefs.

But let us suppose, " that the prospect of success is considera- or where the ble, and that there is reafon to believe that refolute violence may great. in no long time accomplish its purpose." Even here we may be Force has already appeared to be an odious allowed to hefitate. weapon; and, if the use of it be to be regretted in the hands of government, it does not change its nature though wielded by a band of patriots. If the caufe we plead be the caufe of truth, Cc2 there

profpect is

195

BOOK IV. CHAP. I.

196

there is no doubt that by our reafonings, if fufficiently zealous and conftant, the fame purpole may be effected in a milder and more liberal way \*.

In a word, it is proper to recollect here what has been effablithed as to the doctrine of force in general, that it is in no cafe to be employed but where every other means is ineffectual. In the queftion therefore of refiftance to government, force ought never to be introduced without the moft imminent neceffity; never but in circumftances fimilar to those of defending my life from a ruffian, where time can by no means be gained, and the confequences inftantly to ensue are unqueftionably fatal.

Hiftory of Charles the first eftimated. The hiftory of king Charles the first furnishes an instructive example in both kinds. The original defign of his opponents was that of confining his power within narrow and palpable limits. This object, after a struggle of many years, was fully accomplished by the parliament of 1640, without bloodshed (except indeed in the single instance of lord Strafford) and without commotion. They next conceived the project of overturning the hierarchy and the monarchy of England, in opposition to great numbers, and in the last point no doubt to a majority of their countrymen. Admitting these objects to have been in the utmost degree excellent, they ought not, for the pur-

SECTION I. fupport the constitution ofourcountry confidered :

**TO** queftion can be more important than that which respects the best mode of effecting revolutions. Before we enter Obligation to upon it however, it may be proper to remove a difficulty which has fuggested itself to the minds of some men, how far we ought generally speaking to be the friends of revolution; or, in other words, whether it be justifiable in a man to be the enemy of the constitution of his country.

> "We live," it will be faid, "under the protection of this conftitution; and protection, being a benefit conferred, obliges us to a reciprocation of fupport in return,"

To

# DUTIES OF A CITIZEN.

To this it may be answered, first, that this protection is a very BOOK IV. CHAP. 11. equivocal thing; and, till it can be shown that the vices, from the effects of which it protects us, are not for the most part the produce of that conftitution, we shall never fufficiently underftand the quantity of benefit it includes. aste is ma wes sometimesely

Secondly, gratitude, as has already been proved \*, is a vice and not a virtue. Every man and every collection of men ought to be treated by us in a manner founded upon their intrinfic qualities and capacities, and not according to a rule which has existence only in relation to ourfelves.

Add to this, thirdly, that no motive can be more equivocal than the gratitude here recommended. Gratitude to the conftitution, an abstract idea, an imaginary existence, is altogether Affection to my countrymen will be much better unintelligible. proved, by my exertions to procure them a substantial benefit, than by my fupporting a fystem which I believe to be fraught with injurious confequences.

He who calls upon me to support the constitution must found must arise his requisition upon one of two principles. It has a claim upon my support either because it is good, or because it is British.

either from the reason of the cafe, or from a perfonal and local confideration.

Againft.

\* Book II. chap. ii. p. 83.

### DUTIES OF A CITIZEN.

Against the requisition in the first fense there is nothing to object. All that is neceffary is to prove the goodnefs-which is afcribed to it. But perhaps it will be faid, " that, though not abfolutely good, more mifchief will refult from an attempt to overturn it, than from maintaining it with its mixed character of partly right and partly wrong." If this can be made evident, undoubtedly I ought to fubmit. Of this mifchief however I can be no judge but in confequence of enquiry. To fome the evils attendant on a revolution will appear greater, and to others Some will imagine that the vices with which the English lefs. conflitution is pregnant are confiderable, and fome that it is nearly innocent. Before I can decide between these opposite opinions and balance the exifting and the possible evils, I must examine for myfelf. But examination in its nature implies uncertainty of refult. Were I to determine before I fat down on which fide the decifion fhould be, I could not ftrictly fpeaking be feid to examine at all. He that defires a revolution for its own fake is to be regarded as a madman. He that defires it from a thorough conviction of its usefulness and neceffity has a claim upon us for candour and respect.

The fecond. As to the demand upon me for fupport to the English conftitution, because it is English, there is little plausibility in this argument. It is of the fame nature as the demand upon me to be a Christian, because I am a Briton, or a Mahometan, because I am

BOOK IV.

СЕАР. П.

SECTION I. The first ex-

amined.

DUTIES OF A CITIZEN.

BOOK IV. I am a native of Turkey. Inflead of being an expression of refpect, it argues contempt of all government, religion and virtue, and every thing that is facred among men. If there be fuch a thing as truth, it must be better than error. If there be fuch a faculty as reafon, it ought to be exerted. But this demand makes truth a matter of abfolute indifference, and forbids us the exercife of our reason. If men reason and reflect, it must necessarily happen that either the Englishman or the Turk will find his government to be odious and his religion falfe. For what purpole employ his reason, if he must for ever conceal the conclufions to which it leads him? How would man have arrived at his prefent attainments, if he had always been contented with the flate of fociety in which he happened to be born? In a word, either reason is the curse of our species, and human nature is to be regarded with horror; or it becomes us to employ our understanding and to act upon it, and to follow truth wherever it may lead us. It cannot lead us to mischief, fince utility, as it regards percipient beings, is the only bafis of moral and political truth.

**10** return to the enquiry respecting the mode of effecting revolutions. If no queftion can be more important, there is fortunately no question perhaps that admits of a more complete and fatisfactory general anfwer. The revolutions of flates, which a philanthropift would defire to witnefs, or in which he would willingly co-operate, confift principally in a change of fentiments and difpolitions in the members of those flates. The true inftruments for changing the opinions of men are argument and The beft fecurity for an advantageous iffue is free perfuation. and unreftricted discuffion. In that field truth must always prove the fuccessful champion. If then we would improve the focial inftitutions of mankind, we must write, we must argue, we must converse. To this bufines there is no close; in this purfuit there should be no pause. Every method should be employed,-not fo much politively to allure the attention of mankind, or perfuafively to invite them to the adoption of our opinions,-as to remove every reftraint upon thought, and to throw

### MODE OF EFFECTING REVOLUTIONS.

throw open the temple of fcience and the field of enquiry to all BOOK IV. the world.

Those instruments will always be regarded by the differing not violence: mind as fufpicious, which may be employed with equal profpect of fuccefs on both fides of every queftion. This confideration fhould make us look with averfion upon all refources of violence. When we descend into the listed field, we of course desert the vantage ground of truth, and commit the decifion to uncertainty and caprice. The phalanx of reafon is invulnerable; it advances with deliberate and determined pace; and nothing is able to refift it. But when we lay down our arguments, and take up our fwords, the cafe is altered. Amidit the barbarous pomp of war and the clamorous din of civil brawls, who can tell whether the event shall be prosperous or miserable?

We must therefore carefully diftinguish between informing nor refentthe people and inflaming them. Indignation, refertment and fury are to be deprecated; and all we fhould afk is fober thought, clear difcernment and intrepid difcuffion. Why were the revolutions of America and France a general concert of all orders and defcriptions of men, without fo much (if we bear in mind the multitudes concerned) as almost a differtient voice; while the reliftance against our Charles the first divided the nation into two equal parts ? Becaufe the latter was the affair of the feventcenth century, and the former happened in the close of the eighteenth.

D d 2

### MODE OF EFFECTING REVOLUTIONS.

eighteenth. Because in the case of America and France philofophy had already developed fome of the great principles of SECTION II. political truth, and Sydney and Locke and Montesquieu and Rouffeau had convinced a majority of reflecting and powerful minds of the evils of usurpation. If these revolutions had happened still later,<sup>†</sup> not one drop of the blood of one citizen would have been fied by the hands of another, nor would the event have been marked fo much perhaps as with one folitary inftance of violence and confifcation.

Latenels of event defirable.

#### SECTION III.

OF POLITICAL ASSOCIATIONS.

MEANING OF THE TERM.—ASSOCIATIONS OBJECTED TO— I. FROM THE SORT OF PERSONS WITH WHOM A JUST REVOLUTION SHOULD ORIGINATE—2. FROM THE DAN-GER OF TUMULT.—OBJECTS OF ASSOCIATION.—IN WHAT CASES ADMISSIBLE.—ARGUED FOR FROM THE NECESSITY TO GIVE WEIGHT TO OPINION—FROM THEIR TENDENCY TO ASCERTAIN OPINION. — UNNECESSARY FOR THESE PURPOSES.—GENERAL INUTILITY. — CONCESSIONS.—IM-PORTANCE OF SOCIAL COMMUNICATION.—PROPRIETY OF TEACHING RESISTANCE CONSIDERED.

A QUESTION naturally fuggefts itfelf in this place refpecting the propriety of affociations among the people at large, for the purpole of effecting a change in their political inflitutions. It fhould be obferved, that the affociations here fpoken of are voluntary confederacies of certain members of the fociety with each other, the tendency of which is to give weight to the opinions of the perfons fo affociated, of which the opinions of the unconfederated and infulated part of the community are deftitute.

BOOK IV. CHAP. 11. SECTION III. Meaning of the term.

BOOK IV. CHAP.II. SECTION III. titute. This queftion therefore has nothing in common with that other, whether in a well organized flate every individual would not find his place in a deliberative as well as an elective capacity; the fociety being diffributed into diffricts and departments, and each man poffeffing an importance, not measured by the capricious standard of some accidental confederacy, but by a rule impartially applied to every member of the community.

Affociations objected to:

just revolu-

tion should originate :

Relative then to political affociations, as thus explained, there are two confiderations, which, if they do not afford reason for undiftinguishing condemnation, at least tend to diminish our anxiety to their introduction.

In the first place revolutions less originate in the energies of 1. from the fort of perfons the people at large, than in the conceptions of perfons of fome with whom a degree of fludy and reflection. I fay, originate, for it must be admitted, that they ought ultimately to be determined on by the choice of the whole nation. It is the property of truth to diffuse itself. The difficulty is to diffinguish it in the first inftance, and in the next to prefent it in that unequivocal form which shall enable it to command universal affent. This muft neceffarily be the tafk of a few. Society, as it at prefent exifts in the world, will long be divided into two claffes, those who have leifure for fludy, and those whose importunate necessities perpetually urge them to temporary industry. It is no doubt to be defired, that the latter class fhould be made as much as poffible

Digitized by Google

to

to partake of the privileges of the former. But we should be BOOK IV. careful, while we liften to the undiffinguishing demands of benevolence, that we do not occasion a greater mischief than that we undertake to cure. We fhould be upon our guard against an event the confequences of which are always to be feared, the propagating blind zeal, where we meant to propagate reafon.

The fludious and reflecting only can be expected to fee deeply into future events. To conceive an order of fociety totally different from that which is now before our eyes, and to judge of the advantages that would accrue from its inftitution, are the prerogatives only of a few favoured minds. When these advantages have been unfolded by fuperior penetration, they cannot yet for fome time be expected to be underflood by the multitude. Time, reading and conversation are neceffary to render them familiar. They must defeend in regular gradation from the most thoughtful to the most unobservant. He, that begins with an appeal to the people, may be fufpected to understand little of the true character of mind. A finister defign may gain by precipitation; but true wifdom is best adapted to a flow, unvarying, inceffant progrefs.

Human affairs, through every link of the great chain of neceffity, are admirably harmonifed and adapted to each other. As the people form the laft ftep in the progress of truth, they need least preparation to induce them to affert it. Their 3 prejudices

CHAP. II. SECTION III.

prejudices are few and upon the furface. They are the higher orders of fociety, that find, or imagine they find, their advantage SECTION III. in injuffice, and are eager to invent arguments for its defence. In fophiltry they first feek an excuse for their conduct, and then become the redoubted champions of those errors which they have been affiduous to cultivate. The vulgar have no fuch interest, and fubmit to the reign of injuffice from habit only and the want of They do not want preparation to receive the truth, reflection. fo much as examples to embody it. A very fhort catalogue of reasons is fufficient for them, when they fee the generous and the wife refolved to affert the caufe of juffice. A very fhort period is long enough for them to imbibe the fentiments of patriotifm and liberty.

2. from the danger of tumult.

Secondly, affociations must be formed with great caution not to be allied to tumult. The conviviality of a feaft may lead to the depredations of a riot. While the fympachy of opinion catches from man to man, efpecially in numerous meetings, and among perfons whole paffions have not been used to the curb of judgment, actions may be determined on, which folitary reflection would have rejected. There is nothing more barbarous, cruel and blood-thirfty, than the triumph of a mob. Sober thought should always prepare the way to the public affertion of truth. He, that would be the founder of a republic, should, like the first Brutus, be infensible to the energies of the most imperious paffions of our nature.

admiffible.

BOOK IV. CHAP. II. SECTION III. Objects of

alledged, "that affociation is the only expedient for arming the

BOOK IV. CHAP. II. SECTION III.

fense of the country against the arts of its oppressors." Why arm? Why fpread a reftles commotion over the face of a nation, which may lead to the most destructive consequences? Why feek to bestow upon truth a weight that is not her own? a weight that must always produce fome obliquity, fome blind and unenlightened zeal? In attempting prematurely to anticipate the conquest of truth, we shall infallibly give birth to deformity and abortion. If we have patience to wait her natural progress, and to affist her cause by no arguments that are not worthy of her, the event will be both certain and illustrious.

from their tendency to afcertain opinion.

Unneceffary for thefe

purpofes.

A fimilar answer will suggest itself to the objection, "that affociations are neceffary unequivocally to afcertain the opinion of the people." What fort of opinion is that, which thus ftands in need of fome fudden violence to oblige it to ftart from its hiding-place? The fentiments of mankind are then only equivocal in external appearance, when they are unformed and uncertain in the conception. When once the individual knows his own meaning, its fymptoms will be clear and unequivocal. Be not precipitate. If the embryo fentiment at prefent exifting in my mind be true, there is hope that it will gain ftrength by If you wish to affist its growth, let it be by instruction, time. not by attempting to pass that fentiment for mine which you only wifh to be fo. If the opinion of the people be not known to-day, it will not fail to fhew itfelf to-morrow. If the opinion of

Digitized by GOOGLE

of the people be not known to-day, it is because that which you would have fuppofed to be their opinion is not fufficiently their opinion. You might as well think of hiding the inhabitants of England, concealing their towns and their cultivation, and making their country pais for a defert, as of concealing their real and deliberate fentiment.

These are the expedients of men who do not know that truth is General inomnipotent. It may appear to die for a time, but it will not fail to revive with fresh vigour. If it have ever failed to produce gradual conviction, it is becaufe it has been told in a meagre, an obscure or a pusillanimous manner. Ten pages that should contain an absolute demonstration of the true interests of mankind in fociety could no otherwife be prevented from changing the face of the globe, than by the literal deftruction of the paper on which they were written. It would become us to repeat their contents as widely as we were able; but, if we attempted any thing more than this, it would be a practical proof that we did not know they contained a demonstration.

1

Such are the reasonings that should decide upon our abstract Concessions. opinion of every cafe of affociation that comes before us. But. though from hence it fhould fufficiently appear that affociation is fcarcely in any cafe to be defired, there are confiderations that fhould lead us fometimes to judge it with moderation and forbearance. There is one mode, according to which the benefit of mankind may

Ee 2

BOOK IV. CHAP. II. SECTION III.

211

utility.

may beft be promoted, and which ought always to be employed. But mankind are imperfect beings, and there are certain errors SECTION III. of his fpecies which a wife man will be inclined to regard with indulgence. Affociations, as a meafure intrinfically wrong, he will endeavour at least to postpone as long as he can. But it must not be diffembled that in the crisis of a revolution they will fometimes be unavoidable. While opinion is advancing with filent step, imagination and zeal may be expected fomewhat to outrun her progres. Wisdom will be anxious to hold them at bay; and, if her votaries be many, fhe will be able to do this long enough to prevent tragical confequences. But, when the cast is thrown, when the declaration is made and irrevocable, fhe will not fail, be the confusion greater or lefs, to take the fide of truth, and forward her reign by the best means that the neceffity of the cafe will admit.

Importance of focial communication.

But, though affociation, in the received fense of that term, must be granted to be an instrument of a very dangerous nature, it should be remembered that unreferved communication in a finaller circle, and efpecially among perfons who are already awakened to the purfuit of truth, is of unquestionable advantage. There is at prefent in the world a cold referve that keeps man at a distance from man. There is an art in the practice of which individuals communicate for ever, without any one telling his neighbour what effimate he should form of his attainments and character, how they ought to be employed, and how to be improved.

BOOK IV.

CHAP. II.

improved., There is a fort of domestic tactics, the object of BOOK IV. which is to inftruct us to elude curiofity, and to keep up the tenour of conversation, without the disclosure either of our feelings or our opinions. The philanthropift has no object more deeply at heart than the annihilation of this duplicity and referve. No man can have much kindnefs for his fpecies, who does not habituate himfelf to confider upon each fucceffive occafion of focial intercourfe how that occasion may be most beneficently improved. Among the topics to which he will be anxious to awaken attention, politics will occupy a principal fhare.

Books have by their very nature but a limited operation; though, on account of their permanence, their methodical difquifition, and their eafinefs of access, they are entitled to the foremost place. But their efficacy ought not to engrofs our confidence. The number of those by whom reading is neglected is exceedingly great. Books to those by whom they are read have a fort of conftitutional coldness. We review the arguments of an "infolent innovator" with fullennefs, and are unwilling to ftretch our minds to take in all their force. It is with difficulty that we obtain the courage of striking into untrodden paths, and queftioning tenets that have been generally received. But conversation accustoms us to hear a variety of fentiments, obliges us to exercise patience and attention, and gives freedom and elasticity to our mental disquisitions. A thinking man, if he will recollect his intellectual hiftory, will find that he has derived ineftimable advantage from the ftimulus and furprife of colloquial fuggestions; and, if he review

BOOK IV. CHAP. II. SECTION III.

214

review the hiftory of literature, will perceive that minds of great acutenels and ability have commonly exifted in a cluffer.

It follows that the promoting of the best interests of mankind eminently depends upon the freedom of focial communication. Let us imagine to ourfelves a number of individuals, who, having first flored their minds with reading and reflection, proceed afterwards in candid and unreferved conversation to compare their ideas, to fuggest their doubts, to remove their difficulties, and to cultivate a collected and firiking manner of delivering their fentiments. Let us suppose these men, prepared by mutual intercourfe, to go forth to the world, to explain with fuccincineis and fimplicity, and in a manner well calculated to arreft attention, the true principles of fociety. Let us fuppofe their hearers infligated in their turn to repeat these truths to their companions. We shall then have an idea of knowledge as perpetually gaining ground, unaccompanied with peril in the means of its diffusion. Reason will spread itself, and not a brute and unintelligent fympathy. Difcuffion perhaps never exifts with fo much vigour and utility as in the conversation of two perfons. It may be carried on with advantage in finall and friendly focieties. Does the fewnels of their numbers imply the rarity of their existence? Far otherwise: the time perhaps will come when fuch inftitutions will be univerfal. Shew to mankind by a few examples the advantages of political difcuffion undebauched by political enmity and vehemence, and the beauty of the fpectacle will foon render the example contagious. Every man will commune

commune with his neighbour. Every man will be eager to tell BOOK IV. and to hear what the interest of all requires them to know. The bolts and fortifications of the temple of truth will be removed. The craggy steep of science, which it was before difficult to afcend, will be levelled with the plain. Knowledge will be acceffible to all. Wifdom will be the inheritance of man. from which none will be excluded but by their own heedleffnefs and prodigality. If these ideas cannot completely be realised, till the inequality of conditions and the tyranny of government are rendered fomewhat less oppressive, this affords no reason against the fetting afloat fo generous a fystem. The improvement of individuals and the melioration of political inftitutions are defined mutually to produce and reproduce each other. Truth. and above all political truth, is not hard of acquifition, but from the fuperciliousness of its professors. It has been flow and tedious of improvement, because the study of it has been relegated to doctors and civilians. It has produced little effect upon the practice of mankind, because it has not been allowed a plain and direct appeal to their understandings. Remove these obstacles, render it the common property, bring it into daily ufe, and you may reasonably promise yourself consequences of the most inestimable value.

But these confequences are the property only of independent and impartial discussion. If once the unambitious and candid circles of enquiring men be fwallowed up in the infatiate gulf of noify affemblies, the opportunity of improvement is inftantly annihilated. 4

Digitized by Google

EOOF IV. CHAP. II. SECTION III.

annihilated. The happy varieties of fentiment which fo eminently contribute to intellectual acuteness are lost. Activity of thought is fhackled by the fear that our affociates fhould difclaim A fallacious uniformity of opinion is produced, which no us. man efpouses from conviction, but which carries all men along with a refiftlefs tide. Clubs, in the old English fense, that is. the periodical meeting of fmall and independent circles, may be admitted to fall within the line of these principles. But they ceafe to be admiffible, when united with the tremendous apparatus of articles of confederacy and committees of correspondence. Human beings should meet together, not to enforce, but to enquire. Truth difclaims the alliance of marshalled numbers.

It feems fearcely neceffary to add, that the individuals who are engaged in the transactions here cenfured, have frequently been inftigated by the best intentions, and informed with the most liberal views. It would be in the highest degree unjust, if their undertakings should be found of dangerous tendency, to involve the authors in indiferiminate censure for confequences which they did not forese. But at the fame time, in proportion to the purity of their views and the foundness of their principles, it were earness they employ. It would be deeply to be lamented, if those who were the truest friends to the welfare of mankind, should come, by the injudicious of their conduct, to rank among its enemies.

From

#### OF POLITICAL ASSOCIATIONS.

From what has been faid it is fufficiently evident, that no alarm can be more groundlefs, than that of violence and precipitation from the enlightened advocates of political justice. There is however another objection which has been urged against them, fistance fidered. built upon the fuppofed inexpediency of inculcating upon the people at large the propriety of occasional resistance to the authority of government. "Obedience," fay these objectors "is the rule; refistance the exception. Now what can be more preposterous, than perpetually to infift with all the pomp of eloquence upon an expedient, to which only an extreme neceffity can oblige us to have recourfe\*?"

It has already been shewn that obedience, that is, a furrender of the understanding to the voice of authority, is a rule to which it can never be creditable to human beings to conform. Tranquillity indeed, a ftate in which a man shall least be disturbed in the exercise of his private judgment by the interposition of violence, is an object we fhould conftantly endeavour to promote : but this tranquillity the principles here inculcated have little tendency to difturb.

There is certainly no truth which it can be for the general interest to conceal. It must be confessed indeed, that a fingle

. This argument, nearly in the words here employed, may be found in Hume's Effay on Paffive Obedience, Effays, Part II, Effay xiii.

truth

# OF POLITICAL ASSOCIATIONS.

truth may be fo detached from the feries to which it belongs, as. when feparately told, to have the nature of falfhood. But this is by no means the cafe in the prefent inftance. To inform mankind of those general principles upon which all political inftitutions ought to be built, is not to diffuse partial information. To difcover to them their true interefts, and lead them to conceive of a flate of fociety more uncorrupt and more equitable than that in which they live, is not to inculcate fome rare exception to a general rule. If there be any government which must be indebted for its perpetuity to ignorance, that government is the curfe of mankind. In proportion as men are made to underftand their true interefts, they will conduct themfelves wifely, both when they act and when they forbear, and their conduct will therefore promife the most advantageous iffue. He, whole mind has carefully been inured to the dictates of reason, is of all men least likely to convert into the rash and headstrong invader of the general weal.

### OF THE SPECIES OF

BOOK IV. CHAP. II. SECTION IV. confiderable mixture of error. Many ideas may be excellent as parts of a great whole, which, when violently torn from their connection, will not only ceafe to be excellent, but may in fome cafes become politively injurious. In this war of polts and fkirmifhes victory will perpetually appear to be doubtful, and men will either be perfuaded, that truth itfelf is of little value, or that human intellect is fo narrow as to render the difcovery of truth a hopelefs purfuit.

Partial reformation confidered.

Objection.

It may be alledged, that "one of the confiderations of greateft influence in human affairs is that of the gradual decline of ill things to worfe, till at length the mifchief, having proceeded to its higheft climax, can maintain itself no longer. The argument in favour of focial improvement would lofe much of its relative energy, if the opportunity of a fecret comparison of poffible good with actual evil were taken away. All partial reforms are of the nature of palliatives. They skin over the difeafed part instead of extirpating the difeafe. By giving a fmall benefit, perhaps a benefit only in appearance, they cheat us of the fuperior good we ought to have demanded. By ftripping error of a part of its enormities, they give it fresh vigour and a longer duration."

Anfwer.

We must be cautious however of pushing this argument too far. To suppose that truth stands in absolute need of a foil, or that she cannot produce full conviction by her native light, is 4 a con-

220

#### REFORM ΤO BE DESIRED.

a conception unworthy of her enlightened advocates. The true folution will probably be found in the accurately diftinguishing the fources of reform. Whatever reform, general or partial, shall be fuggested to the community at large by an unmutilated view of the fubject, ought to be feen with fome degree of complacency. But a reform, that shall be offered us by those whose interest is fuppoled to lie in the perpetuating of abule, and the intention of which is rather to give permanence to error by divefting it of its most odious features, is little entitled to our countenance. The true principle of tocial improvement lies in the correcting public opinion. Whatever reform is stolen upon the community unregarded, and does not fpontaneously flow from the energy of the general mind, is unworthy of congratulation. It is in this refpect with nations as with individuals. He that quits a vicious habit, not from reason and conviction, but because his appetites no longer folicit him to its indulgence, does not deferve the epithet of virtuous. The object it becomes us to purfue is, to give vigour to public opinion, not to fink it into liftleffnefs and indifference.

Ì.

C

đ

ÿ

Ċ

1

1

h

When partial reformation proceeds from its legitimate caufe, Gradual rethe progress fociety has made in the acquisition of truth, pensible. it may frequently be entitled to our applaufe. Man is the ' creature of habits. Gradual improvement is a most conspicuous law of his nature. When therefore fome confiderable advantage is fufficiently understood by the community to induce them to defire

form indif-

BOOK IV. SECTION IV.

### OF THE SPECIES OF

BOOK IV. CHAP. II. Section IV.

defire its eftablishment, that establishment will afterwards react to the enlightening of intellect and the generating of virtue. It is natural for us to take our stand upon some leading truth, and from thence explore the regions we have still to traverse.

There is indeed a fense in which gradual improvement is the only alternative between reformation and no reformation. All human intellects are at fea upon the great ocean of infinite truth, and their voyage though attended with hourly advantage will never be at an end. If therefore we will ftay till we shall have devised a reformation fo complete, as shall need no farther reformation to render it more complete, we shall eternally remain in inaction. Whatever is fairly understood upon general principles by a confiderable part of the community, and opposed by none or by a very few, may be confidered as sufficiently ripe for execution.

Nature of a juit revolution. To recapitulate the principal object of this chapter, I would once again repeat, that violence may fuit the plan of any political partifan, rather than of him that pleads the caufe of fimple juftice. There is even a fenfe in which the reform aimed at by the true politician may be affirmed to be lefs a gradual than an entire one, without contradicting the former polition. The complete reformation that is wanted, is not inftant but future reformation. It can in reality fearcely be confidered as of the nature of action. It confifts in an univerfal illumination. Men feel their fituation,

#### REFORM TO BE DESIRED.

tion, and the reftraints, that fhackled them before, vanish like a BOOK IV. mere deception. When the true crisis shall come, not a fword will need to be drawn, not a finger to be listed up. The adverfaries will be too few and too feeble to dare to make a stand against the universal sense.

Nor do thefe ideas imply, as at first fight they might feem to How distant? imply, that the revolution is at an immeasurable distance. It is of the nature of human affairs that great changes should appear to be fudden, and great discoveries to be made unexpectedly, and as it were by accident. In forming the mind of a young person, in endeavouring to give a new bent to that of a person of maturer years, I shall for a long time seem to have produced little effect, and the fruits will shew themselves when I least expected them. The kingdom of truth comes not with oftentation. The seeds of virtue may appear to perish before they germinate.

To recur once more to the example of France, the works of her great political writers feemed for a long time to produce little profpect of any practical effect. Helvetius, one of the lateft, in a work published after his death in 1771, laments in pathetic strains the hopeles condition of his country. "In the history of every people," fays he, "there are moments, in which, uncertain of the fide they shall choose, and balanced between political good and evil, they feel a defire to be instructed; in which the foil, so to express mysclf, is in some manner prepared, and may easily be ' impregnated

223

### OF THE SPECIES OF

BOOK IV. CHAP. II. Section IV. impregnated with the dew of truth. At fuch a moment the publication of a valuable book may give birth to the moft aufpicious reforms: but, when that moment is no more, the nation, become infenfible to the beft motives, is by the nature of its government plunged deeper and deeper in ignorance and flupidity. The foil of intellect is then hard and impenetrable; the rains may fall, may fpread their moifture upon the furface, but the profpect of fertility is gone. Such is the condition of France. Her people are become the contempt of Europe. No falutary crifis fhall ever reftore them to liberty\*."

But in fpite of these melancholy predictions, the work of renovation was in continual progress. The American revolution gave the finishing stroke, and only fix years elapsed between the completion of American liberty and the commencement of the French revolution. Will a term longer than this be necessary.

\* " Dans chaque nation il est des momens où les citoyens, incertains du parti qu'ils doivent prendre, et suspendus entre un bon et un mauvais gouvernement, éprouvent la soif de l'instruction, où les esprits, si je l'ose dire, préparés et ameublis peuvent être facilement penétrés de la rose de la vérité. Qu'en ce moment un bon ouvrage paroisse, il peut opérer d'heureuses réformes : mais cet instant passé, les citoyens, insensibles à la gloire, sont par la forme de leur gouvernement invinciblement entraînés vers l'ignorance et l'abrutissent. Alors les esprits sont la terre endurcie : l'eau de la vérité y tombe, y coule, mais fans la féconder. Tel est l'état de la France. Cette nation avilie est aujourd'hui le mépris de l'Europe. Nulle crise falutaire ne lui rendra la liberté."

De l'Homme, Préface.

#### CHAP. III.

#### OF TYRANNICIDE.

DIVERSITY OF OPINIONS ON THIS SUBJECT .- ARGUMENT IN ITS VINDICATION. — THE DESTRUCTION OF A TYRANT NOT A CASE OF EXCEPTION.—CONSEQUENCES OF TYRAN-NICIDE.—ASSASSINATION DESCRIBED.—IMPORTANCE OF SINCERITY.

QUESTION, connected with the mode of effecting re-BOOK IV. CHAP. III. volutions, and which has been eagerly difcuffed among Diverlity of opinions on political reasoners, is that of tyrannicide. The moralists of antithis fubject. quity warmly contended for the lawfulness of this practice; by the moderns it has generally been condemned.

Argument in its vindication.

3

÷Ł

The arguments in its favour are built upon a very obvious principle. "Juffice ought univerfally to be administered. Upon leffer criminals it is done, or pretended to be done, by the laws of the community. But criminals by whom law is fubverted, and who overturn the liberties of mankind, are out of the reach of the ordinary administration of justice. If justice be partially adminiftered in fubordinate cafes, and the rich man be able to opprefs the

#### TYRANNICIDE. OF

the poor with impunity, it must be admitted that a few examples of this fort are infufficient to authorife the last appeal of human But no man will deny that the cafe of the ulurper and beings. the defpot is of the most atrocious nature. In this instance, all the provisions of civil policy being superfeded, and justice poifoned at the fource, every man is left to execute for himfelf the decrees of eternal equity."

It may however be doubted whether the deftruction of a ty- The deftruerant be in any respect a cafe of exception from the rules proper to be observed upon ordinary occasions. The tyrant has certainly no particular fanctity annexed to his perfon, and may be killed with as little fcruple as any other man, when the object is that of repelling immediate violence. In all other cafes, the extirpation of the offender by a felf-appointed authority, does not appear to be the proper mode of counteracting injuffice.

For, first, either the nation, whose tyrant you would destroy, Confequences is ripe for the affertion and maintenance of its liberty, or it is not. If it be, the tyrant ought to be deposed with every appearance of publicity. Nothing can be more improper, than for an affair, interesting to the general weal, to be conducted as if it were an act of darkness and shame. It is an ill lesson we read to mankind, when a proceeding, built upon the broad bafis of general juffice, is permitted to fhrink from public ferutiny. The piftol and the dagger may as eafily be made the auxiliaries of vice as

G g 2

tion of a tyrant not a cale of exception.

of tyranni-

of

227

## OF TYRANNICIDE.

BOOK IV. of virtue. To proferibe all violence, and neglect no means of information and impartiality, is the most effectual fecurity we can have for an iffue conformable to the voice of reason and truth.

> If the nation be not ripe for a state of freedom, the man, who affumes to himfelf the right of interposing violence, may indeed shew the fervour of his conception, and gain a certain degree of notoriety. Fame he will not gain, for mankind at prefent regard an act of this fort with merited abhorrence; and he will inflict new calamities on his country. The confequences of tyrannicide are well known. If the attempt prove abortive, it renders the tyrant ten times more bloody, ferocious, and cruel than before. If it fucceed, and the tyranny be restored, it produces the fame effect upon his fuccessors. In the climate of defpotism fome folitary virtues may fpring up. But in the midst of plots and confpiracies there is neither truth, nor confidence, nor love, nor humanity.

Affaffination deferibed.

Secondly, the true merits of the queftion will be ftill farther underftood, if we reflect on the nature of affaffination. The miftake, which has been incurred upon this fubject, is to be imputed principally to the fuperficial view that has been taken of it. If its advocates had followed the confpirator through all his windings, and obferved his perpetual alarm left truth fhould become known, they would probably have been lefs indifcriminate

4

in

### OF TYRANNICIDE.

in their applause. No action can be imagined more directly at BOOK IV. war with a principle of ingenuoufnefs and candour. Like all that is most odious in the catalogue of vices, it delights in obscurity. It thrinks from the penetrating eye of wildom. It avoids all queftion, and hefitates and trembles before the queftioner. It ftruggles for a tranquil gaiety, and is only complete where there is the most perfect hypocrify. It changes the use of speech, and composes every feature the better to deceive. Imagine to yourfelf the confpirators, kneeling at the feet of Cæfar, as they did the moment before they destroyed him. Not all the virtue of Brútus can fave them from your indignation.

There cannot be a better inftance than that of which we are Importance treating, to prove the importance of general fincerity. We fee in this example, that an action, which has been undertaken from the best motives, may by a defect in this particular tend to overturn the very foundations of justice and happines. Wherever there is affaffination, there is an end to all confidence among men. Protefts and affeverations go for nothing. No man prefumes to know his neighbour's intention. The boundaries, that have hitherto ferved to divide virtue and vice, are gone. The true interests of mankind require, not their removal, but their confirmation. All morality proceeds upon the affumption of fomething evident and true, will grow and expand in proportion as thefe indications are more clear and unequivocal, and could not exift for a moment, if they were deftroyed.

### OF THE CULTIVATION OF TRUTH.

BOOK IV.

CHAP. IV.

**PERHAPS** there cannot be a fubject of greater political importance, or better calculated to lead us in fafety through the mazes of controverfy, than that of the value of truth. Truth may be confidered by us, either abstractedly, as it relates to certain general and unchangeable principles, or practically, as it relates to the daily incidents and ordinary commerce of human life. In whichever of these views we confider it, the more deeply we meditate its nature and tendency, the more shall we be struck with its unrivalled importance.

lectual im-

### OF THE CULTIVATION

BOOK IV. CHAP. IV. Section I. general nature, those truths which preceded, either fubftantially or in the nature of things, the particular existences that furround us, and are independent of them all, are inexhaustible. Is it possible that a knowledge of these truths, the truths of mathematics, of metaphysics and morals, the truths which, according to Plato's conception \*, taught the creator of the world the nature of his materials, the result of his operations, the confequences of all possible fystems in all their detail, should not exalt and elevate the mind? The truths of particular nature, the hiftory of man, the characters and propensities of human beings, the process of our own minds, the capacity of our natures, are fcarcely less valuable. The reason they are so will best appear if we confider, fecondly, the tendency of truth in conducing to the perfection of our virtue.

to our moral improvement.

Virtue cannot exift in an eminent degree, unaccompanied by an extensive furvey of causes and their consequences, so that, having ftruck an accurate balance between the mixed benefits and injuries that for the present adhere to all human affairs, we may adopt that conduct which leads to the greatest possible advantage. If there be such a thing as virtue, it must admit of degrees. If it admit of degrees, he must be most virtuous, who chooses with the soundest judgment the greatest possible good of his species. But, in order to choose the greatest possible good,

\* See the Parmenides.

he

#### TRUTH. OF

he must be deeply acquainted with the nature of man, its gene- BOOK IV. CHAP.IV. ral features and its varieties. In order to execute it, he must have confidered all the inftruments for impreffing mind, and the different modes of applying them, and must know exactly the proper moment for bringing them into action. In whatever light we confider virtue, whether we place it in the action or the difposition, its degree must be intimately connected with the degree of knowledge. No man can love virtue fufficiently, who has not an acute and lively perception of its beauty, and its tendency to produce the only folid and permanent happinefs. What comparison can be made between the virtue of Socrates and that of a Hottentot or a Siberian? A humorous example how univerfally this truth has been perceived might be drawn from Tertullian, who, as a father of the church, was obliged to maintain the hollowness and infignificance of pagan virtues, and accordingly affures us, " that the most ignorant peafant under the Christian dispensation possessed more real knowledge than the wifeft of the ancient philosophers \*."

We shall be still more fully aware of the connection between Virtue the virtue and knowledge, if we confider that the highest employment of virtue is to propagate itfelf. Virtue alone is happinefs. The happiness of a brute that spends the greater part of his life in liftlefinefs and fleep, is but one remove from the happinefs of a plant that is full of fap, vigour and nutrition. The happinefs

beft fource of happinels:

proved by comparison :

234

of a man who purfues licentious pleafure is momentary, and his intervals of wearinefs and difguft perpetual. He fpeedily wears himfelf out in his fpecious career; and, every time that he employs the means of delight which his corporeal existence affords him, takes fo much from his capacity of enjoyment. If he be wife enough like Epicurus to perceive a part of thefe difadvantages, and to find in fresh herbs and the water of the fpring the truest gratification of his appetite, he will be obliged to feek fome addition to his stock of enjoyment, and like Epicurus to become benevolent out of pure fensuality. But the virtuous man has a perpetual fource of enjoyment. The only reason on account of which the truth of this affertion was ever controverted, is, that men have not understood what it was that conflituted virtue.

by its manner of adapting itfelf to all fituations : It is impoffible that any fituation can occur in which virtue cannot find room to expatiate. In fociety there is continual opportunity for its active employment. I cannot have intercourfe with any human being who may not be the better for that intercourfe. If he be already just and virtuous, these qualities are improved by communication. It is from a fimilar principle that it has been observed that great genius have usually existed in a cluster, and have been awakened by the fire ftruck into them by their neighbours. If he be imperfect and erroneous, there must be always fome prejudice I may contribute to destroy, fome motive to delineate, fome error to remove.

7

If

#### OF TRUTH.

In folitude I may accumulate the materials of focial benefit. No fituation can be fo desperate as to preclude these efforts. Voltaire, when fhut up in the Bastille, and for ought he knew for life, deprived of books, of pens and of paper, arranged and in part executed the project of his Henriade \*.

Another advantage of virtue in this personal view, is that, by its undewhile fenfual pleafure exhausts the frame, and passions often excited become frigid and callous, virtue has exactly the opposite propensities. Passions, in the usual acceptation of that term, having no absolute foundation in the nature of things, delight only by their novelty. But the more we are acquainted with virtue, the more estimable will it appear; and its field is as endless as the progress of mind. If an enlightened love of it be once excited in the mind, it is impossible that it should not continually increase. By its variety, by its activity it perpetually

BOOK IV. CHAP. IV. renovates itself, and renders the intellect in which it refides ever new and ever young.

cannot be effectually propagated but by a cultivated mind. All thefe reafonings are calculated to perfuade us that the moft precious boon we can beftow upon others is virtue, that the higheft employment of virtue is to propagate itfelf. But, as virtue is infeparably connected with knowledge in my own mind, fo can it only by knowledge be communicated to others. How can the virtue we have juft been contemplating be created, but by infufing comprehensive views and communicating energetic truths? Now that man alone is qualified to give thefe views, and communicate thefe truths, who is himfelf pervaded with them.

Let us suppose for a moment virtuous dispositions as existing without knowledge or outrunning knowledge, the laft of which is certainly poffible, and we fhall prefently find how little fuch virtue is worthy to be propagated. The most generous views will in fuch cafes frequently lead to the most nefarious actions. A Calvin will burn Servetus, and a Digby generate the gun-But, to leave these extreme instances, in all powder treafon. cafes where miftaken virtue leads to cruel and tyrannical actions, the mind will be foured and made putrefcent by the actions it Truth, immortal and ever prefent truth, is fo perpetrates. powerful, that, in fpite of all his inveterate prejudices, the upright man will fuspect himself, when he refolves upon an action

#### OF SINCERITY.

NATURE OF THIS VIRTUE.—ITS EFFECTS—UPON OUR OWN ACTIONS—UPON OUR NEIGHBOURS.—ITS TENDENCY TO PRODUCE FORTITUDE.—EFFECTS OF INSINCERITY.—CHA-RACTER WHICH SINCERITY WOULD ACQUIRE TO HIM WHO PRACTISED IT. — OBJECTIONS. — THE FEAR OF GIVING UNNECESSARY PAIN.—ANSWER.—THE DESIRE OF PRESERVING MY LIFE.—THIS OBJECTION PROVES TOO MUCH.—ANSWER.—SECRECY CONSIDERED.—THE SE-CRETS OF OTHERS.—STATE SECRETS.—SECRETS OF PHI-LANTHROPY.

SECTION II. Nature of this virtue.

T is evident in the last place, that a strict adherence to truth will have the best effect upon our minds in the ordinary commerce of life. This is the virtue which has commonly been known by the denomination of fincerity; and, whatever certain accom-

accommodating moralists may teach us, the value of fincerity will be in the highest degree obscured, when it is not complete. Real fincerity depofes me from all authority over the flatement of facts. Similar to the duty which Tully impofes upon the historian, it compels me not to dare "to utter what is false, or conceal what is true." It annihilates the bastard prudence, which would inftruct me to give language to no fentiment that may be prejudicial to my interests. It extirpates the low and felfish principle, which would induce me to utter nothing "to the difadvantage of him from whom I have received no injury." It compels/ me to regard the, concerns of my fpecies as my own concerns. What I know of truth, of morals, of religion, of government, it compels me to communicate. All the praife which a virtuous man and an honeft action can merit, I am obliged to pay to the uttermost mite. I am obliged to give language to all the blame to which profligacy, venality, hypocrify, and circumvention are fo justly entitled. I am not empowered to conceal any thing I know of myfelf, whether it tend to my honour or to my difgrace. I am obliged to treat every other man with equal frankness, without dreading the imputation of flattery on the one hand, without dreading his refentment and enmity on the other.

Did every man impose this law upon himself, he would be Its effects obliged to confider before he decided upon the commission of an actionsy equivocal action, whether he chose to be his own historian, to

be.

BOOK IV. CHAP. IV. SECTION II. be the future narrator of the fcene in which he was engaging. It has been juftly obferved that the popifh practice of auricular confeffion has been attended with fome falutary effects. How much better would it be, if, inftead of a practice thus ambiguous, and which may be converted into fo dangerous an engine of ecclefiaftical defpotifm, every man would make the world his confeffional, and the human fpecies the keeper of his confcience ?

upon our neighboure. How extensive an effect would be produced, if every man were fure of meeting in his neighbour the ingenuous censor, who would tell to himself, and publish to the world, his virtues, his good deeds, his meannesses and his follies? I have no right to reject any duty, because it is equally incumbent upon my neighbours, and they do not practife it. When I have difcharged the whole of my duty, it is weakness and vice to make myself unhappy about the omissions of others. Nor is it possible to fay how much good one man sufficiently rigid in his adherence to truth would effect. One such man, with genius, information and energy, might redeem a nation from vice.

Its tendency to produce fortitude. The confequence to myfelf of telling every man the truth, regardlefs of perfonal danger or of injury to my interefts in the world, would be uncommonly favourable. I fhould acquire a fortitude that would render me equal to the most trying fituations, that would maintain my prefence of mind entire in fpite

of

#### SINCERITY. **O**F

of unexpected occurrences, that would furnish me with extemporary arguments and wildom, and endue my tongue with Animated by the love of truth, my irrefistible eloquence. understanding would always be vigorous and alert, not as before frequently fubject to liftleffnefs, timidity and infipidity. Animated by the love of truth, and by a paffion infeparable from its nature, and which is almost the fame thing under another name, the love of my species, I should carefully seek for such topics as might most conduce to the benefit of my neighbours, anxiously watch the progress of mind, and inceffantly labour for the extirpation of prejudice.

What is it that at this day enables a thousand errors to keep their station in the world, priestcraft, tests, bribery, war, cabal, and whatever elfe is the contempt and abhorrence of the enlightened and honeft mind ? Cowardice. Becaufe, while vice walks erect with an unabashed countenance, men lefs vicious dare not paint her with that truth of colouring, which fhould at once confirm the innocent and reform the guilty. Becaufe the majority of those who are not involved in the bufy scene, and who, poffeffing fome difcernment, fee that things are not altogether right, yet fee in fo frigid a way, and with fo imperfect a Many, who detect the imposture, are yet abfurd enough view. to imagine that imposture is necessary to keep the world in awe, and that truth being too weak to curb the turbulent paffions of mankind, it is exceedingly proper to call in knavery and artifice as the abettors of her power. If every man to-day would

BOOK IV. CHAP. IV. SECTION II. would tell all the truth he knows, three years hence there would be fearcely a falfhood of any magnitude remaining in the civilifed world.

Character which fincerity would acquire to him who practifed it.

There is no fear that the character here deferibed should degenerate into ruggedness and brutality \*. The motive by which it is animated affords a fufficient fecurity against fuch con-" I tell an unpleafant truth to my neighbour from a fequences. conviction that it is my duty. I am convinced it is my duty. becaufe I perceive the communication is calculated for his benefit." His benefit therefore is the motive of my proceeding, and with fuch a motive it is impossible I should not feek to communicate it in the most efficacious form, not rousing his refentment, but awakening his moral feelings and his energy. Meanwhile the happiest of all qualifications in order to render truth palatable, is that which rifes spontaneously in the situation we have been confidering. Truth according to the terms of the fupposition is to be spoken from the love of truth. But the face, the voice, the gefture are fo many indexes to the mind. It is fcarcely poffible therefore that the perfon with whom I am converfing fhould not perceive, that I am influenced by no malignity, acrimony and envy. In proportion as my motive is pure, at least after a few experiments, my manner will become unembarraffed. There will be franknefs in my voice, fervour in my gesture, and kindness in my heart. That man's mind must be

\* See a particular cafe of this fincerity discussed in Appendix, No. II.

I

13

of

#### SINCERITY. OF

of a very perverse texture, that can convert a beneficent potion BOOK IV. CHAP. IV. administered with no ungenerous retrospect, no felfish triumph, into rancour and averfion. There is an energy in the fincerity of a virtuous mind that nothing human can refift.

I ftop not to confider the objections of the man who is im- Objections. merfed in worldly prospects and pursuits. He that does not know that virtue is better than riches or title must be convinced by arguments foreign to this place.

But it will be asked, "What then, are painful truths to be dif- The fear of closed to perfons who are already in the most pitiable circum- ceffary pain. fances? Ought a woman that is dying of a fever to be informed of the fate of her hufband whofe skull has been fractured by a fall from his horfe?"

The most that could possibly be conceded to a cafe like this, Asswer. is, that this perhaps is not the moment to begin to treat like a rational being a perfon who has through the courfe of a long life been treated like an infant. But in reality there is a mode in which under fuch circumstances truth may fafely be communicated; and, if it be not thus done, there is perpetual danger that it may be done in a blunter way by the heedlefs loquacioufnefs of a chambermaid, or the yet undebauched fincerity of an infant. How many arts of hypocrify, ftratagem and falfhood must be employed to cover this pitiful fecret ? Truth was calculated in Ii<sub>2</sub> the

1

giving unne-

243

EOOK IV. CHAP. IV. SECTION II. the nature of things to difcipline the mind to fortitude, humanity and virtue. Who are we, that we fhould fubvert the nature of things and the fyftem of the universe, that we should breed up a fet of fummer infects, upon which the breeze of fincerity may never blow, and the tempest of misfortune never beat?

The defire of preferving my life.

" But truth may fometimes be fatal to him that fpeaks it. A man, who fought for the Pretender in the year 1745, when the event happened that difperfed his companions, betook himfelf to folitary flight. He fell in with a party of loyalifts who were feeking to apprehend him; but not knowing his perfon, they enquired of him for intelligence to guide them in their purfuit. He returned an anfwer calculated to cherifh them in their: miftake, and faved his life."

This objection proves too much. This like the former is an extreme cafe; but the true anfwerwill probably be found to be the fame. If any one fhould queftion this, let him confider how far his approbation of the conduct of the perfon above cited would lead him. The rebels, as they were called, were treated in the period from which the example is drawn with the most illiberal injustice. This man, guided perhaps by the most magnanimous motives in what he had done, would have been put to an ignominious death. But, if he had a right to extricate himfelf by falshood, why not the wretch who has been guilty of forgery, who has deferved punishment, but who may now be confcious that he has in him materials

Digitized by Google

materials and inclination to make a valuable member of fociety? Nor is the inclination an effential part of the fuppolition. Whereever the materials exift, it will perhaps be found to be flagrantly unjuft on the part of fociety to deftroy them, inftead of difcovering the means by which they might be rendered innocent and ufeful. At this rate, a man has nothing to do but to commit one crime, in order to give him a right to commit a fecond which fhall fecure impunity to the firft.

But why, when fo many hundred individuals have been con- Anfwer. tented to become martyrs to the unintelligible principles of a pitiful fect, fhould not the one innocent man I have been defcribing be contented to offer himfelf up a victim at the fhrine of veracity? Why fhould he purchase a few poor years of exile and mifery by the commission of falshood? Had he furrendered himfelf to his purfuers, had he declared in the prefence of his judges and his country, "I, whom you think too wicked and degenerate to deferve even to live, have chosen rather to encounter your injuffice than be guilty of an untruth : I would have escaped from your iniquity and tyranny if I had been able; but, hedged in on all fides, having no means of deliverance but in falshood, I chearfully submit to all that your malice can inflict rather than violate the majefty of truth ;" would he not have done an honour to himfelf, and afforded an example to the world, that would have fully compensated the calamity of his untimely death? It is in all cafes incumbent upon us to difcharge

BOOK IV. CHAP. IV. SECTION II.

BOOK IV. CHAP. IV. SECTION II.

charge our own duty, without being influenced by the enquiry whether other men will discharge or neglect theirs.

It must be remembered however that this is not the true jet The ftrefs does not lie upon the good he of the argument. would have done: that is precarious. This heroic action, as it is to be feared has been the cafe with many others, might be configned to oblivion. The object of true wildom under the circumstances we are confidering, is to weigh, not fo much what is to be done, as what is to be avoided. We must not be guilty of infincerity. We must not feek to obtain a defirable object by vile means. We must prefer a general principle to the meretricious attractions of a particular deviation. We must perceive in the prefervation of that general principle a balance of univerfal good, outweighing the benefit to arife in any inftance from fuperfeding it. It is by general principles that the bufinefs of the universe is carried on. If the laws of gravity and impulse did not make us know the confequences of our actions, we should be incapable of judgment and inference. Nor is this lefs true He that, having laid down to himfelf a plan of finin morals. cerity, is guilty of a fingle deviation, infects the whole, contaminates the frankness and magnanimity of his temper (for fortitude in the intrepidity of lying is bafenefs), and is lefs virtuous than the foe against whom he defends himself; for it is more virtuous in my neighbour to confide in my apparent honefty, than in me to abufe his confidence. In the cafe of martyrdom

Digitized by Google

#### SINCERITY. OF

tyrdom there are two things to be confidered. It is an evil not BOOK IV. wantonly to be incurred, for we know not what good yet remains for us to do. It is an evil not to be avoided at the expence of principle, for we fhould be upon our guard against fetting an inordinate value upon our own efforts, and imagining that truth would die, if we were to be deftroyed.

" But what becomes of the great duty of fecrecy, which the Secrecy conincomparable Fenelon has made a capital branch in the education It is annihilated. It becomes a truly virof his Telemachus?" tuous man not to engage in any action of which he would be ashamed though all the world were spectator. Indeed Fenelon with all his ability has fallen into the most palpable inconfistency upon this fubject. In Ithaca a confiderable part of the merit of Telemachus confifts in keeping his mother's fecrets \*. When he arrives in Tyre, he will not be perfuaded to commit or fuffer a deception, though his life was apparently at stake †.

What is it of which an honeft man is commonly ashamed? Of virtuous poverty, of doing menial offices for himfelf, of having raifed himfelf by merit from a humble fituation, and of a thousand particulars which in reality constitute his glory. With respect to actions of beneficence we cannot be too much upon our guard against a spirit of ostentation and the character that imperiously exacts the gratitude of its beneficiaries; but it is certainly an extreme weaknefs to defire to hide our deferts. So

fidered.

BOOK IV. CHAP. IV.

far from defiring to withhold from the world the knowledge of our good deeds, we ought to be forward to exhibit an attractive and illustrious example. We cannot determine to keep any thing fecret without risking at the fame time to commit a hundred artifices, quibbles, equivocations and falfhoods.

The fecrets of others. But the fecrets of others, " have I a power over them ?" Probably not: but you have a duty refpecting them. The facts with which you are acquainted are a part of your poffeffions, and you are as much obliged refpecting them as in any other cafe, to employ them for the public good. Have I no right to indulge in myfelf the caprice of concealing any of my affairs, and can another man have a right by his caprice to hedge up and reftrain the path of my duty?—" But flate fecrets?" This perhaps is a fubject that ought not to be anticipated. We fhall have occafion to enquire how minifters of the concerns of a nation came by their right to equivocate, to juggle and over-reach, while private men are obliged to be ingenuous, direct and fincere.

State fecrets.

Secrets of philanthropy.

There is one cafe of a fingular nature that feems to deferve a feparate examination; the cafe of fecrets that are to be kept for the fake of mankind. Full juftice is done to the affirmative fide of this argument by Mr. Condorcet in his Life of Voltaire, where he is juftifying this illuftrious friend of mankind, for his gentlenefs and forbearance in afferting the liberties of the fpecies. He first

first enumerates the incefant attacks of Voltaire upon fuperstition, BOOK IV. hypocritical aufterities and war; and then proceeds: "It is true, the more men are enlightened, the more they will be free; but let us not put defpots on their guard, and incite them to form a league against the progress of reason. Let us conceal from them the first and eternal union that fublifts between knowledge and liberty. Voltaire thought proper to paint fuperstition as the enemy of monarchy, to put kings and princes upon their guard against the gloomy ferocity and ambition of the priesthood, and to demonstrate that, were it not for the freedom of thought and investigation, there would be no fecurity against the return of papal infolence, of profcriptions, affaffinations and religious war. Had he taken the other fide of the queftion, had he maintained, which is equally true, that fuperflition and ignorance are the fupport of defpotifm, he would only have anticipated truths for which the public were not ripe, and have feen a fpeedy end to his career. Truth taught by moderate degrees gradually enlarges the intellectual capacity, and infenfibly prepares the equality and happiness of mankind; but taught without prudential restraint would either be nipped in the bud, or occasion national concussions in the world, that would be found premature and therefore abortive\*."

BOOK IV. CHAP. IV. SECTION II. What a cowardly diftruft do reafonings like thefe exhibit of the omnipotence of truth! With refpect to perfonal fafety, it will be found upon an accurate examination that Voltaire with all his ingenuity and ftratagem was for fixty years together the object of perpetual, almoft daily perfecution from courts and minifters<sup>\*</sup>. He was obliged to retire from country to country, and at laft to take advantage of a refidence upon the borders of two ftates with a habitation in each. His attempts to fecure the patronage of princes led only to viciffitude and difgrace. If his plan had been more firm and direct, he would not have been lefs fafe. Timidity, and an anxious endeavour to fecure to ourfelves a protector, invite perfecution. With the advantages of Voltaire, with his talents and independence, he might have held the tyrants of the world in awe.

que fans la liberté de penfer le même esprit dans le clergé ramènerait les mêmes assignifinats, les mêmes supplices, les mêmes proscriptions, les mêmes guerres civiles.— Au lieu de montrer que la superstition est l'appui du despotisme, avant que la raison ait rassemblé assert de force, il prouvera qu'elle est l'ennemie des rois.— Tel est l'esprit de tous les ouvrages de Voltaire—Que des hommes, inferieurs à lui, ne voyent pas que se Voltaire eut fait autrement, ni Montesquieu ni Roussen u'auraient pu écrire leurs ouvrages, que l'Europe serait encore superstiticuse, et resterait long-tems esclave.—En attaquant les oppresseurs avant d'avoir éclairé les citoyens, on risque de perdre la liberté et d'étouffer la raison. L'histoire offre la preuve de cette vérité. Combien de fois, malgré les généreux efforts des amis de la liberté, une seule bataille n'a-t-elle pas réduit des nations à une servitude de plusieurs siécles !—Pourquoi ne pas profiter de cette expérience funeste, et savoir attendre des progrès des lumières une liberté plus réelle, plus durable et plus paisible ?"

As

As to the progress of truth, it is not fo precarious as its fear- BOOK IV. ful friends may imagine. Mr. Condorcet has jufily infinuated in the courfe of his argument, that " in the invention of printing is contained the embryo, which in its maturity and vigour is deftined to annihilate the flavery of the human race\*." Books. if proper precautions be employed, cannot be deftroyed. Knowledge cannot be extirpated. Its progress is filent, but infallible; and he is the most useful foldier in this war, who accumulates in an unperishable form the greatest mass of truth.

As truth has nothing to fear from her enemies, she needs not have any thing to fear from her friends. The man, who publishes the sublimest discoveries, is not of all others the most likely to inflame the vulgar, and hurry the great question of human happiness to a premature crisis. The object to be pursued undoubtedly is, the gradual improvement of mind. But this end will be better answered by exhibiting as much truth as possible, enlightening a few, and fuffering knowledge to expand in the proportion which the laws of nature and neceffity prefcribe, than by any artificial plan of piecemeal communication that we can invent. There is in the nature of things a gradation in difcovery and a progress in improvement, which do not need to be affisted by the stratagems of their votaries. In a word, there cannot be a more unworthy idea, than that truth and virtue should be

· PROPOSITION which, however evident in itfelf, feems BOOK IV. never to have been confidered with the attention it deferves, is that which affirms the connexion between understanding and virtue. Can an honeft ploughman be as virtuous as virtue exift

CHAP. IV: Appendix, No. I. Can eminent unconnected Cato? with talents?

### CONNEXION BETWEEN

BOOK IV. Cato? Is a man of weak intellects and narrow education as CHAP. IV. capable of moral excellence as the fublimest genius or the mind APPENDIX. most stored with information and science?

Nature of vir-To determine these questions it is necessary we should recollect the nature of virtue. Confidered as a perfonal quality it confifts in the difpolition of the mind, and may be defined a defire to promote the benefit of intelligent beings in general, the quantity of virtue being as the quantity of defire. Now defire is another name for preference, or a perception of the excellence real or fuppofed of any object. I fay real or fuppofed, for an object totally deftitute of real and intrinsic excellence, may become an object of defire by means of the imaginary excellence that is afcribed to it. Nor is this the only miftake to which human intelligences are liable. We may defire an object of abfolute excellence, not for its real and genuine recommendations. but for fome fictitious attractions we may impute to it. This is always in fome degree the cafe, when a beneficial action is performed from an ill motive.

> How far is this miftake compatible with real virtue? If I defire the benefit of intelligent beings, not from a clear and diffinct perception of what it is in which their benefit confifts, but from the unexamined leffons of education, from the phyfical effect of fympathy, or from any fpecies of zeal unallied to and incommenfurate with knowledge, can this defire be admitted for virtuous?

tue.

### UNDERSTANDING AND VIRTUE.

tuous ? Nothing feems more inconfiftent with our ideas of virtue. BOOK IV. CHAP. IV. A virtuous preference is the preference of an object for the fake of certain beneficial qualities which really belong to that object. To attribute virtue to any other fpecies of preference would be the fame as to suppose that an accidental effect of my conduct, which was altogether out of my view at the time of adopting it, . might entitle me to the appellation of virtuous.

Hence it appears, first, that virtue confists in a defire of the It is the offbenefit of the fpecies : and, fecondly, that that defire only can be derilanding. denominated virtuous, which flows from a diffinct perception of the value, and confequently of the nature, of the thing defired. But how extensive must be the capacity that comprehends the full value of that benefit which is the object of virtue! Itmust begin with a collective idea of the human species. It/ must discriminate, among all the different causes that produce a pleafurable state of mind, that which produces the most exquifite and durable pleasure. Eminent virtue requires that I should have a grand view of the tendency of knowledge to produce happinefs, and of just political institution to favour the progrefs of knowledge. It demands that I should perceive in what manner focial intercourfe may be made conducive to virtue and felicity, and imagine the unspeakable advantages that may arise from a coincidence and fucceffion of generous efforts. Thefe things are neceffary, not merely for the purpose of enabling me to employ my virtuous difposition in the best manner, but alfo-

256

for the purpole of giving to that disposition a just animation and vigour. God, according to the ideas usually conceived of that being, is more benevolent than man, because he has a constant and clear perception of the nature of that end which his providence pursues.

It generates underftanding. A farther proof that a powerful understanding is infeparable from eminent virtue will fuggest itself, if we recollect that earnest defire never fails to generate capacity.

Illustration from other purfuits :

love :

This proposition has been beautifully illustrated by the poets, when they have reprefented the passion of love as immediately leading in the breast of the lover to the attainment of many arduous accomplishments. It unlocks his tongue, and enables him to plead the cause of his passion with infinuating eloquence. It renders his conversation pleasing and his manners graceful. Does he defire to express his feelings in the language of verse? It dictates to him the most natural and pathetic strains, and supplies him with a just and interesting language which the man of mere reflection and science has often south for in vain.

ambition :

No picture can be more truly founded in a knowledge of human nature than this. The hiftory of all eminent talents is of a fimilar kind. Did Themiftoeles defire to eclipfe the trophies of the battle of Marathon? The uneafinefs of this defire would not let him fleep, and all his thoughts were occupied with the 3 invention

### UNDERSTANDING AND VIRTUE.

invention of means to accomplifh the purpole he had chosen. It is a well known maxim in the forming of juvenile minds, that the instruction, which is communicated by mere constraint, makes a flow and feeble impression; but that, when once you have inspired the mind with a love for its object, the scene and the progress are entirely altered. The uneasiness of mind which earness defire produces, doubles our intellectual activity; and as furely carries us forward with increased velocity towards our goal, as the expectation of a reward of ten thousand pounds would prompt me to walk from London to York with firmer resolution and in a schorter time.

Let the object be for a perfon uninftructed in the rudiments of drawing to make a copy of fome celebrated flatue. At firft, we will fuppole, his attempt fhall be mean and unfuccefsful. If his defire be feeble, he will be deterred by the mifcarriage of this effay. If his defire be ardent and invincible, he will return to the attack. He will derive inftruction from his failure. He will examine where and why he mifcarried. He will ftudy his model with a more curious eye. He will perceive that he failed principally from the loofe and undigefted idea he had formed of the object before him. It will no longer fland in hismind as one general mafs, but he will analyfe it, beftowing upon each part in fucceffion a feparate confideration.

The cafe is fimilar in virtue as in frience. If I have con- applied. L l. seived

ł

·£ 58

ceived an earnest defire of being a benefactor of my species, I shall no doubt find out a channel in which for my defire to operate, and shall be quick-fighted in discovering the defects or comparative littleness of the plan I have chosen. But the choice of an excellent plan for the accomplishment of an important purpose, and the exertion of a mind perpetually watchful to remove its defects, imply confiderable understanding. The farther I am engaged in the pursuit of this plan the more will my capacity increase. If my mind flag and be discouraged in the pursuit, it will not be merely want of understanding, but want of defire. My defire and my virtue will be less, than those of the man, who goes on with unremitted constancy in the fame career.

Can eminent talents exift unconnected with virtue? Thus far we have only been confidering how impossible it is that eminent virtue should exist in a weak understanding, and it is surprising that such a proposition should ever have been contested. It is a curious question to examine, how far the converse of this proposition is true, and in what degree eminent talents are compatible with the absence of virtue.

Argument in the affirmative from analogy:: From the arguments already adduced it appears that virtuous defire is another name for a clear and diffinct perception of the nature and value of the object of virtue. Hence it feems most natural to conclude, that, though understanding, or strong percipient power is the indispensible prerequisite of virtue, yet it is necessary

### UNDERSTANDING AND VIRTUE.

neceffary that this power should be fixed upon this object, in BOOK IV. CHAP. IV. order to its producing the defired effect. Thus it is in art. APPENDIX, Without genius no man ever was a poet; but it is necessary that general capacity should have been directed to this particular. channel, for poetical excellence to be the refult.

There is however fome difference between the two cafes. in the nega-Poetry is the business of a few, virtue and vice are the affairs of universality of all men. To every intellect that exifts one or other of thefe lation: qualities must properly belong. It must be granted that, where every other circumstance is equal, that man will be most virtuous, whofe underftanding has been most actively employed in the fludy of virtue. But morality has been in a certain degree an object of attention to all men. No perfon ever failed more or lefs to apply the flandard of just and unjust to his own actions and those of others; and this has of course been generally done with most ingenuity by men of the greatest capacity.

It must farther be remembered that a vicious conduct is always from the nathe refult of narrow views. A man of powerful capacity and extensive observation is least likely to commit the mistake, either of feeing himfelf as the only object of importance in the univerfe, or of conceiving that his own advantage may beft be promoted by trampling on that of others. Liberalaccomplifhments are furely in fome degree connected with liberal principles. He, who takes into his view a whole nation as the fubjects of his

#### CONNEXION BETWEEN

BOOK IV. CHAP. IV. Appendix, No. I. operation or the inftruments of his greatness, may naturally be expected to entertain some kindness for the whole. He, whose mind is habitually elevated to magnificent conceptions, is not likely to fink without strong reluctance into those fordid purfuits, which engross so large a portion of mankind.

The argument balanced. But, though these general maxims must be admitted for true, and would incline us to hope for a conftant union between eminent talents and great virtues, there are other confiderations which present a strong drawback upon so agreeable an expectation. It is sufficiently evident that morality in some degree enters into the reflections of all mankind. But it is equally evident, that it may enter for more or for less; and that there will be men of the highest talents, who have their attention diverted to other objects, and by whom it will be meditated upon with less earnestness, than it may sometimes be by other men who are in a general view their inferiors. The human mind is in some cases so tenacious of its errors, and so ingenious in the invention of a sophistry by which they may be vindicated, as to frustrate expectations of virtue in other respects the best founded.

Importance • of a fenfe of Juffice. From the whole of the fubject it feems to appear, that men of talents, even when they are erroneous, are not defitute of virtue, and that there is a degree of guilt of which they are incapable. There is no ingredient that fo effentially contributes to a virtuous character as a fense of justice. Philanthropy, as

### UNDERSTANDING AND VIRTUE.

contradiftinguished to justice, is rather an unreflecting feeling, than a rational principle. It leads to an abfurd indulgence, which is frequently more injurious than beneficial even to the individual it proposes to favour. It leads to a blind partiality. inflicting calamity without remorfe upon many perhaps, in order to promote the imagined intereft of a few. But justice measures by one inflexible standard the claims of all, weighs their opposite pretentions, and feeks to diffuse happines, because happines is the fit and reasonable adjunct of a confcious being. Wherever therefore a strong sense of justice exists, it is common and reasonable to fay, that in that mind exists confiderable virtue, though the individual from an unfortunate concurrence of circumstances may with all his great qualities be the instrument of a very small portion of benefit. Can great intellectual energy exift without a ftrong fense of justice ?

۱

1

It has no doubt refulted from a train of fpeculation fimilar to Its conthis, that poetical readers have commonly remarked Milton's devil to be a being of confiderable virtue. It must be admitted that his energies centered too much in perfonal regards. But why did he rebel against his maker? It was, as he himself informs us, becaule he faw no fufficient realon for that extreme inequality of rank and power which the creator affumed. It was because prescription and precedent form no adequate ground for implicit faith. After his fall, why did he still cherish the fpirit of opposition? From a perfuasion that he was hardly and injurioufly

nexion with talents.

BOOK IV. CHAP. IV.

> FNDIX. No. I.

### CONNEXION BETWEEN

BOOK IV. CHAP. IV. Appendix, No. I. injurioully treated. He was not difcouraged by the apparent inequality of the conteft: becaufe a fenfe of reafon and jufficewas ftronger in his mind, than a fenfe of brute force: becaufe he had much of the feelings of an Epictetus or a Cato, and little of those of a flave. He bore his torments with fortitude, becaufe he difdained to be fubdued by despotic power. He fought revenge, becaufe he could not think with tameness of the unexpostulating authority that assumed to dispose of him. How beneficial and illustrious might the temper from which these qualities flowed have proved with a small diversity of fituation !

Let us defcend from these imaginary existences to real history. We shall find that even Cæsar and Alexander had their virtues. There is great reason to believe, that, however mistaken was their fystem of conduct, they imagined it reconcileable and even conducive to the general good. If they had defired the general good more earnessly, they would have understood better how to promote it.

Upon the whole it appears, that great talents are great energies, and that great energies cannot flow but from a powerful fenfe of fitnefs and justice. A man of uncommon genius is a man of high passions and lofty defign; and our passions will be found in the last analysis to have their furest foundation in a fentiment of justice. If a man be of an aspiring and ambitious temper, it is because at present he finds himself out of his place, and

### UNDERSTANDING AND VIRTUE.

and wifhes to be in it. Even the lover imagines that his qualities or his paffion give him a title fuperior to that of other men. If I accumulate wealth, it is becaufe I think that the most rational plan of life cannot be fecured without it; and, if I dedicate my energies to fenfual pleafures, it is that I regard other purfuits as irrational and visionary. All our passions would die in the moment they were conceived, were it not for this reinforcement. A man of quick refentment, of strong feelings, and who pertinaciously resists every thing that he regards as an unjust affumption, may be confidered as having in him the feeds of eminence. Nor is it eafily to be conceived that fuch a man fhould not proceed from a fense of justice to some degree of benevolence; as Milton's hero felt real compation and fympathy for his partners in misfortune.

If these reasonings are to be admitted, what judgment shall Illiberality we form of the decifion of doctor Johnfon, who, speaking of a men of tacertain obscure translator of the odes of Pindar, fays, that he usually was "one of the few poets to whom death needed not to be Let it be remembered that the error is by no means terrible \*?" peculiar to doctor Johnson, though there are few instances in which it is carried to a more violent extreme, than in the general tenour of the work from which this quotation is taken. It was natural to expect that there would be a combination among the multitude to pull down intellectual eminence. Ambition is com-

mon to all men; and those, who are unable to rise to diffinction, are at least willing to reduce others to their own standard. No man can completely understand the character of him with whom he has no sympathy of views, and we may be allowed to revile what we do not understand. But it is deeply to be regretted that men of talents should so often have entered into this combination. Who does not recollect with pain the vulgar, abuse that Swift has thrown upon Dryden, and the mutual jealousies and animosities of Rousseau and Voltaire, men whoquest to have co-operated for the falvation of the world?

Let

#### OF THE MODE OF

BOOK IV. CHAP. IV. APPENDIX, No. II. from the fituation in which it places, 1. the vilitor:

Let us first, according to the well known axiom of morality, put ourfelves in the place of the perfon whom this answer excludes. It feldom happens but that he is able, if he be in possession of any difcernment, to difcover with tolerable accuracy whether the answer he receives be true or false. There are a thousand petty circumstances by which falshood continually detects itself. The countenance and the voice of the fervant, unless long practifed indeed in this leffon of deceit, his cold and referved manner in the one cafe, and his free, ingenuous and unembarraffed air in the other, will almost always speak a language lefs ambiguous than his lips. But let us fuppofe only that we vehemently fuspect the truth. It is not intended to keep us in ignorance of the existence of such a practice. He that adopts it, is willing to avow in general terms that fuch is his fystem, or he makes out a cafe for himself much less favourable than I was making out for him. The visitor then who receives this answer, feels in spite of himself a contempt for the prevarication of the perfon he vifits. I appeal to the feelings of every man in the fituation defcribed, and I have no doubt that he will find this to be their true state in the first instance, however he may have a fet of fophiftical reafonings at hand by which he may in a few minutes reason down the first movements of indignation. He feels that the trouble he has taken and the civility he intended intitled him at least to truth in return.

### EXCLUDING VISITORS.

Having put ourfelves in the place of the vifitor, let us next BOOK IV. put ourfelves in the place of the poor defpifed fervant. Let us fuppose that we are ourselves deftined as fons or husbands to give this answer that our father or our wife is not at home. when he or fhe is really in the houfe. Should we not feel our tongues contaminated with the base plebeian lie? Would it be a fufficient opiate to our confciences to fay that "fuch is the practice, and it is well underftood ?" It never can be underftood : its very intention is, not to be underftood. We fay that "we have certain arguments that prove the practice to be innocent." Are fervants only competent to understand these arguments? Surely we ought best to be able to understand our own arguments, and yet we fhrink with abhorrence from the idea of perfonally acting upon them.

Whatever fophiftry we may have to excule our error, nothing is more certain than that our fervants understand the leffon we teach them to be a lie. It is accompanied by all the retinue of falfhood. Before it can be gracefully practifed, the fervant must be no mean proficient in the mysteries of hypocrify. By the eafy impudence with which it is uttered, he best answers the purpose of his master, or in other words the purpose of deceit. By the easy impudence with which it is uttered, he best stiffes the upbraidings of his own mind, and conceals from others the shame imposed on him by his despotic task-master. Before this can be fufficiently done, he must have difcarded the ingenuous M m 2 franknefs

Appendix, No. II. 2. the fervant.

267

## OF THE MODE OF

BOOK IV. CHAP. IV. Appendix, No. II. franknefs by means of which the thoughts find eafy commerce with the tongue, and the clear and undifguifed countenance which ought to be the faithful mirror of the mind. Do you think, when he has learned this degenerate leffon in one inftance, that it will produce no unfavourable effects upon his general conduct? Surely, if we will practife vice, we ought at leaft to have the magnanimity to practife it in perfon, not cowardlike corrupt the principles of another, and oblige him to do that which we have not the honefty to dare to do for ourfelves.

Objections : Pretended neceffity of this practice, 1. to preferve us from intrufion :

But it is faid, " that this lie is neceffary, and that the intercourfe of human fociety cannot be carried on without it." What, is it not as eafy to fay, "I am engaged," or "indifpofed," or as the cafe may happen, as "I am not at home?" Are thefe anfwers more infulting, than the univerfally fufpected anfwer, the notorious hypocrify of "I am not at home?"

The purpole indeed for which this answer is usually employed is a deceit of another kind. Every man has in the catalogue of his acquaintance fome that he particularly loves, and others to whom he is indifferent, or perhaps worfe than indifferent. This answer leaves the latter to suppose, if they please, that they are in the class of the former. And what is the benefit to refult from this indifcriminate, undiffinguishing manner of treating our neighbours? Whatever benefit it be, it no doubt exists

### EXCLUDING VISITORS.

exists in confiderable vigour in the prefent state of polished fo- BOOK IV. ciety, where forms perpetually intrude to cut off all intercourse between the feelings of mankind; and I can fcarcely tell a man on the one hand " that I efteem his character and honour his virtues," or on the other " that he is fallen into an error which will be of prejudicial confequence to him," without trampling upon all the barriers of politeness. But is all this right? Is not the efteem or the disapprobation of others among the most powerful incentives to virtue or punishments of vice? Can we even understand virtue and vice half fo well as we otherwife should, if we be unacquainted with the feelings of our neighbours respecting them ? If there be in the list of our acquaintance any perfon whom we particularly diflike, it ufually happens that it is for fome moral fault that we perceive or think we perceive Why fhould he be kept in ignorance of our opinion in him. respecting him, and prevented from the opportunity either of amendment or vindication? If he be too wife or too foolifh, too virtuous or too vicious for us, why fhould he not be ingenuoufly told of his miftake in his intended kindnefs to us, rather than be fuffered to find it out by fix months enquiry from our fervants?

This leads us to yet one more argument in favour of this dif. ingenuous practice. We are told, "there is no other by which agreeable we can rid ourfelves of difagreeable acquaintance." How long shall this be one of the effects of polished fociety, to perfuade us that

2. to free us from difacquaintance.

CHAP. IV. Appendix. No. II.

#### OF THE MODE OF

that we are incapable of doing the most trivial offices for ourfelves? You may as well tell me, " that it is a matter of indifpenfible neceffity to have a valet to put on my flockings." In reality the existence of these troublesome visitors is owing to the hypocrify of politeness. It is that we wear the fame indiscriminate fmile, the fame appearance of cordiality and complacence to Ought we to do thus? Are virtue and all our acquaintance. excellence entitled to no diffinctions? For the trouble of these impertinent vifits we may thank ourfelves. If we practifed no deceit, if we affumed no atom of cordiality and efteem we did not feel, we fhould be little peftered with these buzzing intruders. But one fpecies of falfhood involves us in another; and he, that pleads for these lying answers to our visitors, in reality pleads the cause of a cowardice, that dares not deny to vice the diffinction and kindnefs that are exclusively due to virtue.

Characters of the honeft and difhoneft man in this respect compared.

The man who acted upon this fystem would be very far removed from a Cynic. The conduct of men formed upon the fashionable fystem is a perpetual contradiction. At one moment they fawn upon us with a fervility that dishonours the dignity of man, and at another treat us with a neglect, a farcastic infolence, and a supercilious disdain, that are felt as the severest cruelty, by him who has not the firmness to regard them with neglect. The conduct of the genuine moralist is equable and uniform. He loves all mankind, he defires the benefit of all, and this love and this defire are legible in his conduct. Does

#### SUBJECT OF SINCERITY RESUMED.

A CASE PROPOSED.—ARGUMENTS IN FAVOUR OF CONCEAL-MENT.—PREVIOUS QUESTION: IS TRUTH IN GENERAL TO BE PARTIALLY COMMUNICATED?—CUSTOMARY EF-FECTS OF SINCERITY—OF INSINCERITY—UPON HIM WHO PRACTISES IT—I. THE SUSPENSION OF IMPROVE-MENT—2. MISANTHROPY—3. DISINGENUITY—UPON THE SPECTATORS.—SINCERITY DELINEATED—ITS GENE-RAL IMPORTANCE.—APPLICATION.—DUTY RESPECTING THE CHOICE OF A RESIDENCE.

BOOK IV. CHAP. IV. APPENDIX, No. III. A cafe propofed. TO enable us more accurately to judge of the extent of the obligation to be fincere, let us fuppofe, "that I am refident, as a native or otherwife, in the kingdom of Portugal, and that I am of opinion that the eftablishment, civil and religious, of that country is in a high degree injurious to the welfare and improvement of the inhabitants." Ought I explicitly to declare the fentiments I entertain? To this question I anfwer, that "my immediate duty is to feek for myself a different refidence."

The

### SINCERITY RESUMED.

The arguments in favour of concealment in this cafe are obvious. " That country is fubject to a high degree of defpotifin, and, if I delivered my fentiments in this frank manner, efpecially if along with this I were ardent and indefatigable in en- in favour of deavouring to profelyte the inhabitants, my fincerity would not In that country the inftitution of the holy inquibe endured. fition still flourishes, and the fathers of this venerable court would find means effectually to filence me, before I had well opened my commission. The inhabitants, wholly unaccuftomed to fuch bold affertions as those I uttered, would feel their pious ears inexpreffibly flocked, and the martyrdom I endured, inftead of producing the good effects with which martyrdom is fometimes attended, would foon be forgotten, and, as long as it was remembered, would be remembered only with execrations of my memory. If on the contrary I concealed my fentiments, I might fpend a long life in acts of fubftantial benevolence. If I concealed them in part, I might perhaps by a prudent and gradual disclosure effect that revolution in the opinions of the inhabitants, which by my precipitation in the other cafe I defeated in the outfet. These arguments in favour of concealment are not built upon cowardice and felfishness, or upon a recollection of the horrible tortures to which I fhould be fubjected. They flow from confiderations of philanthropy, and an endeavour fairly to estimate in what mode my exertions may be rendered most conducive to the general good."

### SUBJECT OF

BOOK IV. CHAP. IV. APPENDIX, No. III. Previous queftion: Is truth in general to be partially communicated ?

Before we enter upon their direct examination, it may be proper to premife fome general obfervations. In the first place, let us calmly enquire whether the inftance here stated be of the nature of an exception or a rule. "Ought I univerfally to tell only a fmall part of the truth at a time, careful not to shock the prejudices of my hearers, and thus lead them imperceptibly to conclusions which would have revolted them at first; or am I to practife this method only, where the rifk is great, and my life may be the forfeit?" It would feem as if truth were a facred deposit, which I had no right to deal out in shreds to my fellow men, just as my temper or my prudence should dictate. It would feem as if it were an unworthy artifice, by an ingenious arrangement of my materials to trick men into a conclusion, to which franknefs, ingenuity and fincerity would never have conducted them. It would feem as if the flock I am fo careful to avoid were favourable to the health and robuft conftitution of mind; and that, though I might in this way produce leaft temporary effect, the ultimate refult would afford a balance greatly in favour of undifguifed fincerity.

Cuftomary effects of finocrity: A fecond preliminary proper to be introduced in this place confifts in a recollection of the general effects of fincerity and infincerity, the reafons for which the one is commonly laudable and the other to be blamed, independently of the fubjects about which they may be employed. Sincerity is laudable, on account of the firmnefs and energy of character it never fails to produce. " An

### SINCERITY RESUMED.

" An upright man," it has fometimes been faid, " ought to BOOK IV. carry his heart in his hand." He ought to have an ingenuoufness which shrinks from no examination. The commerce between his tongue and his heart is uniform. Whatever he fpeaks you can depend upon to be the truth and the whole truth. The defigns he has formed he employs no artifice to conceal. He tells you in the first instance: "This is the proposition I mean I put you upon your guard. I will not take to demonstrate. If what I affirm be the truth, it will bear your you by furprife. fcrutiny. If it were error, I could have recourse to no means more equivocal, than that of concealing in every flep of the process the object in which my exertions were intended to terminate."

Infincerity is to be blamed, because it has an immediate of infincetendency to vitiate the integrity of character. "I must conceal upon him the opinions I entertain," fuppofe, "from the holy father in- it: quifitor." What method shall I employ for this purpose ? Shall I 1. the fuspenhide them as an impenetrable fecret from all the world? If this be provement: the fystem I adopt, the confequence is an instant and immediate end to the improvement of my mind. It is by the efforts of a daring temper that improvements and difcoveries are made. The feeds of discovery are scattered in every thinking mind, but they are too frequently starved by the ungenial foil upon which Every man fuspects the abfurdity of kings and lords, they fall. and the injuffice of that glaring and oppreffive inequality which subfists in most civilised countries. But he dares not let his Nn 2 mind

rity: who practifes

fion of im-

### SUBJECT OF

mind loofe in fo adventurous a fubject. If I tell my thoughts, I derive from the act of communication encouragement to proceed. I perceive in what manner they are received by others. and this perception acts by rebound upon my own progrefs. If they be received cordially, I derive new encouragement from the approbation of others. If they be received with opposition and diftruft, I am induced to revife them. I detect their errors, or I ftrengthen my arguments, and add new truths to those which I had previously accumulated. What can excite me to the purfuit of difcovery, if I know that I am never to communicate my discoveries? It is in the nature of things impoffible, that the man, who has determined with himfelf never to utter the truths he knows, fhould be an intrepid and indefatigable thinker. The link which binds together the inward and the outward man is indiffoluble; and he, that is not bold in fpeech. will never be ardent and unprejudiced in enquiry. Add to this, that confcious difguife has the worft effect upon the temper, and converts virtue, which ought to be frank, focial and ingenuous, into a folitary, morofe and mifanthropical principle.

2. mifanthropy :

3. difingenuity : But let us conceive that the method I employ to protect myfelf from perfecution is different from that above flated. Let us fur pofe that I communicate my fentiments, but with caution and referve. This fyftem involves with it an endlefs train of faifhood, duplicity and tergiverfation. When I communicate my fentiments, it is under the inviolable feal of fecrecy. If my zeal

### SINCERITY RESUMED.

zeal carry me any great lengths, and my love of truth be ardent, I fhall wifh to communicate it as far as the bounds of prudence will poffibly admit, and it will be ftrange if in a courfe of years I do not commit one miftake in my calculation. My grand fecret is betrayed, and fufpicion is excited in the breaft of the father inquilitor. What fhall I do now? I muft, I fuppofe, ftoutly deny the fact. I muft compofe my features into a confiftent expression of the most natural ignorance and furprise, happy if I have made such progress in the arts of hypocrify and falshood, as to put the change upon the wild beast who is ready to devour me. The most confummate impostor is upon this hypothesis the man of most perfect virtue.

· A ·

But this is not all. My character for benevolence being well known, I am likely to be furrounded by perfons of good humoured indifcretion rather than by inveterate enemies. Of every man who queftions me about my real fentiments I muft determine firft, whether he fimply with t be informed, or whether his defign be to betray me. The character of virtue feems in its own nature to be that of firm and unalterable refolution, confident in its own integrity. But the character that refults from this fyftem begins in hefitation, and ends in difgrace. I am queftioned whether fuch be my real fentiments. I deny it. My queftioner returns to the charge with an, "Oh, but I heard it from fuch a one, and he was prefent when you delivered them." What am I to do now? Am I to afperfe the character of the

277

### SUBJECT OF

BOOK IV. CHAP. IV. Appendix, No. 111.

the honeft reporter of my words? Am I to make an impotent effort to get rid of the charge; and, inftead of eftablishing my character for orthodoxy, aftonish my informer with my cool and intrepid effrontery?

upon the fpectators.

Infincerity has the worft effect both upon him who practifes, and upon them who behold it. It deprives virtue of that conficious magnanimity and eafe, which ought ever to be ranked among its nobleft effects. It requires the perpetual exercise of prefence of mind, not for the purpole of telling the most useful truths in the best manner, but in order to invent a confistent catalogue of lies, and to utter them with a countenance at war with every thing that is paffing in my heart. It deftroys that confidence on the part of my hearers, which ought to be infe-They cannot all of them be expected to parable from virtue. understand the deep plan of benevolence and the total neglect of all felfifh and timid confiderations by which I am fuppofing my conduct to be regulated. But they can all fee my duplicity and tergiversation. They all know that I excel the most confummate impostor in the coolness with which I can utter falshood, and the craft with which I can fupport it.

Sincerity delineated. Sincerity has fometimes been brought into difrepute by the abfurd fyftem according to which it has been purfued, and ftill oftener by the whimfical picture which the adverfaries of undiftinguifhing fincerity have made of it. It is not neceffary that I fhould

### SINCERITY RESUMED.

fhould ftop every perfon that I meet in the ftreet to inform him BOOK IV. CHAP. IV. of my fentiments. It is not neceffary that I should perpetually talk to the vulgar and illiterate of the deepest and sublimest All that is neceffary is, that I should practife no contruths. cealment, that I should preferve my disposition and character Whoever queftions me, it is necessary that I should untainted. have no feerets or referves, but be always ready to return a frank and explicit answer. When I undertake by argument to establish any principle, it is necessary that I should employ no circuitous methods, but clearly state in the first instance the object I have in view. Having fatisfied this original duty, I may fairly call upon my hearer for the exercise of his patience. " It is true," I may fay, " that the opinion I'deliver will appear shocking to your prejudices, but I will now deliberately and minutely affign the reasons upon which it is founded. If they appear fatisfactory, receive ; if they be inconclusive, reject This is the ground work of fincerity. The fuperftructure it." is the propagation of every important truth, becaufe it conduces to the improvement of man whether individually or collectively; and the telling all I know of myself and of my neighbour, because strict justice and unequivocal publicity are the best fecurity for every virtue.

Sincerity then, in ordinary cafes at least, feems to be of fo Its general much importance, that it is my duty first to confider how to

importance.

preferve.

### SUBJECT OF

BOOK IV. CHAP. IV. APPENDIX, No, III. preferve my fincerity untainted, and afterwards to felect the beft means in my power in each particular fituation, of benefiting mankind. Sincerity is one of those paramount and general rules, which is never to give way to the affair of the day. I may imagine perhaps that falfhood and deceit may be most beneficial in fome particular inftances, as I might imagine upon the fubject of a preceding chapter, that it would be virtuous to plant my dagger in the heart of a tyrant. But we should be cautious of indulging our imaginations in these instances. The great law of always employing ingenuous and honourable means feems to be of more importance than the exterminating any local and temporary evils. I well know in the prefent cafe what good will refult from a frank and undifguifed principle of action, and what evil from deceit, duplicity and falshood. But I am much lefs certain of the good that will arife under particular circumflances from a neglect of these principles.

#### Application.

Having thus unfolded the true ground of reasoning upon this fubject, we will return to the question respecting the conduct to be observed by the reformer in Portugal.

Duty refpecting the choice of a refidence. And here the true anfwer will perhaps be found to be that which has been above delivered, that a perfon fo far enlightened upon these subjects, ought by no confideration to be prevailed upon to fettle in Portugal; and, if he were there already, ought

4

to

### SINCERITY RESUMED.

to quit the country with all convenient fpeed. His efforts in Por-BOOK IV. CHAP. IV tugal would probably be vain; but there is fome other country in which they will be attended with the happieft confequences.

It may be objected, "that fome perfon must begin the work of reformation in Portugal, and why fhould it not be the individual of whom we are treating?" But the answer is, that, in the fense supposed in this objection, it is not necessary that any body fhould begin. Thefe great and daring truths ought to be published in England, France and other countries; and the diffemination that will attend them here, will produce a report and afford an example, which after fome time may prepare them a favourable reception there.

The great chain of causes from which every event in the universe takes its rife, has fufficiently provided for the gradual inftruction of mankind, without its being neceffary that individuals fhould violate their principles and facrifice their integrity to accomplifh it. Perhaps there never was a mind that fo far outran the reft of the fpecies, but that there was fome country in which the man that poffeffed it might fafely tell all he knew. The fame caufes that ripen the mind of the individual are acting generally, ripening fimilar minds, and giving a certain degree of fimilar impression to whole ages and countries. There exift perhaps at this very moment in Portugal, or foon will exift, minds, which, though mere children in fcience compared with

APPENDIX,

OF FREE WILL AND NECESSITY.

IMPORTANCE OF THE QUESTION .- DEFINITION OF NECES-SITY .- WHY SUPPOSED TO EXIST IN THE OPERATIONS OF THE MATERIAL UNIVERSE .- THE CASE OF THE OPE-RATIONS OF MIND IS PARALLEL.-INDICATIONS OF NE-CESSITY-IN HISTORY-IN OUR JUDGMENTS OF CHA-RACTER-IN OUR SCHEMES OF POLICY-IN OUR IDEAS OF MORAL DISCIPLINE .- OBJECTION FROM THE FALLI-BILITY OF OUR EXPECTATIONS IN HUMAN CONDUCT .----ANSWER .- ORIGIN AND UNIVERSALITY OF THE SENTI-MENT OF FREE WILL .- THE SENTIMENT OF NECESSITY ALSO UNIVERSAL.----THE TRUTH OF THIS SENTIMENT ARGUED FROM THE NATURE OF VOLITION .- HYPOTHE-SIS OF FREE WILL EXAMINED.-SELF-DETERMINATION.-INDIFFERENCE .- THE WILL NOT A DISTINCT FACULTY. -FREE WILL DISADVANTAGEOUS TO ITS POSSESSOR.-OF NO SERVICE TO MORALITY.

AVING now finished the theoretical part of our enquiry, fo far as appeared to be neceffary to afford a foundation for our reasoning respecting the different provisions of political O 0 2 inflitution,

BOOK IV. CHAP. V. inflitution, we might directly proceed to the confideration of those provisions. It will not however be useless to pause in this place, in order to confider those general principles of the human mind, which are most intimately connected with the topics of political reasoning \*.

None of these principles seems to be of greater importance than that which affirms that all actions are necessary.

Importance of the queftion. Most of the reasonings upon which we have hitherto been employed, though perhaps constantly built upon this doctrine as a postulate, will yet by their intrinsic evidence, however inconsistently with his opinion upon this primary topic, be admitted by the advocate of free will. But it ought not to be the prefent design of political enquirers to treat the questions that may prefent themselves superficially. It will be found upon maturer reflection that this doctrine of moral necessity includes in it consequences of the highest moment, and leads to a bold and comprehensive view of man in fociety, which cannot possibly be entertained by him who has embraced the opposite opinion. Severe method would have required that this proposition should have been established in the first instance, as an indispensible.

\* The reader, who is indifpofed to abstrufe fpeculations, will find the other members of the enquiry fufficiently connected, without an express reference tothe remaining part of the prefent book.

#### foundation

#### NECESSITY. AND

foundation of moral reasoning of every fort. But there are well BOOK.IV. disposed perfons, who notwithstanding the evidence with which it is attended, have been alarmed at its confequences; and it was perhaps proper, in compliance with their miftake, to fnew that the moral reafonings of this work did not fland in need of this fupport, in any other fenfe than moral reafonings do upon every other fubject.

To the right understanding of any arguments that may be Definition of adduced under this head, it is requifite that we fhould have a clear idea of the meaning of the term necessity. He who affirms that all actions are neceffary, means, that, if we form a just and complete view of all the circumftances in which a living or intelligent being is placed, we fhall find that he could not in any moment of his existence have acted otherwise than he has acted. According to this affertion there is in the transactions of mind nothing loofe, precarious and uncertain. Upon this queftion. the advocate of liberty in the philosophical fense must join iffue. He must, if he mean any thing, deny this certainty of conjunction between moral antecedents and confequents. Where all is conftant and invariable, and the events that arife uniformly flow from the circumstances in which they originate, there can be noliberty.

It is acknowledged that in the events of the material universe Why fup-

every poled to exift.

neceflity.

### OF FREE WILL

BOOK IV. CIIAP. V. in the operations of the material univcrfe. thing is fubjected to this necessity. The tendency of inveftigation and enquiry relatively to this topic of human knowledge has been, more effectually to exclude chance, as our improvements extended. Let us confider what is the fpecies of evidence that has fatisfied philosophers upon this point. Their only folid ground of reasoning has been from experience. The argument which has induced mankind to conceive of the univerfe as governed by certain laws, and to entertain the idea of neceffary connexion between fucceffive events, has been an obferved fimilarity in the order of fucceffion. If, when we had once remarked two events fucceeding each other, we had never had occasion to fee that individual fucceffion repeated; if we faw innumerable events in perpetual progression without any apparent order, fo that all our obfervation would not enable us, when we beheld one, to pronounce that another of fuch a particular clafs might be expected to follow; we fhould never have conceived of the existence of necessary connexion, or have had an idea correfponding to the term caufe.

Hence it follows that all that ftrictly fpeaking we know of the material univerfe is this fucceffion of events. Uniform fucceffion irrefiftibly forces upon the mind the idea of abstract connexion. When we fee the fun constantly rife in the morning and fet at night, and have had occasion to observe this phenomenon invariably taking place through the whole period of our existence,

### AND NECESSITY.

existence, we cannot avoid believing that there is fome cause pro- BOOK IV. ducing this uniformity of event. But the principle or virtue by which one event is conjoined to another we never fee.

Let us take fome familiar illustrations of this truth. Can it be imagined that any man by the infpection and analyfis of gunpowder would have been enabled, previoufly to experience, to predict its explosion? Would he previously to experience have been enabled to predict, that one piece of marble having a flat and polifhed furface might with facility be protruded along another in a horizontal, but would with confiderable pertinacity refift feparation in a perpendicular direction? The fimplest phenomena of the most hourly occurrence were originally placed at an equal diftance from human fagacity.

There is a certain degree of obfcurity incident to this fubject arifing from the following circumstance. All human knowledge is the refult of perception. We know nothing of any fubftance but by experience. If it produced no effects, it would be no fubject of human intelligence. We collect a confiderable number of these effects, and, by their perceived uniformity having reduced them into general claffes, form a general idea annexed to the fubject that produces them. It must be admitted, that a definition of any fubstance, that is, any thing that deferves to be called knowledge respecting it, will enable us to predict some of its future poffible effects, and that for this plain reason, that definition .

CHAP.V.

287

### OF FREE WILL

BOOK IV. Chap.v.

nition is prediction under another name. But, though, when we have gained the idea of impenetrability as a general phenomenon of matter, we can predict fome of its effects, there are others which we cannot predict: or in other words, we know none of its effects but fuch as we have actually remarked, added to an expectation that fimilar events will arife under fimilar circumftances, proportioned to the conftancy with which they have been observed to take place in our past experience. Finding as we do by repeated experiments, that material fubflances have the property of refistance, and that one substance in a state of rest, when impelled by another, passes into a state of motion, we are still in want of more particular observation to enable us to predift the specific effects that will follow from this impulse in each of the bodies. Enquire of a man who knows nothing more of matter than its general property of impenetrability, what will be the refult of one ball of matter impinging upon another, and you will foon find how little this general property can inform him of the particular laws of motion. We suppose him to know that it will communicate motion to the fecond ball. But what quantity of motion will it communicate? What effects will the impulse produce upon the impelling ball? Will it continue to move in the fame direction? will it recoil in the oppofite direction ? will it fly off obliquely, or will it fubfide into a flate of reft? All these events will appear equally probable to him whom a feries of observations upon the past has not instructed as to what he is to expect from the future.

4

From

#### AND NECESSITY.

From these remarks we may sufficiently collect what is the fpecies of knowledge we poffels respecting the laws of the material universe. No experiments we are able to make, no reasonings we are able to deduce, can ever instruct us in the principle of causation, or shew us for what reason it is that one event has, in every inftance in which it has been known to occur, been the precurfor of another event of a certain given description. Yet we reasonably believe that these events are bound together by a perfect neceffity, and exclude from our ideas of matter and motion the fupposition of chance or an uncaused event. Affociation of ideas obliges us, after having feen two events perpetually conjoined, to pass, as foon as one of them occurs, to the recollection of the other : and, in cafes where this transition never deceives us, but the ideal fuccession is always found to be an exact copy of the future event, it is impossible that this species of forefight should not convert into a general foundation of rea-We cannot take a fingle ftep upon this fubject, which foning. does not partake of the species of operation we denominate ab-Till we have been led to confider the rifing of the ftraction. fun to-morrow as an incident of the fame fpecies as its rifing today, we cannot deduce from it fimilar confequences. It is the business of science to carry this task of generalisation to its farthest extent, and to reduce the diversified events of the univerfe to a fmall number of original principles.

Let us proceed to apply these reasonings concerning matter to The case of the opera the the opera

289

### OF FREE WILL

BOOK IV. CHAP. V. tions of mind is parallel.

the illustration of the theory of mind. Is it poffible in this latter theory, as in the former fubject, to difcover any general principles? Can intellect be made a topic of fcience? Are we able to reduce the multiplied phenomena of mind to any certain standard of reafoning? If the affirmative of these questions be conceded, the inevitable confequence appears to be, that mind, as well as matter, exhibits a conftant conjunction of events, and affords a reasonable prefumption to the necessary connexion of those events. It is of no importance that we cannot fee the ground of that connexion, or imagine how propositions and reasoning, when presented to the mind of a percipient being, are able by neceffary confequence to generate volition and animal. motion; for, if there be any truth in the above reasonings, we are equally incapable of perceiving the ground of connexion between any two events in the material universe, the common and received opinion that we do perceive fuch ground of connexion being in reality nothing more than a vulgar prejudice.

Indications of neceffity :

in hiftory :

That mind is a topic of fcience may be argued from all those branches of literature and enquiry which have mind for their fubject. What fpecies of amusement or instruction would history afford us, if there were no ground of inference from moral causes to effects, if certain temptations and inducements did not in all ages and climates produce a certain feries of actions, if we were unable to trace connexion and a principle of unity in men's tempers, propensities and transactions? The amusement would be

200

### AND NECESSITY.

be inferior to that which we derive from the perulal of a chronological table, where events have no order but that of time; fince, however the chronologist may neglect to mark the internal connexion between fucceffive transactions, the mind of the reader is bufied in fupplying that connexion from memory or imagination : but the very idea of fuch connexion would never have fuggefted itfelf, if we had never found the fource of that idea in experience. The instruction arising from the perusal of history would be abfolutely none; fince instruction implies in its very nature the claffing and generalifing of objects. But. upon the fupposition on which we are arguing, all objects would be unconnected and disjunct, without the poffibility of afford. ing any grounds of reasoning or principles of science.

The idea correspondent to the term character inevitably in- in our judg-ments of chacludes in it the affumption of neceffary connexion. The cha- racter: racter of any man is the refult of a long feries of impreffions communicated to his mind, and modifying it in a certain manner, fo as to enable us, from a number of these modifications and impreffions being given, to predict his conduct. Hence arife his temper and habits, refpecting which we reafonably conclude, that they will not be abruptly fuperfeded and reverfed; and that, if they ever be reverfed, it will not be accidentally, but in confequence of fome ftrong reason perfuading, or fome extraordinary event modifying his mind. If there were not this original and effential connexion between motives and actions, and, which forms

Pp 2

#### BOOK IV. CHAP. V.

forms one particular branch of this principle, between men's past and future actions, there could be no such thing as character, or as a ground of inference enabling us to predict what men would be from what they have been.

in our fchemes of policy : From the fame idea of neceffary connexion arife all the fchemes of policy, in confequence of which men propose to themfelves by a certain plan of conduct to prevail upon others to become the tools and inftruments of their purposes. All the arts of courtship and flattery, of playing upon men's hopes and fears, proceed upon the supposition that mind is subject to certain laws, and that, provided we be skilful and affiduous enough in applying the cause, the effect will inevitably follow.

in our ideas of moral difcipline. Laftly, the idea of moral discipline proceeds entirely upon this principle. If I carefully perfuade, exhort, and exhibit motives to another, it is because I believe that motives have a tendency to influence his conduct. If I reward or punish him, either with a view to his own improvement or as an example to others, it is because I have been led to believe that rewards and punishments are calculated in their own nature to affect the sentences. and practices of mankind.

Objection from the fallibility of our expectations in human conduct. There is but one conceivable objection against the inference from these premises to the necessity of human actions. It may be alledged, that " though there is a real connexion between motives

#### AND NECESSITY.

motives and actions, yet that this connexion may not amount to a certainty, and that of confequence the mind full retains an inherent activity by which it can at pleafure diffolve this connexion. Thus for example, when I addrefs argument and perfuation to my neighbour to induce him to adopt a certain fpecies of conduct, I do it not with a certain expectation of fuccefs, and am not utterly difappointed if all my efforts fail of their effect. I make a referve for a certain faculty of liberty he is fuppofed to poffefs, which may at laft counteract the beft digefted projects."

But in this objection there is nothing peculiar to the cafe of Anfwer. mind. It is just fo in matter. I fee a part only of the premises, and therefore can pronounce only with uncertainty upon the conclusion. A philosophical experiment, which has fucceeded a hundred times, may altogether fail upon the next trial. But what does the philosopher conclude from this? Not that there is a liberty of choice in his retort and his materials, by which they baffle the best formed expectations. Not that the connexion between effects and caufes is imperfect, and that part of the effect happens from no caufe at all. But that there was fome other caufe concerned whofe operation he did not perceive, but which a fresh investigation will probably lay open to him. When the fcience of the material universe was in its infancy, men were fufficiently prompt to refer events to accident and chance; but the farther they have extended their enquiries and observation,

293

BOOK IV. CHAP. V.

#### OF FREE WILL

BOOK IV. CHAP. V.

observation, the more reason they have found to conclude that every thing takes place according to necessary and universal laws.

The cafe is exactly parallel with refpect to mind. The politician and the philosopher, however they may speculatively entertain the opinion of free will, never think of introducing it into their scheme of accounting for events. If an incident turn out otherwise than they expected, they take it for granted, that there was some unobserved bias, some habit of thinking, some prejudice of education, some fingular affociation of ideas, that disappointed their prediction; and, if they be of an active and enterprising temper, they return, like the natural philosopher, to fearch out the fecret spring of this unlooked for event.

Origin and univerfality of the fentiment of free will. The reflections into which we have entered upon the doctrine of caufes, not only afford us a fimple and imprefive argument in favour of the doctrine of neceffity, but fuggeft a very obvious reafon why the doctrine opposite to this has been in a certain degree the general opinion of mankind. It has appeared that the idea of neceffary connexion between events of any fort is the leffon of experience, and the vulgar never arrive at the univerfal application of this principle even to the phenomena of the material univerfe. In the easieft and most familiar inflances, fuch as the impinging of one ball of matter upon another and its confequences, they willingly admit the interference of chance,

7

Or

# AND NECESSITY.

or an event uncaufed. In this inftance however, as both the impulse and its effects are subjects of observation to the senses, they readily imagine that they perceive the abfolute principle which caufes motion to be communicated from the first ball to the fe-Now the very fame prejudice and precipitate conclusion, cond. which induce them to believe that they difcover the principle of motion in objects of fense, act in an opposite direction with refpect to fuch objects as cannot be fubjected to the examination of fenfe. The manner in which an idea or proposition fuggested to the mind of a percipient being produces animal motion they never fee; and therefore readily conclude that there is no neceffary connexion between these events.

But, if the vulgar will univerfally be found to be the advo- The fenticates of free will, they are not lefs ftrongly, however inconfift- ceffity alfo ently, imprefied with the belief of the doctrine of neceffity. It is a well known and a just observation, that, were it not for the existence of general laws to which the events of the material universe always conform, man could never have been either a reafoning or a moral being. The most confiderable actions of our lives are directed by forefight. It is because he forefees the regular fucceffion of the feafons, that the farmer fows his field, and after the expiration of a certain term expects a crop. There: would be no kindnefs in my administering food to the hungry, and no injustice in my thrusting a drawn fword against the bofom.

BOOK IV. CHAP. V.

#### OF FREE WILL

BOOK IV. CHAP. V.

bosom of my friend, if it were not the established quality of food to nourish, and of a fword to wound.

But the regularity of events in the material universe will not of itself afford a fufficient foundation of morality and prudence. The voluntary conduct of our neighbours enters for a share into almost all those calculations upon which our own plans and determinations are founded. If voluntary conduct, as well as material impulse, were not fubjected to general laws, included in the fyftem of caufe and effect, and a legitimate topic of prediction and forefight, the certainty of events in the material universe would be productive of little benefit. But in reality the mind paffes from one of these topics of speculation to the other, without accurately distributing them into classes, or imagining that there is any difference in the certainty with which they are attended. Hence it appears that the most uninstructed peafant or artifan is practically a neceffarian. The farmer calculates as fecurely upon the inclination of mankind to buy his corn when it is brought into the market, as upon the tendency of the feafons to ripen it. The labourer no more fufpects that his employer will alter his mind and not pay him his daily wages, than he fuspects that his tools will refuse to perform those functions today, in which they were yesterday employed with fuccess \*.

\* The reader will find the fubstance of the above arguments in a more diffu-. five form in Hume's Enquiry concerning Human Understanding, being the third part of his Effays.

#### AND NECESSITY.

Another argument in favour of the doctrine of necessity, not lefs clear and irrefiftible than that from the confideration of caufe and effect, will arife from any confistent explication that can be The motions of the from the nagiven of the nature of voluntary motion. animal fystem distribute themselves into two great classes, vofuntary and involuntary. Involuntary motion, whether it be conceived to take place independently of the mind, or to be the refult of thought and perception, is fo called, because the confequences of that motion, either in whole or in part, did not enter into the view of the mind when the motion commenced. Thus the cries of a new-born infant are not lefs involuntary than the circulation of the blood; it being impoffible that the founds first resulting from a certain agitation of the animal frame should be foreseen, since foresight is the fruit of experience.

From these observations we may deduce a rational and confistent account of the nature of volition. Voluntary motion is that which is accompanied with forelight, and flows from intention and defign. Volition is that flate of an intellectual being, in which, the mind being affected in a certain manner by the apprehension of an end to be accomplished, a certain motion of the organs and members of the animal frame is found to be produced.

Here then the advocates of intellectual liberty have a clear dilemma Qq

BOOK IV. CHAP. V. The truth of this fentiment argued ture of volition.

Joogle

297

#### OF FREE WILL

dilemma proposed to their choice. They must ascribe this freedom, this imperfect connexion of effects and causes, either to our voluntary or our involuntary motions. They have already made their determination. They are aware that to ascribe freedom to that which is involuntary, even if the assumption could be maintained, would be altogether foreign to the great subjects of moral, theological or political enquiry. Man would not be in any degree more of an agent or an accountable being, though it could be proved that all his involuntary motions sprung up in a fortuitous and capricious manner.

But on the other hand to afcribe freedom to our voluntary actions is an express contradiction in terms. No motion is voluntary any farther than it is accompanied with intention and defign, and flows from the apprehension of an end to be accomplished. So far as it flows in any degree from another fource, so far it is involuntary. The new-born infant foresees nothing, therefore all his motions are involuntary. A person arrived at maturity takes an extensive furvey of the consequences of his actions, therefore he is eminently a voluntary and rational being. If any part of my conduct be destitute of all foresight of the effects to result, who is there that afcribes to it depravity and vice? Xerxes acted just as soberly as such a reasoner, when he caused his attendants to inflict a thousand lashes on the waves of the Hellespont.

The

BOOK IV.

CHAP. V.

#### NECESSITY. AND

The truth of the doctrine of necessity will be still more evident, if we confider the abfurdity of the opposite hypothesis. One of its principal ingredients is felf determination. Liberty in an imperfect and popular fense is afcribed to the motions of the animal fystem, when they result from the forefight and deliberation of the intellect, and not from external compulsion. It is in this fense that the word is commonly used in moral and political reasoning. Philosophical reasoners therefore, who have defired to vindicate the property of freedom, not only to our external motions, but to the acts of the mind, have been obliged to repeat this process. Our external actions are then faid to be free, when they truly refult from the determination of the mind. If our volitions, or internal acts be also free, they must in like manner refult from the determination of the mind, or in other words, "the mind in adopting them" must be " felf determined." Now nothing can be more evident than that that in which the mind exercises its freedom, must be an act of the mind. Liberty therefore according to this hypothesis confists in this, that every choice we make has been chosen by us, and every act of the mind been preceded and produced by an act of the mind. This is fo true, that in reality the ultimate act is not flyled free from any quality of its own, but because the mind in adopting it was felf determined, that is, becaufe it was preceded by another act. The ultimate act refulted completely from the determination that was its precurfor. It was itfelf neceffary; and, if we would look for freedom, it must be in the preceding act. But in that preceding

BOOK IV. CHAP.V. Hypothefis

299

of free will examined. Self determi-

nation.

Q q 2

#### OF FREE WILL

BOOK IV. CHAP. V.

preceding act also, if the mind were free, it was felf determined, that is, this volition was chosen by a preceding volition, and by the fame reasoning this also by another antecedent to itself. All the acts except the first were necessary, and followed each other as inevitably as the links of a chain do, when the first link is drawn forward. But then neither was this first act free, unless the mind in adopting it were felf determined, that is, unless this act were chosen by a preceding act. Trace back the chain as far as you please, every act at which you arrive is necessary. That act, which gives the character of freedom to the whole, can never be discovered; and, if it could, in its own nature includes a contradiction.

Indifference. Another idea which belongs to the hypothesis of felf determination, is, that the mind is not neceffarily inclined this way or that by the motives which are prefented to. it, by the clearnefs or obfcurity with which they are apprehended, or by the temper and character which preceding habits may have generated; but that by its inherent activity it is equally capable of proceeding either way, and passes to its determination from a previous state of absolute indifference. Now what fort of activity is that which is equally inclined to all kinds of actions? Let us fuppose a particle of matter endowed with an inherent propensity to motion. This propenfity must either be to move in one particular direction, and then it must for ever move in that direction unless counteracted by some external impression; or it must have

### AND NECESSITY.

have an equal tendency to all directions, and then the refult must CHAP. V.

The abfurdity of this confequence is fo evident, that the advocates of intellectual liberty have endeavoured to deftroy its force by means of a diftinction. "Motive," it has been faid, "is indeed the occafion, the *fine qua non* of volition, but it has no inherent power to compel volition. Its influence depends upon the free and unconftrained furrender of the mind. Between opposite motives and confiderations the mind can choose as it pleases, and by its determination can convert the motive which is weak and infufficient in the comparison into the ftrongeft." But this hypothesis will be found exceedingly inadequate to the purpose for which it is produced. Motives must either have a necessary and irressifible influence, or they can have no influence : at all..

For, first, it must be remembered, that the ground or reason of any event, of whatever nature it be, must be contained among the circumstances which precede that event. The mind, is supposed to be in a state of previous indifference, and therefore cannot be, in itself confidered, the source of the particular choice that is made. There is a motive on one fide and a motive on the other: and between these lie the true ground and reason of preference. But, wherever there is tendency to preference, there may be degrees of tendency. If the degrees be equal, 301:

#### OF FREE WILL

equal, preference cannot follow: it is equivalent to the putting equal weights into the opposite scales of a balance. If one of them have a greater tendency to preference than the other, that which has the greatest tendency must ultimately prevail. When two things are balanced against each other, so much amount may be conceived to be struck off from each side as exists in the smaller sum, and the overplus that belongs to the greater is all that truly enters into the confideration.

Add to this, fecondly, that, if motive have not a neceffary influence, it is altogether fuperfluous. The mind cannot first choose to be influenced by a motive, and afterwards fubmit to its operation: for in that cafe the preference would belong wholly to this previous volition. The determination would in reality be complete in the first instance; and the motive, which came in afterwards, might be the pretext, but could not be the true fource of the proceeding\*.

The will not a diffinct faculty. Laftly, it may be observed upon the hypothesis of free will, that the whole fystem is built upon a distinction where there is no difference, to wit, a distinction between the intellectual and active powers of the mind. A mysterious philosophy taught men to suppose, that, when the understanding had perceived any object to be desirable, there was need of some distinct

\* The argument from the impossibility of free will is treated with great force of reasoning in Jonathan Edwards's Enquiry into the Freedom of the Will.

2

power

BOOK IV.

CHAP. V.

### AND NECESSITY.

power to put the body in motion. But reason finds no ground 'BOOK IV. for this supposition; nor is it possible to conceive, that, in the cafe of an intellectual faculty placed in an aptly organifed body, preference can exist, together with a confciousness, gained from : experience, of our power to obtain the object preferred, without a certain motion of the animal frame being the neceffary refult. We need only attend to the obvious meaning of the terms in order to perceive that the will is merely, as it has been happily termed, the last act of the understanding, one of the different cafes of the affociation of ideas. What indeed is preference. but a perception of fomething that really inheres or is supposed to inhere in the objects themfelves ? It is the judgment, true or erroneous, which the mind makes refpecting fuch things as are brought into comparison with each other. If this had been fufficiently attended to, the freedom of the will would never a have been gravely maintained by philosophical writers, fince no man ever imagined that we were free to feel or not to feel an i imprefion made upon our organs, and to believe or not to believe a proposition demonstrated to our understanding.

It must be unnecessary to add any thing farther on this head, Free will dif-advantageous unless it be a momentary recollection of the fort of benefit that to its posses freedom of the will would confer upon us, supposing it to be poffible. Man being, as we have now found him to be, a fimple fubstance, governed by the apprehensions of his underflanding, nothing farther is requisite but the improvement of his reasoning

303

### OF FREE WILL AND NECESSITY.

reasoning faculty, to make him virtuous and happy. But, did he poffefs a faculty independent of the understanding, and capable of refifting from mere caprice the most powerful arguments, the best education and the most fedulous instruction might be of no use to him. This freedom we shall easily perceive to be his bane and his curfe; and the only hope of lafting benefit to the fpecies would be, by drawing clofer the connexion between the external motions and the understanding, wholly to extirpate it. The virtuous man, in proportion to his improvement, will be under the conftant influence of fixed and invariable principles; and fuch a being as we conceive God to be, can never in any one inftance have exercifed this liberty, that is, can never have acted in a foolifh and tyrannical manner. Freedom of the will is abfurdly reprefented as neceffary to render the mind fufceptible of moral principles; but in reality, fo far as we act with liberty, fo far as we are independent of motives, our conduct is as independent of morality as it is of realon, nor is it possible that we should deferve either praise or blame for a proceeding thus capricious and indifciplinable.

of no fervice to morality.

IDEA IT SUGGESTS TO US OF THE UNIVERSE.---INFLUENCE ON OUR MORAL IDEAS-ACTION-VIRTUE-EXERTION ---- PERSUASION ---- EXHORTATION ---- ARDOUR ---- COMPLA-CENCE AND AVERSION -PUNISHMENT --- REPENTANCE -PRAISE AND BLAME-INTELLECTUAL TRANQUILLITY. ---LANGUAGE OF NECESSITY RECOMMENDED.

NONSIDERING then the doctrine of moral necessity as BOOK IV. fufficiently established, let us proceed to the confequences that are to be deduced from it. This view of things prefents us with an idea of the universe as connected and cemented in all its parts, nothing in the boundless progress of things being capable of happening otherwise than it has actually happened. In the life of every human being there is a chain of causes, generated in that eternity which preceded his birth, and going on in regular procession through the whole period of his existence, in confequence of which it was impossible for him to act in any instance otherwife than he has acted.

CHAP. VI. Idea it fuggefts to us of the universe.

### INFERENCES FROM THE

CHAP. VI. Influence on our moral ideas:

BOOK IV.

The contrary of this having been the conception of the mafs of mankind in all ages, and the ideas of contingency and accident having perpetually obtruded themfelves, the eftablished language of morality has been univerfally tinctured with this error. It will therefore be of no trivial importance to enquire how much of this language is founded in the truth of things, and how much of what is expressed by it is purely imaginary. Accuracy of language is the indispensible prerequisite of found knowledge, and without attention to that subject we can never afcertain the extent and importance of the consequences of, neceffity.

action :

First then it appears, that, in the emphatical and refined fense in which the word has fometimes been used, there is no such thing as action. Man is in no case ftrictly speaking the beginner of any event or feries of events that takes place in the universe, but only the vehicle through which certain causes operate, which causes, if he were supposed not to exist, would cease to operate. Action however, in its more simple and obvious sense, is sufficiently real, and exists equally both in mind and in matter. When a ball upon a billiard board is struck by a person playing, and afterwards impinges upon a fecond ball, the ball which was first in motion is faid to act upon the second, though it operate in the strictest conformity to the impression it received, and the motion it communicates be precisely determined by the circumstances of the case. Exactly similar to this, upon the principles

#### DOCTRINE OF NECESSITY.

ciples already explained, are the actions of the human mind. Mind is a real caufe, an indifpenfible link in the great chain of the univerfe; but not, as has fometimes been fuppofed, a caufe of that paramount defcription, as to fuperfede all neceffities, and be itfelf fubject to no laws and methods of operation. Upon the hypothefis of a God, it is not the choic, apprehenfion or judgment of that being, fo properly as the truth which was the foundation of that judgment, that has been the fource of all contingent and particular existences. His existence, if neceffary, was neceffary only as the fenforium of truth and the medium of its operation.

Is this view of things incompatible with the existence of virtue, virtue?

Stand and the stand of the second of the second stands and the second stands and the second stands and the second stands are second stan

If by virtue we understand the operation of an intelligent being in the exercise of an optional power, so that under the same precise circumstances it might or might not have taken place, undoubtedly it will annihilate it.

But the doctrine of neceffity does not overturn the nature of things. Happine's and mifery, wildom and error will ftill be diftinct from each other, and there will ftill be a connexion between them. Wherever there is diftinction there is ground for preference and defire, or on the contrary for neglect and averfion. Happine's and wildom will be objects worthy to be Rr2 defired,

307 BOOK IV. CHAP. VI.

Digitized by Google

#### INFERENCES FROM THE

BOOK IV. defired, mifery and error worthy to be difliked. If therefore CHAP. VI. by virtue we mean that principle which afferts the preference of the former over the latter, its reality will remain undiminished by the doctrine of neceffity.

> Virtue, if we would fpeak accurately, ought to be confidered by us in the first instance objectively, rather than as modifying any particular beings. It is a fystem of general advantage, in their aptitude or inaptitude to which lies the value or worthlessness of all particular existences. This aptitude is in intelligent beings usually termed capacity or power. Now power in the fense of the hypothesis of liberty is altogether chimerical. But power in the fense in which it is fometimes affirmed of inanimate fubstances, is equally true of those which are animater A candleftick has the power or capacity of retaining a candle in a perpendicular direction. A knife has a capacity of cutting. In the fame manner a human being has a capacity of walking : shough it may be no more true of him, than of the inanimate fubstance, that he has the power of exercifing or not exercifing that capacity. Again, there are different degrees as well as different classes of capacity. One knife is better adapted for the purposes of cutting than another.

> Now there are two confiderations relative to any particular being, that excite our approbation, and this whether the being be poffeffed of confcioufness or no. These confiderations are capacity

#### DOCTRINE OF NECESSITY.

eapacity and the application of that capacity. We approve of a BOOK IV. tharp knife rather than a blunt one, because its capacity is greater. We approve of its being employed in carving food, rather than in maiming men or other animals, because that application of its capacity is preferable. But all approbation or preference is relative to utility or general good. A knife is as capable as a man of being employed in the purposes of virtue, and the one is no more free than the other as to its employment. The mode in which a knife is made fubfervient to these purposes is by material impulse. The mode in which a man is made fubservient is by inducement and perfuasion. But both are equally the affair of neceffity. The man differs from the knife, just as the iron candleftick differs from the brafs one; he has one more way of being acted upon. This additional way in man is motive, in the candleftick is magnetifm.

But virtue has another fense, in which it is analogous to duty. The virtue of a human being is the application of his capacity to the general good; his duty is the beft poffible application of that capacity. The words thus explained are to be confidered as rather fimilar to grammatical diffinction, than to real and philofophical difference. Thus in Latin bonus is good as affirmed of a man, bona is good as affirmed of a woman. In the fame manner we can as eafily conceive of the capacity of an inanimate as of an animate fubftance being applied to the general good, and as accurately defcribe the best possible application of the one

CHAP. VI.

309

29:

#### INFERENCES FROM THE

as of the other.. There is no effential difference between the two cafes. But we call the latter virtue and duty, and not the These words may in a popular sense be considered as former. either masculine or feminine, but never neuter.

exertion :

But, if the doctrine of necessity do not annihilate virtue, it tends to introduce a great change into our ideas respecting it. According to this doctrine it will be abfurd for a man to fay, "I will exert myfelf," "I will take care to remember," or even "I will do this." All these expressions imply as if man was or could be fomething elfe than what motives make him. Man is in reality a paffive, and not an active being. In another fense however he is sufficiently capable of exertion. The operations of his mind may be laborious, like those of the wheel of a heavy machine in afcending a hill, may even tend to wear out the fubftance of the shell in which it acts, without in the smallest degree impeaching its passive character. If we were conftantly aware of this, our minds would not glow lefs ardently with the love of truth, juffice, happines and mankind. We should have a firmness and simplicity in our conduct, not wasting itself in fruitless struggles and regrets, not hurried along with infantine impatience, but feeing events with their confequences, and calmly and unrefervedly given up to the influence of those comprehensive views which this doctrine inspires.

perfualion :

As to our conduct towards others in inftances where we were concerned

#### DOCTRINE OF NECESSITY.

concerned to improve and meliorate their minds, we should ad- BOOK IV. drefs our reprefentations and remonstrances to them with double confidence. The believer in free will can expostulate with or correct his pupil with faint and uncertain hopes, confcious that the clearest exhibition of truth is impotent, when brought into conteft with the unhearing and indifciplinable faculty of will; or in reality, if he were confistent, fecure that it could produce. no effect at all. The neceffarian on the contrary employs real antecedents, and has a right to expect real effects.

But, though he would reprefent, he would not exhort, for exhortation = this is a term without a meaning. He would fuggest motives to the mind, but he would not call upon it to comply, as if it had a power to comply or not to comply. His office would confift of two parts, the exhibition of motives to the purfuit of a certain end, and the delineation of the easiest and most effectual way of attaining that end.

There is no better scheme for enabling us to perceive how far any idea that has been connected with the hypothesis of liberty has a real foundation, than to translate the usual mode of expreffing it into the language of neceffity. Suppose the idea of exhortation fo translated to fland thus: "To enable any arguments I may suggest to you to make a suitable impression it is neceffary that they fhould be fairly confidered. I proceed therefore to evince to you the importance of attention, knowing, that,

CHAP.

Digitized by Google

### INFERENCES FROM THE

BOOK IV. CHAP. VI. that, if I can make this importance fufficiently manifeft attention will inevitably follow." I fhould however be far better employed in enforcing directly the truth I am defirous to imprefs, than in having recourfe to this circuitous mode of treating attention as if it were a feparate faculty. Attention will in reality always be proportionate to our apprehension of the importance of the fubject before us.

ardour :

At first fight it may appear as if, the moment I was fatisfied that exertion on my part was no better than a fiction, and that I was the paffive instrument of causes exterior to myself, I fhould become indifferent to the objects which had hitherto interested me the most deeply, and lose all that inflexible perfeverance, which feems infeparable from great undertakings. But this cannot be the true state of the case. The more I refign myfelf to the influence of truth, the clearer will be my perception of it. The lefs I am interrupted by questions of liberty and caprice, of attention and indolence, the more uniform will be my conftancy. Nothing could be more unreafonable than that the fentiment of neceffity should produce in me a fpirit of neutrality and indifference. The more certain is the connexion between effects and causes, the more chearfulness fhould I feel in yielding to painful and laborious employments.

complacence and avertion :

It is common for men impressed with the opinion of free will to entertain refertment, indignation and anger against those who

312

#### DOCTRINE OF NECESSITY.

who fall into the commission of vice. How much of these BOOK IV. feelings is just, and how much erroneous? The difference between virtue and vice will equally remain upon the oppofite hypothefis. Vice therefore must be an object of rejection and virtue of preference; the one must be approved and the other difapproved. But our difapprobation of vice will be of the fame nature as our disapprobation of an infectious distemper.

One of the reafons why we are accustomed to regard the murderer with more acute feelings of difpleafure than the knife he employs, is that we find a more dangerous property, and greater caufe for apprehention, in the one than in the other. The knife is only accidentally an object of terror, but against the murderer we can never be enough upon our guard. In the fame manner we regard the middle of a bufy ftreet with lefs complacency as a place for walking than the fide, and the ridge of a house with more aversion than either. Independently therefore of the idea of freedom, mankind in general find in the enormoully vicious a sufficient motive of antipathy and With the addition of that idea, it is no wonder that difguft. they should be prompted to expressions of the most intemperate abhorrence.

These feelings obviously lead to the prevailing conceptions on punishment: the fubject of punishment. The doctrine of necessity would teach us to class punishment in the lift of the means we posses of re-S s forming

CHAP.

#### INFERENCES FROM THE

BOOK IV. CHAP. VI.

forming error. The more the human mind can be fhewn to be under the influence of motive, the more certain it is that punifhment will produce a great and unequivocal effect. But the doctrine of neceffity will teach us to look upon punifhment with no complacence, and at all times to prefer the most direct means of encountering error, which is the development of truth. Whenever punifhment is employed under this fystem, it will be employed, not for any intrinsic recommendation it poffess, but just fo far as it shall appear to conduce to general utility.

On the contrary it is ufually imagined, that, independently of the utility of punishment, there is proper defert in the criminal, a certain fitness in the nature of things that renders pain the fuitable concomitant of vice. It is therefore frequently faid, that it is not enough that a murderer should be transported to a defert island, where there should be no danger that his malignant propensities should ever again have opportunity to act; but that it is also right the indignation of mankind against him should express itself in the infliction of some actual ignominy and pain. On the contrary, under the system of necessity the ideas of guilt, crime, defert and accountableness have no place.

repentance:

Correlative to the feelings of refertment, indignation and anger against the offences of others, are those of repentance; contrition and forrow for our own. As long as we admit of an effential.

314

#### DOCTRINE OF NECESSITY.

effential difference between virtue and vice, no doubt all erroneous BOOK IV. conduct whether of ourfelves or others will be regarded with disapprobation. But it will in both cases be confidered, under the fystem of necessity, as a link in the great chain of events which could not have been otherwife than it is. We shall therefore no more be disposed to repent of our own faults than of the faults of others. It will be proper to view them both as actions, injurious to the public good, and the repetition of which is to be deprecated. Amidst our present imperfections it will perhaps be useful to recollect what is the error by which we are most easily feduced. But in proportion as our views extend, we shall find motives enough to the practice of virtue. without any partial retrospect to ourselves, or recollection of our own propensities and habits.

lame :

In the ideas annexed to the words refertment and repentance praife and there is fome mixture of true judgment and a found conception of the nature of things. There is perhaps still more justice in the notions conveyed by praife and blame, though these also are for the most part founded in the hypothesis of liberty. When I fpeak of a beautiful landscape or an agreeable fensation, I employ the language of panegyric. I employ it still more emphatically, when I speak of a good action; because I am conscious that panegyric has a tendency to procure a repetition of fuch actions. So far as praife implies nothing more than this, it perfectly accords with the feverest philosophy. So far as it im-S 8 2 plics

#### INFERENCES FROM THE

# BOOK IV. plies that the man could have abstained from the virtuous action CHAP. VI. I applaud, it belongs only to the delusive fystem of liberty.

intellectual tranquillity.

316

A farther confequence of the doctrine of necessity is its tendency to make us furvey all events with a tranquil and placid temper, and approve and difapprove without impeachment to our felf poffession. It is true, that events may be contingent as to any knowledge we poffels refpecting them, however certain they are in themfelves. Thus the advocate of liberty knows that his relation was either loft or faved in the great form that happened two months ago; he regards this event as past and certain, and yet he does not fail to be anxious about it. But it is not lefs true, that all anxiety and perturbation imply an imperfect fenfe of contingency, and a feeling as if our efforts could make fome alteration in the event. When the perfon recollects with clearness that the event is over, his mind grows composed; but presently he feels as if it were in the power of. God or man to alter it, and his diffres is renewed. All that is more than this is the impatience of curiofity; but philosophy and reafon have an evident tendency to prevent an ufelefs curiofity from diffurbing our peace. He therefore who regards all things past, prefent and to come as links of an indiffoluble chain, will, as often as he recollects this comprehensive view, be fuperior to the tumult of paffion; and will reflect upon the moral concerns of mankind with the fame clearnefs of perception, the fame unalterable firmnels of judgment, and the fame 8 tranquillity

### DOCTRINE OF NECESSITY.

tranquillity as we are accustomed to do upon the truths of BOOK IV. CHAP. VI. geometry.

It would be of infinite importance to the caufe of fcience and Language of virtue to express ourfelves upon all occasions in the language of neceffity. The contrary language is perpetually intruding, and it is difficult to fpeak two fentences upon any topic connected with human action without it. The expressions of both hypothefes are mixed in inextricable confusion, just as the belief of both hypotheses, however incompatible, will be found to exist in all uninstructed minds. The reformation of which I fpeak would probably be found exceedingly practicable in itfelf; though, fuch is the fubtlety of error, that we should at first find feveral revifals and much laborious ftudy necessary before it. could be perfectly weeded out. This must be the author's apology for not having attempted in the prefent work what herecommends to others. Objects of more immediate importance. demanded his attention, and engroffed his faculties.

necellity recommended.

quainted, a fystem of mechanism; understanding by mechanism nothing more than a regular connexion of phenomena without any uncertainty of event, fo that every incident requires a fpecific caufe, and could be no otherwife in any respect than as the cause determined it to be.

But there are two forts of mechanism capable of being applied its classes to the folution of this cafe, one which has for its medium only intellectual. matter and motion, the other which has for its medium thought. Which of these is to be regarded as most probable?

According to the first we may conceive the human body to Material fyfbe fo conftituted as to be fusceptible of vibrations, in the fame brations. manner as the strings of a mufical instrument are susceptible of These vibrations, having begun upon the furface vibrations. of the body, are conveyed to the brain; and, in a manner that is equally the refult of construction, produce a second fet of vibrations beginning in the brain, and conveyed to the different organs or members of the body. Thus it may be fuppofed, that a piece of iron confiderably heated is applied to the body of an infant, and that the report of this uncafinefs, or irritation and feparation of parts being conveyed to the brain, vents itself again in a shrill and piercing cry. It is in this manner that we are apt to imagine certain convultive and fpafmodic affections to take place in the body. The cafe, as here described, is fimilar to that of the bag of a pair of bagpipes, which, being 8 preffed

tem, or of vi-

material and

319

BOOK IV.

CHAP.VII.

THE MECHANISM OF

pressed in a certain manner, utters a groan, without any thing CHAP.VII. more being neceffary to account for this phenomenon, than the known laws of matter and motion. Let us add to thefe vibrations a fystem of affociations to be carried on by traces to be made upon the medullary fubstance of the brain, by means of which paft and prefent impreffions are connected according to certain laws, as the traces happen to approach or run into each other; and we have then a complete fcheme for accounting in a certain way for all the phenomena of human action. It is to be observed, that, according to this system, mind or perception is altogether unneceffary to explain the appearances. It might for other reasons be defirable or wife, in the author of the univerfe for example, to introduce a thinking fubstance or a power of perception as a fpectator of the process. But this percipient power is altogether neutral, having no concern either as a medium or otherwife in producing the events \*.

The intellectual fyficm most probable :

The fecond fystem, which represents thought as the medium

\* The above will be found to be a tolerably accurate defcription of the hypothesis of the celebrated Hartley. It was unnecessary to quote his words, as it would be foreign to the plan of the prefent work to enter into a refutation of any individual writer. The fagacity of Hartley, in having pointed out the neceffary connexion of the phenomena of mind, and shewn the practicability of reducing its different operations to a fimple principle, cannot be too highly applauded. The reasonings of the present chapter, if true, may be confidered as giving farther stability to his principal doctrine by freeing it from the scheme of material automatism with which it was unneceffarily clogged.

BOOK IV.

#### OF THE HUMAN MIND.

of operation, is not lefs a fyftem of mechanism, according to the doctrine of necessity, than the other, but it is a mechanism of a totally different kind.

There are various reasons calculated to perfuade us that this laft from the confideration that hypothesis is the most probable. No inconfiderable argument thought would otherwife be a may be derived from the fingular and important nature of that superfluity: property of human beings, which we term thought; which it is furely fomewhat violent to strike out of our fystem as a mere fuperfluity.

A fecond reason still more decisive than the former, arises from the from the conftancy with which thought in innumerable inftances accompanies the functions of this mechanism. Now this conflancy of conjunction has been shewn to be the only ground we have in any imaginable fubject for inferring necessary connexion, or that fpecies of relation which exists between cause and effect. We cannot therefore reject the principle, which supposes thought to have an efficient share in the mechanism of man, but upon grounds that would vitiate all our reafonings from effects to caufes.

It may be objected, " that, though this contiguity of event Objections argues neceffary connexion, yet the connexion may be exactly the reverse of what is here stated, motion being in all instances the caufe, and thought never any thing more than an effect." But this is contrary to every thing we know of the fystem of Τt the

eftablished principles of reafoning from effects to caufes.

refuted.

#### OF THE MECHANISM

322

BOOK IV. CHAP.VII. the univerfe, in which each event appears to be alternately both the one and the other, nothing terminating in itfelf, but every thing leading on to an endlefs chain of confequences.

> It would be equally vain to object, " that we are unable to conceive how thought can have any tendency to produce motion in the animal fystem;" fince it has just appeared that this ignorance is by no means peculiar to the subject before us. We are universally unable to perceive the ground of necessfary connexion.

Thoughts which produce animal motion may bc, It being then fufficiently clear that there are cogent reafons to perfuade us that thought is the medium through which the motions of the animal fyftem are generally carried on, let us proceed to confider what is the nature of those thoughts by which the limbs and organs of our body are set in motion. It will then probably be found, that the difficulties which have clogged the intellectual hypothesis, are principally founded in erroneous notions derived from the fystem of liberty; as if there were any effential difference between those thoughts which are the medium of generating motion, and thoughts in general.

1. involuntary. First, thought may be the source of animal motion, without partaking in any degree of volition, or defign. It is certain that there is a great variety of motions in the animal system, which are in every view of the subject involuntary. Such, for example, are the cries of an infant, when it is first impressed 4 with

BOOK IV.

#### OF THE HUMAN MIND.

with the fenfation of pain. Such must be all those motions BOOK IV. which flowed from fenfation previoufly to experience. Volition implies that fomething which is the fubject of volition, is regarded as defirable; but we cannot defire any thing, till we have an idea corresponding to the term futurity. Volition implies intention, or defign; but we cannot defign any thing, till we have the expectation that the existence of that thing is in some way connected with the means employed to produce it. An infant, when he has observed that a voice exciting compassion is the refult of certain previous emotions, may have the idea of that voice predominant in his mind during the train of emotions that produce it. But this could not have been the cafe the first time it was uttered. In the first motions of the animal system, nothing of any fort could poffibly be forefeen, and therefore nothing of any fort could be intended. Yet in the very inftances here produced the motions have fenfation or thought for their constant concomitant; and therefore all the arguments, which have been already alledged, remain in full force to prove that thought is the medium of their production.

Nor will this appear very extraordinary, if we confider the nature of volition itself. In volition, if the doctrine of necesfity be true, the mind is altogether paffive. Two ideas prefent themfelves in fome way connected with each other; and a perception of preferableness necessarily follows. An object having certain defirable qualities, is perceived to be within my reach; Tt<sub>2</sub> and

CHAP.VII.

# OF THE MECHANISM

BOOK IV. CHAP.VII.

and my hand is neceffarily firetched out with an intention to obtain it. If a perception of preferableness and a perception of defirableness irrestiftibly lead to animal motion, why may not the mere perception of pain? All that the adversary of automatis concerned to maintain is, that thought is an effential link in the chain; and that, the moment it is taken away, the links that were before it have no longer any tendency to produce motion in the links that were after it. It is possible, that, as a numerous class of motions have their constant origin in thought, fo there may be no thoughts altogether unattended with motion.

All animal motions were first involuntary.

Here it may be proper to obferve, that, from the principles already delivered, it follows that all the original motions of the animal fystem are involuntary. In proportion however as we obtain experience, they are fucceffively made the fubjects of reflection and forefight; and of confequence become many of them the themes of intention and defign, that is, become voluntary. We shall prefently have occasion to fuspect that motions, which were at first involuntary, and afterwards by experience and affociation are made voluntary, may in the process of intellectual operation be made involuntary again.—But to proceed.

2. unattended with confcioufnefs. Secondly, thought may be the fource of animal motion, and yet be unattended with confciournels. This is undoubtedly a diftinction of confiderable refinement, depending upon the precife

### OF THE HUMAN MIND.

cife meaning of words; and, if any perfon fhould choose to ex- BOOK IV. prefs himfelf differently on the fubject, it would be ufelefs obftinately to diffute that difference with him. By the confcioufnefs which accompanies any thought there feems to be fomething implied diftinct from the thought itself. Confciousness is a fort of fupplementary reflection, by which the mind not only has the thought, but adverts to its own fituation and obferves that it has Confciousness therefore, however nice the diffinction, feems it. to be a fecond thought.

In order to afcertain whether every thought be attended with The mind confciousnels, it may be proper to confider whether the mind more than one can ever have more than one thought at any one time. this feems altogether contrary to the very nature of mind. My prefent thought is that to which my prefent attention is yielded; but I cannot attend to feveral things at once. This affertion appears to be of the nature of an intuitive axiom; and experience is perpetually reminding us of its truth. In comparing two objects we frequently endeavour as it were to draw them together in the mind, but we feem to be obliged to pass fucceffively from the one to the other.

But this principle, though apparently fupported both by rea-Objection to fon and experience, is not unattended with difficulties. The first from the cafe is that which arifes from the cafe of complex ideas. This will ideas: best be apprehended if we examine it as relates to visible objects.

cannot have thought at Now any one time.

> this affertion of complex

CHAP.VII.

" Let

# OF THE MECHANISM

" Let us fuppose that I am at present employed in the act of I appear to take in whole words and indeed clufters reading. of words by a fingle act of the mind. But let it be granted for a moment that I fee each letter fucceffively. Yet each letter is made up of parts: the letter D for example of a right line and a curve, and each of these lines of the fucceffive addition or fluxion of points. If I confider the line as a whole, yet its extenfion is one thing, and its terminations another. I could not fee the letter if the black line that defcribes it and the white furface that bounds it were not each of them in the view of my There must therefore, as it should feem, upon the hyorgan. pothefis above stated, be an infinite succession of ideas in the mind, before it could apprehend the simplest objects with which we are conversant. But we have no feeling of any fuch thing. but rather of the precife contrary. Thousands of human beings go out of the world without ever apprehending that lines are composed of the addition or fluxion of points. An hypothesis therefore, that is in direct opposition to so many apparent facts, must have a very uncommon portion of evidence to fultain it, if indeed it can be fuftained at all."

The true answer to this objection seems to be the following. The mind can apprehend only a fingle idea at once, but that idea needs not be in every sense of the word a simple idea. The mind can apprehend two or more objects at a fingle effort, but it cannot apprehend them as two. There seems no sufficient reason

BOOK IV.

CHAP.VII.

reason to deny that all those objects which are painted at once BOOK IV. upon the retina of the eye, produce a joint and fimultaneous impression upon the mind. But they are not immediately conceived by the mind as many, but as one: fo foon as the idea fuggests itself that they are made up of parts, these parts cannot be confidered by us otherwife than fucceffively. The refolution of objects into their fimple elements, is an operation of fcience and improvement; but it is altogether foreign to our first and original conceptions. In all cases the operation is rather analytical than fynthetical, rather that of refolution than composition. We do not begin with the fucceffive perception of elementary parts till we have obtained an idea of a whole; but, beginning with a whole, are capable of reducing it into its elements.

The fecond difficulty is of a much fubtler nature. It confifts from various in the feeming " impoffibility of performing any mental opera- tions : tion, fuch as comparison for example, which has relation to two as comparior more ideas, if we have not both ideas before us at once, if one of them be completely vanished and gone, before the other begins to exist." The cause of this difficulty seems to lie in the miftake of fuppoling that there is a real interval between the two It will perhaps be found upon an accurate examination, ideas. that, though we cannot have two ideas at once, yet it is not just to fay, that the first has perished before the second begins to exift. The inftant that connects them, is of no real magnitude, and

mental opera-

CHAP.VII.

### OF THE MECHANISM

BOOK IV. and produces no real division. The mind is always full. It is CHAP.VII. this inftant therefore that is the true point of comparison.

It may be objected, " that this cannot be a just representation, fince comparison is rather a matter of retrospect deciding between two ideas that have been completely apprehended, than a perception which occurs in the middle, before the fecond has been yet observed." To this objection experience will perhaps be found to furnish the true answer. We find in fact that we cannot compare two objects till we have passed and repassed them in the mind.

apprehenfion:

"Supposing this account of the operation of the mind in comparison to be admitted, yet what shall we fay to a complex fentence containing twenty ideas, the fense of which I fully apprehend at a single hearing, nay, even in some cases by that time one half of it has been uttered ?"

The mere talk of understanding what is affirmed to us is of a very different nature from that of comparison, or any other species of judgment that is to be formed concerning this affirmation. When a number of ideas are presented in a train, though in one sense there be variety, yet in another there is unity. First, there is the unity of uninterrupted fuccession, the perennial flow as of a stream, where the drop indeed that succeeds is numerically distinct from that which went before, but there is no ceffation.

#### OF THE HUMAN MIND.

The mind BOOK IV. Secondly, there is the unity of method. ceffation. apprehends, as the difcourse proceeds, a strict affociation, from fimilarity or fome other fource, between each idea as it follows in the process, and that which went before it.

The faculty of understanding the different parts of a difcourse in their connexion with each other, fimple as it appears, is in reality of gradual and flow acquisition. We are by various caufes excluded from a minute observation of the progress of the infant mind, and therefore do not readily conceive by how imperceptible advances it arrives at a quickness of apprehension relative to the fimplest fentences. But we more easily remark its fubfequent improvement, and perceive how long it is before it can apprehend a discourse of any length or a sentence of any abstraction.

Nothing is more certain than the poffibility of my perceiving the fort of relation that exists between the different parts of a methodical discourse, for example, Mr. Burke's Speech upon Oeconomical Reform, though it be impossible for me after the feverest attention to confider the feveral parts otherwise than fucceffively. I have a latent feeling of this relation as the difcourse proceeds, but I cannot give a firm judgment respecting it otherwise than by retrospect. It may however be suspected that, even in the cafe of fimple apprehension, an accurate attention to the operations of mind would fhow, that we fcarcely

Uι

### OF THE MECHANISM

in any inftance hear a fingle fentence, without returning again and again upon the fteps of the fpeaker, and drawing more clofely in our minds the preceding members of his period, before he arrives at its conclusion; though even this exertion of mind, fubtle as it is, be not of itfelf thought fufficient to authorife us to give a judgment upon the whole. There may perhaps be cafes where the apprehension is more inftantaneous. A fimilar exception appears to take place even in fome cafes of judgment or comparison. A new affociation, or a connecting of two ideas by means of a middle term, which were never brought into this relation before, is a tafk of fuch a nature, that the ftrongeft mind feels fome fense of effort in the operation. But, where the judgment accurately speaking is already made, the operation is in a manner inftantaneous. If you fay, that a melon is a larger fruit than a cherry, I immediately affent. The judgment, though perhaps never applied to this individual fubject, may be faid to have been made by me long before. If again you tell me that Carfar was a worfe man than Alexander, I inftantly apprehend your meaning; but, unlefs I have upon fome former occasion confidered the question, I can neither affent nor diffent till after some reflection.

Rapidity of the fucceffion of ideas.

But, if the principle here flated be true, how infinitely rapid must be the fucceffion of ideas? While I am speaking no two ideas are in my mind at the same time, and yet with what facility do I pass from one to another? If my discourse be argumentative,

BOOK IV.

CHAP.VII.

OF THE HUMAN MIND.

mentative, how often do I pass the topics of which it confists in review before I utter them, and even while I am fpeaking continue the review at intervals without producing any paule in my discourse? How many other fensations are perceived by me during this period, without fo much as interrupting, that is, without materially diverting the train of my ideas? My eye fucceffively remarks a thousand objects that present themselves. Μv mind wanders to the different parts of my body, and receives a fensation from the chair upon which I fit, from the table upon which I lean; from the pinching of a fhoe, from a finging in my ear, a pain in my head, or an irritation of the breaft. When these most perceptibly occur, my mind passes from one to another, without feeling the minutest obstacle, or being in any degree distracted by their multiplicity. From this curfory view of the fubject it appears that we have a multitude of different fucceffive perceptions in every moment of our existence\*.

Confciousness, as it has been above defined, appears to be one Application. of the departments of memory. Now the nature of memory, fo far as it relates to the fubject of which we are treating, is exceedingly obvious. An infinite number of thoughts paffed

\* An attempt has been made to calculate thefe, but there is no reafon to believe that the calculation deferves to be confidered as a ftandard of truth. Senfations leave their images behind them, fome for a longer and fome for a fhorter time; fo that, in two different inftances, the calculation is in one cafe eight, and in another three hundred and twenty to a second.

BOOK IV. CHAP.VII.

331

through.

OF THE MECHANISM

through my mind in the last five minutes of my existence. How many of them am I now able to recollect? How many of them. fhall I recollect to-morrow? One impreffion after another is perpetually effacing from this intellectual register. Some of them may with great attention and effort be revived; others obtrude themfelves uncalled for; and a third fort are perhaps out of the reach of any power of thought to reproduce, as having never left their traces behind them for a moment. If the memory be capable of fo many variations and degrees of intenfity, may there not be fome cafes with which it never connects itfelf? If the fucceffion of thoughts be fo inexpressibly rapid, may they not pass over fome topics with fo delicate a touch, as to elude the fupplement of confcioufneis?

Duration meafured by confcioufnefs.

It feems to be confcioufnefs, rather than the fucceifion of ideas, that meafures time to the mind. The fucceffion of ideas is in all cafes exceedingly rapid, and it is by no means clear that it can be accelerated. We find it impracticable in the experiment to retain any idea in our minds unvaried for any perceptible duration. Continual flux appears to take place in every part of the universe. It is perhaps a law of our nature, that thoughts shall at all times fucceed to each other with equal rapidity. Yet time feems to our apprehension to flow now with a precipitated and now with a tardy courfe. The indolent man reclines for hours in the fhade; and, though his mind be perpetually at work, the filent lapfe of duration is unobferved. But, 3

332

BOOK IV.

CHAP.VII.

# OF THE HUMAN MIND.

But, when acute pain or uneafy expectation obliges confcioufnefs to recur with unufual force, the time then appears infupportably Indeed it is a contradiction in terms to fuppofe that the long. fucceffion of thoughts, where there is nothing that perceptibly links them together, where they totally elude or inftantly vanish from the memory, can be a measure of time to the mind. That there is fuch a flate of mind in fome cafes affuming a permanent form, has been to much the general opinion of mankind, that it has obtained a name, and is called reverie. It is probable from what has been faid that thoughts of reverie, understanding by that appellation thoughts untransmitted to the memory, perpetually take their turn with our more express and digefted thoughts, even in the most active scenes of our life.

Laftly, thought may be the fource of animal motion, and yet 3. a diffinet there may be no need of a diffinct thought producing each in-This is a very important point in the fubject necessary : dividual motion. In uttering a cry for example, the number of before us. mufcles and articulations of the body concerned in this operation is very great; shall we fay that the infant has a distinct thought for each motion of these articulations?

The answer to this question will be confiderably facilitated, if apparent we recollect the manner in which the impressions are blended, complexity of which we receive from external objects. The fenfe of feeling prefitions. is diffused over every part of my body, I feel the different sub-

# OF THE MECHANISM

stances that support me, the pen I guide, various affections and petty irregularities in different parts of my frame, nay, the very air that environs me. But all these impressions are absolutely fimultaneous, and I can have only one perception at once. Out of these various impressions, the most powerful, or that which has the greatest advantage to folicit my attention, overcomes and drives out the reft; or, which not less frequently happens, fome idea of affociation fuggested by the last preceding idea wholly withdraws my attention from every external object. It is probable however that this perception is imperceptibly modified by the miniature impressions that accompany it, just as we actually find that the very fame ideas prefented to a fick man. take a peculiar tinge, that renders them exceedingly different from what they are in the mind of a man in health. It has been already shown, that, though there is nothing less frequent than the apprehending of a fimple idea, yet every idea, however complex, offers itfelf to the mind under the conception of unity. The blending of numerous impreffions into one perception is a law of our nature, and the customary train of our perceptions is entirely of this denomination. Mean while it deferves to be remarked by the way, that, at the very time that the most methodical feries of perceptions is going on in the mind, there is another fet of perceptions, or rather many fets playing an under or intermediate part; and, though these perpetually modify each other, yet the manner in which it is done is in an eminent degree minute and unobferved.

Thefe

BOOK IV.

CHAP. VII

#### THE HUMAN MIND. OF

These remarks furnish us with an answer to the long disputed BOOK IV. queftion, whether the mind always thinks? It appears that innumerable impreffions are perpetually made upon our body, always and the only way, in which the flighteft of thefe is prevented from conveying a diffinct report to the mind, is in confequence of its being overpowered by fome more confiderable impreffion. It cannot therefore be alledged, "that, as one impression is found to be overpowered by another while we wake, the ftrongeft only of the fimultaneous impressions furnishing an idea to the mind; fo the whole fet of fimultaneous impreffions during fleep may be overpowered by fome indifpolition of the fenforium, and entirely fail of its effect." For, first, the cases are altogether From the explication above given it appeared, that different. not one of the imprefions was really loft, but tended, though in a very limited degree, to modify the predominant impreffion. Secondly, nothing can be more unintelligible than this indifpo-Were it of the nature which the objection requires. fition. fleep ought to ceafe of its own accord after the expiration of a certain term, but to be incapable of interruption from any experiment I might make upon the fleeper. To what purpofe call or fhake him? Shall we fay, that it requires an impreffion of a certain magnitude to excite the fenforium? But a clock shall firike in the room and not wake him, when a voice of a much lower key produces that effect. What is the precife degree of magnitude neceffary ? We actually find the ineffectual calls that are addreffed to us, as well as various other founds, occafionally mixing

CHAP.VII. The mind thinks.

# 336 OF THE MECHANISM

BOOK IV.

mixing with our dreams, without our being aware from whence this new perception arofe.

To apply these observations. If a number of impressions may come blended to the mind, fo as to make up one thought or perception, why may not one thought, in cafes where the mind acts as a caufe, produce a variety of motions? It has already been shown that there is no effential difference between the two cafes. The mind is completely paffive in both. Is there any fufficient reafon to flow, that, though it be poffible for one fubfance confidered as the recipient of effects to be the fubject of a variety of fimultaneous impressions, yet it is impossible for one fubstance confidered as a caufe to produce a variety of fimultaneous motions? If it be granted that there is not, if the mere modification of a thought defigning a motion in chief, may produce a fecondary motion, then it must perhaps farther be confelled pollible for that modification which my first thought produced in my fecond, to carry on the motion, even though the fecond thought be upon a fubject altogether different.

**C**onclution.

The confequences, which feem deducible from this theory of mind, are fufficiently memorable. By flowing the extreme fubtlety and fimplicity of thought, it removes many of the difficulties that might otherwife reft upon its finer and more evanefcent operations. If thought, in order to be the caufe of animal mathematical methods and the tion, need not have either the nature of volition, or the concomitant

# OF THE HUMAN MIND.

concomitant of confcioufnefs, and if a fingle thought may BOOK IV. become a complex caufe and produce a variety of motions, it will then become exceedingly difficult to trace its operations, or to difcover any circumftances in a particular inftance of animal motion, which can fufficiently indicate that thought was not the principle of its production, and by that means fuperfede the force of the general arguments adduced in the beginning of this chapter. Hence therefore it appears that all those motions which are observed to exist in substances having perception, and which are not to be difcovered in fubstances of any other species, may reafonably be fufpected to have thought, the diffinguishing peculiarity of fuch fubstances, for their caufe.

There are various claffes of motion which will fall under The theory this definition, befide those already enumerated. An example phenomenon of one of these classes fuggests itself in the phenomenon of walking. An attentive observer will perceive various symptoms calculated to perfuade him, that every ftep he takes during the longest journey is the production of thought. Walking is in all cafes originally a voluntary motion. In a child when he learns to walk, in a rope dancer when he begins to practife that particular exercise, the distinct determination of mind preceding each ftep is fufficiently perceptible. It may be abfurd to fay, that a long feries of motions can be the refult of fo many express volitions, when these supposed volitions leave no trace in the memory. But it is not unreasonable to believe, that a

Хх

applied to the of walking :

**fpecies** 

OF THE MECHANISM

fpecies of motion which began in express defign, may, though it ceases to be the subject of confcious attention, owe its continuance to a continued feries of thoughts flowing in that direction, and that, if life were taken away, material impulse would not carry on the exercise for a moment. We actually find, that, when our thoughts in a train are more than commonly earness, our pace flackens, and sometimes our going forward is wholly sufpended, particularly in any less common species of walking, such as that of descending a flight of stairs. In ascending the case is still more difficult, and accordingly we are accustomed wholly to sufpend the regular progress of reflection during that operation.

to the circulation of the blood. Another class of motions of a fill fubtler nature, are the regular motions of the animal economy, fuch as the circulation of the blood, and the pulfation of the heart. Are thought and perception the medium of these motions? We have the fame argument here as in the former inflances, conjunction of event. When thought begins, these motions also begin; and, when it ceases, they are at an end. They are therefore either the cause or effect of percipiency, or mind; but we shall be inclined to embrace the latter fide of this dilemma, when we recollect that we are probably acquainted with many inflances in which thought is the immediate cause of motions, which fcarcely yield in fubtlety to these; but that, as to the origin of thought, we are wholly uninformed. Add to this, that there are probably no

BOOK IV.

CHAP.VII.

#### THE HUMAN MIND. OF

no motions of the animal economy, which we do not find it in BOOK IV. the power of volition, and still more of our involuntary fenfations, to haften or retard.

It is far from certain that the phenomenon of motion can any Of motion in where exift where there is not thought. Motion may be diffributed into four claffcs; the fimpler motions which refult from what are called the effential properties of matter and the laws of impulse; the more complex ones which cannot be accounted for by the allumption of these laws, such as gravitation, elasticity, electricity and magnetism; and the motions of the vegetable and animal fystems. Each of these seems farther than that which preceded it from being able to be accounted for by any thing we understand of the nature of matter.

Some light may be derived from what has been here ad- Of dreams. vanced upon the phenomenon of dreams. "In fleep we fometimes imagine" for example "that we read long paffages from books, or hear a long oration from a fpeaker. In all cafes fcenes and incidents pass before us that in various ways excite our paffions and interest our feelings. Is it possible that these fhould be the unconfcious production of our own minds?"

It has already appeared, that volition is the accidental, and by no means the neceffary concomitant, even of those thoughts which are most active and efficient in the producing of motion.

# OF THE MECHANISM OF THE HUMAN MIND.

340

BOOK IV. CHAP.VII. It is therefore no more to be wondered at that the mind fhould be bufied in the composition of books which it appears to read, than that a train of thoughts of any other kind should pass through it without a confcious of its being the author. In fact we perpetually annex wrong and erroneous ideas to this phrafe, that we are the authors. Though mind be a real and efficient cause, it is in no case a first cause. It is the medium through which operations are produced. Ideas succeed each other in our fensorium according to certain necessary laws. The most powerful impression, either from without or from within, constantly gets the better of all its competitors, and forcibly drives out the preceding thought, till it is in the fame irressiftible manner driven out by its fuccessor.

T HE subject of intellectual mechanism suggested itself as BOOK IV. the most suitable introduction to an enquiry into the moral principles of human conduct. Having first ascertained that

#### THE PRINCIPLE **O**F

BOOK IV. CHAP. VIII.

342

that thought is the real and efficient fource of animal motion, it remains to be confidered what is the nature of those particular thoughts in which the moral conduct of man originates.

**H**ypothefes of benevolence and felf love.

Upon this question there are two opinions. By fome it is fuppofed that the human mind is of a temper confiderably ductile, fo that, as we in certain inftances evidently propose our own advantage for the object of our pursuit, fo we are capable no lefs fincerely and directly in other inftances of defiring the benefit of our neighbour. By others it is affirmed, that we are incapable of acting but from the profpect or ftimulant of perfonal advantage, and that, when our conduct appears most retrograde from this object, the principle from which it flows is fecretly the fame. It shall be the business of this chapter to prove that the former hypothesis is conformable to truth.

Superiority of the former.

Action is either volumtary or involuntary.

It is to be prefumed from the arguments of the preceding chapter, that there exist in the theory of the human mind two classes of action, voluntary and involuntary. The last of these we have minutely inveftigated. It has fufficiently appeared that there are certain motions of the animal fystem, which have fenfation or thought for their medium of production, and at the fame time arife, to have recourse to a usual mode of expression, spontaneoufly, without forefight of or a direct reflecting on the refult which is to follow. But, if we admit the existence of this phenomenon, there does not feem lefs reafon to admit the existence of the other class of action above enumerated, which is

б

#### OF VIRTUE.

is accompanied in its operation with a forefight of its refult, BOOK IV. CHAP. VIII. and to which that forefight ferves as the reafon and caufe of exiftence.

Voluntary action cannot proceed from all perceptions indif- Nature of the criminately, but only from perceptions of a peculiar clafs, viz. fuch perceptions as are accompanied with the idea of fomething as true respecting them, fomething which may be affirmed or denied. One of the first inferences therefore from the doctrine of voluntary action, is the existence of the understanding as a faculty diftinct from fenfation, or, to fpeak more accurately, the , poffibility of employing the general capacity of perception, not merely as the vehicle of diftinct ideas, but as the medium of connecting two or more ideas together. This particular habit, when it has once been created, gradually extends itfelf to every province of the mind, till at length it is impoffible for any thing to make a clear and diffinct impreffion upon the fenforium, without its being followed with fome judgment of the mind concerning it.

It is thus that man becomes a moral being. He is no farther fo than he is capable of connecting and comparing ideas, of making propolitions concerning them, and of forefeeing certain confequences as the refult of certain motions of the animal fystem.

But, if the forefight of certain confequences to refult may be the

first of thefe classes.

# OF THE PRINCIPLE

BOOK IV. CHAP. VIII. the fufficient reafon of action, that is, if there be fuch a thing as volition, then every forefight of that kind has a tendency to action. If the perception of fomething as true, joined with the confcioufnefs of my capacity to act upon this truth, be of itfelf fufficient to produce motion in the animal lystem, then every perception fo accompanied has a tendency to motion. To apply this to the fubject before us.

Argument that refults from it. I perceive a certain agreeable food, I perceive in myfelf an appetite which this food is adapted to gratify, and these perceptions are accompanied with a confcious of my power to appropriate this food. If no other confideration exist in my mind beyond those which have just been stated, a certain motion of the animal system irressifies follows.

Suppole now that the perfon about whole appetites these propolitions are converfant, is not myself but another. This variation cannot materially alter the case. Still there remain all the circumstances necessary to generate motion. I perceive the food, I am acquainted with the wants of the person in question, and I am confcious of my power of administering to them. Nothing more is necessary in order to produce a certain movement of my body. Therefore, if, as in the former case, no other confideration exist in my mind, a certain motion of the animal system irressift pollows. Therefore, if ten thousand other confiderations exist, yet there was in this, separately confidered,

# OF VIRTUE.

fidered, a tendency to motion. That which, when alone, must BOOK IV. CHAP. VIII. inevitably produce motion, must, however accompanied, retain its internal character.

Let us however suppose, which seems the only confistent mode of fupporting the doctrine of felf love, " that there is no fuch thing practically confidered as volition, that man never acts from a forelight of confequences, but always continues to act, as we have proved him to act at first, from the mere impulse of pain, and precisely in the manner to which that impulfe prompts him, without the rational faculty having any tendency to prolong, to check or to regulate his actions." What an incredible picture does this exhibit to us of the human mind? We form to ourfelves, for this cannot be difputed, opinions, we measure the tendency of means to the promotion of ends, we compare the value of different objects, and we imagine our conduct to be influenced by the judgments we are induced to make. We perceive the preferableness of one thing to another. we defire, we chufe; all this cannot be denied. But all this is a vain apparatus; and the whole fystem of our conduct proceeds, uninfluenced by our apprehension of the relative value of objects, and our forefight of confequences favourable or adverse.

]

Voluntary ac-

tion has a real existence.

There is no other alternative. Once admit the understanding Confequence to an efficient share in the business, and there is no reason that ence.

of that exist-

Υy

can

# **OF THE PRINCIPLE**

can poffibly be affigned, why every topic, which is the object of human understanding, should not have its portion of efficiency. Once admit that we act upon the apprehension of fomething that may be affirmed or denied refpecting an idea, and we fhall be compelled to acknowledge that every proposition including in it the notion of preferableness or the contrary, of better or worfe, will, fo far as it falls within the compafs of our power real or supposed to effect, afford a motive inducing, though with different degrees of energy, to animal motion. But this is directly contrary to the theory of felf love. They who maintain that felf love is the only fpring of action, fay in effect, not only that no action is difinterested, but that no difinterefted confideration contributes in any degree as an inducement to action. If I relieve the virtuous diffrefs of the best of men, I am influenced according to them by no particle of love for the individual or compassion for his distress, but ex-7 at-1 clufively by the defire of procuring gratification to myfelf.

Let us confider this cafe a little more clofely. If I perceive either that my profperity or existence must be facrificed to those of twenty men as good as myself, or theirs to mine, furely this affords fome finall inducement to adopt the former part of the alternative. It may not be fuccessful, but does it excite no wish however fleeting, no regret however ineffectual? The decision of the question is in reality an affair of arithmetic; is there no human being that was ever competent to understand it?

# OF VIRTUE

it? The value of a man is his usefulnes; has no man ever be- BOOK IV. lieved that another's capacity for usefulness was equal to his own? I am as 40, confequently the others are as 800; if the 40 were not myself, I should perceive that it was less than 800; is it poffible I should not perceive it, when the case becomes my own?

But the advocates for the fystem of felf love generally admit, " that it is possible for a man to facrifice his own existence in order to preferve that of twenty others;" but they affirm, " that in fo doing he acts from perfonal interest. He perceives that it is better for him to die with the confciousness of an heroic action, than live with the remorfe of having declined it." That is, here is an action attended with various recommendations, the advantage to arife to twenty men, their tranquillity and happiness through a long period of remaining existence, the benefits they will not fail to confer on thousands of their contemporaries, and through them on millions of posterity, and lastly his own escape from remorfe and momentary exultation in the performance of an act of virtue. From all these motives he felects the last, the former he wholly difregards, and adopts a conduct of the higheft generofity from no view but to his own advantage. Abstractedly and impartially confidered, and putting felf as fuch out of the question, this is its least recommendation, and he is absolutely and unlimitedly callous to all the reft.

Confidering then the fystem of difinterestedness as sufficiently Experimental Y y 2 established subject.

view of the

347

BOOK IV. CHAP. VIII Suppositions fuggefted by the advocates of felf love:

eftablished in theory, let us compare it with the leffons of experience. There are two different hypothefes by which this theory is oppofed; the one affirming "that in every thing we do, we employ, previoully to the choice of the mind, a calculation by which we determine how far the thing to be done will conduce to our own advantage;" the other afcribing our actions "to the fame blind and unintelligent principle, by which, when a child cries, he frequently utters a found unexpected by himfelf, but which inevitably refults from a certain connexion of an organized body with an irritated mind."

that we calculate upon all occafions the advantage to accrue to US.

How far does experience agree with the first of these hypothese? Surely nothing can be more contrary to any thing we are able to observe of ourselves, than to imagine, that in every act; of pity suppose, we estimate the quantity of benefit to arise to ourselves, before we yield to the emotion. It might be faid indeed, that the mind is very subtle in its operations, and that, a certain train of reasoning having been rendered familiar to us, we pass it over in our reflections with a rapidity that leaves no trace in the memory. But this, though true, will contribute little to relieve the softent we are confidering, fince it unfortunately happens that our first emotions of pity are least capable of being accounted for in this way.

Falleness of this supposition. To underftand this let us begin with the cafe of an infant. Before he can feel fympathy, he must have been led by a feries

# OF VIRTUE.

ferics of obfervations to perceive that his nurfe for example, is a being poffeffed of confcioufnefs, and fufceptible like himfelf of the impreffions of pleafure and pain. Having fupplied him with this previous knowledge, let us fuppofe his nurfe to fall from a flight of ftairs and break her leg. He will probably feel fome concern for the accident; he will underftand the meaning of her cries, fimilar to thofe he has been accuftomed to utter in diftrefs; and he will difcover fome wifh to relieve her. Pity is perhaps firft introduced by a mechanical impreffion upon the organs, in confequence of which the cries uttered by another prompt the child without direct defign to utter cries of his own. Thefe are at firft unaccompanied with compaffion, but they naturally induce the mind of the infant to yield attention to the appearance which thus impreffed him.

In the relief he wiftes to communicate is he prompted by. reflecting on the pleafures of generofity? This is by the fuppofition the firft benevolent emotion he has experienced, and previoufly to experience it is impoffible he fhould forefee the pleafures of benevolence. Shall we fuppofe that he is influenced by other felfifh confiderations? He confiders, that, if his nurfe die, he will be in danger of perifhing; and that, if fhe be lame, he will be deprived of his airings. Is it poffible that any man fhould believe, that, in the inftantaneous impulfe of fympathy, the child is guided by thefe remote confiderations? Indeed it was unneceffary to have inftanced in an action apparently benevolent, fince it is equally clear that our moft 349

BOOK IV. CHAP. VIII.

# OF THE PRINCIPLE

BOOK IV. CHAP. VIII. most familiar actions are inconfistent with this explanation. We do not fo much as eat and drink, from the recollection that these functions are necessary to our support.

Supposition of a contrary fort.

The fecond of the two hypotheses enumerated, is diametrically the reverse of the first. As the former represented all human actions as proceeding from a very remote deduction of the intellect, the latter confiders the whole as merely phyfical. In its literal fenfe, as has already been feen, nothing can be more incompatible with experience. Its advocates therefore are obliged to modify their original affumption, and to fay, not that we act merely from fenfation, but that fenfation affords the basis for reflection; and that, though we be capable of conducting ourfelves by fystem and forefight, yet the only topic to which we can apply that forefight is the removal of pain. In reality all that which is regularly adapted to the accomplishment of a certain purpose, must be admitted to flow from the dictates of reflection. The tear flarts, the cry is uttered at the prompting of fenfation only, but we cannot lift a finger to relieve except as we are commanded by the underftanding.

We do not calculate what would be the uneafinefs to refult from our refraining to act:

either in relieving dif-

trefs :

Here then we are prefented with the commencement of a new feries. If uneafinefs be full the fource of the phenomena, at leaft it is now under a different form. Before, a certain emotion was produced, refpecting which no intention was extant in the mind. Now an action or a feries of actions is adopted with a certain view and leading to a certain end. This end is faid to

2

be

#### VIRTUE. OF

be the removal of uneafinefs. Whether it be or no is a queftion BOOK IV. which recollection in many cafes is competent to enable us to decide. If we frequently deceive ourfelves as to the motive by which we are prompted to act, this is chiefly owing to vanity, a defire of imputing to ourfelves, or being underftood by the world to act from a principle more elevated than that which truly belongs to us. But this idea is least prevalent with children and favages, and of confequence they ought to be most completely aware that the project they have conceived is that of removing uneafinefs. It feems to be an uncommon refinement in abfurdity to fay, that the end we really purfue is one to which we are in no inftance conficious; that our action is wholly derived from an unperceived influence, and the view extant in the understanding altogether impotent and unconcerned.

In the cafe we have just examined uneafinefs is the first step or in adding in the process; in others which might be stated uneasiness is of general not the first step. "In the pursuit" suppose " of a chemical process I accidentally discover a circumstance, which may be of great benefit to mankind. I inftantly quit the object I was originally purfuing, profecute this difcovery, and communicate it to the world." In the former proceeding a fensation of pain was the initiative, and put my intellectual powers into action. In the prefent cafe the perception of truth is the original mover. Whatever uneafinefs may be fuppofed to exift, rendering me anxious for the publication of this benefit, is the confequence of the

to the flock good.

CHAP. VIII.

351

# OF THE PRINCIPLE

BOOK IV. CHAP. VIII the perception. The uncafinels would never have existed if the perception had not gone before it.

Uneafiness an accidental member of the process.

But it has been faid, " that, though the perception of truth in this cafe goes first, the pain was not lefs indifpenfible in the process, fince, without that, action would never have followed. Action is the child of defire, and a cold and uninteresting decifion of the underftanding would for ever have laid dormant in the mind." Granting that pain in a certain modified degree is a conftant step in the process, it may nevertheless be denied that it is in the strictest sense of the word indispensible. To perceive that I ought to publish a certain discovery, is to perceive that publishing is preferable to not publishing it. But to perceive a preference is to prefer, and to prefer is to choose. The process is in this cafe complete, and pain, in the fenfe in which it comes in at all, is merely an accident. Why do I feel pain in the neglect of an act of benevolence, but becaufe benevolence is judged by me to be a conduct which it becomes me to adopt? Does the understanding wait to enquire what advantage will refult from the propositions, that two and two make four, or that fuch and fuch caufes will contribute to the happiness of my neighbour, before it is capable of perceiving them to be true?

The fame principle which is applied here, is not lefs applicable to fame, wealth and power, in a word to all those purfuits which engage the reflecting and speculative part of the civilifed world.

#### OF VIRTUE.

None of these objects would ever have been pursued, BOOK IV. CHAP. VIII. world. if the decifions of the intellect had not gone first, and informed us that they were worthy to be purfued.

Neither of the two hypothefes we have been examining would The supposeperhaps have been reckoned fo much as plaufible in themfelves, fiftently if they had not been blended together by the inadvertence of their The advocates of felf love have been aware, that fupporters. the mere fenfitive impulse of pain would account for a very fmall part of the hiftory of man; and they have therefore infenfibly flided from the confideration of uneafinefs to be removed, to that of intereft to be promoted. They have confounded the two cafes of fenfation and reflection; and, taking it for granted in the latter that private gratification was the object univerfally purfued, have concluded that they were accounting for all human actions from one principle. In reality no two principles can be more diftinct, than the impulse of uneafiness, which has very improperly been denominated the love of ourfelves, and that deliberate felf love, by which of fet defign we purfue our own advantage. One circumstance only they have in common, that of reprefenting us as incapable of understanding any proposition, till we have in fome way or other connected it with perfonal intereft. This is certainly a just representation of their confequences; fince, if I were capable of understanding the naked proposition, that my neighbour stood in need, of a candle for

Ζz

tions inconblended.

inftance

CHAP. VIII.

BOOK IV. inftance to be removed from one end of a room to the other, this would be a reason of action, a motive, either strong or weak, either predominant or the contrary. But, if this confideration entered for any thing into the ground of my proceeding, the whole would not be refolvable into felf love.

Scheme of felf love recommended from the propenfity of mind to abbreviate its process.

An hypothesis, which has been thought to have some tendency to relieve the difficulties of the fyftem of felf love, is that "of the mind's reasoning out for itself certain general principles. which are a fort of refting-places in the process, to which it afterwards recurs, and upon which it acts, without being at the trouble in each inftance of application, of repeating the reafons upon which the general principle was founded. Thus in geometry, as we proceed to the higher branches, we perpetually refer to the earlier propositions as established and certain, without having at the time in our minds perhaps the fmalleft recollection of the way in which those early propositions were demonstrated." But this representation, though true, has very little tendency to decide in the fubject before us. It is ftill true, that. if I be capable of understanding a proposition as it relates to the interest of my neighbour, any reasoning about the propolition by which it is indirectly connected with my own interest, is unnecessary to put me into a state of action. It is fill true, that my action has a direct and an indirect tendency; and, till it can be shown that there is something in the nature of mind

# OF VIRTUE.

mind that unfits it for entertaining the direct purpofe, an un- BOOK IV. СНАР. УШ. prejudiced enquirer will be very little disposed universally to have recourfe to that which is indirect.

The hypothesis of felf love seems to have been originally in- from the simvented from a love of "that fimplicity, which appears to be the obtains in the ultimate term in all grand discoveries relative to the system of thingsthe univerfe." But fimplicity, though well deferving our approbation, can fcarcely of itfelf be a fufficient fupport for any The fimplicity however in this cafe is more apparent opinion. than real. Not to repeat what has been faid relative to the coalition of two hypotheses very incongruous in their own nature, there is little genuine fimplicity in a fcheme, that reprefents us as perpetually acting from a motive which we least fuspected, and feeks by a circuitous and intricate method for a recommendation of little intrinsic value, rejecting in all cafes the great and obvious reason which the first view of the subject suggested. True fimplicity is altogether on the fide of the opposite fystem, which reprefents man as capable of being governed by the nature of the thing, and of acting from the motive which he fuppofes to influence him; which requires nothing but perception to account for all the phenomena of mind, and, when a reafon exciting to action is apprehended, does not feek for an additional principle to open a communication between the judgment and the choice.

Zz 2

. There

plicity that natures of

OF THE PRINCIPLE

There is one observation more, which, though it be not fo conclusive as fome of those which have been mentioned, ought not to be omitted. If felf love be the only principle of action, there can be no fuch thing as virtue. Virtue is a principle in the mind, by which we are enabled to form a true estimate of the pretensions of different reasons inviting us to preference. He, that makes a falfe estimate, and prefers a trivial and partial good to an important and comprehenfive one, is vicious. It is in the difpolition and view of the mind, and not in the good which may accidentally and unintentionally refult, that virtue Judas's act in betraying Chrift, according to the confifts. Christian system, may be regarded as a real and effential cause conducing to the falvation of mankind. Yet Judas's act was not virtuous, but vicious. He thought only of the forty pieces of filver, the price of his treachery, and neglected every confideration of public utility and justice. Just fo in the cafe stated early in the prefent chapter, the public benefactor, absolutely and ftrictly speaking, prefers forty to eight hundred or eight hundred So far as relates to the real merits of the cafe, his millions. own advantage or pleasure is a very infignificant confideration, and the benefit to be produced, fuppofe to a world, is ineftima-Yet he falfely and unjuftly prefers the first, and regards ble. the latter, abstractedly confidered, as nothing. If there be such a thing as justice, if I have a real and absolute value, upon which truth can decide, and which can be compared with what is greater or lefs, then, according to this fystem, the best action that 5 ever

# OF VIRTUE.

ever was performed, may, for any thing we know, have been the BOOK IV. action in the whole world of the most exquisite and deliberate injustice. Nay, it could not have been otherwife, fince it produced the greatest good, and therefore was the individual inftance in which the greatest good was most directly postponed to perfonal gratification.

Nor will this objection be much relieved by the fyftem already alluded to of refting-places, enabling a man in a certain degree to forget the narrow and felfish principles in which his conduct originated. It can fcarcely be queftioned, that the motives which induced a man to adopt his fystem of conduct, and without which he never would nave adopted it, are of more importance, than the thought leffness and inattention by which they are forgotten, in deciding upon the morality of his character.

From this train of reasoning the refult is, that men are capa- Conclusion. ble of understanding the beauty of virtue, and the claims of other men upon their benevolence; and, understanding them, that these views, as well as every other perception of the intellect, are of the nature of motives, fometimes overpowered by other confiderations, and fometimes overpowering them, but always in their own nature capable of exciting to action, when not counteracted by pleas of a different fort. Men are capable no doubt of preferring an inferior interest of their own to a fuperior interest of other people; but to this preference it is perhaps

357

#### **O**F THE PRINCIPLE

perhaps neceffary, that they should imagine the benefit to CHAP. VIII. themfelves to be great and the injury to others comparatively fmall, or elfe that they fhould have embraced the pernicious opinion that the general good is beft ferved by each man's applying himfelf exclusively to his perfonal advantage.

Importance of the queftion.

There is no doctrine in which the generous and elevated mind refts with more fatisfaction, than in that of which we are treating. If it be falle, it is no doubt incumbent upon us to make the best of the small remnant of good that remains. But it is a heartlefs profpect for the moralift, who, when he has done all, has no hope to perfuade mankind to one atom of real affection towards any one individual of their fpecies. We may be made indeed the inftruments of good, but in a way lefs honourable, than that in which a frame of wood or a fheet of paper may be made the inftrument of good. The wood or the paper are at least neutral. But we are drawn into the fervice with affections of a diametrically opposite direction. When we do the most benevolent action, it is with a view only to our own advantage, and with the most fovereign and unreferved neglect of that of others. We are inftruments of good, just in the fame manner as bad men are faid to be the inftruments of providence, even when their inclinations are most refractory to its decrees. In this fense we may admire the system of the universe, where public utility refults from each man's contempt of that utility, and where the most beneficial actions of those, whom we have been accuftomed

BOOK IV.

### OF VIRTUE.

accuftomed to term the beft men, are only inftances in which juftice and the real merits of the cafe are moft flagrantly violated. But we can think with little complacence of the individuals of whom this univerfe is composed. It is no wonder that philofophers, whofe fyftem has taught them to look upon their fellow men as thus perverfe and unjust, have been frequently cold, phlegmatic and unanimated. It is no wonder that Rouffeau, the most benevolent of all these philosophers, and who most escaped the general contagion, has been driven to place the perfection of all virtue in doing no injury\*. Neither philosophy nor morality nor politics will ever show like themselves, till man shall be acknowledged for what he really is, a being capable of justice, virtue and benevolence, and who needs not always to be led to a philanthropical conduct by foreign and frivolous confiderations.

The fyftem of difinterefted benevolence proves to us, that it is poffible to be virtuous, and not merely to talk of virtue; that all which has been faid by philosophers and moralists respecting impartial justice is not an unmeaning rant; and that, when we call upon mankind to divest themselves of felfish and personal confiderations, we call upon them for something which they are able to practife. An idea like this reconciles us to our species; teaches us to regard with enlightened admiration the men who

\* « La plus sublime vertu est négative; elle nous instruit de ne jamais faire du mal à personne." EMILE, Liv. II.

3

BOOR IV. CHAP. VIII.

have

•\*

# OF THE PRINCIPLE

BOOK IV. CHAP. VIII.

have appeared to lofe the feeling of their perfonal existence in the purfuit of general advantage; and gives us reason to expect, that, as men collectively advance in science and useful institution, they will proceed more and more to consolidate their private judgment and their individual will with abstract justice and the unmixed approbation of general happines.

What are the inferences that ought to be made from this Application, doctrine with respect to political inflitution? Certainly not that the interest of the individual ought to be made incompatible with the part he is expected to take in the interest of the whole. This is neither defirable, nor even poffible. But that focial inflitution needs not defpair of feeing men influenced by other and better motives. The legiflator is bound to recollect that the true perfection of mind confifts in difinterestedness. He should regard it as the ultimate object of his exertions, to induce men to estimate themselves at their true value, and neither to grant to themselves nor claim from others a higher confideration than they justly deferve. Above all he should be careful not to add to the vigour of the felfish paffions. He fhould gradually wean men from contemplating their own benefit in all that they do, and induce them to view with complacency the advantage that is to refult to others.

> The last perfection of this feeling confists in that state of mind which bids us rejoice as fully in the good that is done by others,

as

as if it were done by ourfelves. The truly wife man will BOOK IV. be actuated neither by interest nor ambition, the love of ' honour nor the love of fame. He has no emulation. He is not made uneafy by a comparison of his own attainments with those of others, but by a comparison with the standard of right. He has a duty indeed obliging him to feek the good of the whole; but that good is his only object. If that good be effected by another hand, he feels no.difappointment. All menare his fellow labourers, but he is the rival of no man. Like Pedaretus in ancient ftory, he exclaims : " I also have endeavoured to deferve; but there are three hundred citizens in Sparta better than myfelf, and I rejoice."

BOOK IV. HAVING endeavoured to establish the theory of virtue upon its true principle, and to shew that felf interest is neither its basis in justice and truth, nor by any means necessary

#### OF THE TENDENCY OF VIRTUE.

to incite us to the practice, it may not be improper to confider BOOK IV. CHAP. IX. in what degree public intereft is coincident with private, and by that means at once to remove one of the enticements and apologies of vice, and afford an additional encouragement and direction to the true politician.

In the first place then, there appears to be fufficient reason It is the road? to believe, that the practice of virtue is the true road to individual to happines: happinefs. Many of the reafons which might be adduced in this place have been anticipated in the chapter of the Cultivation of Truth. Virtue is a fource of happiness that does not pall in the enjoyment, and of which no man can deprive us \*. The effence of virtue confifts in the feeing every thing in its true light, and estimating every thing at its intrinsic value. No man therefore, fo far as he is virtuous, can be in danger to become a prey to forrow and discontent. He will habituate himself, refpecting every fpecies of conduct and temper, to look at its absolute utility, and to tolerate none from which benefit cannot arife either to himfelf or others. Nor will this be fo difficult a task as it is commonly imagined. The man, who is accustomed upon every occasion to confult his reason, will speedily find a. habit of this nature growing upon him, till the just and dispaffionate value of every incident that befals him will come at length fpontaneoufly to fuggeft itfelf. Those evils which prejudice has

• Ch. IV. p. 233.

taught

Digitized by Google

taught fo great a part of mankind to regard with horror, will appear to his understanding difarmed of their terrors. Poverty. obloquy and difgrace will be judged by him to be very trivial misfortunes. Few conditions can be fo defititute as to deprive us of the means of obtaining for ourselves a fublistence. The reafonable mind perceives at once the poffibility of this and the best method of executing it; and it needs no great stretch of understanding to decide, that real happiness does not confist in luxurious accommodations. With refpect to obloquy and difgrace, the wife man may lament the tendency they posses to narrow the fphere of his usefulness; but he will readily perceive, that, feparately from this confideration, they are no evils. My real value depends upon the qualities that are properly my own, and cannot be diminished by the slander and contempt of the whole world. Even bodily pain lofes much of its fling, when it is encountered by a chearful, a composed, and a determined spirit. To all these negative advantages of virtue, we may add the pofitive fatisfaction of a mind confcious of rectitude, rejoicing in the good of the whole, and perpetually exerted for the promotion of that good.

There are indeed fome extreme cafes of the election of a virtuous conduct, refpecting which it is difficult to pronounce. Was it Regulus's intereft to return to Carthage to a tormenting death, rather than fave his life by perfuading the Roman fenate to an exchange of prifoners ? Probably it was. Probably, with the

BOOK IV. CHAP. IX.

#### VIRTUE. OF

the exquisite feeling of duty with which Regulus was animated, BOOK IV. CHAP.IX. a life that was to be perpetually haunted with the recollection of his having omitted the nobleft opportunity of public fervice, was not worth his purchafe. His reasoning, fo far as related to perfonal interest, might be like that of Cato in the play:

> " A day, an hour, of virtuous liberty Is worth a whole eternity in bondage \*."

Secondly, virtue not only leads to the happiness of him who to the effect practifes it, but to the efteem and affection of others. Nothing of others. can be more indifputable, than that the direct road to the effeem of mankind, is by doing things worthy of their efteem. The most artful scheme for passing things upon others for somewhat different from what they really are, is in momentary danger of detection; and it would be an egregious mistake to suppose, that men effeem any thing but what comes to them under the ap-

\* The first of the three heads discussed in this chapter is inferted chiefly for the fake of method, few perfons having teally doubted that virtue is the most genuine fource of individual tranquillity and happinefs. It is therefore difmiffed with all practicable brevity. The two remaining heads had a ftronger claim to difcuffion. It unfortunately happens to be the generally received opinion, that rigid virtue is neither the fureft road to other men's approbation and efteem, nor the most probable means of securing our external prosperity. If the author had known of any work at prefent existing, that had appeared to him to place this fubject in any degree in its true light, he would have omitted the reason-ings of this chapter.

and affection

BOOK IV. pearance of virtue. No man ever existed of a taste so depraved as to feel real approbation of another, for the artfulness of his flattery, or the cunning with which he over-reached his neighbours.

Objection from milconftruction and ealumny.

There is indeed one difadvantage that occurs under this head, confifting in this circumstance, " that no man truly admires. what he does not understand. Now, in order thoroughly to comprehend the value of any mental effort, whether of a purely intellectual or moral nature, it is perhaps neceffary that the gemus or virtue of the fpectator fhould be equal to that of him by whom it is made. It is an inevitable law of our nature, that we should in a great measure judge of others by ourselves, and form our flandard of human nature by an investigation of our That, respecting which we feel a clear and distinct own minds. conviction that we are ourfelves incapable, we are prone to fuspect to be mere show and deception in others. We are: the more inclined to this, because we feel their virtues to be at reproach to our indolence, and therefore are little difpofed to, make a liberal estimate of them."

Anfwer. But, though there be fome truth in these observations, they have frequently been made much too indifcriminate, by the mifanthropy and impatience of those, who have conceived their estimation with their neighbours or the world to fall greatly short of their merit. It must be admitted that mankind are reluctant

reluctant to acknowledge a wifdom or a virtue fuperior to their own; but this reluctance is by no means invincible. It is abfurd to suppose that no man believes himself the inferior of his neighbour, or that, when he reads the plays of Shakespeare, the philofophy of Rouffeau, or the actions of Cato, he fays, "I am as skilful, as wife, or as virtuous as this man." It would be still more abfurd to suppose that men may not in a confiderable degree perceive the beauty of paffages they could never have written, and actions they would never have performed.

It is true that men of high moral excellence are feldom efti- Virtue commated at their true value, especially by their contemporaries. ther modes of But the question does not relate to this point, but to that other, effcem. whether they be not effeemed more than perfons of any other description, and of confequence whether virtue be not the best road to efteem ? Now, let a specious appearance be maintained with ever fo much uniformity of fuccess, it is perpetually in danger of detection. It will always want fomething of animation, of confiftency and firmnefs that true virtue would produce. The imitation will never come up to the life. That temporifing and compliance, which are careful not to contradict too much the prejudices of mankind, and in which the principal advantage of a merely exterior virtue confifts, will always bear fomething fuspicious about them. Men do not love him who is perpetually courting their applause. They do not give with a liberal spirit what is fought with too unwearied an affiduity. But their praife

is involuntarily extorted, by him who is not fo anxious to obtain fuccess, as to deferve it.

Vice and not virtue is the loquy :

inftanced in the bafe allov with which our virtues are mixed:

If men of virtue be frequently misinterpreted or misunderfubject of ob- flood, this is in a great degree to be afcribed to the imperfection of their virtue and the errors of their conduct. True virtue fhould hold no commerce with art. We ought not to be fo defirous to exhibit our virtue to advantage, as to give it free fcope and fuffer it to exhibit itfelf. Art is nearly allied to felfifhnefs; and true virtue has already been fhown to be perfectly difinterested. The mind should be fixed only on the object purfued, and not upon the gracefulness or gallantry of the purfuit. We fhould be upon all occasions perfectly ingenuous, expressing with simplicity the fentiments of our heart, and fpeaking of ourfelves, when that may be neceffary, neither with oftentation and arrogance on the one hand, nor with the frequently applauded lies of a cowardlike humility on the other. There is a charm in fincerity that nothing can refift. If once a man could be perfectly frank, open and firm in all his words and actions, it would be impossible for that man to be mifinterpreted.

in arrogance and offcutation :

Another fruitful fource of milrepresentation has appeared to be envy. But, if we be regarded with envy, it may be fuspected to be in a great measure our own fault. He will always be envied most, who is most arrogant, and whose mind moft 1

most frequently recurs to his own attainments and the inferiority of others. Our virtues would feldom be contemplated with an uneafy fenfe of reproach, if they were perfectly unaffuming. Any degree of oftentation in their lefs corrupted neighbour, as it humbles the vanity of mankind, must be expected to excite in them a defire of retaliation. But he whofe virtues flow from philanthropy alone, whofe heart expands with benevolence and good will, and who has no defire to make his fuperiority felt, will at all times have many friends and few enemies.

Virtue has also frequently been subject to misrepresentation is the vices from a farther circumstance which is most properly chargeable perfons of upon the fufferers, and that is, the inequality of their actions. It is no wonder, if we first rouse the angry passions of mankind by our arrogance, and then render our motives fulpected by a certain mixture of art in the exhibition of our characters, that the follies and vices we commit, if they be of a glaring kind, should too often furnish a triumphant argument to support against us the accusation of hypocrify and deceit. It unfortunately happens, that, when men of an ardent fpirit fall into error, their errors are inevitably confpicuous. It happens, that men, who have dedicated the flower of their ftrength to laudable purpofes, too often think they have a right to indulge in relaxations unworthy of the energy of their characters. They would furely avoid this fatal miftake, if they duly reflected, that it is not their individual character only that is at flake, but that they

BOOK IV. CHAP. IX.

BOOK IV. CHAP. 1X. are injuring the caufe of juffice and general good. Prudential and timid virtues, unalloyed with imprudent and thoughtlefs vices, are beft underftood by the vulgar. Their reign indeed is fhort; they triumph only for a day: but that they are transitory is of little avail, while those who are most worthy of lasting efteem, wantonly barter it for gratifications, contemptible in themselves, and fatally important in their effects.

The virtuous man only has friends.

But to return to the comparison between the effeem and. affection that accrue from virtue, and from any other plan of conduct. The produce in the latter cafe must always be in a confiderable degree barren, and of very fhort duration. Whether the good name acquired by virtue be more or lefs, virtue will appear in the end to be the only mode for its acquifition. He who merits the effeem of his neighbours and fellow citizens, will at least be understood by a few. Instances might be adduced in which perfons infligated by the pureft motives have been eminently unpopular. But there is perhaps no instance in which fuch men have not had a few friends of tried and zealous attachment. There is no friendship but this. No man was ever attached to an individual but for the good qualities he ascribed to him; and the degree of attachment will always bear fome proportion to the eminence of the qualities. Who would ever have redeemed the life of a knave at the expence of his own ? And how many inftances do there occur of fuch heroic friendship where the character was truly illustrious? In

In the third place, virtue will probably be found the fecureft BOOK IV. road to outward profperity and fuccefs in the world, according to the old maxim, "that honefty is the beft policy." indeed natural to suppose that a good name should eminently contribute to our fucces. This is evident even in the humblest walks of life. That tradefman, other things equal, will always applied to be most prosperous, who is most fair and equitable in his transactions: dealings. Which is most likely to fucceed, he who never gives expectations that he cannot fulfil, or who is perpetually difappointing his cuftomers? he who is contented with a reasonable profit, or who is ever upon the watch to outwit those with whom he deals? he who puts one conftant price upon his commodities, or who takes whatever he can get, favouring a fufpicious cuftomer unreasonably, and extorting with merciles avarice from an eafy one? in a word, he who wifhes to keep the perfons with whom he is concerned in prefent good humour, or who would give them permanent fatisfaction ?

There is no doubt, that, though the former may obtain by his artifices a momentary fuccefs, the latter will in the fequel be generally preferred. Men are not fo blind to their own interest as they have fometimes been reprefented, and they will foon feel the advantage of dealing with the perfon upon whom they can depend. We do not love to be perpetually upon our guard against an enemy, and for ever prying into the tricks and subterfuges of a depraved heart.

3 B 2

CHAP. IX. Virtue the It is road to profperity and fuccels in the world :

commercial

But

BOOK IV. CHAP. IX.

to cafes that depend upon patronage. Apparent exception where the dependent is employed as the inftrument of vice.

But what shall we fay to those cases in which advancement depends upon patronage? There are two circumstances under this head which seem to form an exception to the rule above delivered. The first is that of a patron, whose vicious and imperfect character renders the co-operation of vicious men necessary to his pursuits, whom therefore he will be contented to reward, even while he despises. The second is that of an office, and it is to be feared such offices exist, which may require a compliant and corrupt character in the person who is to fill it, and for the obtaining of which vice of a certainiort is a necessary recommendation.

Virtue compared with other modes of becoming profperous.

It must no doubt be admitted as to this subject in general, that, fo far as relates to fuccefs in the world, vicious men will But it may reafonably be questioned, often prove fortunate. whether vice be in the first instance the most likely road to for-The candidates for this equivocal species of preferment tune. may be numerous. An individual cannot diffinguish himself in the crowd but by a portion of ability, which it may well be fuppofed would not have been unfuccefsful in the career of virtue. After all, not every candidate, not even every skilful candidate, will be victorious. There is always a ftruggle in the breaft of the patron between contempt and a corrupt motive; and, where there is ftruggle, the decifion will fometimes be on the fide which the client least defires. Even when fortune feems to have overtaken him, his fituation is ftill precarious. His fuccefs is founded upon a local and mutable bafis; his patron 3

1

I

patron may defert him, may be deprived of his power or his life; and the client, who, after having facrificed every principle to his hopes of advantage, miffes his aim, or is cut fhort in his career, is in all cafes a fubject of derifion. A bad eminence is always unftable; and, if we could fum up the numbers of thofe who have facrificed their virtue to their ambition, we fhould probably find that a great majority of them had egregioufly mifcarried in their calculation.

In the mean time, if we turn to the other fide of the estimate, we shall in the first place inevitably suspect that esteem must lead to fome of the fruits of effeem. But, exclusively of this confideration, if there be offices for which vice of a certain fort is a neceffary qualification, there are also undoubtedly a multitude of offices which cannot be well discharged but by a man of inte-The patron, though he would perhaps willingly provide grity. for his pander or his parafite at the expence of his country, will not be inclined to truft a man of accommodating principles with the fuperintendence of his fortune or the education of his child. With the exception of the two cafes that have been flated, integrity, as it is the first qualification for discharging a function with propriety, will always occupy a foremost place in the recommendation of the client. The employer, whole object is the real interest of himself, his friends or his country, will have a powerful motive inducing him to prefer the honeft candidate. Ability may be almost equally requisite; but ability and virtue.

if

BOOK IV. CHAP. IX.

374

if we fhould choose to suppose that there is no necessary alliance between them, will at least by no person be thought exclusive of each other. If a knave may in some cases obtain an employment of trust and real importance, it is vehemently to be sufpected that this would not have happened, if an honest man of equal ability had been at hand. Add to this that virtue is perpetually gaining ground upon us. The more it is tried, and the more it is known, the more will it be respected. It is to the man of real virtue, whose character is not brought into sufficien by the equivocal nature of some of his proceedings, whose virtue consists in benevolence, equanimity and justice, that all will have recourse, when they have the success of the affair in which they are concerned deeply at heart.

Source of the difrepute of virtue in this refpect.

Nothing has tended more to bring honefty as an inftrument of fuccefs into general difrepute, than the fort of complaint that is frequently heard from fuch as are unfuccefsful. Thefe men will naturally have recourfe to the most fpecious topic of felf confolation, and there is none that more obviously fuggests itself than the fuppolition that they failed through their too much virtue. Thus the man of rugged temper who is perpetually infulting the foibles of others, the timid man who is incapable of embracing at once a perilous alternative, the forupulous man who knows not what to admit or reject and is always undetermined upon his courfe of action, and a thousand others, are forward to impute their miscarriage to their integrity, though ftrictly speaking it was in every one of these cases to be as foribed to their vices.

5

There

#### VIRTUE OF

There is another confideration which deferves to be taken BOOK IV. into account in this estimate. There is a degree of virtue which Conceffion. would probably render me difinclined to fill many eminent ftations, to be a great lawyer, a great fenator, or a great minister. The functions of these situations in the present state of mankind are of fo equivocal a nature, that a man, whofe moral views are in the highest degree sublime, will perhaps find in himself little forwardness to exercise them. He will perhaps conceive that in a private station, unincumbered with engagements, unwarped by the finister motives that high office will not fail to prefent, he may render more lafting fervices to mankind. But furely it is no very formidable objection to fay, that honefty will prevent a man from acquiring what he has no with to acquire.

A cafe of fomewhat a different nature has been fuggested, and Cafe where it has been asked, "Whether honefty be the beft road to fucces, where the violation of it bids fair for perpetual concealment? ment. Fortune has led me to the military profession, I lack advancement, but promotions in the army are cuftomarily made by purchase. Thus circumstanced, I find by accident a sum of money, in fecreting which I am in little danger of detection, and I apply this fum to purchase me a commission. Should I have more effectually promoted my worldly fuccess by a more scrupulous conduct ?"

convenient vice bids fair for conceal-

The answer to this question ought probably to be affirmative. Chance of de-In

tection.

BOOK IV.

376

In the first place we are to confider the chance of detection. The direct tendency of the laws of the material universe is fuch, as to force the more confiderable and interefting actions of human beings into publicity. No man can render himfelf invisible. The most artful conspirator eannot fufficiently provide against a thousand petty circumstances, that will lead, if not to conviction, at leaft to prefumption against him. Who is there that would wifh to have fastened upon him the fuspicion of a base and difingenuous procedure? This feature in human affairs is fo remarkable, as to have furnished topics to the literary industry of former centuries, and to have been interpreted God's revenge against the Suppose that in this cafe I found the money dropped in unjuft. a field. Will the owner have no fufpicion where he loft it? Will no human being have observed that I was near the spot at the queftionable period? The chances are certainly against me, and a mere balance of chance would probably have been fufficient to prove that honefty is the best policy. The bare circumstance of my fuddenly possessing a fum of money without vifible means of acquiring it, a circumstance to which the attention of my neighbours is always fufficiently alive, would caft an unpleafant stain upon my character. How often has the well contrived train of the politician, triumphing in the inferutability of his wifdom, been baffled by the most trivial accidents? Since therefore, " the race is not to the fwift, nor the battle to the ftrong," the trueft wifdom is to act fo as to fear no detection.

There

There are other circumstances which tend to establish the BOOK IV. fame proposition. The man, who depends upon his courage, his ability, or his amiable character for recommendation, will perpetually cultivate these. His constancy will be unwearied; and, confcious of the integrity of his means, his fpirit will be intrepid and erect. The progress of this man, if his ardour be fufficiently great to infpire him with ability, and to render him quick fighted to the detection of his mistakes, will be inceffant. But the man who has employed foul means, will depend partly upon them, and cannot be fo fervent in the cultivation of the If he always escape detection, he will always fear it, and apprehentrue. this will fully the clearness of his spirit. Vice cannot compare with virtue in its tendency to individual happines. This is not the fubject we are confidering in this place; but this will apply to our fubject. Remorfe, uneafinels and confusion of mind are calculated to prevent me from perceiving the true point of projection in my affairs, and detract much from the probability of my rifing to eminence in any profession.

Laftly, the man who has once yielded to a diffioneft tempta- and depravity tion, will yield to it again. He has loft the confiftency of cha- of vice. racter and difdain of vice, which were his firmest fecurities. He that fays, "I will be difhoneft now, and difhoneft no more," forgets fome of the most obvious and characteristic features of the human mind. If he escape sufpicion in the first instance, he will
